

## Training Exercise: Thinking through...*GIS for Tribal Resilience*

1. What is **something you've come to value** in your GIS work, department or community that may be **"at-risk"** due to developmental pressures, lack of resources, neglect, environmental or technical shifts?
2. In the **circles**, enter **names of at least three** organizations, departments or individuals that might be able to work *with* you toward a forward-looking improvement to preserve the asset mentioned above. Along the **lines**, **list a collective action** you might take together.

3. Might data collection with GIS mapping and / or analysis assist others to better understand the risks and quantify / qualify what is at stake and / or point to next steps in planning or possible solutions?

**DATA COLLECTION NEEDS:**

**GIS MAPPING NEEDS:**

**GEOSPATIAL ANALYSIS NEEDS:**

**OTHER TECHNICAL SUPPORT:**

4. What could really make a difference in terms of forward-looking actions taken now to minimize risks or losses to item 1 above and / or other Tribal values, culture, and assets you manage or care about?

**Training Exercise: Thinking through...*GIS for Tribal Resilience***

How might Bureau of Indian Affairs, **Tribal Resilience Program** staff, as well as, **Branch of Geospatial Support** personnel and trainers better assist you through data collection, mapping, analysis and / or training support enhancements or by working with other federal partners to assist you?

How are you going to **leverage your efforts** and / or incorporate more integrated, future-focused ***GIS for Resilience*** into your work and life?

**This week I will** \_\_\_\_\_

---

**Next month I will** \_\_\_\_\_

---

**Within three months I will** \_\_\_\_\_

---

**By the end of 2017, I hope to accomplish the following:** \_\_\_\_\_
