WEBINAR TRAINING EVENT

How to Complete the BIA, Indian Child Welfare Quarterly and Annual Report

OMB Clearance No. 1076-0131 Expires: 01/31/2018

Tribal Indian Child Welfare Act (ICWA) programs are intended to protect the best interests of Indian children and to promote the stability and security of Indian tribes and Indian families. This is done by preventing the removal of Indian children and preventing the breakup of Indian families. No other activity within the BIA budget is solely dedicated to protecting Indian families like ICWA. Data on the activities performed by Tribes in relation to ICWA and Child Protection is critical.

The BIA, Division of Human Services will offer three webinar training sessions on the Indian Child Welfare Quarterly and Annual Report. The Training will focus on how to compile and complete Part A and Part B of the new reporting form. Reporting on the form will begin in Fiscal Year 2016. Specifically, the new ICW report combines the ICWA Data Report *and* the Child Abuse and Neglect (CAN) Report into one reporting form. The target audience for the training is tribal leaders, tribal ICWA program staff, and tribal or BIA child protection workers or program managers. Each individual webinar training session will be 1.0 hour and each session will cover the same material. To register for one of the training sessions please click on the link below:
