

Havasupai Elementary School's Modular Classroom Arrives Via Helicopter

Students will have a new modular classroom with reliable bathrooms.

A helicopter was used to transport materials from Long Mesa on the rim of the Grand Canyon (left three photos) to build a

[modular classroom](#) at Havasupai Elementary School at the bottom of the canyon in February. The existing school has been troubled by malfunctioning bathrooms. Bathrooms are included in the new building.

The location of the modular classroom building is seen in the lower left corner of this photo.

The modular classroom is assembled at Havasupai Elementary School.
