To: osageeregneg@bia.gov

The proposed regulation changes are a bureaucratic nightmare. They are punitive from all points and would make Osage County one of the worst places to be an oil producer. It would be counter productive for the tribe and could run off many smaller producers that have been stalwarts over the years. Sincerely, frederick drummond

Royalty based on NYMEX particularly
onerous. Osage seller do not get that price,
hence paying royalty on oil they can't sell.
It would be a rip off by the BIA FID
