Executive Summary

Indian Affairs FY 2019 Budget Request Executive Summary

My Administration is committed to tribal sovereignty and self-determination. A great Nation keeps its word, and this Administration will continue to uphold and defend its responsibilities to American Indians and Alaska Natives. The United States is stronger when Indian Country is healthy and prosperous.

*President Donald J. Trump
October 31, 2017*

Within this budget request, the term “Indian Affairs” is meant to include the Bureau of Indian Affairs (BIA), the Bureau of Indian Education (BIE), and the Office of the Assistant Secretary-Indian Affairs (AS-IA). The primary mission of Indian Affairs is to honor the Nation’s trust, treaty, and other responsibilities to American Indians and Alaska Natives and improve the quality of life in Indian Country. These objectives are achieved by recognizing the wide diversity of Indian Tribes and Alaska Native villages as distinct cultural and governmental entities, strengthening government-to-government relationships, and advancing self-governance and self-determination.

Indian Affairs programs serve 573 federally recognized Indian Tribes, a service population of approximately two million American Indians and Alaska Natives in tribal and native communities. The Bureau of Indian Affairs provides direct services and funding for compacts and contracts for Tribes to provide Federal programs for a wide range of activities necessary for community development. Programs address tribal government, natural resource management, trust services, law enforcement, economic development, and social service needs. The Bureau of Indian Education manages a school system with 169 elementary and secondary schools and 14 dormitories providing educational services to 47,000 individual students, with an Average Daily Membership of 41,000 students in 23 States. The BIE also operates two post-secondary schools and administers grants for 29 tribally controlled colleges and universities and two tribal technical colleges.

FY 2019 Budget Proposal

Budget Overview – The 2019 President’s budget for Indian Affairs is \$2.4 billion in current appropriations. The budget prioritizes programs serving the broadest American Indian and Alaska Native service population and proposes reductions in initiatives that are more narrowly focused. Staffing is estimated at 6,873 full time equivalents in 2019.

The 2019 budget supports the Administration’s commitment to help promote tribal nation-building and self-determination, empower tribal communities, foster tribal self-sufficiency, create educational and economic opportunities, ensure safe Indian communities, preserve and foster cultural heritage, and steward natural resources. Indian Affairs programs deliver community services, restore tribal homelands,

fulfill commitments related to water and other resource rights, execute fiduciary trust responsibilities, support the stewardship of energy and other natural resources, create economic opportunity, and expand access to education.

The 2019 Indian Affairs budget proposal continues efforts to advance self-governance and self-determination through a wide range of activities. The Bureau of Indian Affairs maintains programs for tribal government, social services, law enforcement, infrastructure, and stewardship of land, water, and other natural resources in Indian Country. The BIE funding supports classroom instruction, student transportation, native language instruction, cultural enrichment, gifted and talented programs, and school maintenance. In some schools, funding also supports residential costs, mostly in remotely located sites. The BIE also operates two post-secondary schools and administers grants for 29 tribally controlled colleges and universities and two tribal technical colleges.

Public Lands Infrastructure Fund – As part of operating a school system, BIE is responsible for oversight and the maintenance of facilities that are part of the system. The estimated deferred maintenance backlog for BIE schools is \$634 million, which does not include the cost of replacement for the schools in the worst condition. The Administration proposes legislation in 2019, the Public Lands Infrastructure Fund, to provide up to \$18.0 billion to address needed repairs and improvements in the BIE schools, as well as the national parks and national wildlife refuges.

Total 2019 Budget Request

(Dollars in Thousands)

Budget Authority	2017 Enacted	2018 CR	2019 Request
Current Appropriations	2,859,765	2,842,210	2,398,260
Permanent Appropriations	122,779	131,584	122,518
Total Budget Authority	2,982,544	2,973,794	2,520,778
<i>FTEs</i>	<i>7,214</i>	<i>7,203</i>	<i>6,873</i>

Operation of Indian Programs – The 2019 budget for the Operation of Indian Programs account is \$2.0 billion. In 2019, priority is given to programs serving Indian communities nationwide rather than initiatives executed through pilot programs or programs that serve fewer Tribes. In general, the 2019 budget gives priority to base program funding.

The BIA budget reflects Department-wide efforts to identify administrative savings across Interior. The budget assumes \$8.3 million in administrative savings attained by consolidating and sharing administrative services such as procurement, information technology, human resources, and by shifting acquisition spending to less costly contracts.

The budget also includes \$900,000 to support the Department’s migration to common regional boundaries to improve service and efficiency. Organizing bureaus along common geographic lines will allow for more integrated and better coordinated decision making across the Department. The Department will hold a robust consultation process with tribal nations before actions are made with respect to Indian Affairs regions.

Promote Tribal Self-Determination – The Department supports tribal sovereignty. The BIA Tribal Government activity supports assistance to Tribes and Alaska Native entities to strengthen and sustain tribal government systems and support tribal self-governance through the Public Law 93-638 contracting and compacting process. The 2019 budget provides \$291.5 million for programs that support Tribal Government activities.

Within this amount, the budget includes \$157.8 million for compacts for self-governance Tribes. These funds enable Tribes to plan, conduct, consolidate, and administer programs, services, functions, and activities for tribal citizens according to priorities established by their own tribal governments. The budget includes \$72.6 million to support Consolidated Tribal Government programs which also promote Indian self-determination, giving approximately 275 Tribes the flexibility to combine and manage contracted programs and grants which are similar or compatible, and also simplifies contracting.

The budget includes \$960,000 to provide initial Federal support for six Virginia Tribes federally-recognized by an act of Congress in January 2018. The new Tribes are the Chickahominy, the Eastern Chickahominy, the Upper Mattaponi, the Rappahannock, the Monacan, and the Nansemond. The request provides \$160,000 to each Tribe to establish and carry out the day-to-day responsibilities of a tribal government. The 2019 budget is the first opportunity to include funding for the new Tribes in the budget process. In 2018, funds from within available sources will be provided to these Tribes upon recognition, pro-rated from the day of recognition.

The BIA maintains nearly 29,000 miles of paved, gravel and earth surface roads; and more than 900 bridges. The 2019 budget includes \$28.3 million for Road Maintenance to support pavement and gravel maintenance, remedial work on improved earth roads, bridge maintenance, and snow and ice control.

Protect Indian Country – The BIA’s Office of Justice Services funds law enforcement, corrections and court services to support safe tribal communities. These programs safeguard life and property, enforce laws, maintain justice and order, and ensure detained American Indian offenders are held in safe, secure, and humane environments. The OJS also provides technical assistance to Tribes to amend tribal legal codes consistent with the Tribal Law and Order Act of 2010 and the Violence Against Women Act, as reauthorized. In addition, BIA is implementing training for direct service law enforcement program staff in the areas of law enforcement, social services, victim services, and courts and is making this training available to Tribes operating these programs under self-determination contracts and compacts.

The 2019 budget includes \$350.1 million for Public Safety and Justice activities, of which \$326.7 million directly supports 190 law enforcement programs and 96 corrections programs run both by Tribes and as direct services. The 2019 budget prioritizes funding for the primary law enforcement and corrections programs, and identifies savings to minimize impacts on these critical programs. For example, savings in the 2019 request include \$3.0 million for the pilot program to reduce recidivism which ended in 2017.

The 2019 Law Enforcement special initiatives budget includes \$2.5 million to address the opioid crisis which has been particularly devastating in Indian Country. This initiative will expand BIA capacity to address the increase in drug-related activities through interdiction programs to reduce drug use, distribution, and drug related crime. The initiative will support OJS participation in intra- and inter-

agency initiatives targeting opioid and substance abuse prevention efforts. This funding will enable BIA to better align, leverage, and coordinate with other Federal efforts and resources to assist Native American communities to reduce the supply of drugs, provide opioid addiction prevention assistance, and otherwise combat the opioid crisis which the Administration has identified as a priority. The budget includes \$7.2 million for Tribal Justice Support programs and \$22.1 million for Tribal Courts.

Support Indian Communities – Sustaining families is critical to fostering thriving Indian communities. The BIA Office of Indian Services supports a community-based approach to child welfare, family stability, and strengthening tribal communities as a whole. The Human Services activity includes \$115.4 million for programs providing social services, welfare assistance, and Indian Child Welfare Act protections. The budget includes \$65.8 million for Welfare Assistance and \$46.6 million for Social Services and Indian Child Welfare Act programs. The budget proposes to redirect savings from Tiwahe pilot programs and the Housing Improvement Program to other priorities.

Manage Trust Resources and Lands – The BIA Trust-Natural Resources Management activity supports the stewardship of trust lands in Indian Country. Natural resource programs assist Tribes in the management, development, and protection of Indian trust land and natural resources on 56 million surface acres and 59 million acres of subsurface mineral estates. These programs enable tribal trust landowners to optimize use and conservation of resources, providing benefits such as revenue, jobs, and the protection of cultural, spiritual, and traditional resources.

The 2019 budget proposes \$153.4 million for natural resource management programs which includes agriculture, forestry, water resources, and fish, wildlife and parks activities. The budget prioritizes base program funding for resource management in Indian Country and identifies savings in programs that provide one-time or short-term project funding for studies and technical assistance such as Tribal Climate Resilience awards, or are allotted to a limited, specific number of Tribes on a continuing basis.

The BIA helps to support the management of Indian forest lands by 300 Tribes across 18.7 million acres. The budget includes \$48.9 million for BIA Forestry programs to support development, maintenance, and enhancement of forest resources in accordance with sustained yield principles included in forest management plans. The budget includes \$28.0 million for BIA's Agriculture and Range program to continue support for multiple use and sustained yield management on over 46 million acres of Indian trust land dedicated to crop and livestock agriculture. The budget also includes \$11.4 million for Fish, Wildlife and Parks and \$8.6 million for Water Resources management activities.

Keep Fiduciary Trust Responsibilities – The Trust-Real Estate Services activity manages Indian trust-related information to optimize the efficacy of Indian trust assets. The 2019 budget proposes \$105.5 million for real estate services programs. The budget supports the processing of Indian trust-related documents such as land title and records and geospatial data to support land and water resources use, energy development, and protection and restoration of ecosystems and important lands. The budget includes \$11.0 million for probate services to determine ownership of Indian trust assets essential to economic development and accurate payments to beneficiaries.

Support Economic Opportunities – The 2019 budget funds the Community and Economic Development activity at \$35.8 million and features investments in Indian energy activities. The 2019 budget supports the Administration’s priority for domestic energy dominance and economic development, including development on tribal lands. Income from energy and minerals production is the largest source of revenue generated from natural resources on trust lands, with royalty income of \$676.0 million in 2017 payable to tribal governments and individual mineral rights owners. The 2019 budget continues the commitment to the Indian Energy Service Center which coordinates Indian energy development activities across Interior’s bureaus. The Center works to improve communication and coordination to enhance BIA’s ability to process leases, Bureau of Land Management’s responsibility for Applications for Permit to Drill approval and monitoring, and ONRR’s responsibilities for royalty accounting. Working with the Department of Energy’s Office of Indian Energy Policy and Programs, the Center provides a full suite of energy development related services to Tribes nationwide.

Foster Tribal Student Success – The BIE serves as a capacity builder and service provider to support Tribes in delivering culturally appropriate education with high academic standards to allow students across Indian Country to achieve success. The 2019 budget includes a total of \$741.9 million for Bureau of Indian Education programs. The 2019 budget prioritizes funding for core mission programs at BIE-funded elementary and secondary school operations and Post-Secondary tribal colleges and universities. Funding includes \$625.9 million for Elementary and Secondary programs, \$92.7 million for Post-Secondary programs, and \$23.3 million for Education Management. Activities which do not directly support BIE school programs or facilities are a lower priority.

The budget focuses on direct school operations including classroom instruction, student transportation, native language development programs, cultural awareness and enrichment, and school maintenance. In some remotely located schools, funding also supports residential costs. The budget continues to invest in activities that promote educational self-determination for tribal communities and includes \$74.0 million for Tribal Grant Support Costs for Tribes which choose to operate BIE-funded schools. This level will support 100 percent of the estimated requirement. Savings proposed for BIE core mission programs are identified from restricted supplemental programs and administrative savings, to preserve funding for classroom instruction and other core services.

Tribal Priority Allocations – The 2019 budget proposes Tribal Priority Allocation funding of \$578.7 million.

Contract Support Costs – The President’s budget maintains the Administration’s support for the principles of tribal self-determination and strengthening tribal communities across Indian Country. Contract Support Costs enable Tribes to assume responsibility for operating Federal programs by covering the costs to administer the programs. The 2019 budget for the Contract Support Costs account is \$231.0 million. The request fully supports estimated needs assuming BIA program funding at the 2019 request. The 2019 budget continues to request funding for Contract Support Costs in a separate indefinite current account to ensure full funding for this priority.

Construction – The Indian Affairs 2019 budget proposes \$133.3 million for Construction activities, with increases in deferred maintenance projects for resource management infrastructure and regional and

agency offices serving tribal programs and operations in Indian Country. The budget also proposes a one-time cancellation of \$21.4 million in unobligated balances from prior year appropriations within Public Safety and Justice Construction and Resources Management Construction, for a request of \$111.9 million.

The 2019 budget prioritizes rehabilitation of dams, irrigation projects, and irrigation systems which deliver water to aid tribal economic development as well as protect lives, resources, and property. The budget proposes program \$26.4 million for Safety of Dams projects and \$3.3 million for irrigation projects rehabilitation. The Safety of Dams program is currently responsible for 138 high or significant-hazard dams located on 43 Indian reservations. The irrigation rehabilitation program addresses critical deferred maintenance and construction work on BIA-owned and operated irrigation facilities, including 17 irrigation projects, with a focus on health and safety concerns. Many facilities are nearing 100 years of age and are in need of major capital improvements.

The request includes \$4.0 million for construction related to regional and agency offices serving tribal programs and operations in Indian Country. The program will support upgrade and repair of telecommunication infrastructure and facilities housing BIA and tribal employees providing services to Indian Communities.

In addition to support through the Public Lands Infrastructure Fund, the budget proposes \$72.9 million in annual funding for Education Construction. Funding focuses on facility improvement and repair at existing schools. Available funding from prior years will continue work to complete school construction on the 2004 school replacement list and start design and construction for schools on the 2016 school replacement list.

Land and Water Claims Settlements – The 2019 budget prioritizes funding to meet Indian Settlement commitments, and proposes \$45.6 million. The 2019 budget enables the Department to meet Federal responsibilities outlined in enacted settlements with Indian Tribes. Settlements resolve tribal land and water rights claims and ensure Tribes have access to land and water to meet domestic, economic, and cultural needs. Many of the infrastructure projects supported in these agreements improve the health and well-being of tribal members and preserve existing economies and, over the long-term, bring the potential for jobs and economic development.

The 2019 budget provides sufficient funding to complete payments for the Navajo Trust Fund and the Navajo-Gallup Water Supply Project, both of which have enforceability dates in 2019. The distribution of settlement funding between settlements for 2019 for these and other enacted settlements will depend on the outcome of Congressional action on the 2018 appropriations. A proposed allocation of the 2019 request by settlement will be forwarded separately at that time.

Indian Guaranteed Loan Program – The 2019 budget request for this program is \$6.7 million which will guarantee or insure \$108.6 million in loan principal to support Indian economic development.

Fixed Costs – Fixed costs of \$9.7 million are fully funded.

Secretarial Initiatives

Public Lands Infrastructure Initiative

Interior manages an infrastructure asset portfolio with a replacement value exceeding \$300 billion, ranging from elementary and secondary schools serving Indian children across the Nation, to highways and bridges serving the daily commuting needs of the Washington, D.C., metropolitan area. Most well-known are Interior's iconic and unique national treasures that have priceless historical significance. Many of these assets are deteriorating, with older assets becoming more expensive to repair and maintain in good condition.

The FY 2019 budget launches Interior's new Public Lands Infrastructure Fund to help pay for repairs and improvement in national parks, national wildlife refuges, and BIE schools. The Department is taking action to increase revenue from energy leasing and development over 2018 budget projections and plans to keep for Department infrastructure needs 50 percent of additional revenue that is not otherwise allocated for other purposes. This initiative has the potential to generate up to \$18 billion for national parks, national wildlife refuges, and BIE schools. This investment would significantly improve the Nation's most visible and visited public facilities that support a multi-billion dollar outdoor recreation economy. By investing in schools, we are fulfilling commitments to provide a safe learning environment for Indian children. The other 50 percent of increased revenues would go to the Treasury supporting deficit reduction.

Modernizing Our Organization and Infrastructure for the Next 100 Years

The Department of the Interior is taking bold steps to better position itself for the next 100 years. In response to President Trump's Executive Order on a *Comprehensive Plan for Reorganizing the Executive Branch*, Secretary Zinke laid out a vision for a reorganized Department of the Interior which aligns regional boundaries within Interior to provide better coordination across the Department to improve mission delivery and focuses resources in the field. Across the Department, the 2019 budget includes a total of \$17.5 million to start this effort.

The Department of the Interior intends to establish common regional boundaries for Interior's bureaus in FY 2018, and to further develop this approach in FY 2019. The goal is to improve overall operations, internal communication, customer service, and stakeholder engagement. Aligning geographic areas across Interior will enhance coordination of resource decisions and policies and will simplify how citizens engage with the Department.

Organizing bureaus along common geographic areas will allow for more integrated and better coordinated decision making across our bureaus. Currently, Interior's bureaus have more than 40 distinct regions, each with their own geographic boundaries. This complicates coordination and hampers Interior's ability to get things done expeditiously. Having common regions will help streamline operations and in doing so, provide better service to the American people. Bureaus within a region will focus on common issues, taking a comprehensive approach versus a bureau-centric approach. This culture shift will help us work better together to accomplish one vision.

The new regional boundaries currently under discussion, and subject to modification, are expected to have minimal budgetary impact. The BIA has initiated discussions with Indian Country and will continue with formal tribal consultations regarding any proposed adjustments to the regional field organizations serving the Bureau of Indian Affairs and Bureau of Indian Education. The 2019 BIA budget includes \$900,000 to support the Department's migration to common regional boundaries to improve service and efficiency.

Administrative Savings

The Department annually spends nearly \$3 billion to procure goods and services, over \$1 billion on information technology and over \$300 million to administer acquisition and human resources services. Interior will work to achieve cost savings of \$50 million through more aggressive use of shared services and use of multi-agency procurement vehicles, such as shared contracting with other bureaus and Federal agencies. These savings will take effort to achieve, however, identifying administrative efficiencies provides the best opportunity to meet broader fiscal objectives and maintain programmatic funding. While all bureaus and offices will contribute to overall savings, Indian Affairs will achieve at least \$8.3 million in administrative savings.

General Statement

INDIAN AFFAIRS GENERAL STATEMENT

“One of my top priorities for the Department of the Interior is to make tribal sovereignty meaningful, and that includes providing the basis for tribes to build and strengthen their economies.”

*Secretary Ryan K. Zinke – January 19, 2018
Oklahoma City, OK*

Introduction: The Federal Government as a whole carries out trust, treaty and other obligations to tribes. Over 20 Federal departments and agencies collectively provide a full range of Federal programs to American Indians and Alaska Natives similar to those provided to the general public, but with a recognition of the special relationship between Indian Tribes and the Federal Government, which is expressed in terms of legal duties and moral obligations. At the same time, the United States acknowledges the wide diversity of Indian Tribes and Alaska Native villages as distinct cultural and governmental entities.

Indian Affairs: Within this budget request, the term “Indian Affairs” is meant to include the Bureau of Indian Affairs (BIA), the Bureau of Indian Education (BIE), and the Office of the Assistant Secretary-Indian Affairs (AS-IA). The extensive scope of Indian Affairs programs covers virtually the entire range of Federal, state, and local government services authorized by numerous treaties, court decisions, and legislation. Indian Affairs plays a critical role in removing obstacles to building and promoting tribal self-determination, strong and stable governing institutions, economic development, and human capital development.

Programs funded by BIA can be administered by tribes or provided by BIA as direct services. These programs carry out the responsibility to protect and improve the trust assets of American Indians, Indian Tribes, and Alaska Natives and include social services, natural resources management, economic development, law enforcement and detention services, administration of tribal courts, implementation of land and water claim settlements, replacement and repair of schools, repair and maintenance of roads and bridges, and repair of structural deficiencies on high hazard dams.

The BIE funds and administers either through grants to Tribes or as direct services provided by BIE an education system consisting of 169 Elementary/Secondary schools and 14 dormitories located in 23 states for approximately 47,000 individual students (with a calculated three year Average Daily Membership of about 41,000 students). BIE also owns and operates two post-secondary institutions and provides operating grants to 29 tribal colleges and universities and two tribal technical colleges.

Federal Indian Policy: Over the last 100 years, Congress has passed successive Federal laws pertaining to American Indians and Alaska Natives that reflect the emergent Federal Indian Policy of strengthening government-to-government relationships with Indian Nations, delivering services to American Indians and Alaska Natives, and advancing self-governance and self-determination.

The Snyder Act of 1921 authorizes the Bureau of Indian Affairs to operate programs for the benefit and assistance of Indians throughout the United States. The Indian Reorganization Act of 1934 created a foundation for tribal self- government. The Indian Self-Determination and Education Assistance Act of 1975 solidified self-determination as the foundation of Federal Indian Policy. The Indian Education Amendments of 1978, the No Child Left Behind Act of 2001, which includes the Native American Education Improvement Act of 2001, the Tribal Law and Order Act of 2010, and the Violence Against Women Act are just a few of the laws that continue to define the Federal authority and obligation to provide various programs and services to Indian country while at the same time affirming and strengthening recognition of tribal sovereignty, self-determination, and nation-building. The Federal Government has sought to further advance these efforts through greater consultation and collaboration with tribes, continued reform and modernization of programs, and more effective coordination across the Federal Government in providing services and funding to meet tribal needs and Federal responsibility.

The People We Serve: Indian Affairs provides services directly or through contracts, grants, or compacts to a service population of approximately 2 million American Indians and Alaska Native people who are members of 573 federally recognized tribes in the 48 contiguous United States and Alaska. Indian Affairs programs support Tribes and improve the quality of life of their members and communities.

Initial Federal services were established in the Trade and Intercourse Acts passed between 1790 and 1834. The objective of the laws were to protect Indians against incursions by non-Indians, since exploitation of Indians was one of the major causes of conflict on the frontier. The Acts subjected all interaction between American Indians and non-Indians to Federal control. These laws engendered the trust relationship between trustee and beneficiaries that the U.S. continues with federally-recognized tribes to this day.

The U.S. War Department was established in 1784 with its primary mission to negotiate treaties with Indians. Over the next 50 years, laws regulating trade between Indians and non-Indians were enacted and a network of Indian agents and subagents was established. This network is the foundation for the current day Bureau of Indian Affairs. Some treaties included U.S. commitments to provide education to tribal children. These schools form the basis of the current day Bureau of Indian Education.

The U.S. enacted other laws, such as the Indian Removal Act of 1830, which institutionalized forced relocation of Indians from traditional homelands. In 1849, with the creation of the Department of the Interior, the BIA passed from military to civilian control. The BIA mission initially focused on promoting tribal settlement on defined reservations and cultural assimilation. The General Allotment Act of 1887, sought to further break up tribal land holdings and to assimilate Indian people through individual ownership of land.

The Congress passed the Indian Reorganization Act of 1934, to halt the allotment policy. However, from 1953 to 1964, the Congress passed several bills terminating the special Federal relationship between several Indian Tribes and the United States to de-emphasize its custodial functions. In the mid-1960s the Federal Government abandoned termination, to focus greater efforts on the development of both human and natural resources on Indian reservations. In 1970, President Nixon called for self-determination of Indian people without the threat of termination of the trust relationship over Indian lands. Since that date,

self-determination has been the basis of Federal Indian Policy. Today's Indian Affairs, recognizing tribal sovereignty and self-determination, administers programs that help tribes maintain robust tribal governments that foster thriving communities and successful tribal members.

The resilience of Native American communities is a testament to the deep importance of culture and vibrant traditions, passed down throughout generations. Tribal contributions are woven deeply into our Nation's rich tapestry and have influenced every stage of America's development. Native Americans helped early European settlers survive and thrive in a new land and contributed democratic ideas evoked in the U.S. Constitution. Native Americans have contributed to the world's common fund of knowledge in the areas of agriculture, science and technology, medicine, transportation, architecture, psychology, military strategy, government, and language. Native Americans have contributed and been leaders in all aspects of American enterprise, including serving with distinction in every branch of the United States Armed Forces.

Today, however, many Indian communities that the Indian Affairs programs support face great challenges. On Indian reservations, poverty is still commonplace; violence is experienced at higher rates than the national average; and rates of infant mortality, alcoholism, and substance abuse are higher than in the rest of America. The key to overcoming these challenges and protecting tribal culture is strong and stable tribal governments which protect and enhance the health, safety, and welfare of tribal citizens within tribal territory according to self-determined governance structures and objectives.

Organization and Leadership: Currently, the line authority for Indian Affairs programs begins at the Assistant Secretary level. Within the parameters established by the Congress and the Executive Branch, the primary responsibilities of the Assistant Secretary are to advise the Secretary of the Interior on Indian Affairs policy issues, communicate policy to and oversee the programs of the BIA and the BIE, provide leadership in consultations with tribes, and serve as the DOI official for intra- and inter- departmental coordination and liaison within the Executive Branch on Indian matters.

The Assistant Secretary – Indian Affairs is supported by the Principal Deputy Assistant Secretary, as well as, the following organizational units:

The Director of the Bureau of Indian Affairs has line authority over all Regional and Agency offices. The Director provides program direction and support to Indian Services, Trust Services, Justice Services, and Field Operations.

The Director of the Bureau of Indian Education has line authority over the education resource centers stationed throughout the country and two post-secondary schools. The BIE supports the operation of day schools, boarding schools, and dormitories, including housing some Indian children who attend public schools.

Two *Deputy Assistant Secretaries*, as well as the Principal Deputy, provide leadership through;

- a. *Management* - the Office of the Chief Financial Officer; Office of Facilities, Property and Safety Management; Office of Budget and Performance Management; Office of Human

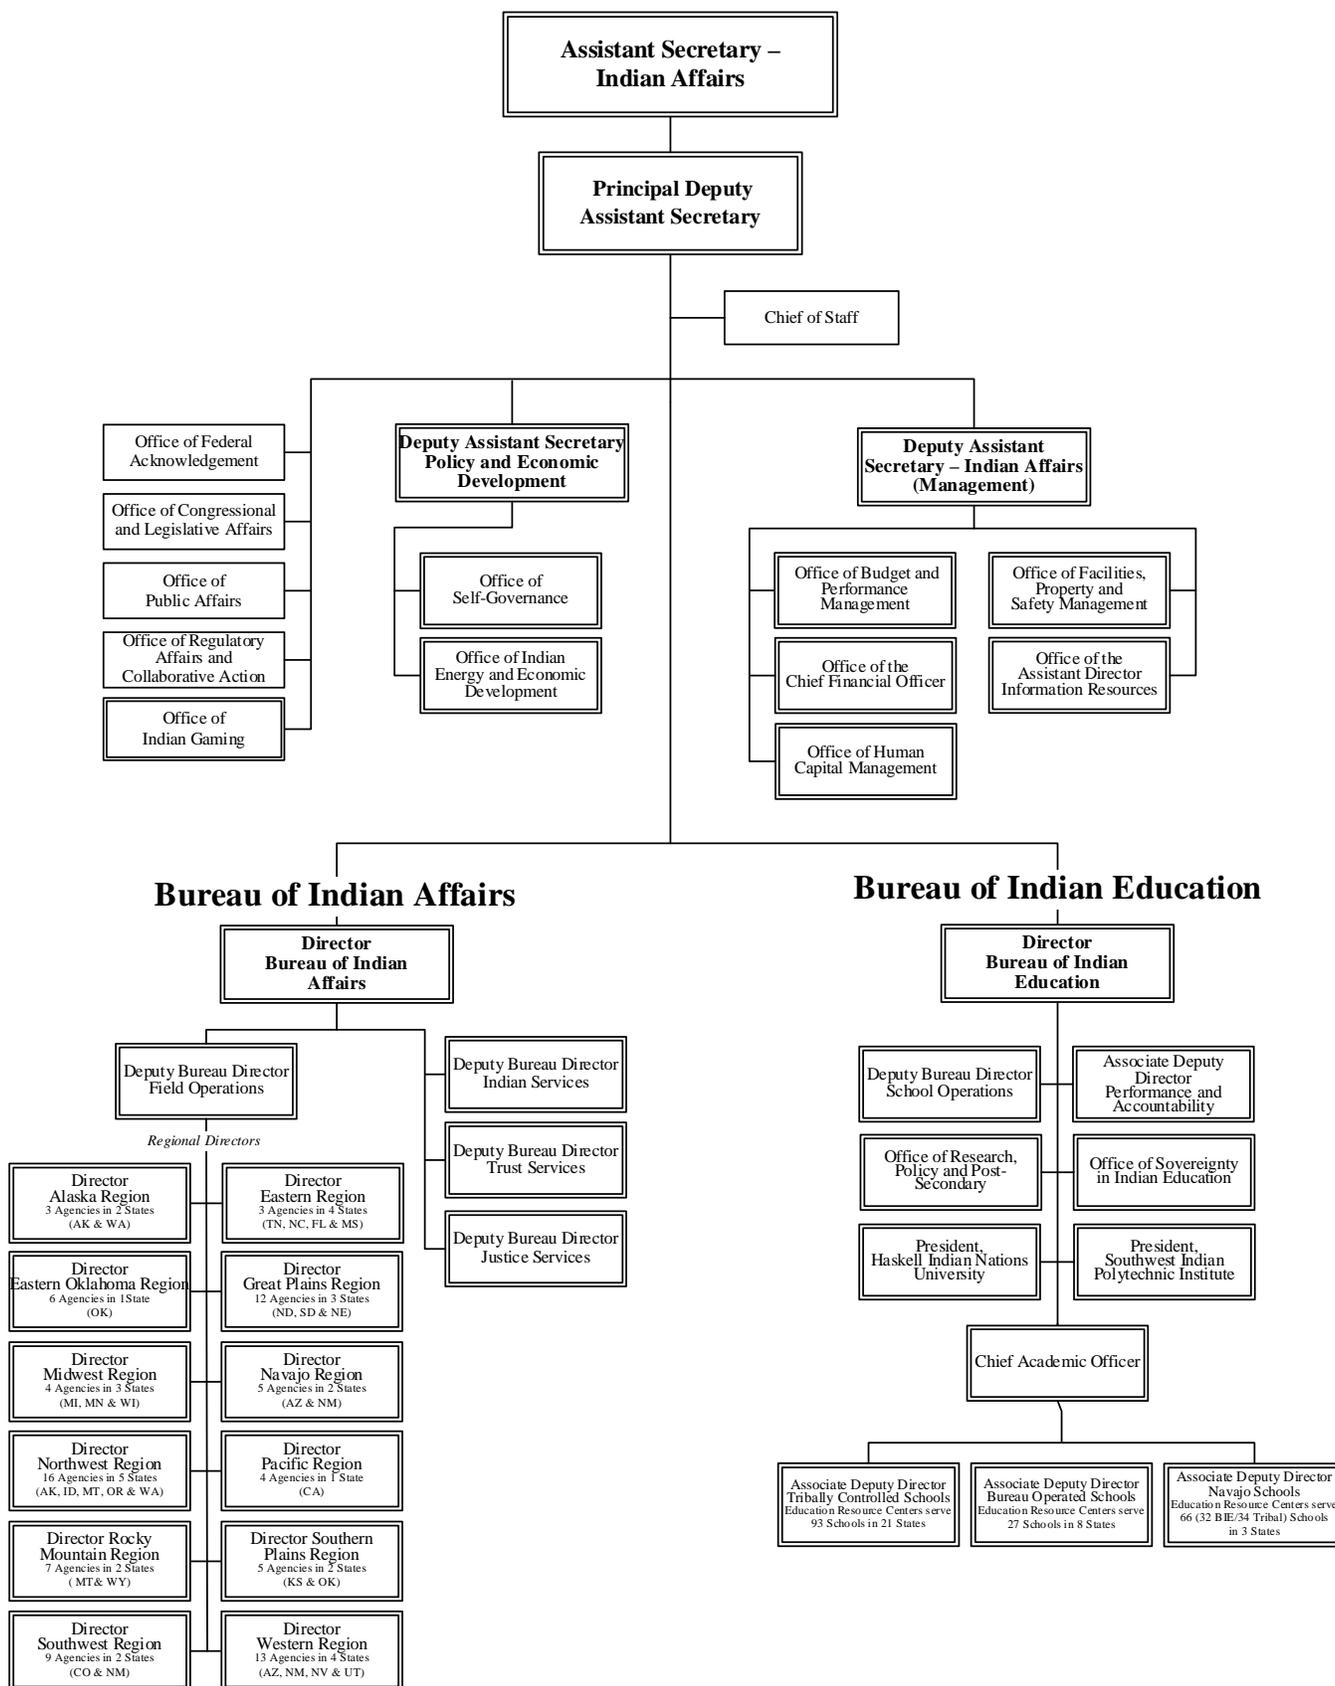

Capital; and Office of the Assistant Director Information Resources provide senior leadership, policy, and oversight of budget, acquisition, property, accounting, fiscal services, information technology, planning, facilities operations, and human resources down to the regional office level; and

- b. *Policy and Economic Development* - the Office of Indian Energy and Economic Development, and the Office of Self-Governance, oversee and administer programs pertaining to economic development, and self-governance activities of Indian Affairs, respectively.

Indian Affairs functions are closely coordinated with the Office of the Special Trustee for American Indians (OST). The functions performed by OST support Indian Affairs efforts to ensure continued trust management improvements, sound management of natural resources, accurate and timely real estate transactions, and leasing decisions that preserve and enhance the value of trust lands. Indian Affairs strives to meet its fiduciary trust responsibilities, be more accountable at every level, and operate with people trained in the principles of fiduciary trust management.

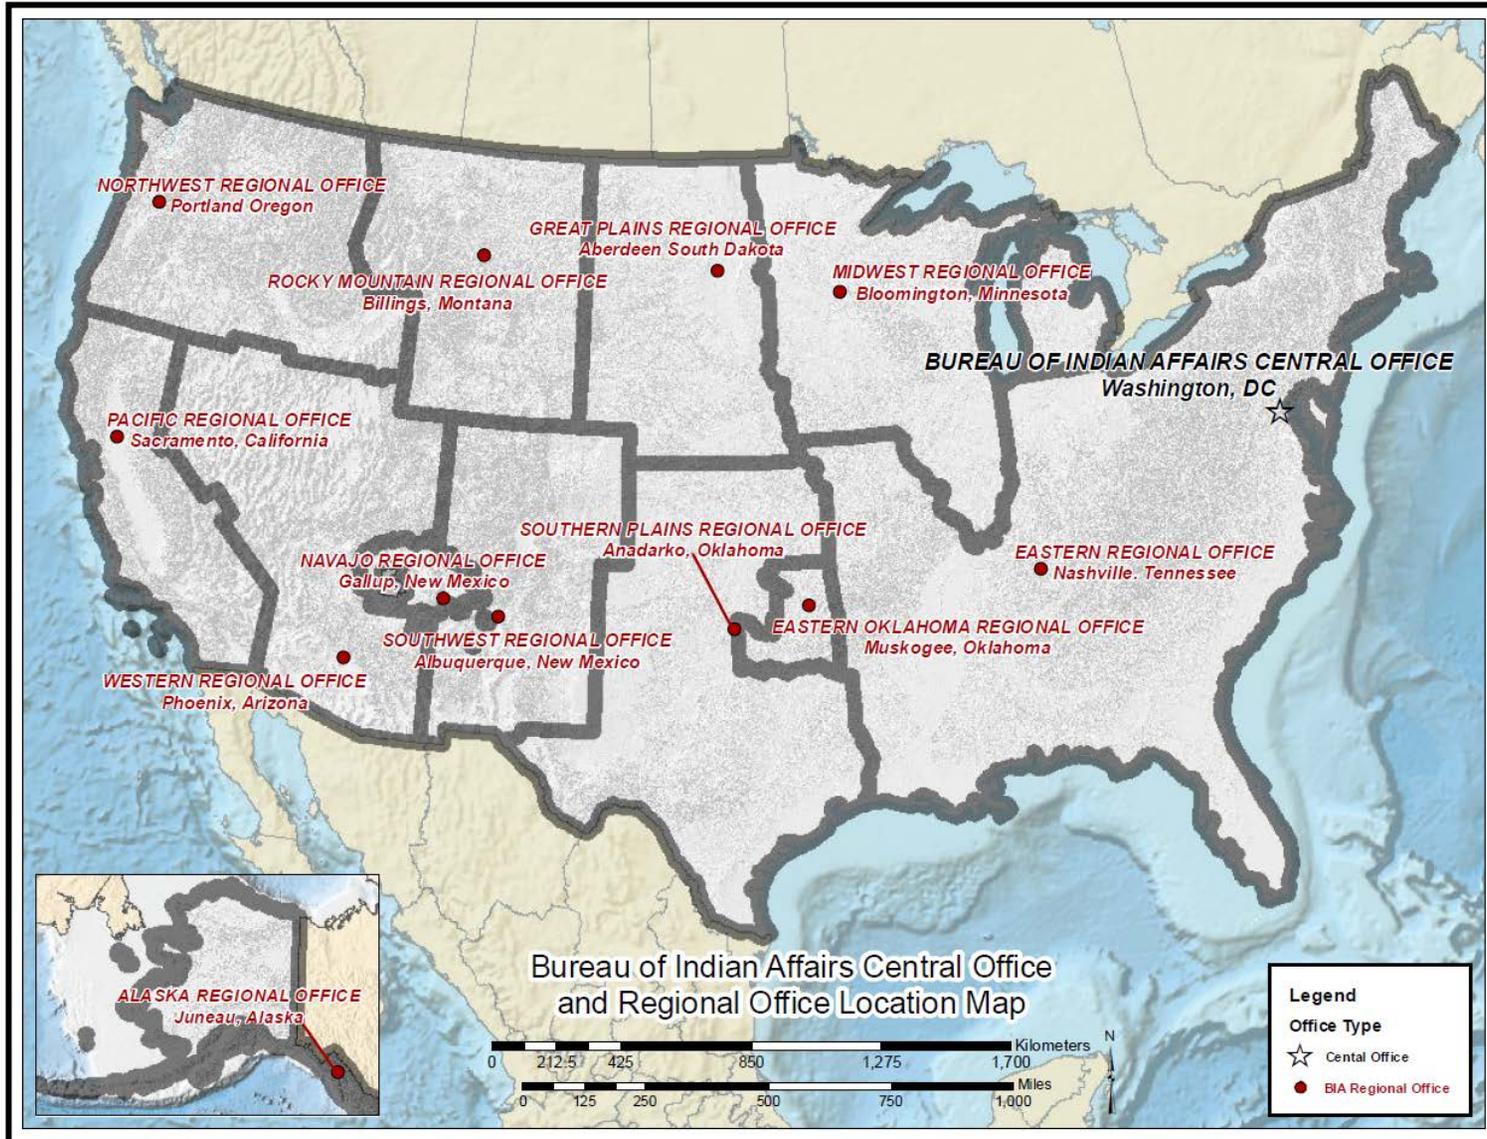

The current organizational charts for the Indian Affairs are illustrated on the following pages.

Tribal Priority Allocations

Evaluation of Tribal Priority Allocations Distribution: Tribal Priority Allocations (TPA) fund basic tribal services, such as social services, job placement and training, child welfare, natural resources management, and tribal courts. TPA gives tribes the opportunity to further Indian self-determination by establishing their own priorities and reallocating Federal funds among programs in this budget category. The table below details the program changes to TPA in the FY 2019 budget.

Tribal Priority Allocations	2017 Enacted	2018 Cont. Res.	Internal Transfers	Fixed Costs	Program Changes	2019 Budget Request	Change from 2018
INCREASES:							
New Tribes (TPA)	160	159			961	1,120	961
TOTAL, TPA PROGRAM INCREASES	160	159			961	1,120	961

Administrative Provisions

Appropriation Language

DEPARTMENT OF THE INTERIOR

INDIAN AFFAIRS

Administrative Provisions

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding Public Law 87–279 (25 U.S.C. 15), the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103–413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996, and to any school or school program that was reinstated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106–113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101–301, the Secretary shall continue to

distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

Funds available under this Act may not be used to establish satellite locations of schools in the Bureau school system as of September 1, 1996, except that the Secretary may waive this prohibition in order for an Indian tribe to provide language and cultural immersion educational programs for non-public schools located within the jurisdictional area of the tribal government which exclusively serve tribal members, do not include grades beyond those currently served at the existing Bureau-funded school, provide an educational environment with educator presence and academic facilities comparable to the Bureau-funded school, comply with all applicable Tribal, Federal, or State health and safety standards, and the Americans with Disabilities Act, and demonstrate the benefits of establishing operations at a satellite location in lieu of incurring extraordinary costs, such as for transportation or other impacts to students such as those caused by busing students extended distances: Provided, That no funds available under this Act may be used to fund operations, maintenance, rehabilitation, construction or other facilities-related costs for such assets that are not owned by the Bureau: Provided further, That the term "satellite school" means a school location physically separated from the existing Bureau school by more than 50 miles but that forms part of the existing school in all other respects.

Operation of Indian Programs

(INCLUDING TRANSFER OF FUNDS)

For expenses necessary for the operation of Indian programs, as authorized by law, including the Snyder Act of November 2, 1921 (25 U.S.C. 13), the Indian Self-Determination and Education Assistance Act of 1975 (25 U.S.C. 5301 et seq.), the Education Amendments of 1978 (25 U.S.C. 2001–2019), and the Tribally Controlled Schools Act of 1988 (25 U.S.C. 2501 et seq.), \$2,002,996,000, to remain available until September 30, 2020, except as otherwise provided herein; of which not to exceed \$8,500 may be for official reception and representation expenses; of which not to exceed \$65,794,000 shall be for welfare assistance payments: Provided, That, in cases of designated Federal disasters, the Secretary may exceed such cap, from the amounts provided herein, to provide for disaster relief to Indian communities affected by the disaster: Provided further, That federally recognized Indian tribes and tribal organizations of federally recognized Indian tribes may use their tribal priority allocations for unmet welfare assistance costs: Provided further, That not to exceed \$583,916,000 for school operations costs of Bureau-funded schools and other education programs shall become available on July 1, 2019, and shall remain available until September 30, 2020: Provided further, That not to exceed \$35,598,000 shall remain available until expended for road maintenance, land records improvement, and the Navajo-Hopi Settlement Program: Provided further, That, notwithstanding any other provision of law, including but not limited to the Indian Self-Determination Act of 1975 (25 U.S.C. 5301 et seq.) and section 1128 of the Education Amendments of 1978 (25 U.S.C. 2008), not to exceed \$73,973,000 within and only from such amounts made available for school operations shall be available for administrative cost grants associated with grants approved prior to July 1, 2019: Provided further, That any forestry funds allocated to a federally recognized tribe which remain unobligated as of September 30, 2020, may be transferred during fiscal year 2021 to an Indian forest land assistance account established for the benefit of the holder of the funds within the holder's trust fund account: Provided further, That any such unobligated balances not so transferred shall expire on September 30, 2021: Provided further, That, in order to enhance the safety of Bureau field employees, the Bureau may use funds to purchase uniforms or other identifying articles of clothing for personnel.

Note.—A full-year 2018 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Continuing Appropriations Act, 2018 (Division D of P.L. 115–56, as amended). The amounts included for 2018 reflect the annualized level provided by the continuing resolution.

The BIA Tribal Government activity supports assistance to Tribes and Alaska Native entities to strengthen and sustain tribal government systems and support tribal self-governance through the Public Law 93-638 contracting and compacting process.

Justification of 2019 Program Changes:

Aid to Tribal Government (TPA) (-\$2,812,000):

Funding is used by tribes for program costs, including staffing, to execute tribal government activities such as monitoring compliance with governing documents, establishing voter lists, registering voters, and maintaining current membership information.

Consolidated Tribal Government Program (TPA) (-\$2,693,000):

This program provides Consolidated Tribal Government Program (CTGP) tribes funding for contracted programs including agriculture, law enforcement, social services and training.

Self Governance Compacts (TPA) (-\$4,610,000):

This program provides Self Governance program tribes funding for self-governance compacts for program areas including welfare assistance, roads maintenance, and law enforcement.

New Tribes (TPA) (+\$961,000):

The budget includes \$961,000 to provide initial Federal support for six Virginia tribes federally-recognized by act of Congress in January 2018. The new tribes are the Chickahominy, the Eastern Chickahominy, the Upper Mattaponi, the Rappahannock, the Monacan, and the Nansemond. The request provides \$160,000 to each tribe to establish and carry out the day-to-day responsibilities of a tribal government. The 2019 budget is the first opportunity to include funding for the new tribes in the budget process. In 2018, funds from within available sources will be provided to these tribes upon recognition, pro-rated from the day of recognition.

Small & Needy Tribes (TPA) (-\$4,418,000)

The FY 2019 budget does not request funding for this program.

Road Maintenance (TPA) (-\$1,953,000)

The program will continue maintenance responsibility for approximately 29,000 miles of roads and 900 bridges as resources permit.

Tribal Government Program Oversight (-\$1,060,000; -4 FTE):**Tribal Government Program Oversight (-306,000)**

The program will continue to negotiate, monitor, and provide technical assistance to nearly 3,200 self-determination contracts as well as develop and implement policies and initiatives to assist tribes administer Federal programs.

Administrative Savings (-\$754,000)

To support prioritizing core responsibilities, the FY 2019 budget request includes \$754,000 in administrative savings attained by consolidating and sharing administrative services such as, procurement, Information Technology, and Human Resources; and by shifting acquisition spending to less costly contracts.

Tribal Government Overview:**Subactivity - Aid to Tribal Government (TPA) (FY 2019: \$24,326,000; FTE: 66):**

The Aid to Tribal Government sub-activity allows the BIA to provide assistance to tribes and Alaska Native entities through the Pub. L. 93-638 contracting and compacting process. Aid to Tribal Government funding assists tribal government systems by providing baseline funding for tribal government programs and services.

Subactivity - Consolidated Tribal Gov't Program (TPA) (FY 2019: \$72,634,000; FTE: 0):

The Consolidated Tribal Government Program (CTGP) seeks to promote Indian Self-Determination and improve the quality of life of tribal communities by allowing approximately 275 tribal entities to combine various contracted programs and grants of a similar or compatible nature. By merging and consolidating several programs into a single contract activity, tribes are able to engage in a simpler and more flexible

method for setting priorities, goals, and objectives. By combining related programs and providing flexibility in their use, tribes realize a savings while still meeting the unique needs of their communities. The combination of activities of similar character gives tribes the most effective means of setting priorities and operating programs consistent with tribal goals and objectives, as well as with Federal laws and regulations.

Subactivity – Self-Governance Compacts (TPA) (FY 2019: \$157,790,000; FTE: 0):

Self-Governance Compacts implement the Tribal Self-Governance Act of 1994 (Pub. L.103-413), by providing resources to new and existing self-governance tribes, enabling them to plan, conduct, consolidate, and administer programs, services, functions, and activities for tribal citizens. Under tribal self-governance, tribes have control and flexibility in the use of these funds and reduced reporting requirements compared to tribes that contract under Pub.L. 93-638. However, self-governance tribes are subject to annual trust evaluations to monitor the performance of the trust functions they perform. They are also subject to annual audits pursuant to the Single Audit Act Amendments (Pub.L. 104-156).

Tribal Self-Governance funding is negotiated on the same basis as funding provided to tribes contracting under Title I of Pub. L. 93-638. Self-governance tribes are subject to the same incremental adjustments of base funding as non-compacting tribes. Also, included in self-governance funding agreements are funds from other Federal programs allocated or awarded to self-governance tribes such as funds from the Department of Transportation, Federal Highway Administration, Tribal Transportation Program, Bureau of Land Management, the Department of Labor, and the Department of Health and Human Services under the Employment, Training, and Related Services Demonstration Act (Pub. L. 102-477).

Subactivity - New Tribes (TPA) (FY 2019: \$1,120,000; FTE: 0):

The New Tribes sub-activity provides funding to support new federally recognized tribes, new federally acknowledged tribal governments, and BIA Regions or Agencies in their provision of support services for such tribes. The New Tribes sub-activity helps foster strong and stable tribal governments and provides tribes with the funding resources they need to fund their basic governmental affairs, which will put them in a better position to contract and compact BIA programs. This sub-activity provides \$160,000 in TPA base funding for a new tribe to establish and carry out the day-to-day responsibilities of a tribal government. Once a tribe has been acknowledged as a federally recognized tribe, it remains in the “New Tribes” category for three fiscal years.

Subactivity - Road Maintenance (TPA) (FY 2019: \$28,318,000; FTE: 116):

The BIA has maintenance responsibility for approximately 29,000 miles of roads and more than 900 bridges. The road mileage consists of: 7,150 miles of paved, 4,720 miles of gravel, and 17,130 miles of unimproved and earth surface roads. The total public road network serving Indian country is 140,000+ miles according to the National Tribal Transportation Facility Inventory.

The Office of Indian Services, Division of Transportation in Washington, DC provides oversight and distribution for the annual maintenance program. The maintenance funds are allocated to regions by

formula, which then sub-allocates them to the BIA agencies or provides funding to tribes under contracts or compacts negotiated under Pub.L. 93-638.

The major work components for roads maintenance in the Great Plains, Rocky Mountain, and Northwest Regions include snow and ice control, interior pavement sealing, pavement maintenance, gravel maintenance, and remedial work on improved earth roads. In some severe winter seasons, the snow and ice control activities have consumed the majority of maintenance funds.

Subactivity - Tribal Government Program Oversight (FY 2019: \$7,326,000; FTE: 61):

This sub-activity supports and maintains the staff responsible for fulfilling the BIA tribal government duties at both the Central and Regional office. The staff is responsible for developing and implementing policies and initiatives affecting a tribe's capacity to effectively administer Federal programs, as well as, negotiating, monitoring, and providing technical assistance to nearly 3,200 self-determination contracts. In addition, BIA has maintained the responsibilities of administering secretarial elections, facilitating a resolution to tribal leadership disputes, managing judgment fund distributions, and aiding tribal governments to develop or modify governing documents, among other duties.

Central Oversight [\$2,236,000; FTE: 9]:

Central Oversight provides the direction, management, and coordination of Indian Services activities necessary for the Director of the BIA to carry out the Indian Affairs' mission. The Central Oversight sub-activity allows Indian Services leadership and staff to manage the intersection of interdisciplinary relations among Human Services, Workforce Development, Tribal Government Services, Indian Self-Determination, and Transportation programs.

Regional Oversight [\$5,090,000; FTE: 52]:

Regional Oversight funding provides support for regional and field offices by providing financial support for regional leadership, and budget and administration functions related to Indian Services programs.

The BIA Office of Indian Services supports a community-based approach to child welfare, family stability, and strengthening tribal communities as a whole. In FY 2019, BIA plans include continuing its partnerships with tribes and educators to train more child welfare and child protection workers, making the current Social Service training curriculum more accessible to tribal and the BIA staff, and implementing a strategy to better categorize and track ICWA compliance.

Justification of 2019 Program Changes:

Social Services (TPA) (-\$19,376,000; -14 FTE):

The program will continue to serve the Financial Assistance, Child Protection and Child Welfare Services (CP/CWS), Adult Protection and Individuals Indian Money Accounts (IIM) Services, and Family and Domestic Violence needs of American Indians and Alaska Natives at the requested level. The program change will impact Tiwahe initiative activities.

Welfare Assistance (TPA) (-\$8,471,000):

The program will provide financial assistance to American Indians and Alaska Natives (AI/AN) who have no access to Temporary Assistance for Needy Families (TANF).

Indian Child Welfare Act (TPA) (-\$5,195,000):

The ICWA program is a tribally operated program. Services provided to tribal communities through this program include intervening in involuntary child custody proceedings in state court, preventing the unnecessary removal of Indian children from their tribal cultural base, and providing reunification and protective services to Indian families. The program change will impact Tiwahe initiative activities.

Housing Program (TPA) (-\$9,642,000):

No funding is requested for this program.

Human Services Program Oversight (-\$391,000; -1 FTE):

Human Services Program Oversight [-\$109,000;-1 FTE]:

Funding supports Human Services staff, in consultation with tribes, BIA, and the Central Office, to manage programs that ensure individual Indians residing on or near reservations or Alaska Native villages receive assistance for the essential needs of food, clothing, shelter and utilities.

Administrative Savings [-\$282,000]

To support prioritizing core responsibilities, the FY 2019 budget request includes \$282,000 in administrative savings attained by consolidating and sharing administrative services such as, procurement, Information Technology, and Human Resources; and by shifting acquisition spending to less costly contracts.

Human Services Overview:

The Human Services activity consists of the following sub-activities to support a variety of social programs throughout Indian Country. In addition, certain administrative costs are assessed in this activity to support government-wide, department-wide, and BIA-wide functions performed at both the BIA Central and Regional offices. Within the Social Services sub-activity, services are provided in the areas of family and domestic violence, child abuse and neglect, and protective services to Individual Indian Monies (IIM) supervised account holders who are considered to be at higher risk for exploitation, including minors, adults in need of assistance, under legal disability, or found not to be of sound mind.

The BIA continues its partnership with the Department of Health and Human Services (DHHS), the Administration for Children and Families (ACF), and the Department of Justice (DOJ) on the Native American Children's Safety Act (NACSA) guidance. BIA's Division of Human Services is continuing work with the Universities of Montana and Oklahoma on the Center for Excellence (Child Welfare and Child Protection training and credentials), and the Native American Children's Trauma Center on family violence prevention, deferential response, and trauma informed care.

Subactivity - Social Services (TPA) (FY 2019): \$32,864,000; FTE: 98)

Program Overview:

Social Services (TPA) funding supports a number of activities for tribal contracted and compacted social services programs, BIA staff at the region and agency levels, and is provided annually to approximately 300 tribes, tribal consortiums, and BIA agencies. Roughly 34 percent of the 300 tribes receive funding through an Indian Self-Determination and Education Assistance Act (ISDEAA) Annual Funding Agreement (compact); the remaining 66 percent are either tribes receiving BIA direct services, or tribes that have contracted under Title I of Pub. L. 93-638.

Under the umbrella of Social Services, tribes operate a multitude of programs, which include: Financial Assistance, Child Protection and Child Welfare Services (CP/CWS), Adult Protection and IIM Services, and Family and Domestic Violence. Tribes must operate these programs with a single funding stream, although each program area has different eligibility requirements and regulations.

In FY 2019, the BIA will work to maintain BIA social services worker's skills and program operations. The BIA will continue its partnerships with tribes and educators to train more child welfare and child protection workers, including state workers, judges, and presenters, in skills related to child and family assistance and services programs. Funding will also help sustain and train existing staff and employ professional and other trained personnel to assist in areas such as domestic relations, family violence, alcohol and substance abuse, and incarceration.

In FY 2019, under the Center for Excellence, the BIA will:

- Continue its partnership with the University of Montana, the BIA Rocky Mountain Region Office, and the Rocky Mountain Tribal Leaders Council to implement the Trauma Informed Child Protection/Child Welfare curriculum in Indian country through online, classroom style and webinar training.
- Continue to work with the BIA, Rocky Mountain Region and the University of Montana Two-Plus-Two program, which will enable students with an associate's degree or with community college credits to pursue a bachelor's degree at a tribal community college.
- Examine opportunities for BIA, Regional MSW staff to serve as training practicum supervisors and as team teachers where appropriate to facilitate the Two-Plus-Two program.
- Coordinate and collaborate with programs in neighboring states to explore avenues to expand the efforts of the Two-Plus-Two program.

Subactivity - Welfare Assistance (TPA) (FY 2019): \$65,794,000; FTE: 0):

Program Overview:

The Welfare Assistance program provides financial assistance to American Indians and Alaska Natives (AI/AN) who do not have access to Temporary Assistance for Needy Families (TANF), who do not meet the eligibility criteria, or have exceeded the lifetime limit for services. It is BIA's position that Welfare Assistance programs are a secondary resource. Therefore, otherwise eligible AI/AN are assessed, screened, and referred to other public assistance programs through which they might receive direct financial assistance, such as: Supplemental Security Insurance (SSI), Social Security Disability Insurance, medical assistance, and state-operated general assistance programs. In total, approximately 90 compacted tribes and 161 contracted tribes have joined with 47 BIA agency offices to deliver direct social services to individual AI/AN through the Welfare Assistance program.

In FY 2019, the BIA will continue implementation of the FASS-CMS Modernization system, a comprehensive case management system for social service case workers, and begin exploring the use of tablets or other mobile devices to allow case workers access to FASS-CMS remotely. The Division will also work with the Regional Social Workers and Universities to make the current trauma informed BIA

funded Social Service Training curriculum more accessible to tribal and the BIA staff by transitioning to an on-line or web-ex approach, which includes investigating easily accessible and cost effective approaches for both tribal and BIA staff. The BIA is also exploring a certification program for the online sessions.

Subactivity - Indian Child Welfare Act (TPA) (FY 2019): \$13,696,000; FTE: 0):

Program Overview:

The Indian Child Welfare Act (ICWA) program is provided to tribes as authorized under Pub.L. 95-608, the Indian Child Welfare Act of 1978. The ICWA program is a tribally operated program only. Annually, there are approximately 360 tribes and tribal consortiums that receive ICWA TPA funding to prevent the separation of Indian families and provide assistance for family reunification. Of the 360 tribes or tribal consortiums, 27 percent receive ICWA funding through an ISDEAA Self-Governance Annual Funding Agreement. Tribal ICWA programs are the central contact point for tribes and AI/AN families seeking assistance for temporary and permanent placement of Indian children. Tribal ICWA staff serve as the liaison between state and tribal court systems. The activities and work of tribal ICWA staff have resulted in improved coordination and compliance with ICWA.

In FY 2019, the BIA with its Federal partners will develop and implement a strategy to categorize and track ICWA compliance by state courts. Additionally, the BIA will identify the number of Indian children placed in non-Indian homes; the number of children receiving services under the tribal ICWA program; and explore ways to track the number of family reunifications that occur under ICWA. The BIA will assess state compliance by tracking rates of removals and reunification. A key element of success is the development of cooperative, working relationships between the BIA, Federal partners, state welfare programs, state courts, and tribes.

Subactivity - Human Services Tribal Design (TPA) (FY 2019: \$259,000; FTE: 0):

Program Overview:

The Tribal Design program supports AI/AN by allowing tribes flexibility to redesign their Social Services program delivery as authorized under the Snyder Act of 1924. This funding gives tribes the ability to design Social Services programs that are both cost effective and fit the needs of their communities.

Subactivity - Human Services Program Oversight (FY 2019: \$2,745,000; FTE: 18):

Program Overview:

Human Services staff, in consultation with tribes, BIA, and Central Office, develops policies and procedures that strive to ensure individual Indians residing on or near reservations receive assistance for the essential needs of food, clothing, shelter, and utilities. The long-term goal of this program is to improve the living conditions of AI/AN individuals and families.

Program Oversight staff manage and distribute the Welfare Assistance program funds, which requires monitoring and working with tribal and BIA Regional and Agency staff on a regular basis to ensure their equitable distribution. BIA Regional social workers have combined efforts with Central Office staff in the development of an automated database that tracks both applications for Social Services and the number of applicants receiving assistance. Social workers provide expert assistance to tribes and field agencies in the operation of their programs on a day-to-day basis, and they interact with other Federal agencies that provide social and mental health services to Indian communities to ensure that services are coordinated, and duplication avoided. Social workers also monitor supervised IIM accounts at the field level in compliance with 25 CFR, Part 20 and 25 CFR, Part 115 and in coordination with the Office of the Special Trustee for American Indians and the Office of Trust Funds Management. Human Services staff is also responsible for inspecting tribal and Federal compliance with regulations and policies by providing oversight during construction for contracts, project activities, and inspections.

Central Oversight (\$793,000):

Central Oversight funding provides for staff and costs associated with the aforementioned services that are performed at the Central office level. Funds also support the annual operational and maintenance costs of the FASS-CMS and the Center for Excellence. The FASS-CMS is a comprehensive case management system for Social Service caseworkers. It improves Social Service workers' productivity and decision-making process by providing comprehensive case information and enabling better resource management. The system automates the application process for services and case workflow, provides adequate tracking and records management, supports the processing of financial payments to eligible Indian clientele, and provides management reporting for performance and compliance management.

The Center for Excellence (the Center) implements comprehensive plan that offers onsite, virtual, and simulated training in areas such as, but not limited to, differential response, trauma informed care, self-care, and working with Tribal Courts. The Center also offers BIA and tribal social services staff a career pathway for credentials and sustainable employment.

Regional Oversight (\$1,952,000):

Regional Oversight funding provides for Regional staff and costs associated with the technical assistance, training, and monitoring performed at the Regional office level. The program provides oversight on the various social services programs operated by tribes and tribal consortia, and BIA agency programs within the region. The Regional staff are responsible for the various administrative activities associated with these programs, including managing Performance Reporting/GPRA, budgeting, Awarding Official Technical Representative (AOTR) Monitoring responsibilities on Social Services contracts, and

compiling various reports. In addition, each Region is responsible for providing ongoing technical assistance and training in these various areas and on the various governing laws and regulations, ensuring that the Social Services worker is familiar with and understands the multiple laws and regulations that impact and govern the operation of Tribal Social Services.

The BIA Trust-Natural Resources Management activity supports the stewardship of trust lands in Indian Country. Natural resource programs assist Tribes in the management, development, and protection of Indian trust land and natural resources on 56 million surface acres and 59 million acres of subsurface mineral estates. These programs enable tribal trust landowners to optimize use and conservation of resources, providing benefits such as revenue, jobs, and the protection of cultural, spiritual, and traditional resources.

Justification of 2019 Program Changes:

Natural Resources (TPA) (-\$90,000):

This program will continue to assist tribes in the management, development, and protection of Indian trust land and natural resource assets. The program will prioritize direct service and technical assistance for management and improvement of land and natural resources.

Irrigation Operations and Maintenance (-\$3,697,000):

The FY 2019 budget request proposes to fund the Irrigations O&M at \$9.1 million. The Irrigation O&M program supports 17 Indian Irrigation Projects, some of which are revenue-generating. BIA will work with Tribes to identify opportunities to adjust user fees to cover the full cost of service.

Rights Protection Implementation (-\$14,767,000):

The Rights Protection Implementation (RPI) program provides base funding for affected tribes to meet Federal court litigated and mitigated responsibilities in the conservation and management of fish and wildlife resources.

Tribal Management/Development Program (-\$2,913,000):

Tribal Management/Development Program (TMDP) will continue to support tribal self-determination by allowing tribal management of fish and game programs on Indian reservations.

The proposed funding for TMDP also includes a transfer of +\$375,000 to move the Salmon and Steelhead Habitat Inventory and Assessment Program (SSHIAP) funding out of Forestry Projects and into TMDP. SSHIAP provides data management, sharing, and analysis on freshwater, marine, and nearshore habitat, and salmonid stock distribution within Washington State which is better aligned to the TMDP budget subactivity.

Endangered Species (-\$1,365,000):

This program coordinates IA and tribal responsibilities regarding compliance with the Endangered Species Act (ESA), Pub.L. 93-205, and the related protection and preservation of trust lands and resources.

Eliminate Tribal Climate Resilience (-\$9,888,000; FTE -2):

The FY 2019 budget does not request funding for this program.

Integrated Resources Information Program (-\$403,000):

Integrated Resources Information Program [-161,000]

This program funds the Branch of Geospatial Services (BOGS) within IA. BOGS is the single geospatial technical center for the IA which operates in conjunction with the Division of Land Titles and Records to deliver Federal land title service to Indian beneficiaries and Tribes.

Administrative Savings [-\$242,000]

To support prioritizing core responsibilities, the FY 2019 budget request includes \$242,000 in administrative savings attained by consolidating and sharing administrative services such as, procurement, Information Technology, and Human Resources; and by shifting acquisition spending to less costly contracts.

Agriculture & Range (-\$2,738,000; -17 FTE):

Agriculture Program TPA [-\$1,771,000; FTE -17]:

The Agriculture and Rangeland Management Program will continue to promote multiple use and sustained-yield management on over 46 million acres of trust Indian land dedicated to crop and livestock agriculture.

Invasive Species Program [-\$967,000]:

This program will continue to provide on-the-ground management and treatment of noxious weeds on trust rangelands and funding to assist tribes in the management, control, and prevention of invasive species threats that occur outside the realm of agricultural operations.

Forestry (-\$4,774,000; -12 FTE):

Forestry Program (TPA) [-\$967,000; FTE -12]:

The Forestry Program will continue to support work associated with the preparation and administration of forest products sales, and the management and technical oversight of those activities.

Forestry Projects [-\$3,807,000]:

This subactivity includes programs such as Forest Development; Forest Management, Inventory and Planning; Woodland Management; and the Timber Harvest Initiative. The Forestry Projects program, through direct service or contracts, employs thousands of seasonal positions to perform in-woods activities designed to meet forest management objectives.

The proposed funding for TMDP also includes a transfer of +\$375,000 to move the Salmon and Steelhead Habitat Inventory and Assessment Program (SSHIAP) funding out of Forestry Projects and into TMDP. SSHIAP provides data management, sharing, and analysis on freshwater, marine, and nearshore habitat, and salmonid stock distribution within Washington State which is better aligned to the TMDP budget subactivity.

Water Resources (-\$1,845,000):

Water Resources Programs (TPA) [-\$145,000]:

The program will continue to support tribes and IA regional offices that provide for the protection and management of tribal water resources.

Water Management, Planning & Pre-Development [-\$1,700,000]:

The program will continue to support the management, conservation, and utilization of reservation water resources including the negotiation and implementation of Indian Water Rights settlements.

Fish, Wildlife & Parks (-\$3,691,000):

Wildlife & Parks Program (TPA) [-\$198,000]:

This funding is provided to tribes through a local priority setting process determined by the tribe and IA to fund tribal activities in the areas of fisheries, wildlife, outdoor recreation, tribal youth in natural resources, and public use management, conservation enforcement, and related fields.

Fish, Wildlife & Parks Projects [-\$3,493,000]:

This funding is provided to fish-producing tribes in support of associated hatching, rearing, and stocking programs.

Resource Management Program Oversight (-\$669,000):

Regional Oversight [-\$160,000]:

This funding provides for staff and costs associated with resource management oversight services performed at the regional office level.

Administrative Savings [-\$539,000]

To support prioritizing core responsibilities, the FY 2019 budget request includes \$539,000 in administrative savings attained by consolidating and sharing administrative services such as, procurement, Information Technology, and Human Resources; and by shifting acquisition spending to less costly contracts.

Trust - Natural Resources Management Overview:

The Trust - Natural Resources Management program assists tribes in the management, development, and protection of Indian trust land and natural resource assets. The resource management activities provide many benefits to the landowner such as revenue, jobs, and the protection of cultural, spiritual, and traditional resources.

While a significant part of the Trust - Natural Resources Management activity is executed under contracts with tribes, many tribes still rely on Direct Services from IA in order to execute Trust programs. Trust - Natural Resources Management is comprised of the following subactivities: Natural Resources; Irrigation

O&M; Rights Protection Implementation; Tribal Management/Development Program; Endangered Species; Integrated Resource Information Program; Agriculture and Range; Forestry; Water Resources; Fish, Wildlife, and Parks; and Program Oversight.

In addition, certain administrative costs are assessed in this activity to support government-wide, departmental, and IA-wide functions performed at regional or central offices.

Subactivity - Natural Resources (TPA) (FY 2019: \$4,866,000; FTE: 15):

Program Overview:

The overall Trust Natural Resources Management program fulfills Indian trust responsibilities through the strategy of improved management, protection, and development of Indian land and natural resource assets. The tribal programs manage their own natural resources in compliance with Federal regulatory requirements and operate under contract or compact. The FTE outlined within this budget subactivity are located at the agency level to provide direct service to tribes that do not have contracts or compacts that include this program.

Funding also supports various tribal youth programs that promote interest in pursuing career opportunities within the various areas of natural resources management. These programs ensure qualified candidates for a future workforce while instilling a respect for all natural resources and an appreciation of the importance of natural resources to tribal culture and livelihood.

Subactivity - Irrigation Operations and Maintenance (FY 2019: \$9,134,000; FTE: 4):

Program Overview:

The Irrigation Operations and Maintenance program manages water resources on Indian lands. Activities include operation, maintenance, and rehabilitation of irrigation infrastructures in accordance with accepted industry standards. A substantial portion of the budget request is comprised of payments required by established legal directives. These payments are made to both revenue-generating irrigation projects and to a number of smaller irrigation systems. The program also provides reimbursement to the BOR for water storage costs on behalf of the tribes served; continued delivery of water by and to irrigation systems as required by law, court order, or contractual agreement; and proportionate cost-share payments legally required to be made to Indian projects that are a part of, or adjacent to, non-Indian irrigation facilities. The program also provides funding for operation and maintenance needs on the

Navajo Indian Irrigation Project for the Gallegos Pumping Plant, the three minor pumping plants, and the Pinabete substation.

The following table illustrates the allocation of funding dollars in thousands, (including supplemented) for the noted fiscal years:

Irrigation O&M Funding Distribution	FY 2017 Actual	FY 2018 Estimate
Court Orders and Legislated Requirements		
Ft. Hall Indian Irrigation Project, Idaho	674	674
Ft. Hall - Michaud & Minor Units, Idaho	272	272
San Carlos Irrigation Project - Indian Works, Arizona	3,733	3,733
Gila River Water Commissioner, Arizona	0	0
Navajo Indian Irrigation Project, Arizona	6,020	6,020
Uintah Indian Irrigation Project, Utah	234	234
Pyramid Lake, Nevada	0	0
Middle Rio Grande Pueblos, New Mexico	1,100	1,100
Middle Rio Grande Designated Engineer	150	150
Total Court Orders and Legislated Requirements	12,183	12,183
Water Storage (Bureau of Reclamation)		
Wapato Indian Irrigation Project, Washington	360	360
Fresno Dam for Fort Belknap Indian Irrigation Project, Montana	40	40
Total Water Storage (Bureau of Reclamation)	400	400
Contracts (Contractual Carriage and OM&R Agreements)		
Tongue River Water Users Association, Montana	28	28
Two Leggins/Bozeman Trail Drainage Assn., Montana	9	9
Newlands/Fallon Irrigation District, Nevada	276	276
Coachella Valley Water District, California	58	58
Pojaque Valley Water District, New Mexico	47	47
Pine River Irrigation District, Colorado	40	40
Total Contracts (Contractual Carriage and OM&R)	458	458
Total Irrigation O&M Mandatory Payments	13,041	13,041
Irrigation O&M Support Contracts and Rehabilitation		
Irrigation O&M Support Contracts and Rehabilitation	900	900
Last Chance Ditch Company, City of Escondido	0	0
Walker River Irrigation Project	75	75
Total Irrigation O&M Support Contracts & Rehabilitation	977	977
Total Costs	14,018	14,009

Subactivity - Rights Protection Implementation (FY 2019: \$24,737,000; FTE: 0):

Program Overview:

The Rights Protection Implementation program supports the implementation of Federal courts. These cases recognize and protect court decisions and orders implemented through this program including U.S. v. Washington, U.S. v. Michigan, Lac Courte Oreilles v. Voigt, U.S. v. Oregon, Minnesota v. Mille Lacs and Grand Portage v. Minnesota. In addition, this program supports the implementation of the US/Canada Pacific Salmon Treaty, reserved treaty rights to hunt, fish, and gather within reservation, ceded territory. These rights apply beyond particular reservation boundaries and are shared among multiple tribes. Therefore, they have intertribal co-management implications as well as implications for management with other jurisdictions.

The goal of this program is to ensure compliance with Federal court orders by assisting in implementing effective tribal self-regulatory and co-management systems. Contract agreements are designed to assure proper regulation and management of off-reservation fish, wildlife, shellfish, and plant gathering activities, provide conservation enforcement, and perform the necessary assessment and habitat protection activities that help ensure abundant and healthy populations of ceded territory resources. The benefits of these programs accrue not only to tribes, but to the wider communities as well, because protection and enhancement of ceded territory natural resources and their habitats benefit all users of those resources. In particular, there are 49 tribes whose off-reservation hunting, fishing, and gathering rights in the Pacific Northwest and Great Lakes regions are supported by this program. Five umbrella intertribal organizations assist the tribes in implementing relevant court orders and carrying out co-management responsibilities.

Rights Protection Implementation Distributions*		
Program	FY 2016 Enacted	FY 2017 Enacted
Western Washington (Boldt Decision)	8,532	10,004
Washington State Timber Fish & Wildlife	2,736	3,207
Columbia River Fisheries Mgmt	4,589	5,381
U.S. Canada Pacific Salmon Treaty	4,280	5,017
Salmon Marking	1,068	1,252

Chippewa/Ottawa Inland Consent Decree	[1,600]	[1,900]
1854 Treaty Authority	826	970
Evaluation and Research Activities - Climate	5,442	2,000
Youth Program Initiatives	500	500
Total	37,638	39,661

*BIA will allocate 2018 and 2019 funding after Congressional Action.

Below, is information regarding results from the various activities carried out by these organizations.

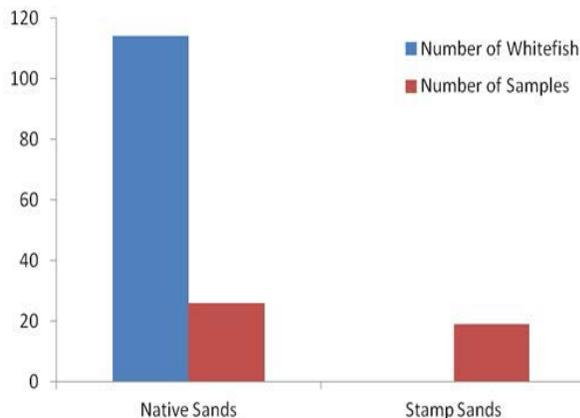

The accomplishments in 2017 were:

Great Lakes Intertribal Fish and wildlife Commission (GLIFWC) Accomplishments:

GLIFWC Environmental Biologist Selected for Prestigious EPA Award: In April 2017, Great Lakes Indian Fish and Wildlife Commission (GLIFWC) environmental scientist John Coleman received the Environmental Protection Agency’s Taimi Lynn Hoag Award for Environmental Stewardship. The award recognizes significant contributions in environmental management and/or environmental stewardship in EPA Region 5 and the recipient is selected by the tribes in Region 5. Coleman was selected for his work on a wide range of environmental protection issues throughout GLIFWC member tribes’ ceded territories.

Governments Cooperating to Restore and Protect Important Spawning Habitat in Lake Superior:

Federal, state and tribal governments and agencies, including GLIFWC, are working together to halt the degradation of an important whitefish and lake trout spawning reef in Lake Superior. The reef is being smothered with “stamp sands” – mining waste that was dumped into the lake and on its shoreline during the late 1800s and early 1900s. The stamp sands are destroying the spawning reef by filling in and contaminating the cobble substrate where the fish lay eggs. The stamp sands are high in copper, mercury, arsenic and other contaminants toxic to aquatic life, illustrated by the fact that juvenile fish are not found

in shoreline habitats that are covered in stamp sands (see chart, at left). At present, approximately 35% of the reef is no longer viable because it is covered with an inch or more of stamp sands; modeling predicts that by 2025, 60% of the reef will no longer be viable for lake trout and whitefish spawning.

GLIFWC is contributing to management efforts by conducting juvenile whitefish seining surveys and fall whitefish and lake trout assessments on the reef and the adjacent shoreline. It is also working with other governments to coordinate on-the-ground

action. This past summer, stamp sand dredging occurred in nearby Grand Traverse Harbor, and funds have been committed in 2018 to dredge a trench, or trough, that has protected the reef, but which has now filled up with stamp sands. GLIFWC is also an active participant in an intergovernmental Task Force that is looking for long-term solutions to the problem.

Passing on Ojibwe Spearfishing Traditions: On April 14, 2017, 32 youth from the Bad River and Red Cliff Bands of Lake Superior Chippewa participated with elders, parents and volunteers in a spring tradition – spearfishing for walleye (*ogaa* in Ojibwe). The event was a cooperative effort between GLIFWC, tribal programs, and people from both bands who wanted to pass along the time-honored Ojibwe tradition of spearfishing to the next generation. GLIFWC places special emphasis on helping to coordinate activities that enable youth to learn about tribal treaty harvest practices and associated

regulations, particularly when those activities involve connecting elders and youth. On that evening, participants shared in ceremonies, food, and story-telling before setting out on the water where experienced spear-fishers shared their knowledge and harvesting techniques. The evening was a great success, resulting in the harvest of nearly 100 oгаа that will be enjoyed by community members from both tribes.

Scott Babineau assists Jada Buckholtz with a spear at the front of the boat while Layla Boyd, Emily Pierre, and Red Cliff Conservation Warden Mark Duffy keep an eye on the water.

Columbia River Inter-Tribal Fish Commission:

The Columbia River Inter-Tribal Fish Commission's (CRITFC) work is vested in a comprehensive gravel-to-gravel management plan, *Wy-Kan-Ush-Mi Wa-Kish-Wit* "The Spirit of the Salmon" oriented to these long-term goals:

1. Restore anadromous fishes to the rivers and streams that support the historical, cultural and economic practices of the tribes;
2. Emphasize strategies that rely on natural production and healthy river systems to achieve this goal;
3. Protect tribal sovereignty and treaty rights; and
4. Reclaim the anadromous fish resource and the environment on which it depends for future generations.

Wy-Kan-Ush-Mi Wa-Kish-Wit's annual goals are:

1. Assist the member tribes in maintaining the integrity of treaty reserved rights and Resources by assisting in carrying out co-management responsibilities through a coordinated regulatory authority, including law enforcement services.

2. Identify and pursue significant actions that will update, integrate, promote and implement Wy-Kan-Ush-Mi Wa-Kish-Wit for increasing the return of naturally spawning and other harvestable fish to tribal fishing areas.
3. Assist the tribes in educating and gaining support from tribal, local, regional, national, and international audiences on the nature of treaty rights, tribal culture and values, and salmon restoration and related natural resources as well as careers relating to these aspects of sovereignty.
4. Create, refine and implement sound and cost-effective organizational systems that support the efforts of the Commission.
5. Secure the financial resources necessary to meet CRITFC mission and goals.

The 2017 CRITFC accomplishments are:

Fisheries Management & Science Departments: The CRITFC tribes are leaders in fisheries restoration and management working with state, federal and private entities to halt the decline of salmon, lamprey and sturgeon populations and rebuild them to levels that support ceremonial, subsistence and commercial harvests. To achieve these objectives, the tribes' actions emphasize 'gravel-to-gravel' management including supplementation of natural stocks, healthy watersheds and collaborative efforts.

- Completed the Biological Assessment for the rollover of the U.S. v. OR Management Agreement.
- Successfully supported tribes in implementation of fishing seasons consistent with the U.S. v. Oregon Management Agreement. Fall fishing resulted in a fall chinook catch of about 100,000 over eight weekly fishing periods.
- Evaluated hydro operations for consistency with the FCRPS BiOp requirements for spill and dissolved gas. Participated in hydrologic modelling to assess the effects of potential spill patterns.
- Evaluated proposals in PSC for the revised Chinook Chapter, including assessing the conservation and allocation effects of the proposals.
- Assisted tribes in the implementation of lamprey translocation program by collecting lamprey at main stem dams.
- The Hanford Coded Wire Tag and PIT tagging projects had a third consecutive record-breaking year with 2017 having the highest tag output and lowest mortality rates in the 31 years of this project.
- Collaborated with Nez Perce to collect, recondition, and release 98 (approximately 20% increase in female spawners) wild adult Group B steelhead into the Snake River.
- Developed a reference genome assembly for Chinook salmon that has enabled identification of the genetic basis for traits such as premature migration, adult run-timing, and age-at-maturity. Markers for these traits will be incorporated into standard genotyping panels to monitor trait variation in addition to specific stocks.
- Established methods for classifying individual males as mini jacks or immature, and verifying that males classified as mini jacks based on 11-KT go on to be ready to spawn in the fall.
- Worked with staff at Umatilla to complete needs assessments at CRITFC, Nez Perce, and Warm Springs to begin installation of Centralized Data Management Systems at each site.
- Renewed contractual agreement with PFMFC for alternative spill study to inform BiOp EIS NEPA requirement. Performed analysis to predict juvenile migration survival benefits of breaching lower four Snake River dams, and long-term recovery benefits for Snake River spring/summer chinook.

- Published 10 papers in professional journals and gave 28 professional presentations at conferences.

Fisheries Enforcement: CRITFC's Enforcement Department (CRITFE) patrols 150 miles of the Columbia River, including its shorelines in Oregon and Washington. In this area, we are the primary provider of enforcement services at 31 In-lieu and Treaty Fishing Access Sites (IL-TFAS) developed pursuant to P.L.87-14 and P.L.100-581 for use by treaty fishers from the Commission's four member tribes the Yakama, Umatilla, Warm Springs, and Nez Perce. CRITFC's officers have obtained IA Special Law Enforcement Commissions to aid their efforts protecting and serving tribal members and federal trust properties along the Columbia River.

- Responded to In-lieu and Treaty Fishing Access Sites for assaults, domestic violence, thefts, drug and alcohol use, animal neglect, disorderly conduct, traffic complaints, and with weapons.
- Conducted welfare checks on tribal members at the request of family and/or social service agencies; medical assistance was provided when needed.
- Conducted a class on "Cultural Resource and Archaeological Protection" to police officers and Corps park rangers and archaeologist.
- Assisted Warm Springs Fish and Wildlife Committee in revising codes including adopting boating safety regulations.
- Working with state agencies to promote case referrals to CRITFE for filing charges in tribal courts.
- Cultural oriented training was attended by approximately 100 state and local social service providers.

Fishing Site Maintenance Department: The Fishing Site Maintenance Department (FSMD) is for In-Lieu and Treaty Fishing Access Sites operations and maintenance. The department's purpose is to provide and support the operational infrastructure of the In-Lieu and Treaty Fishing Access Sites to meet the organizations goals.

- Coordination with IA on the Health, Safety and Sanitation site improvements bill working its way through Congress.
- Completed first year of the second three-year clean-up program. Sites completed during this first year included Dallesport, Celilo, Pasture Point and North Bonneville IL-TFAS.
- Coordination with IHS/EPA in continuing to maintain Safe Drinking Water Act standards on all sites with wells maintained by CRITFC – FSMD.
- Emergency repairs completed for water systems at Cooks, Dallesport and Pasture Point IL-TFAS.
- Crew member development included certification through the Very Small Water System Operator training, leadership training, water system maintenance training, HAZMAT and oil spill awareness training.
- Crews and tribal fishers at helped with the removal of more than 120 cubic yards of trash and abandoned personal property at Lone Pine, Underwood and Cooks IL-TFAS.

Chippewa-Ottawa Resource Authority (CORA):

Biological Assessments

Inland Fisheries – 129 miles of stream assessed

Wildlife – 178,293 acres assessed

Inland Harvest – 1,565 Registered

Conservation Law Enforcement Officer (CLEO) Activities

175 Patrol Hours logged

1,137 Complaints investigated

167 Citations issued

1,368 Great Lakes Trainings attended

Northwest Intertribal Fisheries Commission (NWIFC):

(Western Washington Fisheries Management):

NWIFC Tribal Fish Health Center's (TFHC's) Activities: The Tribal Fish Health Center (TFHC) provides fish health services to our 20 western Washington Treaty tribes. The following is a breakdown of the quantity of some of the services we have provided.

Case Load: The total number of cases processed annually by the TFHC is approximately 500 per year. A case represents a group of fish from a tribal hatchery that was examined by a TFHC pathologist for the purpose of assessing their overall health. In many of these cases, laboratory assays were run to test for fish pathogens.

TFHC Vaccine Production: The TFHC produces vaccines annually that are used to immunize fish reared at tribal hatcheries against two bacterial diseases. Vaccines provide a low cost method of using the fish's natural immune system to provide protection and reduce the use of antibiotics to control disease at tribal hatcheries. In 2016, we produced 120 liters of vaccine and vaccinated over one million juvenile salmon in 2017.

Ohop Creek Restoration: The Nisqually Tribe, the Nisqually Land Trust, and the South Puget Sound Salmon Enhancement Group are tacking on another 1.5 miles of restored habitat to Ohop Creek. Ohop Creek is one of two major tributaries to the Nisqually River that can support Chinook salmon and steelhead, both of which are listed as threatened under the Federal Endangered Species Act. Because there are only a few places other than the mainstem of the Nisqually River where they can spawn, increasing the quality of habitat in those places is important. Ohop Creek also supports Coho and pink salmon and cutthroat trout.

1854 Treaty Authority: Selected Accomplishments - Resource Management - Treaty Rights

Implementation: The 1854 Treaty Authority managed seasons to hunt, fish, and gather in the 1854 Ceded Territory. Activities included setting seasons and limits in accordance with the agreement with the

state of Minnesota and other applicable regulations, managing tagging and registration requirements, and completing the necessary reporting.

The four primary goals of the organization are:

1. Provide an organization capable of delivering 1854 Treaty Authority programs to its qualified constituents;
2. Protect, preserve, and enhance the off-reservation hunting, fishing, and gathering rights of the Grand Portage and Bois Forte Bands of the Lakes Superior Chippewa;
3. Protect, preserve, and enhance the trust resources of the 1854 Treaty Area;
4. Preserve culture by fostering interest, participation and understanding of the traditions and practices that are integral to the Ojibwe way of life.

In order to meet the mission and goals of the organization, the program funding assisted the organization in developing and implementing conservation codes which govern hunting, fishing, and gathering activities, providing associated biological and environmental services, conducting outreach activities, regulating activities through conservation enforcement, and performing judicial services as needed.

Wildlife: The 1854 Treaty Authority coordinated a regional small mammal survey as an index to prey populations for furbearers and owls. Additionally, staff cooperated in conducting surveys for ruffed grouse, furbearers (scent post/winter track), loons (11 lakes), wolves, and owls. Moose monitoring and research efforts were also a focus (aerial population, habitat use, and mortality surveys). In partnership with The Nature Conservancy, efforts to enhance moose forage availability and condition were undertaken on several hundred acres. A project to GPS collar wolves was initiated to increase our knowledge of pack sizes and distribution in a portion of the ceded territory. These are key elements needed to accurately monitor wolf population numbers and status in the ceded territory. Surveys of waterfowl use at two recently established waterfowl refuges were conducted. Habitat improvement projects and maintenance activities were completed at waterfowl impoundments.

Wild Rice: The 1854 Treaty Authority continued its long-term monitoring of 10 wild rice waters which began in 1998, including examining water chemistry, water levels, and rice biomass. Another 11 waters were surveyed to evaluate their suitability as current or future rice habitat. An inventory of wild rice waters in the 1854 Ceded Territory was updated and maintained. Beaver management was completed at wild rice lakes when necessary. Assistance was provided in the coordination and completion of the annual flights for aerial photographs of approximately 80 wild rice waters. The 1854 Treaty Authority cooperated with other partners for wild rice restoration work at 10 locations in the St. Louis River estuary, and specifically completed monitoring at all sites in 2016. The 1854 Treaty Authority provided wild rice condition updates to harvesters during the ricing season.

Fisheries: Walleye spawning population assessments were conducted on three lakes, along with index surveys of walleye recruitment on 13 lakes. Bottom trawling surveys were conducted spring, summer, and fall 2016 to monitor abundance and distribution of native and non-native fish in the St. Louis River estuary. Additional trawling and larval drift netting were completed to detect evidence of naturally

reproducing lake sturgeon. Assistance was provided with the Lake Superior lake wide sturgeon assessment which is completed every five years. Staff also participated in a revision of the State's Lake Superior Fishery Management plan. Participation in the Great Lakes Fishery Commission at the Executive, Lake, and Technical committee levels was continued.

Invasive Species: Invasive species technicians were employed in 2016 to complete activities outlined in our invasive species management plan. Staff worked boat landings within the 1854 Ceded Territory to inspect watercraft for invasive species, and cleanings were completed with our decontamination unit when necessary. Early detection and monitoring for aquatic invasive species were completed. Additional work was done within areas of wild rice to determine potential impacts from rusty crayfish. Cooperation occurred with other partners on identification and planning for control of invasive reed (phragmites) in the St. Louis River estuary. A list of infested waters in the 1854 Ceded Territory was maintained and made available to field staff and band members. The 1854 Treaty Authority was also active with terrestrial species and pests, including identifying locations of invasive species and completing control efforts. Staff cooperated with other organizations to work booths at public outreach events in the region. The program has been successful in developing partnerships with Federal, state, county, local, and nonprofit agencies and organizations.

Conservation Enforcement: The 1854 Treaty area encompasses 6.4 million acres of land and water (including Lake Superior) that make up the Enforcement Divisions' geographic jurisdictional authority. The 1854 Treaty Authority employed three full-time officers this past year. Daily activities include patrol of land and water, as well as joint patrol with other tribal, state, Federal and other local government units. These Officers practice and promote Community Policing efforts such as: conducting various safety trainings, participating in educational and outreach activities, cooperating on special projects/details, attending enforcement related trainings, as well as providing security on wildland fire details.

Subactivity - Tribal Management/Development Program (FY 2019: \$8,660,000; FTE: 2):

Program Overview:

Individual tribes have jurisdiction over hunting and fishing activities on trust lands, and the Tribal Management/Development Program (TMDP) supports tribal self-determination by allowing tribal management of fish and game programs on Indian reservations. The program activities implemented under TMDP are not court ordered but provide a means for tribes to prioritize and implement natural resource management activities for their communities.

Contract agreements are executed with individual fish and wildlife resource tribes to accomplish management objectives. Tribes administer programs that contribute significantly towards economic development and meet the growing national demand for outdoor recreation and tourism. These programs ensure the protection of millions of acres of habitat necessary for the conservation of fish, wildlife, and plant resources.

All management objectives are set by the respective tribal governments; IA monitors contract agreements for each tribe to ensure program compliance and the appropriate use of funds. The established tribal programs funded through the Tribal Management Development Program are listed as follows:

TMDP Core Programs

Alaska Native Subsistence Program: Funds support IA's role in the Federal Subsistence Management Program in implementing Title VIII of the Alaska National Interest Land Conservation Act (ANILCA).

Tribal Fish & Game Projects: This program provided base funding for 26 tribal fish and game management programs and enforcement of tribal fish and wildlife codes through acquisition of conservation law enforcement officers. The development and enforcement of fish and game codes is the cornerstone of fish and wildlife management, and tribal lands provide an important component of fish and wildlife habitats across the larger landscape. These funds allow tribes to manage habitat and fish and wildlife resources while also collaborating with adjoining land managers to accomplish landscape level management needs.

Native American Fish & Wildlife Society: An organization of tribal biologists and conservation officers that provides needed conservation officer training, technical services to tribes, and youth programs to introduce Indian youth to careers in the natural resource field.

Lake Roosevelt: Provides funds for the Confederated Tribes of the Colville Reservation and the Spokane Tribe of Indians as part of a Memorandum of Understanding (MOU) to conduct law enforcement and safety patrols along over 150 miles of the shoreline of Lake Roosevelt, in north central Washington State.

Upper Columbia United Tribes (UCUT): The UCUT unite for the protection, preservation, and enhancement of their rights, sovereignty, culture, fish, water, wildlife, and habitat for the benefit of all. The UCUT represents nearly 20,000 enrolled tribal members and has management authority and responsibility over approximately 2 million acres of reservation land, 14 million acres of aboriginal territories, over 500 miles of navigable waterways, 40 interior lakes, and 30 dams and reservoirs. The natural resources managed by the UCUT yields millions of dollars annually to the fishing, hunting, forestry, and recreation economies in North Idaho and Eastern Washington.

The TMDP funding allows the UCUT members to harvest and share fisheries resources through a comprehensive salmon harvest, sharing and distribution program. The UCUT is engaged in the Columbia River Treaty (Treaty) to develop a goal of modernizing the Treaty to further ensure a comprehensive ecosystem-based function throughout the Columbia River Basin watershed.

The UCUT are leading a collaborative effort for examining the viability of restoring fish passage at Chief Joseph and Grand Coulee dams, which have blocked anadromous fish from the upper Columbia River Basin for 80 years. Both the Regional Recommendation on the Treaty, and the Northwest Power Act Program Amendment support this action. The UCUT lead the policy and technical level scientifically-based phased approach to determine and test the feasibility of reintroducing anadromous fish into habitats above the blocked areas.

Inter-Tribal Buffalo Council (ITBC): The ITBC provides trust asset support for the tribal Yellowstone Bison Management program, the Yellowstone Bison Quarantine program, fulfills agency participation in the DOI Bison Management work group in support of the DOI Bison Leadership Committee, and assists Yellowstone National Park Bison management participation by the Inter-Tribal Bison Council.

The ITBC also provides technical assistance and services to the 60 member tribes, including those participating in the Yellowstone Bison Quarantine program. The funding also helps to facilitate the transfer of bison from the Federal parks and refuges to the tribes.

Wetlands/Waterfowl Management (Circle of Flight): The Circle of Flight program is the Midwest Region's waterfowl and wetland enhancement program. Up to 35 tribes, the Great Lakes Indian Fish and Wildlife Commission, Chippewa Ottawa Resource Authority, and the 1854 Treaty Authority are eligible to participate in this program. Existing contracts are executed in support of tribal wetland rehabilitation, waterfowl habitat enhancement, and wild rice production projects on Indian lands and ceded territories in the States of Minnesota, Wisconsin, and Michigan. Improved tribal wetland habitats support local wildlife populations, tens of thousands of additional ducks and geese in spring and fall migrations, provide expanded hunting opportunities for tribal members and the general public, and offer enhanced wild rice gathering opportunities and economic development possibilities for tribes.

During FY 2017 the IA-MR funded fifteen (15) Circle of Flight projects. These Projects included:

Great Lakes Indian Fish & Wildlife Commission: *It takes a village – and time:* Funding from Circle of Flight (COF) and Great Lakes Restoration Initiative (GLRI) programs certainly makes the big moments possible – though it can take some time getting there. As every field biologist knows, wetland restorations of any size tend to be complicated and time-consuming. In 2016 two projects first initiated in 2012 reached fruition, making big impacts in northwest and northeast Wisconsin. Both efforts were conducted in cooperation with the Wisconsin DNR on state lands within the ceded territory

1854 Treaty Authority: *Waterfowl Impoundment and Wild Rice Management, Invasive Species, Wildlife Habitat:* The 1854 Treaty Authority continues to work on initiatives to benefit moose. Since 2014 we have visited nearly 300 sites that have had some sort of vegetative disturbance (wildfires, prescribed burns, various timber management activities like clearcuts, thinnings, mechanical or hand shearing, etc.) with the goal of comparing stand regeneration characteristics and evaluating moose utilization of the sites for browse. Moose browse is being looked at in terms of what species are available, and which of those species seem to be preferred by moose in summer (leaf on) and winter (leaf off). A number of the sites we are monitoring are being managed primarily for moose, including sites where GLRI funding allowed us to partner with The Nature Conservancy in forage regeneration activities for moose. At nine of these locations we are also using GLRI funding to help conduct annual winter moose counts for 20 years as part of the broader aerial moose census of the ceded territory each winter. While we plan to continue these efforts for a number of years, the initial results are already being utilized in discussions with USFS, MnDNR, and counties as wildlife habitat and timber management projects are designed and implemented.

The Little River Band of Ottawa Indians (LRBOI): *Native Species Stewardship - Lake Sturgeon:* For the past 15 years lake sturgeon management, restoration, and research have been a priority within the Big Manistee River. LRBOI celebrated the 13th Annual Sturgeon Release Ceremony in the fall of 2016 with the release of 7 lake sturgeon from the Tribes save-our-sturgeon assessment. These fish were collected during the week before the chemical treatment of the Manistee River for sea lamprey control efforts by the US Fish and Wildlife Service (USFWS). The release ceremony helps achieve a primary goal of the LRBOI Nmé (lake sturgeon) Stewardship Plan by bringing sturgeon and people back to the river in celebration. While this year's release didn't celebrate the traditional rearing of sturgeon and release back into the water, it celebrated the collaborative efforts to assist these fish in making it past a critical life stage road block where limited survival occurs to those exposed to the chemical treatment for control of the invasive sea lamprey.

Lower Sioux: Restoring Wild Rice: In September 2016, the Lower Sioux Community's Office of the Environment purchased 1000 lbs of wild rice from the Leech Lake Band. The rice was seeded at five different sites which were deemed appropriate for rice habitat. An education and outreach event was hosted by the Office of the Environment to facilitate awareness of the project which was met with full attendance. Community members showed up with wild rice dishes to pass, stories of wild rice harvesting growing up, and excitement of what re-establishment can mean for the future. Community members, made up of elders, also gathered at a site targeted for wild rice seeding and eagerly helped with the seeding process. The funding provided by the Circle of Flight grant has enabled the tribe with the opportunity to build community interest, education, and excitement associated with the restoration of historical wild rice beds. In the fall 2016, Community members also processed wild rice from green rice to edible rice.

Grand Traverse Band: Restoring the Grand Traverse Band's Manoomin: The grant provided the GTB community with its first local ricing camp in recent times, led by Lee Sprague, a knowledgeable teacher who shared important information and teachings about manoomin with our community for a three day weekend at Grass Lake. Grass Lake and the Betsy River contain the nearest existing remnant population of manoomin to the Peshawbestown reservation. We had over 50 participants harvest, process, and cook manoomin. Feasts were prepared and enjoyed, and manoomin stories and knowledge were shared.

Chugach Regional Resource Commission: The Chugach Regional Resources Commission (CRRC) is a private non-profit consortium comprised of the seven Alaska tribal governments located within Alaska's Chugach Native Region in south central Alaska. The CRRC has been working with its member tribes for many years in natural resource management and development. These include the Nanwalek Indian Reorganization Act Council, Port Graham Village Council, Chenega Indian Reorganization Act Council, Tatitlek Indian Reorganization Act Council, Native Village of Eyak, the Qutekcak Native Tribe, and the Valdez Native Tribe. The success of these programs

from both an economic and a social standpoint have made them an integral part of overall tribal development.

The Chugach Regional Resources Commission passed a resolution this fiscal year to become members the Indigenous Peoples Council for Marine Mammals to keep better informed on the issues surrounding marine mammals and how they affect the subsistence activities of the Tribes and their members.

The Executive Director attended the U.S. Fish & Wildlife Service Regulations Committee meeting in Minneapolis in late October to present the subsistence regulations for migratory birds. All subsistence regulations presented were passed by the committee and included the approval of a subsistence harvest season for emperor geese.

Several meetings were held with Nanwalek IRA Council members, staff, and community members regarding the Sockeye Salmon enhancement project. It is the desire of the community to rejuvenate the project and become more meaningfully involved in the management of this important subsistence fishery. CRRC supported this project last fiscal year and will continue to do so into this fiscal year. Partnerships are being pursued and developed with organizations that can assist the Tribe, such as the Cook Inlet Aquaculture Association, the Alaska Pacific University (APU), Chugachmiut, and the Alaska Department of Fish & Game. Jeff Hetrick, Alutiiq Pride Shellfish Hatchery Director, is the CRRC lead for this endeavor.

A young graduate student, who is a Native from Canada, will be assisting with this project along with the other students APU is planning on bringing to the village for assistance. Jeff Hetrick, Alutiiq Pride Shellfish Hatchery Director, is the CRRC lead for this endeavor, and Martin Leonard with Chugachmiut has been working hard keeping everyone organized and meeting on a regular basis.

The executive director attended the workshop entitled Long-Term Challenges to Alaska's Salmon and Salmon-Dependent Communities in Anchorage during the first week in November. The workshop focused on identifying and addressing long-term challenges to Alaska's salmon, and also on long-term challenges to communities that depend on salmon.

The IA held their annual Providers Conference at the Denai'na Center in Anchorage during this quarter. Many people from the Chugach Region attended the conference, including some of the CRRC Board Members. The executive director and staff participated in the natural resource track of the conference, as well as the sessions addressing climate change.

The Executive Director also participated in the Chugachmiut Heritage Preservation Department's Open House in December. CRRC continues to provide technical expertise in analyzing the heritage kits, providing suggestions for improving them, and provided advice on how to incorporate indigenous ecological knowledge into the kits and the program as a whole.

Participated in the Alaska Board of Game meeting in Bethel. The purpose was to present a proposal recommending a harvest framework for the general hunt of Emperor Geese. This species had been

experiencing declining populations, so an agreement was made under the Yukon Delta Goose Management Plan to cease harvest of the emperor geese. After nearly 30 years, the population reached a level to sustain a harvest, so a legal harvest was approved by the Service Regulations Committee last fall. The Board of Game passed the proposal.

The CRRC staff participated in the Chugach Region Economic Summit held in early February. We put together the panel on mariculture, which was very well received. We also participated in the panel on food security, and distributed copies of our questionnaire on food security and food sovereignty. The 16th Annual Subsistence Memorial Gathering was held March 23, 2017. There was a full-day workshop on food security prior to the regularly scheduled evening activities. The theme for this year's Gathering was *When the Tide is Out, the Table is Set: Protecting our Traditional Foods*. The sessions were divided into four topic areas: Hunt, Fish, Gather, and Grow, and began with an introduction on CRRC's traditional food initiatives and an overview of the day.

A preliminary meeting was held with Michelle Pryor of the Tatitlek Corporation to discuss possible mariculture projects that could potentially be housed in the Tatitlek Village IRA Council's mariculture processing building in the village. A commitment was made to continue working together to explore options discussed and to bring in additional partners to assist in this process. The Chugach Alaska Corporation and Chugachmiut have both expressed an interest in participating.

Alutiiq Pride Shellfish Hatchery:

Overview: The hatchery is over wintering cockles, littleneck and butter clams produced in 2016 for out stocking in May of 2017. We are holding abalone adults and expect to get red king crab brood stock in January. The hatchery has been culturing littleneck and butter clams and cockles spawned in May of 2016 for the out stocking of shellfish sanctuaries in Port Graham and Resurrection Bay in 2017.

Enhancement Projects: Considerable time and effort has gone into developing the shellfish sanctuary concept in Port Graham and Resurrection Bay. Land use permits were acquired from DNR for Port Graham and the Alaska Railroad for Resurrection Bay.

The Port Graham Shellfish Sanctuary was stocked with 220 little neck, 200 cockles and 220 butter clams adults. Unfortunately, there was very poor survival. It is thought that the clams were stressed when dug, shipped and replanted. Otters obviously played a role. We will try again next spring with more intense predator control.

Ocean Acidification Monitoring: We have committed a lot of time to our Ocean Acidification (OA) monitoring lab. In addition to under taking processing 300 discrete samples from our cooperators in south-central Alaska we have also completed our first dosing experiment. We have been doing continuous monitoring of our intake and have been processing the samples collected from the villages and our science partners. We have over 300 samples waiting processing. The Burk-O-Later requires continual maintenance and calibration.

We performed our first dosing experiments on butter clams with Dr. Amanda Kelly newly (Ocean Acidification Research Coordinator with the University of Alaska) and Cale Miller her PhD. Candidate. The experiments went very well.

We performed our first dosing experiments on butter clams with Dr. Amanda Kelly newly (Ocean Acidification Research Coordinator with the University of Alaska) and Cale Miller her PhD. Candidate this past November. The results were published in several scientific journals. We have just finished identical experiments with littleneck clams and cockles. We hope to host similar experiments with other shellfish we raise.

Maintenance and Physical Plant: The hatchery has finally entered into a preventative maintenance program. The only significant project this winter was the installation of new chillers donated from the university of Alaska. The chillers were installed in case the king crab broodstock were collected early and the temperatures were high. In 206 warm water s cause the crab to release their larvae early and in a much compromised state. In October we were notified that the University of Alaska was shutting down its “Silver Lab” due funding considerations and costs to upgrade it's depuration system. That shut down has been delayed until June 2017. APSH has been utilizing their saltwater system as a matter of convenience and cost savings.

Salmon and Steelhead Habitat Inventory and Assessment Program: In 1995, the Northwest Indian Fisheries Commission (NWIFC) and the State of Washington established the Salmon and Steelhead Habitat Inventory and Assessment Program (SSHIAP) as a partnership-based information sharing project. SSHIAP provides data management, sharing, and analysis on freshwater, marine, and nearshore habitat, and salmonid stock distribution within Washington State. The goal of SSHIAP is to advance the understanding of salmon and steelhead habitat by promoting the development, acquisition, dissemination, and delivery of key habitat information to resource managers, researchers, and policy makers. SSHIAP organizes data utilizing a geographic information system (GIS) that allows for local watershed and regional scale analysis. This analysis assists the co-managers of the State of Washington by identifying salmonid habitat protection and restoration efforts, and track status and trends in habitat conditions over time. GIS enhances the ability of SSHIAP to integrate and analyze habitat information acquired from a wide variety of sources.

Much work has been accomplished since SSHIAP began, including completion of routed hydro-layer in western Washington attributed with gradient, confinement, habitat type, fish distribution, migration barriers and more. SSHIAP continues to evolve into a modern spatial data management, analysis and sharing system and has been used for a variety of projects including prioritizing salmon restoration projects for the Washington State's Salmon Recovery Funding Board (SRFB), several Timber, Fish and Wildlife (TFW) watershed analyses, salmon life history modeling exercises such as Comprehensive Coho and EDT model, nearshore mapping and “change analysis” efforts with the Puget Sound Partnership, the development of the Water Quality and Juvenile Migrant Data Exchanges and in 2012 the completion of the State of Our Watersheds Report (<http://maps.nwifc.org:8080/sow2012/>). In addition to providing data through this GIS data management system, SSHIAP staff provides technical support to tribal habitat and

natural resource staff on various fronts in their respective regions, from GIS/GPS, to providing review of culvert data, habitat recovery actions, and land use policies that affect the tribes.

SSHAP has quickly moved to utilizing a web-based interactive map service which enables managers, scientists and the general public to access information about their individual watersheds and the region which surrounds them. Our objectives are to document past and present habitat conditions; build a consistent approach to storing and analyzing habitat and monitoring data; assess habitat quantity and quality; assess relationships between stocks and habitat, and recommend integrated protection and restoration strategies.

Program Performance:

Upper Columbia United Tribes (UCUT): The Upper Columbia United Tribes (UCUT) has an ongoing mission to serve its member Tribes' needs and interests, and continue its role in coordinating fish and wildlife mitigation and restoration work, and developing and participating in efficient regional partnerships that result in direct on-the-ground implementation of cost effective projects. The UCUT perform essential government functions necessary to fulfill federal trust responsibilities concerning the use, protection and restoration of public resources, with significant benefits provided to regional economies across the Northwest.

The UCUT have lead efforts in the renegotiation of the Columbia River Treaty (Treaty), and amendments to the Columbia River Basin Fish and Wildlife Program (Program) under the Northwest Power Act, to re-establish anadromous fish above Grand Coulee and Chief Joseph dams. These dams and subsequent river operations eliminated salmon and other fish from thousands of miles of habitat in both the United States and Canada. Due to UCUT efforts, restoring fish passage and reintroducing anadromous fish are now being investigated and implemented as a key element of integrating ecosystem-based function and restoring environmental justice into the Treaty and the Program. Present efforts are aimed at incrementally determining the viability of anadromous fish reintroduction, beginning with a series of

preliminary planning, research and experimental pilot studies designed to inform subsequent strategies and actions. The UCUT are finishing the Phase 1 report of the feasibility of reintroducing migratory anadromous fish into the blocked habitats above Chief Joseph and Grand Coulee dams - including habitat, risk assessments, and donor brood-stock assessments, life-cycle modeling, and analyses of techniques being employed at high-head dams in the Pacific Northwest and worldwide to restore passage of migratory fish. The Tribes include a large outreach and education program for these efforts, including the production and release of a new documentary movie title “United by Water” – archiving the efforts of the five UCUT to resurrect the building and use of dugout canoes, symbolizing and pursuing the reintroduction of salmon into the blocked habitats above Grand Coulee and Chief Joseph dams.

Future objectives for FY18 include effective participation in the Columbia River System Operation (NEPA on the major Federal Columbia River Power System dams and reservoirs); Columbia River Treaty re-negotiations; and finalizing Phase 1 of the Fish Passage and Reintroduction Work Plan and transitioning to Phase 2; completion and public and policy outreach of the tribes Columbia River Basin Valuation Report – explaining the natural capital value of the Columbia Basin ecosystem; and continued improvements to networking, outreach, and coordination with the five member tribes and other governance entities in an effective and cost-efficient manner.

Tribal Fish & Game Projects: Provided funding for 26 tribal fish and game management programs including conservation enforcement at: Blackfeet, Crow, Fort Belknap, Fort Peck, Northern Cheyenne, Wind River, Bad River, Great Lakes Tribes, Lac Courte Oreilles, Lac du Flambeau, Mole Lake, Red Cliff, St. Croix, Stockbridge-Munsee, White Earth, Fort Hall, Nez Perce, Yakama, Ute Mountain, Zuni, Hualapai, Colorado River, White Mountain Apache, San Carlos Apache, Summit Lake, and Uintah & Ouray.

Inter-Tribal Buffalo Council (ITBC): In FY 2017, the ITBC provided 58 of the 60 member tribes with technical assistance on bison management. Eleven on-site visits were conducted to assess current and potential bison programs. One national and five regional training sessions were held for bison managers and technicians. Over 392 surplus bison were distributed to 6 member tribes aside from the approximately 500 surplus bison moved under special agreement to tribes local to two parks. The ITBC supported tribal economic efforts that utilize bison as an economic resource through six trainings on buffalo program sustainability. Sixty-nine bison were procured from tribes for the Cooperative Marketing Program. Seventy tribes were provided with technical assistance on infrastructure needs, development, and marketing. There were thirty-five buffalo provided to eleven tribes for Health Care Programs. The ITBC is an active member of the Inter-Agency Bison Management Plan Partnership, overseeing the management of bison in the Greater Yellowstone Area and is actively involved with parks and refuges that provide surplus bison to the tribes. There was a variety of training opportunities provided by ITBC including drought management, marketing considerations, and incorporating buffalo meat into school lunch programs. ITBC has expanded the model developed with Flandreau Santee Sioux Tribe Health Department, Elderly Nutrition Program, Flandreau Indian School, and South Dakota State University to the Sisseton Wahpeton Oyate, Spirit Lake Nation, Taos Pueblo, Cheyenne and Arapahoe Tribes, Shoshone Bannock Tribes, Crow Tribe, and Iowa Tribe of Oklahoma. ITBC has done a number of nutritional content and health benefits of buffalo meat studies

and presentations of the findings. ITBC developed traditional use brochures and have been translating them into native languages.

Salmon and Steelhead Habitat Inventory and Assessment Program: In FY 2017, the development of the AquaScape GIS platform used for data analysis and storage, development of data solutions, and the development of the SSHIAP Interactive Map Tools for tribal and general public consumption of natural resource data was continued. SSHIAP will further efforts to provide GIS and data management support to each of the NWIFC member tribes and provide the central/regional support including the coordination with the Washington state agencies. SSHIAP will also provide GIS training/support and technical assistance.

Subactivity - Endangered Species (FY 2019: \$1,306,000; FTE: 1):

Program Overview:

This program coordinates IA and tribal responsibilities regarding compliance with the Endangered Species Act (ESA), Pub.L. 93-205, and the related protection and preservation of trust lands and resources. Due to IA oversight authority, tribal projects are subject to Section 7 of the ESA which causes tribal activities to have more restrictions than would be required of private landowners, corporations, or states. For many tribes, trust resources such as timber, water, and fisheries, represent the only stable source of income. Funding for the ESA program has enabled IA to supplement the costs associated with meeting the mandates of Section 7 of the ESA on tribal lands, while also allowing tribes to protect, recover, and manage important species, whether afforded protections by Federal or tribal listing processes.

Subactivity - Integrated Resource Info Program (FY 2019: \$2,576,000; FTE: 3):

Program Overview:

The Branch of Geospatial Services (BOGS) is the single geospatial technical center for the IA which operates in conjunction with the Division of Land Titles and Records to deliver accurate, timely and cost-effective Federal land title service to Indian beneficiaries and Tribes. This office provides GIS software, training, technical support including geospatial database management, programming and project support. This work is required for land status title mapping and sound management of natural resources on over 10 million acres belonging to individual Indians and 46 million acres held in trust or restricted status for Indian Tribes.

The BOGS consists of four main program areas: Extended Services, Geospatial Training, Enterprise License Agreements, and the Geospatial Help Desk. Geographic Information Services (GIS) delivered by BOGS provides tribes, approximately 4,000 tribal members, resources to strengthen their governments, exercise their authority as sovereign nations, enhance the quality of life in tribal communities, and protect and preserve trust lands and trust resources. Through the support by IA, many tribes have been able to expand their use of GIS to enterprise level and use GIS as a tool to be more efficient and self-sufficient. The BOGS is developing new authoritative National Trust Land Boundary data to be shared across DOI, with tribes, and other Federal and state agencies. Partnerships and delivery of this information avoids

duplication of efforts between agencies, establishes one authoritative source, eliminates the distribution of inaccurate and misinformation, and improves and increases the delivery of professional trust services. The GIS has the ability to accurately and rapidly translate and graphically display land ownership and encumbrance information from alphanumeric Trust Asset Accounting Management System (TAAMS) data. This data is used to create land status maps, conduct analysis, modeling, reporting, and monitoring and will support the new TAAMS Map Viewer.

Subactivity - Agriculture & Range (FY 2019: \$27,979,000; FTE: 113):

Program Overview:

Agriculture Program (TPA) [\$22,220,000; FTE: 113]:

The Agriculture and Rangeland Management Program promotes multiple use and sustained-yield management on over 46 million acres of trust Indian land dedicated to crop and livestock agriculture. Program responsibilities are carried out by IA agency personnel or by individual tribes through Indian self-determination agreements under Pub.L. 93-638.

Activities include soil and vegetation inventories and noxious weed surveys that provide data to support programmatic and lease/permit-level planning, land-use management decisions, and program review and development. IA staff provides technical assistance to and participates with Indian landowners, tribal governments, and land users to develop, update, and amend land use plans under the principles of sustained-yield and multiple-resource management. The program supports programmatic resource management planning (Integrated and Agricultural Resource Management Plans) which incorporates reservation-level goals for resources and activities designed to meet those goals. Conservation planning for individual leases and permits is also supported where specific land-unit goals, activities, and responsibilities are described. Technical support is provided for the design, engineering, and implementation of cropland and rangeland improvements, such as drainage systems, erosion control, fencing, and livestock water sources. Staff work to secure financial assistance for the implementation of agricultural improvement projects as well.

Invasive Species [\$5,759,000]:

There are two components to the Invasive Species program.

- The noxious weed program provides on-the-ground management and treatment of noxious weeds on trust rangelands. This component provides financial and technical assistance to Bureau agencies, tribes, and tribal entities to implement weed control projects on trust rangelands. Competitive funding criteria emphasize cooperative and integrated weed management, local priority species, and Early Detection/Rapid Response. To extend the reach of program funding and to ensure cooperator commitment, funding requires a minimum of 50 percent non-program cost-share contribution. The program also provides and supports weed awareness training and research into biological control.
- This program also provides for an invasive species program which provides funding to assist tribes in the management, control, and prevention of invasive species threats that occur outside the realm of agricultural operations. This component of the Invasive Species program protects important tribal resources such as fisheries, wildlife, clean water, healthy ecosystems, and forest health, by providing tribes with funding to address invasive species issues on a landscape level, through collaboration or by developing their own management strategies where ongoing efforts do not exist. This funding allows tribes to participate in collaborative and landscape level invasive species management efforts.

Regional weed coordinators will continue to work to increase the number of tribes implementing noxious weed management programs and to boost participation in cooperative weed management organizations. The Program will also encourage completion of dedicated noxious weed inventories in order to increase the number of reservations with current noxious weed inventory data needed to support weed management planning and control decisions. Impacts from invasive species occur primarily at a landscape level, and thus program efforts in FY 2019 will emphasize support for projects that increase

tribal participation in cooperative, stakeholder-driven planning and management efforts to help ensure that tribal issues and solutions become part of resulting management strategies.

Subactivity - Forestry (FY 2019: \$48,872,000; FTE: 177):

Program Overview:

The Forestry Program conducts management on Indian forest land in accordance with sustained yield principles in an effort to develop, maintain, and enhance forest resources. Indian Forestry has a unique standing among Federal land management programs in that the Congress declared the United States has a trust responsibility toward the management of Indian forest lands pursuant to the National Indian Forest Resources Management Act of 1990 (P.L. 101-630, Title III, 104 Stat. 4532). This responsibility extends to the management of Indian forests covering a total of 18.7 million acres of which 8 million are timberland and 10.7 million acres are woodland.

The IA and tribal forest managers recognize forest and ecosystem health does not stop at the reservation border. Creating resilient, productive forestlands within and adjacent to Indian reservations requires collaboration with Federal, State, and private landowners. The Tribal Forests Protection Act of 2004 (Pub.L. 108-278, 118 Stat. 868) was intended to protect tribal forest assets by authorizing the Secretary of Agriculture and the Secretary of the Interior to enter into agreements or contracts with Indian tribes to carry out projects to protect Indian forest land. Through this Act, tribes are working with cooperators such as the U.S. Forest Service and the Bureau of Land Management to create larger cross-jurisdictional land management treatments. In addition to this effort, timber tribes such as Colville and Yakama are taking a leading role in the development of the “Anchor Forests” initiative which involves securing consistent regional wood fiber volume commitments from various Federal, state, and private stakeholders sufficient to support infrastructure investments by forest products companies who rely on a steady, dedicated supply stream to insure economic viability.

Forestry Program (TPA) [\$26,880,000; FTE: 124]:

The Forestry Program (TPA) subactivity funds work associated with the preparation and administration of forest products sales, and the management and technical oversight of those activities. The sale of forest products is a principle trust responsibility and a key source of tribal revenue, tribal employment, and employment of others who benefit from the sale of Indian forest products. Forest products sales support

IA efforts to promote self-sustaining communities and healthy and resilient Indian forest resources. To assist tribes with identifying markets for their forest products, the program partners with the Intertribal

Timber Council in marketing and branding research. The harvesting of forest products is required to maintain forest health and protect Indian forests and communities from wildfire, insect epidemics, and disease infestations. The program encompasses all elements of sale preparation, sale administration, and supervision of forest product harvesting contracts. Forestry staff performs program oversight and administrative activities to ensure compliance with applicable laws and regulations.

Indian Forest Management Assessment: As required by NIFRMA, the Secretary must ensure that Indian forest land management is independently assessed every 10 years. The next scheduled Indian Forest Management

Assessment (IFMAT) meeting is scheduled for 2020. NIFRMA states that Indian Forest Management Assessments shall be national in scope and centered on eight topics of inquiry:

- a) Management practices and funding levels for Indian forest land compared with Federal and private forest lands;
- b) The health and productivity of Indian forest lands;
- c) Staffing patterns of IA and tribal forestry organizations;
- d) Timber sale administration procedures, including accountability for proceeds;
- e) The potential for reducing IA rules and regulations consistent with Federal trust responsibility;
- f) The adequacy of Indian forest land management plans, including their ability to meet tribal needs and priorities (such as harvesting the AAC);
- g) The feasibility of establishing minimum standards for measuring the adequacy of IA forestry programs in fulfilling trust responsibility;
- h) Recommendations of reforms and increased funding levels.

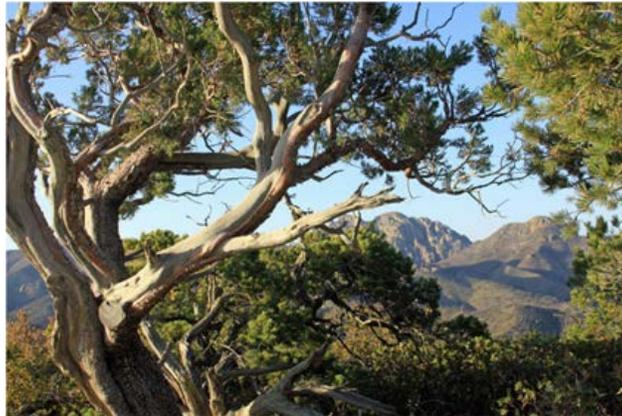

Findings and recommendations developed by the Assessment are used in guiding Indian forest management activities in the future and serve as a principle communication tool in explaining the challenges and opportunities of managing the Indian Timber Trust to the Department, OMB, and Congress.

Forestry Projects [\$21,992,000; FTE: 41]:

This subactivity includes programs such as Forest Development; Forest Management, Inventory and Planning; Woodland Management; and the Timber Harvest Initiative.

Forest Development activities include pre-commercial thinning of overstocked forests as well as tree planting - both essential post-harvest activities that protect stands from wildfire, insects, and disease. The thinning of overstocked stands also accelerates growth rates of remaining trees, increases future volume

yield and stumpage values, improves species composition, and reduces vulnerability to destructive agents.

Forest Management, Inventory and Planning includes geospatial analysis, measurement of trees and other forest vegetation, determination of tree growth, and documentation of long term trends. It also includes the calculation of the allowable annual cut (annual sustained yield harvest), and the development of environmental compliance documents, forest management plans, and forest histories.

Woodland Management activities occur in forested areas where traditional logging operations are considered uneconomical. However, these areas, such as the pinyon-juniper woodlands of the southwest, have important fuelwood, cultural, spiritual, and traditional characteristics important to tribes. Woodland acres may also include valuable niche market products including beams, vigas, latillas, transplants, and species conducive to the manufacture of specialty woodworking lumber. Indian woodlands encompass over 10 million acres. Historically, little emphasis has been placed on treating the deteriorating ecological condition of tribal woodlands which, although lacking quality wood fiber for commercial sale, have important cultural value to tribes. Treatments in Tribal woodlands include density and stand composition manipulation to improve resilience to climatic variability, improved water yield and water quality, control of invasive species, and preservation of culturally important plants and animals.

The Timber Harvest Initiative is used to promote the harvest of forest products on reservations that are unable to meet their allowable annual cut. This funding provides additional resources to IA Agencies or tribes to prepare and offer timber sales, and to administer timber sales.

Fire Recovery: In FY 2019, \$2 million will continue to be used as needed on fire recovery operations, such as reforestation, but also, may be allocated for Forestry Projects activities (Forest Development, Forest Management Planning and Inventory, Environmental Assessments, Woodland Management, or Timber Harvest Initiative).

In 2019, the program anticipates:

- 1,800,000 green metric tons of a potential 3,800,000 green metric tons (47%) of forest biomass are planned to be utilized for energy and other products.

- 19,000 acres of reforestation completed.
- 14,000 acres of commercial forest stand improvement thinning completed.
- Approximately 15 Forestry and Fire Management Student Interns will be supported through the IA/TREES Pathways Program.

Subactivity - Water Resources (FY 2019: \$8,567,000; FTE: 11):

Program Overview:

Water Resources Program (TPA) [\$3,819,000; FTE: 1]:

The Water Resources Program for Tribal Priority Allocation (TPA) allows tribes and IA regional offices to provide for the protection and management of tribal water resources. Funding is used for the administration and management support of individual tribal water programs. Tribes utilize funding to participate in the management and use of regional water resources appurtenant to tribal and Indian trust lands, including public domain allotments. Under this program, funds are also provided to support tribes' diverse water management needs.

Water Management, Planning & Pre-Development [\$4,748,000; FTE: 10]:

The Water Management Planning and Pre-Development (WMPPD) program supports the management, conservation, and utilization of reservation water resources. Funds are utilized for technical studies and developing other information necessary for tribes to serve as informed managers of tribal water resources in a manner consistent with sound economic and conservation principles that enhance the quality of life, environment, and economic conditions on all Indian trust lands. The program assists in developing and maintaining a managerial environment which ensures tribal water resource programs are conducted in a manner consistent with applicable laws and regulations.

The program awards funding for projects using BIA's published process (Notice of Revised Instructions for Preparing and Prioritizing Water Program Funding Requests, Federal Register, Vol 70, No. 201, October 19, 2005). Each year under this process, IA solicits funding proposals for eligible projects from tribes and regional offices. All proposals are evaluated and scored by a review team and prioritized accordingly. The higher scoring proposals are funded at various levels, subject to the constraints of available funding. Due to the nature of the annual competitive process, funds are generally awarded in single-year, as opposed to multiyear increments. In FY 2017, 83 projects were funded including water management planning studies to assist the tribes, data gathering of surface and sub-surface hydrology, technical studies to determine "Best Practice" methods for tribes to use water, and drought management plans for developing water conservation techniques, as well as, projects to support Indian water rights aid in rights protection activities for water rights claims.

Additionally, the WMPPD program supports the BIA Water Resources Technician Training Program where students compete nationally to attend a month long concentrated academic training program in the field of hydrology. Upon successful completion of the training, the students qualify to be placed in Water Resources Internship programs throughout the country with federal and tribal water agencies. They also become eligible as AmeriCorps Interns. This program develops a future workforce able to provide informed water resources management of reservation water resources.

Native Intern Training- University of Arizona, Tucson

Subactivity - Fish, Wildlife and Parks (FY 2019: \$11,436,000; FTE: 2):

Program Overview:

This program supports the IA mission of fulfilling Indian trust responsibilities by enabling tribes to meaningfully exercise their treaty fishing, hunting, and gathering rights. The program funds tribal projects in the areas of fisheries management and maintenance, wildlife management, outdoor recreation management, public use management, conservation enforcement, and related fields.

Wildlife & Parks Program (TPA) [\$5,066,000; FTE: 2]:

This program supports the Wildlife and Parks program at the agency or tribal level. Funding is provided to tribes through a local priority setting process determined by the tribe and IA to fund tribal activities in the areas of fisheries, wildlife, outdoor recreation, tribal youth in natural resources, and public use management, conservation enforcement, and related fields. Activities conducted are determined by tribes, and cover a broad array of diverse fisheries, wildlife, conservation enforcement, public use, habitat management, and related programs. Tribes, through the local priority setting process, will determine any changes in annual funding and performance.

Fish, Wildlife & Parks Projects [\$6,370,000]:

Fish Hatchery Operations Program: This funding is provided to fish-producing tribes in support of associated hatching, rearing, and stocking programs. Tribal fish hatchery facilities are provided with base funding for aquaculture and enable cost share/in-kind cooperative work with neighboring tribes, Federal agencies, and state fishery managers. This type of fish production helps achieve mandated fish recovery efforts throughout the Pacific Northwest and Great Lakes states where all tribes in the States of Alaska, Washington, Oregon, California, Idaho, Minnesota, Wisconsin, and Michigan may benefit.

Tribes in the Pacific Northwest operate 45 salmon hatcheries and rearing facilities (24 hatcheries, 15 rearing ponds, 4 marine net pens, and two remote site incubators). Tribes alone released more than 46 million salmon in 2017. Salmon and steelhead trout released from tribal hatcheries in the Pacific

Northwest benefit Indian and non-Indian commercial and sport fisheries in the U.S. and Canada and help satisfy Indian subsistence and ceremonial needs. In the Great Lakes Region and throughout the rest of the country, recreational opportunities created by the stocking of trout, walleye, and other species provide for tribal subsistence while also attracting sport fishermen to Indian reservations and assisting in the development of reservation economies.

Fish Hatchery Maintenance Program: These funds supplement facility maintenance for 88 Indian hatcheries. Maintenance is mandatory to extend the life of the hatcheries and rearing facilities so tribes can continue their fishery programs. Funding is provided to fish-producing tribes based on an annual ranking of maintenance project proposals received. The ranking factors utilize procedures and criteria in the areas of health and safety, water quality compliance, economic benefits, rights protection, resource enhancement, and providing educational opportunities for tribal youth. Typical projects include: re-lining raceways, replacing water pumps, upgrading alarm systems, fencing, roof and ceiling repair, and rearing tank installation. Funding for projects within this program is distributed on a competitive basis.

The anticipated program accomplishments in FY 2018 and FY 2019 are to be: Progress is measured by the ability to maintain hatchery production at 88 tribal hatcheries. Specifically, Treaty rights often rely on the production of tribal hatcheries. Progress is accomplished in terms of fish produced and the continued maintenance and operations of all tribal hatcheries while also achieving compliance with permitting requirements, including required retrofits and other alterations to current production systems. A strict correlation of fish production to fiscal criterion cannot competently quantify socioeconomic and tribal cultural prosperity. The benefits of tribal hatchery production are far ranging and linked to benefits both locally and also to larger markets, including commercial and recreational fishing, tourism, and larger ecosystem benefits. Millions of fish are produced each year, driving tribal employment, subsistence, nutrition of tribal families, and preservation of cultural traditions, recreation, tribal and non-tribal local communities and larger markets and interdependent economies. Tribal fishermen and tribal families likely experience the greatest benefit due to grassroots economic benefit in areas experiencing extreme unemployment along with health issues tied to lack of traditional foods.

Fish Hatchery Operations Program: The program currently supports 12 tribally operated fish hatcheries on 11 reservations and is expected to produce an estimated 34 million fish in FY 2018 and FY 2019.

Fish Hatchery Maintenance Program: Funding will provide for approximately 200 hatchery maintenance projects in FY 2018 and FY 2019.

Subactivity - Resource Management Program Oversight (FY 2019: \$5,293,000; FTE: 39):

Program Overview:

Natural Resources oversight funds the proper management and administration of the Natural Resources program. Functions include enhancing tribal management of Indian natural resources through the use of resource management plans, conducting annual program reviews, and ensuring compliance with various regulations and requirements related to the management of Indian natural resource trust assets. Emphasis

is also focused upon carrying out the reforms outlined in the American Indian Agricultural Resources Management Act, 25 U.S.C. 3701 et seq. (1994) and the implementation of regulations, 25 CFR Parts 162, 166.

Central Oversight [\$1,576,000; FTE: 13]:

This funds the coordination at the IA Central Office level of all of the natural resources services outlined within this section. It supports a Natural Resources Youth Program Coordination Office to ensure the development and continued efficient operation of the various youth programs outlined within the Natural Resources program lines. Funds are also used to support Natural Resource programs at the field level throughout the year; e.g., provide travel funds to ensure tribal participation at national conferences; provide support for field biologists to assist tribal programs; and support Endangered Species compliance work.

Regional Oversight [\$3,717,000; FTE; 26]:

This funds the coordination of and services performed at the regional office level which support the natural resources services outlined in this section.

The Trust-Real Estate Services activity manages Indian trust-related information to optimize the efficacy of Indian trust assets. The budget supports the processing of Indian trust-related documents such as land title and records and geospatial data to support land and water resources use, energy development, and protection and restoration of ecosystems and important lands. The program also provides probate services to determine Indian trust assets. In FY 2019, the accomplishments for Trust-Real Estate Services program will include preparing, reviewing and approving an estimated 10,000 new surface and mineral contracts, leases and grants and completing an expected 100 percent of the required annual museum collections inventories.

Justification of 2019 Program Changes:

Trust Services (TPA) (-\$1,801,000: -11 FTE):

The program will support the overall management responsibility for the operation of trust functions at the agency and tribal levels with regard to real estate services, probate, environmental and cultural resource compliance, and rights protection programs.

Probate (TPA) (-\$1,088,000: -13 FTE):

BIA will continue to perform pre-case preparation, case preparation, and act as a coordinator for probate case closings.

Land Title and Records Office (-\$1,408,000: -15 FTE):

The program will focus on generating revenue for Indian landowners by the timely processing of land title transactions.

Real Estate Services Program (TPA) (-\$2,125,000; -16 FTE):

Program staff will provide real property management, counseling and land use planning services to individual Indian allottees, tribes and Alaska Natives who own an interest in the 56 million surface acres and 59 million acres of mineral estates held in trust and restricted status by the United States.

Real Estate Services Projects (-\$123,000):

The funding supports cadastral surveys conducted by the Bureau of Land Management (BLM). BLM is the only Federal agency authorized by statute to conduct cadastral surveys on any Federal lands.

Land Records Improvement – Central (-\$203,000)

The program will support the operation and maintenance of the Trust Asset and Accounting Management System (TAAMS).

Land Records Improvement – Regional (-\$85,000; -1 FTE):

The program will provide operational support and technical assistance across the 12 IA regions.

Environmental Quality Program (TPA) (-\$170,000):

The Environmental Quality Program (EQ) will continue to work toward the protection, restoration, and preservation of environmental and cultural resources of Native Americans.

Environmental Quality Projects (-\$2,418,000):

The Environmental Quality Project (EQP) will continue to monitor environmental compliance of IA activities with Federal regulations and standards and identify hazardous contaminated sites for remedial cleanup actions.

Alaska Native Programs (TPA) (-\$1,410,000; -6 FTE):

The FY 2019 budget does not request funding for this program.

Rights Protection (TPA) (-\$63,000):

The BIA field staff will continue to provide advice and technical assistance to tribes and other agency personnel on various rights protection issues such as negotiating water rights and protecting tribal treaty hunting, fishing and gathering rights.

Water Rights Negotiation/Litigation (-\$2,434,000; -2 FTE):

The program will continue to provide technical assistance to the regions and tribes as requested and aid in policy and settlement negotiation strategies at the National level as resources permit.

Litigation Support/Attorney Fees (-\$1,490,000):

The FY 2019 budget does not request funding for this program.

Other Indian Rights Protection (-\$168,000; -2 FTE)

The FY 2019 budget does not request funding for this program.

Trust – Real Estate Services Oversight (-\$2,623,000):

Central Oversight [-19,000]:

The BIA Central Office staff will continue to formulate Real Estate Services policy; perform oversight reviews; evaluate the effectiveness of regional real estate functions; administer appeals; and review and approve HEARTH Act regulations and reservation proclamations.

Regional Oversight [-\$1,387,000]:

Regional offices will continue to provide policy directions, technical assistance, training, administrative review and monitoring in the evaluation of the agency real property operations.

Administrative Savings [-\$1,217,000]

To support prioritizing core responsibilities, the FY 2019 budget request includes \$1,217,000 in administrative savings attained by consolidating and sharing administrative services such as, procurement, Information Technology, and Human Resources; and by shifting acquisition spending to less costly contracts.

Trust - Real Estate Services Overview:

The Trust - Real Estate Services activity addresses the IA's Indian fiduciary trust responsibilities through implementing strategies to advance Indian trust ownership and improve Indian trust related information. This activity supports the IA's responsibilities in the areas of real estate services, probate, and land titles and records. Trust management also incorporates programs that coordinate and support the Department's trust reform improvement efforts. While portions of Real Estate Services activities are executed under contracts, compacts, or grants, it is administered primarily by the IA as a direct service. Real Estate Services is comprised of the following sub-activities: Trust Services, Navajo-Hopi Settlement Program, Probate, Land Title and Records Offices, Real Estate Services, Land Records Improvement, Environmental Quality, Alaskan Native Programs, Rights Protection, and Trust - Real Estate Services

Oversight. Additionally, certain administrative costs are assessed in this activity to support government-wide, departmental, and bureau-wide functions performed at IA's Regional or Central Offices.

Subactivity - Trust Services (TPA) (FY 2019: \$6,368,000; FTE: 32):

This program supports the overall management responsibility for the operation of trust functions at the agency and tribal levels with regard to real estate services, probate, environmental and cultural resource compliance, and rights protection programs. Program funding is provided to the regions to support the Deputy Superintendent for Trust positions which provide IA executive direction and management oversight to Federal employees providing trust program services on behalf of tribes and tribally contracted trust programs. This subactivity also supports the regional lockbox coordinators who coordinate the distribution of trust funds to individual Indian beneficiaries.

Subactivity - Navajo-Hopi Settlement Program (FY 2019: \$1,167,000; FTE: 6):

The Settlement Program works to implement the Navajo-Hopi Settlement Act of 1974, as amended (Pub.L. 93-531), and to further the IA's mission by providing for the management, protection, and preservation of agricultural and rangeland resources on the Navajo and Hopi Partitioned Lands. Through IA staffing and Pub.L. 93-638 contracting, the Program provides support to the tribes, and to Indian farmers and ranchers in several major areas.

The IA and Pub.L. 93-638 contracted staff provide support in the area of Agricultural and Range management. Soil surveys, periodic rangeland vegetation inventories, annual range utilization studies, and land-use suitability evaluations are provided to relevant IA and tribal staff to support planning, management, and administrative decision making. Technical assistance is also made available to Indian landowners, tribal government entities, and land users to develop, update, and amend programmatic Agricultural and Integrated Resource Management Plans, along with individual unit/permittee conservation plans.

The program works with tribal officials and resource users to determine rangeland infrastructure needs and to plan, engineer and implement rangeland improvements. The program budget supports the maintenance of specified livestock water developments, mediator and other livestock control fencing, and incidental improvement maintenance and implementation. Rangeland insect-pest control, noxious weed and other invasive species management, and trespass livestock actions are also integral parts of this subactivity.

In support of self-governance contracting, the program provides subject matter expertise to review initial contract proposals and to monitor existing tribal self-determination contracts and grants issued under Pub.L. 93-638. Monitoring includes on-site visits to ensure contractual compliance, review of performance reports submitted to the agency or region, and technical assistance and training to address any material weaknesses or corrective actions indicated as a result of monitoring.

Subactivity - Probate (TPA) (FY 2019: \$10,995,000; FTE: 115):

The IA probate program provides the staff and tools needed to administer probate services to American Indian and Alaska Native beneficiaries. Probate staff prepares a comprehensive trust estate package for adjudication by the Office of Hearing and Appeals (OHA). The success of the program is dependent upon the successful collaboration with OHA, the Division of Land Title & Records (DLTR), the Office of the Special Trustee for American Indians (OST) and family of the decedent.

The probate management process consists of four major activities: pre-case preparation, case preparation, case adjudication, and case closing. The IA performs pre-case preparation, case preparation, and coordinates case closing; OHA performs the case adjudication activity. The probate business process will be continuously modified as new tools and research methods are implemented to improve the efficiency of probate services.

Subactivity - Land Title and Records Offices (FY 2019: \$12,610,000; FTE: 122):

The Land Titles and Records Office (LTRO) is the office of record for land title documents for Indian lands. The program budget is directed at maximizing revenue generation for Indian landowners by the timely processing of land title transactions and support requests from across the country. Processing includes the recording, examination and validation of titles at the LTRO to produce certified ownership and Title Status Reports (TSR) that are used by tribes, individual landowners and other agencies; this includes the Department of Interior (DOI) Land Buy-Back Program (LBB), Justice, and the Internal Revenue Service, to document interest, rights and restrictions to the land. Counties and local communities also rely on LTROs to determine title status necessary for Indian trust land management. The LTROs record conveyance and encumbrance documents affecting title to all trust and restricted Indian land and perform detailed examination, chain title to determine ownership, identify defects, seek corrections, certify current ownership, issue Title Status Reports (TSR's) and respond to legal inquiries. The LTROs in oil and gas regions and LBB priority areas are presently performing record high volumes of these types of transactions. The LTROs also produce Probate Inventory Reports (INV) and Modifications for the IA Probate program and the Office of Hearings and Appeals (OHA). Further, LTROs, in conjunction with the Branch of Geospatial Support (BOGS) which reports through the LTRO program, prepare and certify official Land Status Maps (LSM) and related geospatial land boundary data. The maps illustrate ownership and boundaries prepared from the LTRO records and plats of official surveys made by the General Land Office and Department of Interior (DOI) Bureau of Land Management (BLM). This information is also made viewable in the new Trust Asset and Accounting Management System (TAAMS) Map Viewer. Program level staff and Tribes are now be able to view and print maps from TAAMS that can be shared with landowners and enable managers to make informed decisions regarding energy resources in a timely manner. The tract and reservation boundary information used in the viewer is standardized, certified and is more accurate and reliable because it is based on certified BLM public land survey information and is linked to the system of record, TAAMS. The Map Viewer in conjunction with the TAAMS ownership and encumbrance reports provide program level managers with the necessary information regarding title and restrictions for making timely energy resource decisions.

The LTRO program provides for the day-to-day operation and maintenance costs of nine Federal and nine tribal title offices. These offices render support to all 12 IA Regions and 85 Agencies, the Land Buy Back Acquisition Center, and to other agencies who deliver trust services including the Department of Housing and Urban Development (HUD) and the mortgage industry.

Subactivity - Real Estate Services (FY 2019: \$34,913,000; FTE: 290):

The United States has a unique legal and political relationship with Indian tribes and Alaska Native entities as provided by the Constitution of the United States, treaties, court decisions and Federal statutes. As a result, IA has a fiduciary trust obligation to 573 federally recognized tribes, serving a population of about 2 million American Indian and Alaska Natives.

The trust obligation is administered by IA and includes land, natural resources, and revenues derived from realty activities. While the role of IA has changed significantly in the last three decades in response to a greater emphasis on Indian self-governance and self-determination, tribes, American Indians and Alaska Natives continue to look to IA for a broad spectrum of real estate services, including the following:

- Determining land ownership;
- Protecting ownership rights;
- Consultation on land conveyances;
- Preparation and approval of land conveyances;
- Consultation on land use and land use contracts;
- Preparation and approval of land use contracts;
- Preparation and approval of mortgages and leasehold mortgages on trust lands;
- Entering and maintaining accurate ownership and contract data in TAAMS;
- Monitoring land use contracts for monetary and other compliance matters;
- Enforcement of contract violations and trespass situations; and
- Processing revenue derived from the trust obligation.
- Environmental and Cultural review and compliance

The trust responsibility, as it relates to land and revenue, is administered by the Division of Real Estate Services and is among the most complex programs in the IA. Real Estate Services is on the frontline of public service at Central Office, 12 Regions, and 85 Agencies, serving in a fiduciary capacity for real property management for tribes, American Indians and Alaska Native beneficiaries.

RES Program (TPA) [\$32,256,000; FTE: 290]:

The Real Estate Services Program has a positive impact on reservation economies. The program improves information of ownership and administers and manages all land held in trust and restricted status for the benefit of individual Indians and tribes. Field staff initiate all land transfer actions, which are often complicated by highly fractionated surface and mineral ownership. Program staff provides real property management, counseling and land use planning services to individual Indian allottees, tribes and Alaska Natives who own an interest in the 56 million surface acres and 59 million acres of mineral estates held in trust and restricted status by the United States. Decision-making processes are developed through

cooperative efforts with Indian landowners for the proper utilization, development, and enhancement of Indian trust lands.

RES Projects [\$2,657,000; FTE: 0]:

This program element provides technical advice and assistance to Indian landowners on issues related to cadastral surveys and processes transactions that reflect accurate ownership information for tribes and individual Indian beneficiaries. The program supports the Real Estate Services program in the management of tribal and individually owned trust and restricted lands (surface and minerals) through the determination of the legal boundaries, to ensure that property and resources are accounted for, managed, and protected. This program improves ownership information by cataloging survey needs and securing Bureau of Land Management (BLM) cadastral surveys of trust lands (both tribal and allotted). The BLM surveys lead to a decrease in the number of trespass actions, thereby assisting individual Indians, tribes, and the Secretary of the Interior on costly litigation. BLM surveys provide updated precise boundaries. The precise legal descriptions allow for better opportunities for development such as oil and gas leasing.

The Real Estate Services Projects (RES) subactivity funds the work associated with federal land surveys, land boundaries and the management of those activities. The cadastral surveys are instrumental in the identification and protection of known trust lands and their locations. Real Estate Services in coordination with Land Titles and Records manages the Cadastral Survey program budget line in partnership with BLM. Indian Trust Lands Boundary regulations and policy applies to all activities that impact an existing boundary through modification or establishment on Indian trust or restricted lands. It is applicable to all offices conducting land transactions and resource management activities involving federally recognized tribes or individual Indians. Precise boundary information is critical for home building on trust lands, the establishment of contracts, border protection, law enforcement, forestry, fire and fuels management, gaming, and creating energy right of ways and many other mission critical management activities. This program creates confidence in boundary identification and resolves issues which may arise from poor land descriptions, or lack of legally defined land description.

The Project funds the program for the Bureau of Land Management Indian Land Surveyors (BILS) and related Geographic Coordinate Database Support for mapping Indian Lands. The BILS are BLM employees located at the IA Regional Offices who provide support and technical guidance regarding land descriptions and Evidence of Boundary Standards. This program improves ownership and land description information by securing BLM surveys to legally define Indian lands and enhances the public land survey base data for mapping. This can assist in preventing or resolving some issues of non-development, trespass, ingress/egress in the event of a disputed boundary. Further, the use of geographic information system (GIS) stretches resources and resolves common boundary questions without the high cost of survey, as well as uses the GIS data for forestry, fire, law enforcement, and irrigation, safety of dams and natural resources management among other mission related applications. The data is also shared with other federal agencies and tribes.

In FY 2019, Real Estate Services will prepare, review and approve an estimated 10,000 new surface and mineral contracts, leases and grants. An estimated 1,000 new oil and gas leases and agreements will be

submitted to a new tracking system for monitoring and tracking timelines in the review and approval of the mineral development documents.

The system of record (TAAMS) will be utilized to complete conveyance documents, which will increase the data quality and integrity of the ownership system by allowing timely encoding of conveyances. The Bureau receives an average of 5,500 conveyance applications annually; the enhancements to TAAMS will allow automated processing and internal approval of deeds and conveyance documents.

Subactivity - Land Records Improvement (FY 2019: \$6,113,000; FTE: 4):

LRI - Central [\$4,269,000; FTE: 2]:

This program supports the operation and maintenance of the TAAMS. The TAAMS stores up-to-date land ownership data online (including simultaneous display of title/legal interests and beneficial/equitable interests) and has the following effects: reducing or eliminating errors; reducing or eliminating liability arising from reliance on out-of-date land title ownership and encumbrances information; and allowing the online drafting and execution of land title documents reducing time and costs, and increasing output and customer satisfaction. Additional priority is funding for the lead position of the Land Titles and Records Program which also has oversight for the Branch of Geospatial Support. Title and GIS oversight in concert with the administration of TAAMS ensures accountability and accurate energy and other lease generated payouts through TAAMS for the Office of the Special Trustee for American Indians (OST) and information necessary for the DOI Office of Valuation Services, Mineral Evaluations, Appraisal Services, Energy Development and the Land Buy Back Program.

The TAAMS provides mission critical land ownership information to process trust land-resource management conveyances and encumbrances, and to allocate trust income to the owners of trust and restricted lands and resources throughout all of Indian country. The Land Records Improvement (LRI) program provides overall program policy, management, coordination, and guidance concerning land title and ownership certifications, title document recording and management, land title mapping for the regional LTROs, and a platform for the accurate and timely development and issuance of both surface and mineral conveyance documents and land use contracts. The program supports the land title needs and requirements for all tribal and restricted lands, and supports the delivery of title products and services to tribal and individual owners as required for real estate and other trust program transactions.

The TAAMS exists as the cornerstone of trust resource and information management, supporting direct service tribes and tribally managed programs. The TAAMS is mission critical and designed to support IA's goal "to protect and preserve trust land and trust resources to ensure trust responsibility" and the Department's goal of meeting trust responsibilities to Indian tribes and Alaska Natives. The TAAMS provides comprehensive information and business actions pertaining to land title, lease management, trust income and royalty management data for planning, management, and reporting, of trust and restricted Indian lands. This system is foundational to multiple entities and organizations within the Department of the Interior including, the Bureau of Land Management's cadastral program, Office of Natural Resource Revenue financial management, Office of the Secretary, and the Land Buy-Back program. The

functionality of TAAMS is integral to daily activities affecting over a billion dollars of trust revenue and royalties.

LRI - Regional [\$1,844,000; FTE: 2]:

Across the 12 IA Regions, the LRI Regional program operates detailed records clean up efforts to ensure quality and internal control for Land Title Records (LTR), Real Estate Services activities and other trust resource transactions such as timber sales, agriculture, and range leasing. Specific to the Alaska Region and this account, processing of documents, transactions and other related trust management activities are associated with the Alaska Native Allotment Act of 1906, which allows for eligible Alaska Natives to apply and receive a restricted fee allotment. At the Alaska Regional Office level, the LRI program funds covers the costs of issuing allotment certificates for ownership and all associated work to complete the allotment application process; this includes, but is not limited to, site visits, surveys, title work, adjudication, and litigation. This budget item also supports Geographic Information System (GIS) Legal Land description clean up through a Central Office National GIS Contract.

Currently, Central Office oversees a national Data Quality and Integrity indefinite Delivery Indefinite Quantity (IDIQ) Service Contract for TAAMS Critical Data elements and through the Division of Land Titles and Records, Branch of Geospatial Support a Professional Services GIS contract which is used to address legal land description data discrepancy clean up and mapping for TAAMS. The program expects to complete over 40,000 Data Quality & Integrity Transactions (DQ & IT) for legal land descriptions to support the Land Buy Back Program this fiscal year. This works supports the TAAMS Map viewer which allows program level staff and Tribes to view and print maps from TAAMS that can be shared with landowners and enable managers to make informed decisions regarding energy resources in a timely manner.

In FY 2018 and into FY 2019, the LRI plans to continue to upgrade the TAAMS system with much needed enhancements that have been placed on hold. There is a requirement to modify the Osage Suite module and implement the acquisition and disposal module along with a Probate Tracking module. This effort increases accountability, decreases processing time and will ultimately allow for a centralized management of data at all levels of the organization.

Subactivity - Environmental Quality (FY 2019: \$13,263,000; FTE: 49):

EQ Program (TPA) [\$2,613,000; FTE: 17]:

The Environmental Quality (EQ) Program (EQ) is tasked with the protection, restoration, and preservation of environmental and cultural resources of Native Americans. Through enforcement of applicable laws and regulations and assessment of activities impacting these resources, the program provides direction and guidance to tribes and other IA programs in order to protect those resources most important to tribal communities.

The program's 12 Regional National Environmental Policy Act (NEPA) Coordinators provide technical assistance for production and review of environmental documents, conduct training, and ensure compliance of all IA projects and activities with NEPA and the National Historic Preservation Act

(NHPA). Central office staff, in coordination with the Regions, is responsible for program oversight, and the development of policy and guidance to ensure that a fair and consistent national program is implemented. Staff also prepares a Notice of Intent for publication in the Federal Register.

The Environmental Quality Program also provides funding support and training to 12 Regional Archaeologists who are responsible for the administration of archaeological permits in accordance with the Archaeological Resources Protection Act of 1979 (ARPA), and provides training and support for needed IA law enforcement activities. Regional archaeologists are responsible for identifying and assessing conditions of archaeological sites under Section 106 and Section 110 of NHPA, and determining eligibility of archaeological sites for listing on the National Register. The IA Central Office Archaeologist serves as the Federal Preservation Officer for IA and works directly with tribal and state Historic Preservation Officers in establishing historic preservation programs in Indian country.

EQ Projects [\$10,650,000; FTE: 32]:

The Environmental Quality Project (EQP) has primary responsibility for monitoring environmental compliance of IA activities with Federal regulations and standards, and identifying hazardous contaminated sites for remedial cleanup actions. The EQP supports funding for 12 Regional Environmental Scientists and other positions.

The Environmental Management, Assessment and Performance (EMAP) program monitors environmental compliance of IA program operations and activities at IA and BIE facilities to ensure regulatory requirements are met. Facilities potentially covered by these audits include IA Regional offices, IA agencies, Law Enforcement/Detention Centers, Irrigation Projects, BIE Education Line Offices, and BIE schools.

In FY 2018 and FY 2019, IA Museum Program staff expect to complete site visits to 10 museum repositories each year and provide training and technical assistance to repository staff to ensure that the IA collections are properly managed and preserved. The IA expects to complete 100 percent of the required annual museum collections inventories, and continue to oversee contracts with museums to conduct cataloging, accessioning, and preservation work on the IA collections as well as NAGPRA compliance work. Additionally, the program will continue to monitor repositories with IA collections, to ensure repatriation under NAGPRA.

In FY 2019, the Environmental Quality program expects to complete 105 EMAP audits, 30 NEPA reviews and 104 Internal EMS reviews. The Environmental Disposal Liabilities program will conduct 50 to 100 emerging and recurring remedial and cleanup projects at contaminated sites including multi-year and non-recurring projects identified through EMAP audits.

Subactivity - Rights Protection (FY 2019: \$9,145,000; FTE: 21):

Rights Protection (TPA) [\$1,949,000; FTE: 14]:

The IA field staff provides advice and technical assistance to tribes and other agency personnel in various rights protection issues. Funds under the program are also provided to tribes under the authorities of

Pub.L. 93-638 contracts and self-governance compacts. Staff consults and cooperates with tribes involved in negotiating or litigating their water rights; establish and protect tribal treaty hunting, fishing and gathering rights; address issues concerning trespass on tribal trust lands; protect tribal cultural resources; and address natural resource damage claims and other unresolved land management issues. The functions performed by program personnel depend on the services and technical expertise required by the tribes that is not available in other programs within the jurisdiction of Trust Services.

Water Rights Negotiations/Litigation [\$7,196,000; FTE: 7]:

The Water Rights Negotiation and Litigation program supports confirming and defining Indian water rights through litigation and court decree or through negotiated settlement. The IA staff coordinates with the Department of Justice, the Department of the Interior, Office of the Solicitor, and the Secretary's Indian Water Rights Office to support active litigation/settlement negotiations. Funding is allocated through IA's published process (Notice of Revised Instructions for Preparing and Prioritizing Water Program Funding Requests, Federal Register, Vol. 70, No. 201, October 19, 2005) and typically funds projects for data collection and analysis for active litigation and negotiation cases. Other types of projects may include economic feasibility studies, studies to determine practicably irrigable acreage, soil classification, hydrographic survey reports, and other technical data that is required by the particular matter being funded.

In FY 2019, in cooperation with the Secretary's Indian Water Rights office, IA will continue to support efforts to increase efficient management of the Water Rights Litigation/Negotiation program. Focusing on collective partnerships with the Bureau of Reclamation and the United States Geological Survey (USGS), allows the Department to perform work deemed necessary by a court to further the United States water rights claims on behalf of Indian tribes.

In FY 2019, the program will continue to provide support to the ongoing efforts to increase the effective and efficient management and use of the Water Rights Negotiation/ Litigation Program.

Subactivity - Trust - Real Estate Services Oversight (FY 2019: \$10,910,000; FTE: 96):

Central Oversight [\$2,895,000; FTE: 21]:

The IA Central Office staff formulates Real Estate Services policy; performs oversight reviews; evaluates the effectiveness of regional real estate functions; administers appeals; and reviews and approves HEARTH Act regulations and reservation proclamations. The program manages the acceptance of real estate on behalf of tribes under the Base Closure and Realignment Act and the Federal Property and Administrative Services Act. Real Estate Services staff also process waivers for real estate regulations; reviews and makes recommendations for highly controversial real estate transactions; and develops regulations and policies affecting trust lands and resources. Real Estate Services staff coordinate national training and the development of resources for field staff. In addition, the program also provides assistance in the development and utilization of trust and restricted Federal Indian-owned lands, including acquisitions, disposals, tenure of land, rights-of-way, surface and mineral permits, mineral leasing, and sales of leases. The program also provides guidance and implementation in the development of the

system of record (TAAMS), in standardizing the data entry, and the utilization of the system by the field. Real Estate Services is the primary source of national data and information regarding Indian lands.

Regional Oversight [\$8,015,000; FTE: 75]:

Within the 12 regional offices of IA, there are Real Estate Services programs that protect, maintain and preserve the integrity of trust lands and trust resources. Regional offices provide policy directions, technical assistance, training, administrative review and monitoring in the evaluation of the agency real property operations.

In addition, regional office responsibilities also include, but are not limited to: assist in deciding appeals of agency actions, litigation support, reviewing and approval of numerous real estate services transactions (acquisition, disposal, surface and sub-surface lease), and land use planning proposal transactions for tribes who have contracted or compacted the program.

The BIA's Office of Justice Services funds law enforcement, corrections and court services to support safe tribal communities. The program supports 190 bureau and tribal law enforcement programs, 96 BIA-funded corrections programs, and 185 tribal courts. These programs safeguard life and property, enforce laws, maintain justice and order, and ensure detained American Indian offenders are held in safe, secure, and humane environments. The OJS also provides technical assistance to Tribes to amend tribal legal codes consistent with the Tribal Law and Order Act of 2010 and the Violence Against Women Act, as reauthorized. In addition, BIA is implementing training for direct service law enforcement program staff in the areas of law enforcement, social services, victim services, and courts and is making this training available to Tribes operating these programs under self-determination contracts and compacts.

Justification of 2019 Program Changes:

Criminal Investigations and Police Services (-\$10,803,000; -48 FTE):

The FY 2019 budget proposes \$190.8 million for Criminal Investigations and Police Services. In 2019, the program will continue to support BIA-funded direct services and tribally run law enforcement programs tasked with enforcing laws and investigating crimes committed on, or involving Indians. Funding is not requested for the Conservation Law Enforcement Officer program which supplements tribal enforcement of fish, wildlife, and associated land natural resources codes, regulations, and laws.

Detention/Corrections (-\$2,351,000; -16 FTE):

The FY 2019 budget proposes \$94.0 million for the Detention/Corrections programs. In 2019, the program will continue to support Tribal detention programs tasked with ensuring the safe and secure confinement of offenders sentenced by of tribal courts.

Inspections/Internal Affairs (-\$134,000):

The FY 2019 budget proposes \$3.3 million for Inspections/Internal Affairs programs. In 2019, the program will continue to undertake misconduct and internal investigations of tribal law enforcement programs as resources permit.

Law Enforcement Special Initiatives (-\$1,634,000; +17 FTE):

Opioid Crisis Initiative (+\$2,500,000; +17 FTE):

The 2019 budget includes \$2.5 million to address the opioid crisis which has been particularly devastating in Indian Country. This initiative will expand BIA capacity to address the increase in drug-related activities through interdiction programs to reduce drug use, distribution, and drug related crime. The initiative will support OJS participation in intra- and inter-agency initiatives targeting opioid and substance abuse prevention efforts. This funding will enable BIA to better align, leverage, and coordinate with other Federal efforts and resources to assist Native American communities to reduce the supply of drugs, provide opioid addiction prevention assistance, and otherwise combat the opioid crisis which the Administration has identified as priority.

Completed Recidivism Initiative (-\$3,000,000):

The measurement period for the initiative to reduce recidivism in targeted locales in Indian Country was completed in FY 2017 and funding for this initiative is no longer requested. Implementation plans and best practices have been documented, along with multiple years of offender data pointing to success. BIA and tribal law enforcement programs will incorporate these best practices into policies and programs to continue efforts to reduce recidivism.

Victim/witness assistance program (-\$514,000):

The budget request proposes to fund the Victim/Witness Assistance program at \$1.1 million. In 2019, the program will continue to support law enforcement agencies tasked with ensuring victims are afforded their rights under the Crime Victims' Rights Act of 2004 as required for Federal law enforcement agencies.

Land Mobile Radios (-\$620,000):

The budget request proposes to fund the Land Mobile Radios program at \$3.2 million. In 2019, the program will continue to support repair and replacement of radio equipment installed in BIA vehicles and hand-held radio units. Individual program offices will prioritize expenditure of available equipment funding to best meet the needs of their organization.

Indian Police Academy (-\$187,000):

The budget request proposes to fund the Indian Police Academy at \$4.7 million. In 2019, the program will continue to provide training opportunities for tribes in basic police, criminal investigation, telecommunications, and detention programs. The IPA will continue to offer advanced courses, including: community policing, drug investigation, child abuse investigation, domestic violence investigation, sex crime investigation, field training officer certification, management/leadership, and peer support/critical incident debriefing as resources permit.

Tribal Justice Support (-\$9,907,000):

The budget request proposes to fund the Tribal Justice Support at \$7.2 million. The program will continue to provide technical assistance to tribes, training to tribal court personnel, and tribal court management computer systems. The request does not request funding for assessments of tribal court needs for tribes primarily located in jurisdictions subject to Pub. L. 83-280 where states have primary local criminal jurisdiction.

Law Enforcement Program Management (-\$581,000):

Program Change [-\$43,000]

Administrative Savings [-\$538,000]

The budget request proposes to fund Law Enforcement Program Management at \$5.4 million. The program will continue to support the national leadership team and administrative or support services for PS&J programs. These activities include collaboration with other Federal partners and the development and dissemination of standards, policies, and procedures for BIA implementation of the law enforcement, corrections, emergency management, land mobile radio, tribal court, and justice training programs as resources permit.

To support prioritizing core responsibilities, the FY 2019 budget request includes \$538,000 in administrative savings attained by consolidating and sharing administrative services such as procurement, Information Technology and Human Resources, and by shifting acquisition spending to less costly contracts.

Facilities Operations & Maintenance (-\$524,000):

The budget request proposes to fund Facilities Operations & Maintenance Management at \$12.6 million. The program will continue to conduct preventive, routine, scheduled, and unscheduled maintenance for BIA funded detention facilities, equipment, utilizing systems, and ground structures as resources permit.

Tribal Courts (TPA) (-\$8,560,000):

The budget request proposes to fund Tribal Courts at \$22.1 million. The program will continue to support 185 tribal courts currently receiving funds directly through this program under Pub. L. 93-638 contracts and self-governance compacts for operation of tribal justice systems.

Fire Protection (TPA) (-\$51,000):

The budget request proposes to fund Fire Protection at \$1.4 million. The program will continue to support program staff, training, volunteer firefighters, repairing existing firefighting equipment, and purchasing additional equipment.

Public Safety and Justice Overview:

The mission of the Office of Justice Services (OJS) is to uphold the constitutional sovereignty of federally recognized Tribes and preserve peace within Indian country. OJS is responsible for providing for the safety of Indian communities by ensuring the protection of life and property, enforcing laws, maintaining justice and order, and by ensuring that incarcerated Native Americans are confined in safe, secure, and humane environments. Ensuring public safety is one of the most fundamental government services

provided in tribal communities. Resources requested under this budget activity fund all three critical components of effective justice systems (law enforcement, corrections, and courts).

The Department of Justice's (DOJ) Coordinated Tribal Assistance Solicitation (CTAS) program also provides public safety and justice funding to tribes. However, CTAS grants are competitive, one-time awards. Conversely, the vast majority of BIA public safety & justice funding provides recurring annual amounts that support self-determination by providing a stable resource base, from which tribes can strategically plan and function.

Subactivity - Law Enforcement (FY 2019: \$326,649,000; FTE: 747):

The Law Enforcement budget subactivity is comprised of six operational areas:

- Police and Corrections
- Inspections/Internal Affairs
- Indian Police Academy
- Tribal Justice Support
- Program Management
- Facilities Operations and Maintenance

Close to 90 percent of funding under this subactivity is used at the local level to provide law enforcement and detention/corrections services for Indian communities. Many Tribes operate their programs through 638 contracts and self-governance compacts; BIA provides direct services to other tribes. The majority of resources are distributed based on historical funding amounts.

The Tribal Law and Order Act (TLOA) expanded a number of public safety authorities and responsibilities for tribal law enforcement agencies and tribal governments. TLOA requires the Bureau of Indian Affairs to develop guidelines for approving correction centers for long-term incarceration, as well as to work with DOJ and tribes to develop a long-term plan for tribal detention centers. In addition, TLOA provided the authority for Tribal justice systems to implement extended sentencing for offenders convicted of crimes outlined therein.

The Violence against Women Reauthorization Act of 2013 (VAWA) has had a significant impact on tribal justice systems, as well. The law amended, among other statutes: the Indian Civil Rights Act, 25 U.S.C. 1301; the Federal Assault provisions under 18 U.S.C. 113; and the Domestic Violence and Stalking Chapter, specifically addressing the full faith and credit given to tribal protection orders, under 18 U.S.C. 2265. To ensure compliance with provisions contained in VAWA, BIA conducts training for direct service program staff in the areas of law enforcement, social services, victim services, and courts, as well as provides additional technical assistance and training to Tribes operating these programs under self-determination contracts and compacts, and assists tribes in updating their codes to reflect provisions in the VAWA Reauthorization as they “opt in”.

Criminal Investigations and Police Services [\$190,753,000; FTE: 384]:

The OJS Field Operations Directorate is responsible for enforcing laws and investigating crimes committed on or involving Indian country where states lack local criminal authority. Programs address major Federal crimes as well as state crimes assimilated into Federal statutes, such as murder, manslaughter, child sexual abuse, kidnapping, rape, assault, arson, burglary, robbery, and the production, sale or distribution of illegal drugs. In addition to investigating crimes, OJS provides oversight and technical assistance to tribal law enforcement programs. Approximately 66 percent of the funds under criminal investigations and police services are executed at the tribal level under Pub. L. 93-638 contracts and self-governance compacts.

The Field Operations Directorate program supports 190 total law enforcement offices, which include 25 full-function agencies operated by BIA, 157 agencies that are contracted or compacted for operation by Tribes, and 8 BIA sub-agencies that do not have defined service populations. The latter are criminal investigation units only, and in some cases provide services for multiple Tribes. Investigators working out of sub-agencies cover one or more specific reservations along with either BIA or tribally contracted police programs. In addition, there are nine programs reporting crime statistics to BIA that are not supported by BIA funding under this subactivity. Tribes fund these programs themselves, from tribally generated resources, such as mineral royalties or gaming revenues.

The OJS drug enforcement unit is comprised of 35 BIA criminal investigator positions and 16 school resource officer positions located throughout the country. Drug trafficking and drug related crimes, including the ongoing methamphetamine crisis, continue to impact communities in Indian country. Drug use and distribution plays a role in violent crime activity and seriously impacts the health and economic vitality of Indian communities. The abuse of prescription drugs is quickly becoming a crisis in Indian country along with the illegal processes used in obtaining these drugs.

To deal effectively with these challenges, BIA developed advanced training courses to further enhance a patrol officer's ability to assist the drug enforcement agents in investigations, which equates to a stronger presence in the fight against drugs. In addition, the program focuses heavily on Indian youth by

continuing a specialized training program called "Drug Endangered Children". The training has been instrumental in the prevention and reduction of drug use and distribution in Indian country.

Responsibilities of drug enforcement agents include managing investigations and implementing interdiction programs to reduce drug use, distribution, and drug related crime. Agents perform activities that include conducting complex criminal investigations, carrying out surveillance of criminals, infiltrating drug trafficking networks, developing and implementing undercover techniques, executing search warrants, confiscating illegal drug supplies, and collecting and processing evidence.

Funding for drug enforcement, intelligence sharing, and victim witness coordination are reported to the Office of National Drug Control Policy as the Bureau's contribution to combating drug trafficking and crime in Indian country. Proposed funding of these drug enforcement efforts to include intelligence sharing and victim witness coordination totals \$11.3 million in FY 2019.

The drug unit also includes an intelligence sharing component that gathers real-time data on trends, threats, and analysis of criminal activity and drug trafficking and distribution throughout Indian country. The information is instrumental for resource allocation and directing timely and effective investigations.

Recognizing the impact and the effect rising suicide rates has had, and continues to have, on tribal communities, and the need to support law enforcement officers in the field as front line first responders, the BIA is working with DOJ and HHS to provide comprehensive suicide prevention training to police officers and facility workers. Comprehensive training that shares interagency resources and expertise will enhance early identification and intervention, as well as equip officers and communities with a foundation from which they can advance toward a holistic approach to suicide prevention.

Detention/Corrections [\$94,027,000; FTE: 216]:

Safe and secure confinement of offenders sentenced by hundreds of tribal courts throughout Indian country each year is a fundamental aspect of public safety. The OJS Detention/Corrections program oversees 96 detention programs nationwide, of which 71 are tribally operated and 25 are operated by the BIA as a direct service to tribes.

The program requires correctional supervisors, officers, cooks, and administrative personnel, along with food service contracts, inmate surveillance and other computer systems, communications equipment and service, bedding, and uniforms. In addition, the program funds four teams of armed transport officers within the corrections program to enable police officers to remain in their respective communities, patrolling, and enforcing the law rather than traveling long distances to transport prisoners.

The BIA is responsible for providing Detention/ Corrections services or funding to approximately 227 tribes. Of those, 40 tribes have compacted or contracted detention center services and the BIA directly operates detention centers that serve roughly 20 tribes. The detention needs of the remaining 167 tribes are handled via “direct service”, whereby the BIA funds commercial contracts with local county or tribal facilities to house tribal inmates.

The BIA and the DOJ Bureau of Justice Assistance (BJA) continue to coordinate the planning and renovation of jails in Indian country. Currently, the organizations conduct quarterly meetings to discuss grant requests received by DOJ. The BIA participation in these meetings is critical to ensure that each individual grant request can be evaluated within an accurate regional or nationwide context. The Indian Health Service is another integral Federal partner brought in at the planning stages to ensure effective coordination of services to Indians. Previous tribal grant recipients are included in the quarterly discussions to update the Federal partners on planning, development, construction, and opening schedules of funded facilities.

Inspections/Internal Affairs [\$3,335,000; FTE: 17]:

This program conducts operational inspections/audits, physical security audits of Bureau of Indian Education (BIE) schools and BIA Federal buildings, and investigations of officers involved shootings and in-custody deaths that occur in Indian country. This oversight function emphasizes standardization and professionalism of BIA and tribal law enforcement, criminal investigations and corrections programs.

Program staff conducts annual audits on Federal investigative case file reviews, detention program reviews, police program reviews, and law enforcement facility vulnerability assessments. The inspection/audits conducted by an independent staff provide an objective appraisal that illustrates the level to which professional standards are incorporated within each specific program.

Inspection reports identify the compliance of BIA standards applicable to each specific program, review areas of high liability, evaluate practices of well performing operations, and identify areas of deficiency that require improvement. The law enforcement, criminal investigations, and detention audit process also

includes a review of equipment checklist (vehicles, firearms, emergency equipment, etc.), evidence room standard compliance, and personnel/administrative requirement review (employee development, performance appraisals, training records, etc.).

Detention program reviews are conducted to ensure that confinement conditions are safe, secure, humane, and protect the statutory and constitutional rights of detainees. Core detention standards are modeled after the American Correctional Association. Indian Affairs standards have been identified as the metric to consistently evaluate the operation of detention facilities.

Law Enforcement Special Initiatives [\$8,659,000; FTE: 40]:

This program provides resources for initiatives involving law enforcement in high priority and high crime areas, victim and witness services, data collection, and radio communication. The special initiative line allows OJS to track funding for focused strategic efforts directed to a specific purpose. In FY 2019, funding is allocated for the following special initiatives:

Address Opioid Crisis: Drug trafficking and drug related crime, including the ongoing opioid and methamphetamine crisis, continue to escalate throughout Indian Country. Tribal officials have called for a bold proactive step toward addressing an increasingly common cause of Indian Country crime by strengthening drug enforcement capabilities throughout the nation. Jurisdictional complexities and resulting challenges to prosecution continue to make Indian communities disproportionately vulnerable to systematic infiltration by drug cartels. As a result, additional funds would hire and equip more drug enforcement agents at strategic locations throughout Indian Country and establish Mobile Enforcement Teams (task force) to investigate and aid in prosecuting a growing number of drug-related criminals. Responsibilities of these agents include managing investigations and implementing interdiction programs to reduce drug use, distribution, and drug related crime. Agents perform activities that include surveillance of criminals, infiltrating drug trafficking networks, developing and implementing undercover operations, executing search warrants, confiscating illegal drug supplies, and collecting and processing evidence. The funding would also include a liaison that would be the primary points of contact for coordination of intra- and inter-agency initiatives that support opioid and substance abuse prevention efforts for the Bureau of Indian Affairs and the Bureau of Indian Education. The liaison will align, leverage, and coordinate federal efforts and resources to assist American Indian and Alaska Native communities in achieving their goals in prevention and intervention of opioid use and substance abuse.

Victim/Witness Assistance program: Providing assistance to victims and witnesses who are involved with criminal prosecutions in tribal or Federal courts within Indian country during the investigative stages of violent and/or drug crimes is critical to the success of many investigations. The program administers and promotes overall victim services by analyzing the needs of victims and the needs of law enforcement agencies, ensuring that victims are afforded their rights under the Crime Victims' Rights Act of 2004 as required for Federal law enforcement agencies. This program provides direct services and follow-up services to victims and their families during their involvement with the criminal justice system.

Land Mobile Radio: The land mobile radio communication system is the basis for wireless communication within Indian Country and is an instrumental component of public safety, education, public works, and wildfire programs in tribal communities. This program funds the support, repair, and

replacement of radio equipment installed in hundreds of BIA vehicles across the nation, as well as hundreds of hand-held radio units, all used in primarily remote locations with limited or no cell phone coverage. Support activities occur on a 24 hour / 365 day basis to ensure connectivity between dispatch stations and police or correctional officers, as well as other emergency personnel, in the field.

Indian Police Academy [\$4,665,000; FTE: 21]:

The Indian Police Academy is located at the Department of Homeland Security Federal Law Enforcement Training Center at Artesia, New Mexico and provides basic police, criminal investigation, telecommunications, and detention training programs to personnel serving both direct services and tribally operated BIA funded law enforcement programs.

Numerous advanced courses are offered as well, including child abuse investigation; domestic violence investigation; sex crime investigation; field training officer certification; management/leadership; peer support/critical incident debriefing; community policing; and drug investigation. Other advanced courses include use of force, firearms instruction, archeological resource protection, executive leadership, crime scene processing, interview and interrogation techniques, and criminal jurisdiction in Indian country, advanced detention, and dispatcher training courses for both tribal and Indian Affairs law enforcement officers.

Tribal Justice Support [\$7,233,000; FTE: 6]:

Pursuant to 25 U.S.C. Section 3601, the Tribal Justice Support Act (the Act), the Office of Tribal Justice Support was established to further the development, operation, and enhancement of tribal justice systems and BIA Courts of Indian Offenses.

Title 25 U.S.C. 3611 tasks the Office of Justice Support staff primarily with three functions: (1) schedule and coordinate independent tribal court reviews and complete these reviews annually; (2) schedule training and technical assistance to tribes and tribal organizations focusing on setting up and empowering tribal courts; and (3) study and conduct research on tribal justice systems.

The program regularly provides Tribal Courts with technical assistance in the fields of pre-trial, probation, alternative sentencing issues, family matter issues including Indian Child Welfare Act (ICWA), juvenile issues, victim witness issues, probate matters, contract matters, and matters of economic development including contract issues and Uniform Commercial Codes legislated by tribal governments. In addition, a portion of program funding is allocated to provide specific training to tribal court personnel including tribal court judges, tribal court prosecutors, tribal public defenders, and tribal court management computer systems. The program also provides tribal court bench books covering both the criminal and civil issues at trial, and works specifically with tribal court judges and tribal court associations to provide training and technical assistance for court personnel.

Law Enforcement Program Management [\$5,381,000; FTE: 23]:

BIA is the Federal entity most directly responsible for maintaining law and order throughout Indian country. This funding supports the BIA Office of Justice Services’ national leadership team and a number of administrative or support services to manage the activity effectively for tribes. The team collaborates with other Federal partners, and develops and disseminates standards, policies, and procedures for BIA implementation of the law enforcement, corrections, emergency management, land mobile radio, tribal court, and justice training programs. In addition, OJS management coordinates and oversees human resource, internal control, information technology, program performance, acquisition, and budget management activities.

External recruiting for OJS positions is an on-going priority that is also funded from Program Management. The resources are used to contract for media services, background screening, and overall recruitment efforts to ensure critical law enforcement and detention vacancies are filled. This funding also supports physical battery and psychological testing to ensure that recruits are able to achieve minimum hiring and Indian Police Academy requirements to reduce the number of dismissed applicants.

Program management also funds the BIA’s emergency management coordination function. The Emergency Management Division coordinates assessments and identifies requirements on a nationwide basis to ensure adequate systems and procedures are in place to support BIA’s mission critical functions and facilities. These activities also ensure protection of the public, employees, information technologies, and vital records in case of emergency.

Facilities Operations & Maintenance [\$12,596,000; FTE: 40]:

Detention Facility Operations funds are used to operate detention centers including janitorial services, utilities cost, refuse disposal, fire protection, maintenance of vehicles, communication cost, pest control, personnel services, equipment, material and supplies, travel, training, and for products required to keep

these services operational. The program funds are also used for items necessary for compliance with Occupational Safety and Health Act standards.

Detention Facility Maintenance funds are used to conduct preventive, routine, scheduled and unscheduled maintenance for detention facilities, equipment, utility systems, and ground structures. Funds will provide needed maintenance services for:

- Equipment such as heating, ventilation and air conditioning systems, boilers and other pressure vessels, furnaces, fire alarms and sprinklers, radio repeaters, and security systems.
- Utility systems such as potable water wells, water treatment plans, and water storage tanks.
- Horizontal infrastructures including sidewalks, driveways, parking lots, and landscaping.

Subactivity - Tribal Courts (TPA) (FY 2019: \$22,110,000; FTE: 12):

This program currently provides funding to 185 tribal courts under Pub. L. 93-638 contracts and self-governance compacts. Tribes utilize this funding for judges, prosecutors, public defenders, court clerks, court administrators, pre-trial and probation officers, juvenile officers, victim witness specialists, and other court support staff and administrative costs that contribute to the operation of tribal justice systems. Tribal judicial systems address everything from violent crimes and drug use, to domestic and family issues, to all types of civil claims. Appropriations are used to process caseloads and address filings of criminal cases, tort claims, tribal probate claims, and family law issues including the ICWA.

Subactivity - Fire Protection (TPA) (FY 2019: \$1,372,000; FTE: 0):

Fire Protection funds over 40 Tribal fire protection programs. The Fire Protection programs support Tribal staff, train volunteer firefighters, repair existing firefighting equipment, and purchase additional equipment. Funds can also be used to purchase smoke detectors, fire extinguishers, and emergency lights for tribal buildings.

Community & Economic Development

The Community and Economic Development activity supports the advancement of American Indian and Alaska Native communities by creating jobs, bolstering reservation economies, and promoting economic growth throughout Indian country. The activity is comprised of the Job Placement and Training (JP&T) program, which includes the Workforce Development program as authorized by the Indian Employment, Training, and Related Services Demonstration Act, Pub.L. 102-477 (477); Economic Development; Minerals and Mining; the Energy Service Center; the Energy Resources Development Program; Community Development; and Community Development Oversight.

Justification of 2019 Program Changes:

Job Placement and Training: (TPA) (-\$4,419):

The JP&T funding will continue to assist eligible applicants to obtain job skills and to find and retain a job, thereby leading to self-sufficiency. The funding provides for vocational training and employment assistance to individuals to improve job skills and provide increased employment.

Economic Development: (TPA) (-\$64,000):

The funding will continue to support tribes in developing programs to build business and commercial capacity for individual tribal members, as well as opportunities for business and energy development to enhance reservation economies.

Minerals & Mining Program: (TPA) (-\$276,000):

This program provides tribal base funding for Minerals and Mining activities that directly contribute to energy and mineral development on reservations. Funded activities include a regulatory policy program that facilitates the development of renewable energy, traditional fossil fuels and other mineral resources with a focus on self-determination opportunities for tribes.

Minerals & Mining Central Oversight: (-\$712,000):

Minerals and Mining Central Oversight program will continue to provide support to meet specific legislative requirements concerning trust responsibilities, such as those required under the Linowes Commission and Indian Mineral Development Act (IMDA).

Minerals & Mining Regional Oversight: (-\$107,000):

This program supports BIA regional staff that assists tribes in developing renewable energy potential and facilitating the management of oil and gas resources in Indian country.

Community Development Oversight: (-\$288,000):

Community Development Oversight staff provides management and oversight for all of the DOI's Indian economic development programs, including Indian energy and mineral development; Indian energy policy; the commercial code adoption and implementation program; Indian economic development feasibility study grants; and Indian and tribal procurement outreach and training. It also coordinates intergovernmental collaboration with respect to each of these sub-activities.

Subactivity - Job Placement and Training (TPA) (FY 2019: \$8,028,000; FTE:9):

Participating tribes are encouraged to provide services directly to their members by either entering into a Pub.L. 93-638 contract with the BIA or a compact with the Office of Self-Governance. Tribes may also consolidate Job Placement and Training (JP&T) funds in accordance with the provisions of the Indian Employment, Training, and Related Services Demonstration Act of 1992, Pub.L. 102-477.

The JP&T program is designed to assist individuals in securing jobs at livable wages, thereby reducing their dependence on federally subsidized programs such as childcare assistance, food stamps, and welfare. The JP&T funding aims to assist eligible applicants to obtain job skills and to find and retain a job, thereby leading to self-sufficiency. The funding provides for vocational training and employment assistance to individuals to improve job skills and provide increased employment. This includes client assessments, career counseling, planning, costs for travel, training stipends, and unsubsidized job placements.

Pub. L. 102-477 is a self-determination statute that allows tribes greater control over delivery of social-welfare and workforce development services. It permits eligible Indian tribes and Alaska Native organizations to consolidate into a single plan employment-and-training-related, formula-funded Federal grant monies from ten different programs within the BIA and BIE, the Departments of Labor (DOL), and Health and Human Services (DHHS). The 477 program allows participating tribes to save administrative time and expense due to no longer having the requirement to submit individual program plans and reports, thus affording more support for job placements and case management activities. The grant money that BIA contributes to the 477 program includes Job Placement & Training (TPA) funding.

The Office of Indian Services (OIS) manages the JP&T program and nationally the BIA awards approximately 175 JP&T contracts. The program will complete approximately 20 on-site contract reviews, which will include a review of contract compliance, expense reports, tribal 477 personnel performance and capacity, and property management. The program's Awarding Official Technical

Representatives will work with six Federal program managers and three different agencies to solicit approvals that will result in the completion of approximately 65 contracts, enabling the transfer of funds to contractors who will perform services for program clients, thereby increasing training and work opportunities. Staff will ensure that all required reports are submitted on time and reviewed for accuracy and applicability. Federal partners will continue to be kept abreast of their contributions to each tribe's success.

Subactivity - Economic Development (TPA) (FY 2019: \$1,737,000; FTE: 0):

One-hundred percent of the funding under this program is distributed as base funding to tribes via contract or compact to promote economic growth throughout Indian country. The funding assists tribes in developing programs to build business and commercial capacity for individual tribal members, as well as opportunities for business and energy development to enhance reservation economies. Other tribal programs supported by this funding provide services such as credit counseling, budget counseling, consumer finance education, lending programs and affordable financing.

Subactivity - Minerals and Mining (FY 2019: \$24,119,000; FTE:41):

Program Overview:

The Minerals and Mining program promotes and provides technical assistance for the development of renewable energy, conventional energy, and mineral resources. The Department of the Interior (DOI) holds in trust 56 million surface acres and 59 million acres of subsurface mineral estates and assists tribes and Indian allottees in managing this land throughout Indian country. In consultation with tribes and Indian allottees, the DEMD assists in the exploration and development of trust lands with active and potential energy and mineral resources. This program element represents base funding for Minerals and Mining programs that directly contributes to energy and mineral development on the reservations. It is administered at the BIA Central Office, regional and tribal organizational levels.

The following table shows the significant impact of energy and mineral development on Indian economies. The source of these numbers is from DOI's annual reports on the financial and job creation contributions to the economy from DOI agencies. The IEED's Division of Energy and Mineral Development (DEMD) office is the primary office responsible for fulfilling Indian Affairs' trust responsibility concerning the development of Indian Trust land owners' energy and mineral resources. The DEMD is the only office within the Federal Government with the primary responsibility of assisting Indian Trust land owners in identifying and quantifying their energy and mineral resources and insuring that the Indian Trust land owners realize a maximum economic return from the responsible development of their resources.

**SUMMARY OF ECONOMIC ACTIVITY
INDIAN LANDS (FY 2016)**

DOI Activity (FY 2016)	Direct Economic Contribution (sales in billions)	Jobs	Value Added (billions, \$)	Total Economic Contribution (billions, \$)
Grazing	.02	561	n/a	.05
Irrigation water*	2.53	45,367	3.19	7.71
Energy**	4.18 (62%)	31,809 (39%)	6.02 (64%)	9.58 (53%)
Other minerals***	.00	23	.00	.01
Timber	.05	3,238	.25	.73
Total Contributions to the National Economy	6.78	80,998	9.46	18.08

Source: U.S. Department of the Interior Economic Report, Fiscal Year 2016

* Includes value of crops and jobs produced from irrigation water

** Does not include renewable energy

*** Does not include sand and gravel or other industrial minerals

The program office also implements the Tribal Energy Resource Agreement Program (TERA) and has issued regulations to govern the process for tribes to assume the regulatory functions governing the leases and business agreements associated with energy resource development. This regulatory policy program facilitates the development of renewable energy, fossil fuels, and other mineral resources with a focus on self-determination opportunities for tribes. If a tribe receives approval by the Secretary of the Interior, a tribe may, at its discretion, enter into leases and business agreements for energy development or rights-of-ways for transmission lines and pipelines on its tribal lands without review and approval by the Secretary of the Interior. In support of TERA and the Helping Expedite and Advance Responsible Tribal Homeownership (HEARTH) Act, DEMD has developed the Tribal Energy Development Capacity (TEDC) grant program. The purpose of the TEDC grant program is to develop tribal managerial, organization and technical capacity needed to maximize the economic impact of energy resource development on Indian land. The TEDC grant gives tribes the tools to develop or enhance their business and regulatory environment for energy resource development consistent with TERA and HEARTH Act regulations.

BIA participates on a number of inter-agency teams to coordinate Federal permitting processes and procedures and to facilitate Indian energy resource development. Participation and leadership on these teams provides earlier and better communication among the many bureaus and offices involved in Indian energy development and helps reduce permitting and review time frames.

The Minerals and Mining program is designed to assist tribes and Indian allottees develop their energy and mineral resources and build tribal technical and managerial capacity to manage energy resources. This is accomplished by providing technical and financial assistance to Indian Trust land owners to help them understand their resource potential, where these resources are most likely to be located, to plan for land use impacts and environmental concerns, and how to understand the business agreements and terms

being offered to them to develop their resources. The Minerals and Mining program also offers managerial and business training to Indian resource managers who can best direct and oversee development on their lands. A key component of DEMD's strategy is to work closely with Indian resource managers and agency staff.

Minerals & Mining Program (TPA) (\$3,794,000; FTE: 33):

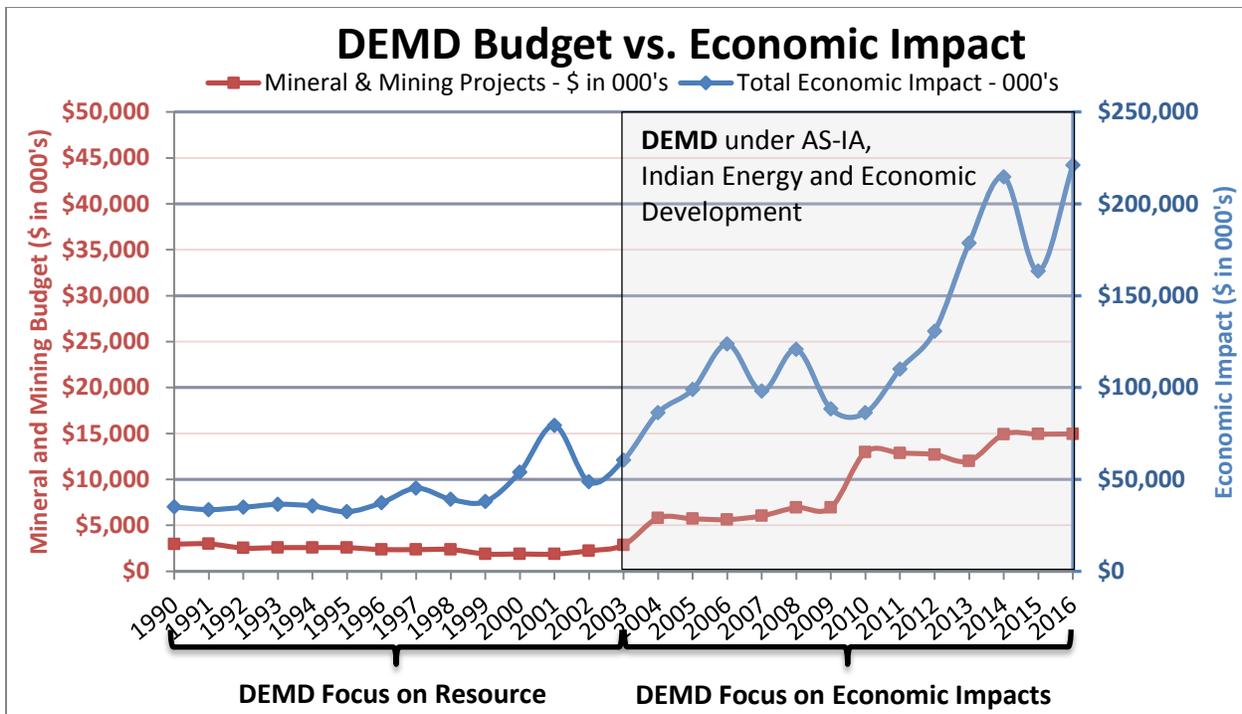

This program element represents tribal base funding for Minerals and Mining programs that directly contribute to energy and mineral development on the reservations. This is administered at the BIA Central Office, regional and tribal organizational levels.

The regulatory policy program facilitates the development of renewable energy, traditional fossil fuels and other mineral resources with a focus on self-determination opportunities for tribes. This program develops a streamlined regulatory process for implementation of the TERA. To enhance regulatory policy coordination for the myriad of energy and mineral development issues among tribes and various Department bureaus, the DEMD also manages and facilitates a Secretarial Advisory Committee that focuses on internal relationships among DOI organizations, the Indian Energy and Mineral Steering Committee (IEMSC). It is also designed to complement the Helping Expedite and Advance Responsible Tribal Homeownership (HEARTH) Act which permits tribes to lease tribal surface trust lands for business and other purposes by implementing their own leasing regulations.

Minerals & Mining Projects [\$14,890,000]:

The BIA, DEMD office is the primary office responsible for fulfilling BIA's trust responsibility concerning the development of Indian mineral owners' energy and mineral resources. It is the only office within the Federal Government with the central responsibility of assisting Indian mineral owners in identifying and quantifying their vast energy and mineral resources and insuring that they realize maximum revenue from their development.

The following chart shows a comparison plot of the Mineral and Mining budget allocation to energy and mineral projects on Indian lands (amounts shown on left axis) versus the economic impact to Indian lands (amounts shown on right axis).

Development of energy resources on Indian lands has contributed to a more secure energy future of the Nation, while also significantly impacting the economic health of many Indian communities. Although the progress has been substantial, there remains much to do to enable tribal self-determination in the development of energy and mineral resources. Recognizing the opportunities that exist for Indians, DEMD’s primary commitment is to provide technical advice, economic analysis and support services so that tribes realize the maximum economic self-sufficiency by creating sustainable economic benefit through the environmentally sound development of their energy and mineral resources.

The DEMD recognizes that the primary reason a tribe elects to develop its energy and mineral resources is to create stable, long-lasting sustainable economic benefits, primarily in the form of jobs and income for its people and communities. Several objectives underlay a tribe’s decision to develop its energy and mineral resources. First, is the desire to create positive, long lasting sustainable economic development. Other objectives include exercising sovereignty, receiving sustainable environmental benefits, and a hedging against high electric utility bills and inconsistent utility services. Economic benefits derived from resource development should not be looked at as a be-all and end-all, but rather as providing seed capital for creating other economic activities located on reservations, which then create sustainable tribal economies as resources are depleted over time. Renewable energy development, on the other hand, provides the opportunity to realize sustainable economic returns over time as these resources are not depleted but continue to produce energy.

Oil and Natural Gas. Oil and gas resources are the largest revenue generator from natural resources in Indian country. The development of shale oil and gas in the United States has been rapid, and advances in technology continue to improve the economic returns for oil and gas production in the U.S. New horizontal drilling applications have accelerated domestic production of oil and natural gas. Since 2008, the output of oil and natural gas has increased dramatically from tight shale formations, representing a

game-changer for conventional energy development and providing an opportunity for economic growth and job creation on Indian reservations.

The economic benefit for Indian tribes is potentially large because many Indian reservations are located in known shale play areas and contain large amounts of undeveloped or underdeveloped areas attractive to oil and gas production companies. The production of oil and gas on Indian lands has historically provided significant royalty income to tribes and individual Indians.

Renewable Energy. The DEMD views renewable energy as one of the many tools available to American Indians and Alaska Natives for creating sustainable economies on Indian land. Many Indian reservations are well positioned to either access or provide a stable source of competitively priced, low carbon energy. Energy security is an issue that is at the forefront of the manufacturing industry. Of the 326 American Indian Reservations, more than 200 have the energy resource capacity needed to create and sustain a 1 to 25 MW renewable power generation facility. This provides a great opportunity for both tribes and private industry to team up and take advantage of the available energy resources. The potential, just for renewable energy, on these reservations is as follows: (a) wind energy, 535 million kW; (b) solar energy, 17,600 million kW; (c) woody biomass, 3 billion kW; (d) geothermal, 21 million kW; and (e) hydroelectric, 5.7 million kW. A tremendous need exists to quantify these potentials on individual reservations to gain a better understanding of how to best develop these resources.

Based on the DEMD frequent and highly involved interactions and collaborations with tribes on their renewable energy projects, it has been determined the primary reasons behind a tribe's desire to develop renewable energy projects were found to involve one or more of the following motivations: Exercising Sovereignty; Energy Independence, Security, and Diversification; Environmental Benefits and Sustainability; and Economic Impact by strengthening and solidifying the tribal economy.

Community scale 1 MW solar array installed at the Fond du Lac Band in 2016.

The DEMD technical assistance and grant funding aids tribes in high energy cost areas to evaluate their renewable energy resources to determine if lower energy costs can be achieved through renewable energy development. These smaller renewable energy projects, where the produced energy is utilized locally, can have a great economic impact on the local tribal community through job creation and energy cost savings. Smaller projects can also be easier to finance, easier for a tribe to

solely own, and easier to connect into the existing transmission system. The DEMD assists tribal exploration efforts in order to develop renewable energy opportunities that facilitate tribal economic development goals. Technical assistance is provided through a team of engineers, geologists, economists, and business development specialists

As of May 2017, DEMD was actively involved in 74 renewable energy projects, with 58 different tribes. These projects encompass biomass, waste to energy, hydroelectric, geothermal, solar, and wind resources. More than half of these are small, community scale projects, where tribes are seeking opportunities to reduce local energy costs and enhance energy security. One such effort is to develop and further define and quantify tribal energy sources for Industrial Scale Energy Production. The primary purpose is to provide a reliable energy resource that could be utilized in manufacturing and industrial processes. The DEMD focuses on energy utilizing high capacity factor (reliable and uninterrupted) such as hydroelectric, geothermal, biomass, and waste-to-energy.

Minerals. The DEMD's solid minerals group provides technical assistance to tribes and Allottees with respect to identification and responsible development of their solid minerals resources. This includes base and precious minerals such as gold, copper, rare earth minerals, aggregate resources for infrastructure and construction projects such as crushed rock and sand and gravel, limestone resources for a variety of industrial uses and indigenous raw materials that can be used for building homes that could ultimately evolve into the creation of tribal housing industries. The solid minerals group is also tasked with assisting tribes in the sound development of coal, including numerous alternatives to simply burning coal in electricity generating power plants.

The solid minerals group's technical assistance includes the following general guidelines to continue to monitor upcoming regional and local infrastructure improvement projects that would require solid minerals resources (e.g. sand and gravel) that could be supplied by tribes or allottees. To identify specific prospective emerging markets for Tribal solid mineral resources with respect to regional and local supply/demand pressures. To work with BIA Regional Directors, tribes and BIA Agencies to provide information about the aforementioned potential emerging markets. Another look will be given to certain completed solid minerals projects that were not marketable several years ago due to the U.S. wide economic downturn and to determine their marketability in the current expanding U.S. economy. To continue with and expand on DEMD's successful assistance to tribes in providing cost effective, sustainable, efficient housing utilizing tribal resources, manpower and expertise. To work with tribes that have large limestone resources that could be potentially used as feedstock for cement manufacture, agricultural limestone for soil amendment in acidic soils, lime production for use in environmental mitigation processes and fluidized beds for coal gasification projects. DEMD is actively assisting three tribes that have significant coal reserves that provide thousands of jobs and millions of dollars in income. This assistance is focused on new alternative uses of coal including the conversion of coal into liquid fuels (diesel, gasoline, aviation fuel, etc.), chemicals as feedstock for many industrial uses (fertilizer, plastics, pharmaceuticals, methanol, etc.) and carbon fiber which is used for a whole host of products ranging from jet airplanes and automobiles to bicycles and golf clubs, etc.)

The DEMD has focused on tribal aggregate needs, primarily road aggregate, in order to help tribes offset raw material costs and provide tribal jobs, income, and related business opportunities. This approach satisfies two major tenets of DEMD's mission: 1) Reservation jobs and income, and 2) retaining money on the reservation.

Direct Technical and Administrative Support to Tribes and Allottees. The personnel who deliver technical assistance include staff credentialed in engineering, geology, geophysics, mineral economics,

and mineral marketing. They work directly with Indian mineral owners. These staff average more than 20+ years of private business experience and operate in teams to address all aspects of exploration and development of renewable and conventional energy, industrial minerals, rare earth minerals, base metals and precious metals.

The assistance to tribes and allottees in evaluating and developing their energy and mineral resource potential starts at a project's conception, continues on to assessment of the resource, and culminates in negotiating agreements that lead to development and production, including:

- Assessment of the energy and mineral potential, including geologic field studies, laboratory analyses, geophysical interpretation and land status;
- Assistance to tribes and Indian mineral owners in marketing energy and mineral resources. This can include sponsoring a tribal representative's attendance and serving as technical representatives for tribes at industrial trade shows, industry forums where tribes can interact directly with prospective industry partners, and providing tribally authorized technical presentations detailing the geology, geophysics, engineering and resource potential of tribal lands to potential partners;
- Advising Indian mineral owners concerning business options and the economic benefits and risks associated with each;
- Generating risk-adjusted economic analyses for Indian mineral owners to utilize as a framework for negotiating value-added agreements with potential business partners; and
- Assisting Indian mineral owners in negotiating complex, value-added agreements with potential business partners conditioned on aggressive work commitments, including acquiring seismic data, drilling wells, timelines, job training, and job placement.

Each year, tribes are offered an opportunity to participate in a grant program for energy and mineral assessment projects. The Energy and Mineral Development Program (EMDP) is an annual program designed to financially assist tribes and Indian allottees in evaluating the energy and mineral resource potential beneath their lands. Proposals are solicited from tribes and a competitive review process is used to select qualified projects for funding. Projects are monitored to ensure that the best possible product is obtained for the funds allocated. Staff provides technical assistance to tribal grantees and supply tribes with geological, geophysical, and engineering reports, maps, and other data. They also interpret data for them and assist tribes in negotiating value added development agreements.

Minerals & Mining Central Oversight [\$4,639,000; FTE: 5]:

Minerals and Mining Central Oversight provides for staff to meet specific legislative requirements concerning trust responsibilities, such as those required under the Linowes Commission and Indian Mineral Development Act (IMDA), including:

- Providing economic evaluations of energy and mineral resources to Indian mineral owners as requested;
- Furnishing expert technical advice on geology, mining engineering, petroleum engineering, geophysics, feasibility studies, market analyses, and mineral economics to Indian mineral owners; and

- Dispensing expert technical advice to the Indian mineral owners in negotiating IMDA agreements with respective developers.

The DEMD assists the Federal Government in meeting its trust responsibilities in the IMDA. The DEMD is best able to provide tribes with a thorough understanding of both the geo-technical data and economic information concerning their resources. This is because DEMD is the only Federal office that maintains and utilizes the many types of geotechnical data pertaining to a tribe's resources. Equipped with this data, tribes are better able to enter into complex development agreements (IMDAs or business agreements) with investors or other parties.

Energy Service Center. This subactivity includes support for the Indian Energy Service Center (Service Center) staffed by BIA, the Office of Natural Resources Revenue (ONRR), the Bureau of Land Management (BLM), and the Office of the Special Trustee for American Indians (OST). The Service Center facilitates energy development in Indian Country. The Service Center will expedite leasing, permitting, and reporting for conventional and renewable energy on Indian lands, and importantly, provide resources to ensure development occurs safely, protects the environment, and manages risks appropriately by providing funding and technical assistance to support assessment of the social and environmental impacts of energy development.

The development of oil and gas and renewable energy resources in several locations within Indian country, have placed new demands on the field-based Federal agencies that contribute to energy development. The agencies must process approximately 250 permits per year to meet the industry's demands or the drilling rigs will move to other non-Indian sites. Workload capacity has not always grown to meet demand and growing this capacity is sometimes hindered by issues associated with securing qualified staffing for remote locations and the implementation of the administrative processes associated with energy development.

The Service Center serves as a multi-agency processing center for certain nationwide trust functions in support of energy production, where this service can be more efficiently provided by an off-site work team. The Service Center supports the Bureau of Indian Affairs (BIA) agencies and regional offices, BLM Field Offices and State Offices, ONRR outreach and accounting functions, and OST beneficiary services. The Service Center provides direct support, technical advice and contractual services to:

- Address backlogs restricting the timely development of energy resources;
- Provide direct services in support of energy development;
- Develop statements (scope of work) and provide funding for contracts to provide short term and long term assistance for field level work to expedite leasing and development;
- Identify and assist with the implementation of best practices for deployment throughout the appropriate bureau or office;
- Help formulate and develop consistent policies, rules, regulations, and business processes, and support the enforcement of them;
- Provide resources to help assess social and environmental impacts of energy development;
- Conduct risk assessments to address management concerns and develop recommendations for improvement; and

- Lead innovative processes or products with multi-agencies which will benefit the trust mineral estate owners, such as closing out statements and outreaches when the mineral estate has ceased production and plugging and reclamation procedures have begun. DOI will work with the Department of Energy (DOE) to develop and implement this program, and to leverage and coordinate with DOE funded tribal programs.

Minerals & Mining Regional Oversight (\$796,000; FTE: 3):

The DEMD provides technical support for renewable and conventional energy. BIA regional staff assist tribes in developing renewable energy potential and facilitating the sustainable management of oil and gas resources in Indian country.

The experienced staff furnishes technical and administrative assistance to tribes under the Indian Mineral Development Act (IMDA) outreach and trust responsibility tracking services. Central office staff facilitates key energy and mineral resource development opportunities on Indian lands while assuring consistency with the execution of Federal trust responsibilities over such resources. Regional office staff provides realty and administrative functions for energy and mineral lease development.

The Assistant Secretary – Indian Affairs, Office of Energy and Economic Development (IEED), Division of Energy and Mineral Development office is Indian Country’s primary office responsible for fulfilling Indian Affairs’ trust responsibilities concerning the development of Indian Trust land owners’ energy and mineral resources.

DEMD is unique within the Federal government in that 90% of its senior staff comes from the energy and minerals private sector. It is akin to a medium sized consulting firm consisting of geologists, engineers, marketers, economists, etc. Consequently the level of technical assistance provided to tribes covers the entire spectrum of energy and mineral resource development. This assistance is hands-on, project specific, and lasts throughout the life of projects, beginning with resource assessment, and culminating in signed agreements to develop Tribal resources or in Tribes obtaining their own financing to create tribally owned businesses. Resource development creates local economic engines throughout Indian Country. DEMD is not the typical government program office that simply distributes monies to Tribes without providing the hands-on technical assistance that is critical to project success.

According to the U.S. Department of the Interior Economic Report FY 2016, September 25, 2017, the Department’s tribal energy and mineral programs had a Total Economic impact of over \$9.58 billion in 2016. According to this study, energy and mineral projects make an economic contribution larger than irrigation, grazing, and timber combined. Indian lands contain vast areas of energy and mineral resources that are under explored and sparsely developed. DEMD offers to tribes a collection of programs and services that pro-actively assist tribal managers to perform the environmentally responsible exploration, development, and management of their energy and mineral resources in order to produce economic self-sufficiency.

Development of oil and gas resources has been the largest revenue generator from natural resources in Indian Country. Over the last ten years, the production of oil and natural gas has increased due to advances in drilling and production technologies. New horizontal drilling applications have accelerated domestic production of oil and natural gas. In 2016 alone (most recent ONRR data available), royalty

income paid to Indian mineral owners from oil and natural gas development was over \$552 million which represents approximately two thirds of all income generated from natural resource development in Indian Country. As an example of DEMD's assistance, in the last three years, DEMD has worked with Tribes in the negotiation of 48 Indian Mineral Development Act (IMDA) leases for oil and gas, totaling approximately 2.75 million acres and about \$45 million in bonuses (i.e., upfront payments). These leases have the potential to produce more than \$20 billion in additional revenue to the Indian mineral owner over the life of those leases through royalties and working interests.

DEMD manages two grant programs – the Energy and Mineral Development Program (EMDP), and the Tribal Energy Development Capacity (TEDC) program. DEMD also developed and implements the NIOGEMS service which provides GIS and data management support to tribes and federal agencies to effectively support oil and gas development. Technical services, including engineering, business development, marketing, economic analysis, and planning, are also available to tribes through direct and dedicated staff time.

The Energy and Mineral Development Program (EMDP) provides financial assistance to Tribes in evaluating their energy and mineral resource potential, providing Tribes with the information and data they need to promote their lands, negotiate the best agreement with investors, and eventually develop the resource.

The TEDC grant gives tribes the tools to develop or enhance their business and regulatory environment for energy resource development consistent with TERA and Helping Expedite and Advance Responsible Tribal Homeownership (HEARTH) Act (25 U.S. Code § 415) regulations.

At the close of FY2017, DEMD was involved in numerous energy and mineral projects with over 80 different tribal entities. Some projects have received funding, and several projects receive technical assistance. Some highlights from FY 2017 are:

- Northern Ute – Reserve and Cash Flow Projections: DEMD is assisting Tribe with potential cash flow analysis and possible development on Tribal lands. This evaluation is critical to projecting Tribal funding and job opportunities. The resource potential is important to
- Rocky Boys – 3D Seismic Acquisition and Geological Interpretation: DEMD is assisting the Tribe with exploration evaluation on a very complicated geological area to promote the development of the Tribes' gas resource. The Tribe purchased several wells, but cash flow has not been adequate to further develop the area. The acquisition and interpretation of 3D seismic data and the reprocessing of existing seismic data will greatly benefit the Tribe with future development. This is a complex area, and more interpretation and geological definition is required to reduce the risk for potential developers.
- Northern Ute – Joint Venture Analysis: DEMD assisted the Tribe with reservoir evaluation, leasing and cash flow predictions for proposed JV enhanced recovery operations. The Tribe is participating as an active joint venture participant and requires ongoing professional economic analysis.
- Osage – Data Digitization: Assisting Tribe with the electronic storage of well records on Tribal lands. This project is necessary to any future development of natural resources on Osage lands.

- Osage – Geological Exploration for potential Resource Development: DEMD is assisting the Osage Nation with the promotion and evaluation of the resource.
- Blackfeet – Geological Exploration for potential Resource Development: DEMD is assisting Tribe with the potential leasing of open acreage on the reservation. Reservoir analysis and contacting potential producing companies is an ongoing project.
- Fort Berthold – Reserve and Cash Flow Projections: DEMD is assisting Tribe with potential cash flow analysis and possible development on Tribal lands. This evaluation is critical to projecting Tribal funding and job opportunities.
- Navajo Nation – Gothic Shale Potential: DEMD is evaluating regional potential regional shale opportunities to promote and forecast possible projects on Trust lands.

Subactivity - Community Development Oversight (FY 2019: \$1,942,000; FTE:2):

The IEED Central Office staff provides management and oversight for all of the DOI's Indian economic development programs, including Indian energy and mineral development; Indian energy policy; the commercial code adoption and implementation program; Indian economic development feasibility study grants; and Indian and tribal procurement outreach and training. It also coordinates intergovernmental collaboration with respect to each of these sub-activities. It is responsible for the day-to-day management of its wide range of projects, creation of new initiatives and monitoring methods, addressing economic development issues as they arise, conducting Internal Control Reviews, and other operational matters.

The IEED's Division of Economic Development (DED), located in the BIA Central Office, assists tribes, American Indians and Alaska Natives to start and sustain businesses, develop commercial codes, bring innovative ideas to the marketplace, take advantage of commercial opportunities, and provide funding (when available) to study the feasibility of tribal economic development projects. Services are delivered through direct technical assistance and by third-party contractors and consultants through discretionary grants. In particular, resources support:

- Training for tribal, American Indian, and Alaska Native business leaders on how to effectively market their products and services and take advantage of Federal, state, and private sector procurement opportunities;
- Hosting business development and procurement events to enable tribes to participate in the Federal market;
- Technical assistance to tribes seeking to expand their legal infrastructure and increase access to business capital by adopting and implementing the Model Tribal Secured Transactions Act (MTSTA);
- Increasing tribal business knowledge by preparing and posting on IEED's website a series of primers dealing with topical tribal economic development issues; and
- Helping tribes meet due diligence requirements to obtain business capital, and preserve scarce tribal financial resources by providing discretionary grants to fund tribal economic development feasibility studies.

Building Tribal Legal Infrastructure. For tribes to successfully develop enterprises, they must first establish an environment conducive to business. In many cases, tribes lack the fundamental set of rules

that guide business dealings, such as corporate codes, commercial codes, and utility authority codes, and this can be an obstacle to tribal energy and mineral development.

To meet this challenge with respect to energy development, IEED staff coordinates and administers the Tribal Energy Development Capacity (TEDC) grant program, which is designed to complement the HEARTH Act. The program seeks to enable tribes to take advantage of the regulatory flexibility and the opportunity for self-determination afforded by the HEARTH Act. TEDC funds support: 1) Establishment of organizational structures or business entity structures capable of engaging in commercial energy development or management activities, including leasing property, meeting lending requirements, entering into standard business contracts, and forming joint venture partnerships. These structures include tribal business charters under Federal law (IRA Section 17 Corporation), and corporations formed under state or tribal incorporation codes; and 2) Development or enhancement of key regulatory activities, including the establishment of tribal policies, enactment of tribal regulations for leasing of surface land for energy development pursuant to the HEARTH Act, legal infrastructure for business formation, regulations, ordinances related to regulating and developing energy resources, and adoption of a secured transactions code or a memorandum of understanding, compact, or letter of intent with the state to register liens pursuant to the code.

Procurement Outreach and Training. Over the past several years, IEED has partnered with Native American Procurement Technical Assistance Centers (PTACs) to sponsor regional matchmaking events in Texas, Nevada, Montana, Minnesota, California, Alaska, Washington, Virginia, and North Dakota. All told, 600 tribal and Native American businesses and some 100 corporate and government buyers participated in these events, which focused on the aerospace, machine shop, and manufacturing industries. During this period, IEED's procurement outreach activities have resulted in or contributed to millions of dollars in contracts for tribal and Indian owned businesses.

This activity funds support programs including Executive Direction, Administrative Services, Safety and Risk Management, Information Technology, Human Resources, Facilities Management, the DOI Working Capital Fund, and Rentals. Executive Direction funds leadership and policy offices. Administrative Services include budget and performance management, accounting management, acquisition and procurement management, property management, safety management, and internal evaluation and assessment. The Safety and Risk Program ensures safety at BIA- and tribally-owned facilities serving BIA-funded programs. The information technology program funds the operation and maintenance of core systems and services for a diverse set of mission needs, including business services, social services, transportation, irrigation, power, trust, forestry, justice services, detention centers, and wildland firefighters. Human Capital Management includes human resources support, workers' compensation payments, and unemployment compensation. Facilities Management provides funding for

operations and maintenance of IA facilities across the Nation consisting of 1,461 administrative-type buildings, including offices, fire stations, garages, warehouses, communication repeaters, and utility plants with approximately 4.6 million square feet at 160 locations. Intra-governmental payments include services provided or administered by the Department of the Interior. The Rental program provides office space for BIA Central, Regional, and Agency offices and special purpose spaces.

Justification of 2019 Program Changes:

Executive Direction (-\$1,378,000; 0 FTE)

The FY 2019 budget request proposes \$19.0 million for Executive Direction functions. The program will continue to deliver policy, consultation, oversight, and technical assistance and guidance to Tribes and individual American Indians and Alaska Natives provided by the BIA central, regional and agency offices.

Administrative Services (-\$6,654,000; -44 FTE)

Program Change [-\$6,017,000; -44 FTE]

Administrative Savings [-\$637,000]

The FY 2019 budget request proposes \$42.7 million for Administrative Services at the Central, Regional and Agency levels. The administrative programs will continue the management of funding distributions to tribes and the field, procurement, property, finance budget formulation, and Indian Self-Determination and Education Assistance Act (Pub. L. 93-638) contracts and grants administration support. The program will continue the management of systems, policies and procedures to ensure financial audit compliance.

To support prioritizing core responsibilities, the FY 2019 budget request includes \$637,000 in administrative savings attained by consolidating and sharing administrative services such as procurement, Information Technology and Human Resources, and by shifting acquisition spending to less costly contracts.

Safety and Risk Management (-\$1,319,000; 0 FTE)

The FY 2019 budget request proposes \$1.6 million for Regional Safety Management. The program will continue to prioritize core responsibilities to support programs across Indian Affairs bureaus, including meeting statutory requirements, such as facilities Safety and Occupational Health Program evaluations.

Information Resources Technology (-\$9,649,000; -11 FTE):

Program Change [-\$7,149,000; -44 FTE]

Administrative Savings [-\$2,500,000]

The FY 2019 budget request proposes \$34.7 million for Information Resources Technology for Indian Affairs programs. The Office of Information Management and Technology will continue to provide computer technology support and services to the BIA organization and to other external customers including the BIA Albuquerque Data Center, a DOI High Value Asset, Indian Health Service (IHS), and the Department of Health and Human Services.

To support prioritizing core responsibilities, the FY 2019 budget request includes -\$2,500,000 in administrative savings attained by consolidating and sharing administrative services such as procurement, Information Technology and Human Resources, and by shifting acquisition spending to less costly contracts.

Human Resources (+\$400,000; 0 FTE)

Departmental Reorganization (+\$900,000; 0 FTE):

Administrative Savings [-\$500,000]

The budget includes \$900,000 to support the Department's migration to common regional boundaries to improve service and efficiency. Organizing bureaus along common geographic lines will allow for more integrated and better coordinated decision making across the Department. The Department will hold a robust consultation process with tribal nations before actions are made with respect to Indian Affairs regions.

To support prioritizing core responsibilities, the FY 2019 budget request includes -\$500,000 in administrative savings attained by consolidating and sharing administrative services such as procurement, Information Technology and Human Resources, and by shifting acquisition spending to less costly contracts.

Labor-related payments (-\$271,000; 0 FTE):

The FY 2019 budget request proposes \$13.5 million for Labor-related payments. Indian Affairs will continue to make workers' compensation payments, and unemployment compensation as required.

Facilities Management (-\$501,000; 0 FTE):

The FY 2019 budget request proposes \$16.9 million for Facilities Management. The program will continue maintenance activities including preventative, routine, cyclical, and emergency repair work for all buildings, site structures, equipment, and utility systems included in the BIA inventory.

Intra-Government Payments (+\$161,000; 0 FTE):

The FY 2019 budget request proposes \$24.8 million for Intra-Government Payments. This funds the direct and central billings for the Departmental Working Capital Fund. These charges include assessments for Department-wide services including oversight of major administrative systems such as the Federal Personnel and Payroll System; DOI University; Facilities Management Services; Support Services; Space Management Services; Technology and Telecommunications services; and FBMS.

Rentals (GSA/Direct) (-\$350,000; 0 FTE):

The FY 2019 budget request proposes \$36.9 million for Rentals. This funds expected GSA and direct lease contracts costs for FY 2019 which incorporate some planned consolidations and utilization efficiencies.

Subactivity - Assistant Secretary Support [FY 2019: \$10,026,000; FTE:0]:

Program Overview:

The Assistant Secretary – Indian Affairs and the immediate staff are included in the Office of the Secretary's budget request; therefore, these FTEs are not reflected in BIA's budget submission. The organizations under the Assistant Secretary described below operate under a reimbursable agreement with the Office of the Secretary.

The *Office of Congressional and Legislative Affairs (OCLA)* oversees and coordinates the legislative planning and congressional relations activities for BIA. The OCLA provides legislative research and assistance to program offices in developing legislation, preparing testimony, and providing legislative histories on various issues. The OCLA also works with Congressional committees and responds to requests for information from congressional staff, DOI, other Federal agencies, tribal leadership, and the public at large on various issues concerning American Indians and Alaska Natives.

The *Office of Public Affairs (OPA)* provides liaison functions with media, the public and other government agencies in need of information about BIA. The OPA creates and disseminates all press releases to news media outlets, websites, and interested stakeholders. The OPA serves as BIA, Web Content Manager as well as monitoring content uploaded by BIA and BIE content managers. The OPA also serves as Internal Communications coordinator for Indian Affairs and approves broadcast communications.

The *Office of Regulatory Affairs and Collaborative Action (ORACA)* conducts the review and revision of all regulations governing Indian Affairs programs facilitating the development and implementation of consistent policies and procedures governing the performance of the Assistant Secretary's Indian trust responsibilities. ORACA also provides tools necessary to meet the trust management goals identified in statute, manages all Federal Register Notices for the organizations reporting to and for ASIA, and is responsible for the development and implementation of the Indian Affairs Conflict Resolution program.

The *Office of Federal Acknowledgement (OFA)* implements Title 25 of the Code of Federal Regulations, Part 83 – Procedures for Federal Acknowledgment of Indian Tribes. On July 1, 2015, DOI issued a final rule regarding Federal acknowledgment which became effective on July 31, 2015. Section 83.7 of these 2015 regulations allows petitioners that have submitted a complete petition but have not yet received a final agency decision to choose whether to proceed under the current 2015 regulations, applying those standards and processes, or the standards and processes of 25 CFR, Part 83 revised as of April 1, 1994 (superseded regulations). For transparency, the 2015 regulations allow OFA to post to its website; petition materials, comments, guidance, and advice to the extent feasible and allowable under Federal law, except documentation and information protected from disclosure under Federal law. These postings allow petitioning groups, other parties (such as state and local governments), and the public to have access to the administrative record.

The *Office of Indian Gaming (OIG)* acts as the primary advisor to the Secretary and Assistant Secretary – Indian Affairs on Indian gaming and implements the Secretary's responsibilities under the Indian Gaming Regulatory Act (IGRA), Pub. L. 100-497. OIG's duties and responsibilities include the administrative review and analysis of the statutory and regulatory requirements of IGRA and related statutes, policy development, and technical assistance to tribal and state stakeholders.

The *Office of Self-Governance (OSG)* Self-governance compacts provide tribal governments with greater flexibility and responsibility to meet the social, economic, and cultural needs of their people and are a cornerstone of tribal sovereignty for many Indian Nations and Alaska Native Villages. Almost half of federally-recognized tribes have entered into self-governance compacts. The OSG combines financial assistance and compacting services for tribes in a one-stop shop. In 2019, it is estimated OSG will distribute funding to 277 tribes covered by 122 self-governance compact agreements.

The OSG conducts a range of fiscal and contracting responsibilities to compact tribes including:

- Negotiating annual and multi-year funding agreements with eligible Self Governance tribes and consortia, calculating contract support, and resolving issues identified in financial and tribal operations.
- Scheduling and reconciling fund transactions with program and account managers in the BIA and with partner Federal agencies.
- Satisfying the program accountability requirements of other Federal agencies by reviewing pass through funding for program funding consistency.
- Assisting in the growth of self-governance by marketing and developing educational products.
- Recruiting additional tribes to enter into self-governance compacts.
- Managing any appeals and conflicts in funding and contractual language.
- Reviewing and resolving annual audit and evaluation reviews.

The OSG provides a central point of coordination on policy and practical issues with other non-BIA offices that engage in self-governance compacting with tribes for non-BIA services and programs. The OSG also provides review for legislative proposals that impact tribal programs in the area of self-governance.

The *Deputy Assistant Secretary for Management Office (DASM)* provides executive leadership, guidance, and direction to the following operations: Office of the Chief Financial Officer, Office of Budget and Performance Management, Office of Information Management Technology, Office of Human Capital Management, the Office of Facilities, Property, and Safety Management, the Division of Administration and Resources Management, and the Division of Internal Evaluation and Assessment.

The *Division of Administration and Resources Management* provides administrative resources, executive correspondence, FOIA management, logistic, and facility management support to the Assistant Secretary organization and subordinate programs. Support includes such activities as government credit card management, time and attendance system support, acquisition of services, and personnel liaison with servicing human resources offices. The Division performs FOIA case management and recordation and executive correspondence processes for all Indian Affairs organizations. The organization also provides logistical facility and property support for the BIA, BIE, and Assistant Secretary organizations in the Washington, D.C. metropolitan area.

Subactivity - Executive Direction (FY 2019: \$18,986,000; FTE: 127):

Program Overview:

Executive Direction provides executive leadership and policy direction for BIA, executing the line responsibility on behalf of and as delegated by the Secretary of the Interior to achieve mission responsibilities. This subactivity provides the core funding for the senior leadership of BIA, including the Office of the Director, the Office of the Deputy Bureau Director - Field Operations, BIA Regional Directors Offices, and BIA Agency Superintendents.

Executive Direction: (TPA) (\$14,358,000; FTE: 98):

This funding supports the Offices of the Superintendent at BIA agency locations located across the Nation. Agency Superintendents serve Tribes at the local level providing planning, direction, and line management leadership for the day-to-day implementation of policy initiatives and program operations. Agency Superintendents also provide decision-making, direction, public relations, BIA representation to other governmental agencies and private sector organizations, and overall management of assigned resources at the local level.

Executive Direction (Central) (\$1,583,000; FTE 11):

The BIA senior leadership at the Central Office management level provides organizational direction and coordination to ensure that all programs are effectively integrated in areas of policy formulation and review, tribal consultation, representation of BIA to other governmental agencies and private sector organizations, and the overall management of assigned resources. The BIA senior leadership provides policy direction and advises on all matters regarding mission, program, functional and managerial policy matters. They also develop and execute policies, administer the employee ethics program, review and evaluate the achievements of BIA, Central Office and all field offices, and coordinate the activities of BIA with other Federal agencies for direct efficient and effective operations.

Executive Direction (Central) also funds the Equal Employment Opportunity (EEO) program. Pursuant to DOI guidance, EEO provides direction and guidance to execute policy on the promotion of EEO programs including, but not limited to, compliance with and enforcement of all current statutes and policies.

Executive Direction (Regional) (\$3,045,000; FTE 18):

The BIA's Regional Directors Offices (RDO) and their immediate support staff are located in 12 Regional Offices throughout the United States. The RDO function primarily on behalf of the Secretary of the Interior, AS-IA, the Director, and BIA on a daily basis by maintaining the government-to-government relationship with tribes and upholding the Indian Trust responsibility. Activities include policy review and formulation, tribal consultation, representing BIA in activities involving other governmental agencies and private/public organizations, determination of BIA administrative and tribal program appeals, and daily administrative of all administrative functions.

Subactivity - Administrative Services (FY 2019: \$42,718,000; FTE: 235):

The BIA Administrative Services are responsible for improving internal controls and fiscal integrity in the areas of budget and performance management, accounting management, acquisition and procurement management, property management, safety management, and internal evaluation and assessment. The BIA Administrative Services provides overarching support to the Office of Trust Services programs, Office Indian Services programs, BIE and OJS along with all other related programs.

Administrative Services (TPA) (\$12,297,000; FTE 104):

This program provides administrative services at the agency level either through direct program services or Pub.L. 93-638 contracts/grants.

Administrative Services (Central) (\$17,021,000; FTE 16):

The *Office of the Chief Financial Officer (OCFO)* is responsible for the Indian Affairs annual financial audit in compliance with the Chief Financial Officers Act of 1990, and the development of systems, policies and procedures to guide the BIA Central and Regional Offices operations in the areas of financial management, accounting and payments, contracts and procurements, and commercial grant administration. The Chief Financial Officers (CFO) Act, the Federal Acquisition Regulations (FAR), the Federal Managers Financial Integrity (FMFIA) Act, the Government Management Reform Act, and various Office of Management and Budget regulations largely guide activities of the OCFO.

The *Office of Facilities, Property, and Safety Management (OFPSM) Division of Property Management (DPM)* is responsible for providing leadership, oversight and advice on property management policies and procedures to Indian Affairs senior management and property management personnel to assure compliance with laws, regulations, and internal controls for the Federal Management Regulation (FMR), Department of the Interior, Office of Management and Budget, and the General Services Administration. DPM ensures that IA's real and personal property and fleet assets serve the mission of IA through strategic management for assets life cycle such as planning, budgeting, acquisition, utilization, and disposal.

The *Office of Budget and Performance Management (OBPM)* is responsible for planning, formulating and justifying the BIA budget submission; and coordinating and executing budget requirements.

The *Division of Internal Evaluations and Assessment* provides guidance and oversight to ensure that internal controls are established and maintained for Indian Affairs programs, organizations, and functions for financial audits of tribal contractors and grantees. The program also monitors programs and resources for compliance with laws, regulations, policies and procedures. The program conducts internal IA reviews to ensure programs achieve intended results and resources are used consistent with DOI agency mission and are protected from waste, fraud, and mismanagement. The program provides financial guidance and assistance to IA organizations on the Single Audit Act and OMB Circular A-133 (A-133), Audits of States, Local Governments and Non-Profit Organizations. The program also ensures financial compliance with the Single Audit Act and 2 CFR Part 200 Uniform Administrative Requirement, Cost Principle, and Audit Requirements for Federal Awards.

Administrative Services (Regional) (\$13,400,000; FTE 115):

The Regional Offices provide administrative services in 6 key areas: finance, budget, facilities management, acquisitions, property management, and safety management. The program regulates and accounts for resources used to achieve BIA's mission and uphold mandates as required by Federal statutes such as the Indian Self-Determination Act, as amended. Each function is a direct operating service in support of Federal trust program activities. To maximize resources, the Regional Offices work with agency sites to coordinate resources to meet programmatic responsibilities. Staff also provides technical advice and assistance to tribes within their servicing areas, specifically related to Pub.L. 93-638 contract and grant programs.

Subactivity - Safety and Risk Management (FY 2019: \$1,647,000; FTE: 15):

Program Overview:

The Safety and Risk Management Program fulfills statutory requirements and administers programs that are required by law for the safety and management of IA-owned facilities serving BIA-funded programs, or tribally-owned facilities serving BIA-funded law enforcement programs and IA employees. These statutes and programs include: Occupational Safety and Health Act, (29 U.S.C. 651 et seq.); inspection of facilities conditions at BIA-funded schools (25 U.S.C. 2005); Federal Employees Compensation Act (U.S.C. 8101 et seq.); the Federal Tort Claims Act (28 U.S.C. 2671 et seq.); Military Personnel and Civilian Employees' Claims Act (31 U.S.C. 3721 et seq.); Bureau Fire Marshal (25 IAM); and Motor Vehicle Operator Safety (25 IAM). The IA Safety and Risk Management Program covers all IA controlled facilities, including facilities constructed, operated or maintained under contracts or grants authorized by the Indian Self-determination and Education Assistance Act (Pub.L. 93-638) or the Tribally Controlled Schools Grant Act (Pub.L. 100-297).

Central Safety & Risk Management [\$748,000; FTE 4]:

The *Office of Facilities, Property, and Safety Management (OFPSM) Division of Safety and Risk Management (DSRM)* provides senior leadership, policy, and oversight for Indian Affairs' (IA) safety programs required by law including occupational safety and health, industrial hygiene, and public safety (non-law enforcement). DSRM reviews architectural and engineering drawings, specifications, shop design submittals, and all other documents for construction and major rehabilitation or repair of facilities and existing facilities for compliance with applicable health and safety codes and standards. DSRM conducts acceptance inspections for new construction and major renovation projects for issuance of a Certificate of Occupancy. The DSRM also collects statistics, analyzes information, prepares reports, provides training, and maintains a safety management information system. The Motor Vehicle Operator, Workers Compensation and Loss Compensation programs are also administered by DSRM.

Regional Safety Management [\$899,000; FTE 11]:

The Regional Safety and Health program ensures that IA employees comply with applicable safety procedures, health laws and regulations to provide a safe and healthful working environment. The program's efforts are focused on developing courses of action to eliminate or reduce hazards to an acceptable level. The program conducts annual workplace inspections, monitors Office of Workers Compensation Program chargebacks, and provides training and technical assistance to all locations with IA-owned or tribally-owned facilities serving IA-funded programs. Other duties include performing annual safety inspections, processing annual driving record history verifications, processing workers' compensation claims, processing loss compensation claims, and conducting safety and health training.

Subactivity - Information Resources Technology [FY 2019: \$34,707,000; FTE: 58]:

The Information Resources Technology (IRT) program provides Information Technology (IT) services to Indian Affairs programs and is responsible for compliance with the Federal Financial Management Improvement Act, Federal Management Financial Integrity Act, OMB Circular A-123, and Federal Information Technology Acquisition Reform Act (FITARA). The IRT program funds the operation and

maintenance of core systems and services for BIA programs to fulfill their obligations to the 573 federally recognized Tribes. The program provides IT support and services to BIA locations nationwide, supporting a diverse set of mission needs, including business services, social services, transportation, irrigation, power, trust, forestry, justice services, detention centers, and wildland firefighters.

Subactivity - Human Capital Management (FY 2019: \$22,836,000; FTE: 74):

Program Overview:

Human Capital Management includes human resources support, workers' compensation payments, unemployment compensation, and employee displacement costs.

Human Resources [\$9,292,000; FTE 74]:

Human Resources consists of the Office of Human Capital Management which provides all human resource operational services to all of Indian Affairs, and the Center for Personnel Security.

The *Office of Human Capital Management* provides all recruitment, on-boarding, personnel staffing, position classification, employee benefit administration and has in-sourced retirement services, personnel action processing, records management, managing and maintaining the personal identity verification card credentialing program, nationwide labor relations administration and contract negotiations, and employee relations including representation before third parties.. The OHCM develops, interprets, and issues HR and employee development policy. The Office also monitors, evaluates, and implements initiatives to improve human resource management processes, services, and organizations in Indian Affairs.

The *Center for Personnel Security* is responsible for determining position sensitivity level for each position occupied; ensuring the appropriate background investigation and reinvestigation is conducted for appointees, employees, contractors, consultants, volunteers, and tribal users for BIA. This office is also responsible for policies and procedures related to suitability and clearance determination and processes.

Labor-Related Payments and Training [\$13,544,000; FTE 0]:

The Labor-Related Payments and Training program consists of the following three components:

Workers' Compensation Payments: Provides reimbursements to the Department of Labor (DOL) for on-the-job injury payments based on the DOL's annual charge back.

Unemployment Compensation: Provides reimbursements to the DOL for unemployment compensation payments on a prorated share. Allocations are based upon percentages obtained from the contractor's match of actual state charges with the DOL's payroll records annually.

Employee Displacement Costs: Pursuant to Section 205 of the 1988 amendments to the Indian Self-Determination Act (Pub.L.100-472), this program covers the payment of separation costs to Indian Affairs employees who are separated from Federal employment due to tribal contracting or compacting of Federal programs under Pub.L. 93-638, as amended. These costs include severance pay and lump sum annual leave payments. .

Subactivity - Facilities Management [FY 2019: \$16,880,000; FTE: 116]:

Program Overview:

The Facilities Management subactivity provides funding for two programs: BIA Regional Facilities Management; and Operations and Maintenance (O&M) for BIA administrative buildings and structures. The BIA Regional Facilities Management programs, operating under the direction of BIA Regional Directors, provide guidance, technical assistance, and oversight to local education, public safety and justice, and BIA Agency facilities management staff to operate and maintain their facilities. In addition Regional Facilities Management programs administer and provide support for executing facilities improvement and repair projects. The O&M program provides funding to operate and maintain BIA facilities across the Nation, which consists of 1,408 administrative-type buildings, including offices, fire stations, garages, warehouses, communication repeaters, and utility plants with approximately 4.5 million square feet at 160 locations across the 12 BIA Regions.

Regional Facilities Management [\$3,744,000; FTE 30]:

The BIA Regional Facilities Management programs, operating under the direction of BIA Regional Directors, provide guidance, technical assistance, and oversight on construction, renovation, operations, and maintenance of BIA-funded facilities to local education, public safety and justice, and BIA Agency facilities management programs. The programs also assist local programs with data gathering and reporting and project development and prioritization to support the Indian Affairs-Facilities Management System.

Operations and Maintenance [\$13,136,000; FTE 86]:

The O&M program funds daily operations and maintenance at BIA facilities at 160 locations across the 12 BIA Regions. The inventory of facilities includes 1,408 administrative-type buildings, including offices, fire stations, garages, warehouses, communication repeaters, and utility plants with approximately 4.5 million square feet. O&M services keep buildings in safe, healthy, and environmentally compliant conditions.

Facilities Operations: Operations activities and costs include janitorial services, utilities expenses, refuse disposal, fire protection, maintenance vehicles, communication services expenses, and pest control. Utility expenses include electrical power, natural gas, propane, heating oil, potable water, sewer, and refuse collection.

Facilities Maintenance: Funding covers annual routine maintenance activities and preventive, cyclical, and emergency unscheduled repairs and replacement projects below \$2,500 addressing needs at BIA structures, equipment, and utility systems. In addition to buildings, structures include telecommunication radio repeater towers, water towers, underground and above ground fuel storage tanks, parking lots, landscaping, sidewalks, and fencing. Equipment includes heating, ventilation and air conditioning (HVAC), boilers, furnaces, fire alarm panels, sprinkler controls, security lights/camera and emergency lights and sirens and master control systems. Utility systems include electrical systems, potable water treatment and distribution systems, sewer treatment and collection systems, storm drainage, fire hydrants, gas distribution, street lighting and Supervisory Control and Data Acquisition.

Subactivity - Intra-Governmental Payments [FY 2019: \$24,752,000; FTE: 0]:

Indian Affairs makes contributions to the DOI Working Capital Fund for services provided or administered by the Department, the Interior Business Center (IBC), the United States Postal Service (USPS), and the General Services Administration (GSA). Department-wide services include oversight of major administrative systems such as the Federal Personnel and Payroll System; DOI University; Employee and Public Services; Security Program; Facilities Management Services; Support Services; Space Management Services; Technology and Telecommunications services; and FBMS. The GSA charges include voice and data services; USPS charges consist of all classes of mail being utilized by the BIA.

Subactivity - Rentals [GSA/Direct] [FY 2019: \$36,857,000; FTE: 0]:

This program provides the core funding for BIA office and special purpose spaces, which includes occupancy agreements with GSA and direct leases, primarily with tribes. Funding covers rental costs for all Indian Affairs programs including office space for Indian Affairs central, regional and agency offices, Indian education schools and offices, and Office of Justice Services law enforcement and detention centers, including grounds.

GSA Rentals: Funds support approximately 100 GSA occupancy agreements with over 1.0 million square feet of office, warehouse, and parking space as well as building and storage lots. Funding also supports 25 direct leases with approximately 550,000 square feet of office and warehouse space as well as four land leases/easements and three detention centers/police stations which contain an additional 145,000 square feet of space.

Direct Rentals: Funds cover lease contract costs for spaces directly leased by BIA under GSA's delegation of lease authority program.

The BIE serves as a capacity builder and service provider to support Tribes in delivering culturally appropriate education with high academic standards to allow students across Indian Country to achieve success. The core mission of the BIE is to support the BIE school system and administer grants to higher education tribal institutions. The Bureau of Indian Education manages a school system with 169 elementary and secondary schools and 14 dormitories providing educational services to 47,000 individual students, with an Average Daily Membership of 41,000 students in 23 States. The BIE also operates two post-secondary schools and administers grants for 29 tribally controlled colleges and universities and two tribal technical colleges.

Justification of 2019 Program Changes:

ISEP Formula Funds (Forward Funded) (-\$20,710,000):

The ISEP formula funds serve as the primary funding source for basic and supplemental educational programs at BIE-funded elementary and secondary schools. The FY 2019 proposed level of funding for School Year (SY) 2019-2020 will provide an estimated \$5,272 per Weighted Student Unit (WSU).

ISEP Program Adjustments (Forward Funded) (-\$2,780,000):

ISEP Program Adjustments enable BIE-funded schools to respond to specific findings of need or deficiencies. The FY 2019 proposed level allows BIE to prioritize contracts supported by adjustments, such as continuing to provide BIE the ability to fund safety operations and support safe and secure schools.

Education Program Enhancements (Forward Funded) (\$-5,807,000):

In FY 2019, BIE will continue to provide basic services and technical assistance to schools to improve student outcomes, such as identifying and supporting school improvement measures, data-driven methodologies, innovative programs, and resource materials that complement and enhance existing programs.

Tribal Education Departments (Forward Funded) (-\$2,483,000):

The FY 2019 budget does not request funding for this program to enable BIE to focus its efforts on direct school operations and classroom instruction.

Student Transportation (Forward Funded) (-\$4,941,000):

The BIE school system is located across 64 reservations in 23 states in largely rural and geographically remote areas. The annual transportation distance for BIE schools totals nearly 14.9 million miles, not counting bus, train and airline costs to transport residential students. The proposed FY 2019 budget funds transportation at a rate of \$3.11 per mile for SY 2019-2020.

Early Child Development (Forward Funded) (-\$18,532,000; FTE -51):

The FY 2019 budget does not request funding for this program.

Tribal Grant Support Costs (Forward Funded) (-\$5,648,000):

The FY 2019 budget request supports 100% of Tribal Grant Support Costs calculated need.

Facilities Operations (-\$5,551,000):

The Education Facilities Operations program conducts repair services, custodial services, grounds maintenance, fire protection response and inspection, refuse collection and disposal, utility services, and abates safety and health deficiencies.

Facilities Maintenance (-\$5,141,000):

The Education Facilities Maintenance funds address annual facilities maintenance and unscheduled maintenance problems costing less than \$2,500.

Juvenile Detention Center Education (-\$497,000):

The FY 2019 budget does not request funding for this program.

Johnson O'Malley Assistance Grants (TPA) (-\$14,678,000):

The FY 2019 budget does not request funding for this program.

Tribal Colleges and Universities (Forward Funded) (-\$3,655,000):

The Tribal Colleges and Universities (TCU) receiving grants in FY 2019 will provide services to an estimated 23,000 students.

Tribal Technical Colleges (Forward Funded) (-\$900,000):

The Tribal Technical Colleges (forward funded) program funds core functions (e.g., classroom instruction and school operations) at United Tribes Technical College (UTTC) and for Navajo Technical University (NTU).

Haskell and SIPI (-\$2,772,000):

In FY 2019, Haskell and SIPI will support an estimated 949 and 529 students respectively. Haskell will continue the successful efforts begun in the 2016-2017 academic year to increase student retention and graduation rates. SIPI will continue the "Expect Success" framework which utilizes data to track student cohorts and develop customized interventions to improve academic success and student retention.

Tribal Colleges and Universities Supplements (TPA) (-\$63,000):

Tribes may choose to direct Tribal Priority Allocations (TPA) funds to supplement the operation of their TCUs. Currently, six tribes are providing tribal colleges with these funds. Funds are used for policy development, curriculum additions, and general program operations designed to meet the specific needs of a TCUs' community members.

Scholarships and Adult Education (TPA) (-\$34,547,000; FTE -2):

The FY 2019 budget does not request funding for this program.

Special Higher Education Scholarships (-\$2,972):

The FY 2019 budget does not request funding for this program.

Science Post Graduate Scholarship Fund (-\$2,433):

The FY 2019 budget does not request funding for this program.

Education Program Management (-\$9,116; FTE -37):

Administrative Savings (-\$206,000)

To support prioritizing core responsibilities, the FY 2019 budget request includes \$206,000 in administrative savings attained by consolidating and sharing administrative services such as, procurement, Information Technology, and Human Resources; and by shifting acquisition spending to less costly contracts.

Program Efficiencies (-\$8,910)

In FY 2019, BIE will continue to restructure and expand responsibility for administrative services and construction.

Education IT (-\$2,515):**Administrative Savings (-\$157,000)**

To support prioritizing core responsibilities, the FY 2019 budget request includes \$157,000 in administrative savings attained by consolidating and sharing administrative services such as, procurement, Information Technology, and Human Resources; and by shifting acquisition spending to less costly contracts.

Program Efficiencies (-\$2,358)

In FY 2019, BIE will meet core IT needs including support for the Wide Area Network (WAN) infrastructure and data systems to manage school records and student performance.

Bureau of Indian Education Overview:

The United States has a trust and treaty responsibility to provide eligible Indian students with a quality education that reflects the unique cultural, geographic, and socio-economic circumstances of Indian Country. The BIE serves as the principal government agency in ensuring that the United States' educational obligations to Indian tribes and their eligible Indian students are fulfilled. As stated in Title 25 CFR, Part 32.3, BIE's mission is to provide quality education opportunities from early childhood through life in accordance with a tribe's needs for cultural and economic well-being, in keeping with the wide diversity of Indian tribes and Alaska Native villages as distinct cultural and governmental entities.

Historically, there have been three major legislative actions aimed at improving the delivery of education to eligible Indian students. First, the Indian Reorganization Act of 1934 introduced the teaching of Indian history and culture in BIA schools (until then it had been Federal policy to acculturate and assimilate Indian people through a boarding school system). Second, the Indian Self-Determination and Education Assistance Act of 1975 (Pub.L. 93-638) gave authority to federally recognized tribes to contract with the Bureau of Indian Affairs (BIA) for the operation of Bureau-funded schools and to determine education programs suitable for their children. Third, the Education Amendments Act of 1978 (Pub.L. 95-561) and further technical amendments (Pub.L. 98-511, 99-99, and 100-297) provided funds directly to tribally operated schools, empowered Indian school boards, permitted local hiring of teachers and staff, and established a direct line of authority between the BIE Director and the AS-IA. The No Child Left Behind Act of 2001 (Pub.L. 107-110) brought additional requirements to the schools by holding them accountable for improving their students' academic performance with the Department of Education supplemental program funds.

Education Subactivities

The *Elementary and Secondary (forward funded)* subactivity provides the primary funding for the core functions of the BIE school system: educational programs (including supplemental programs), transportation, security, and school administration. These funds are forward funded, meaning they are executed during a 15-month period between July 1 of the appropriation year and September 30 of the following appropriation year.

The *Elementary/Secondary* subactivity, including facilities operations and maintenance funds, is distributed at the beginning of the fiscal year, and are expendable for a 24-month period. Collectively, these two subactivities support a total of 183 elementary, secondary, residential and peripheral dormitories across 23 states, 131 schools are tribally controlled under Pub.L. 93-638 contracts or Pub.L. 100-297 Tribally Controlled Grant Schools Act, and 52 schools are operated by the BIE. The BIE elementary and secondary school system serves about 46,810 individual students with a calculated three year Average Daily Membership of 40,728 students.

The *Post-Secondary (forward funded)* subactivity provides funding to 29 Tribally Controlled Universities and two technical colleges. The funds are provided in July of the appropriation year and are available for use during the forthcoming school year via operating grants, endowment grants, and technical assistance.

The *Post-Secondary* subactivity funds the operation of BIE’s two post-secondary institutions: Haskell Indian Nations University and Southwestern Indian Polytechnic Institute (SIPI). Funds are also used for supplements to Tribal Colleges and Universities.

The *Education Management* subactivity consists of Education Program Management and Information Technology. This subactivity represents just over two percent of total funding (including all funding provided to BIE by the Department of Education) for BIE educational activities. Education Management supports staff at BIE’s Education Resource Centers (ERC) in their role providing direct and customized technical assistance. The BIE’s ERCs are forward-located in close geographical proximity to the schools and dormitories within their respective service areas.

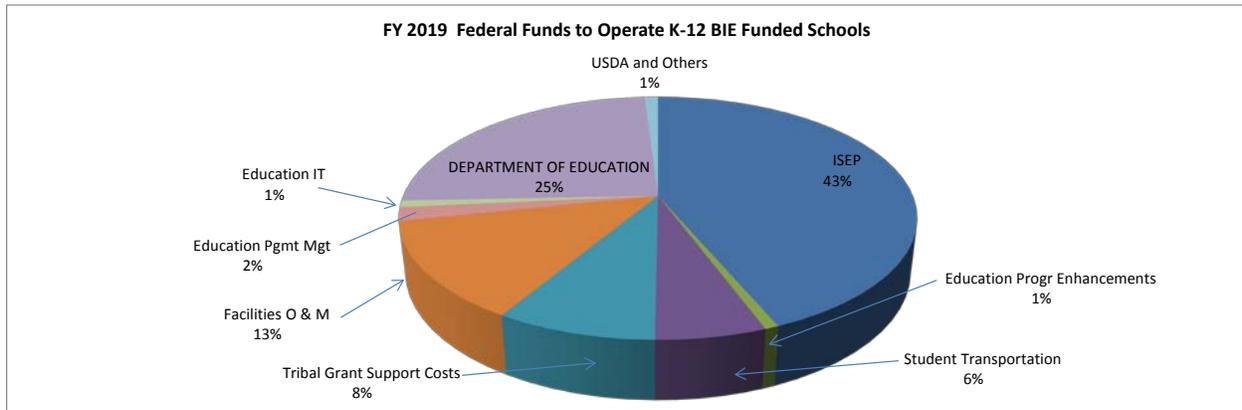

BIE-Funded Operations by Category			
Type Unit	FY 2018 Total Count	FY 2018 Tribally Operated	FY 2018 BIE Operated
Early Childhood Centers	47	31	16

Dormitories	14	13	1
Boarding Schools	44	22	22
Off Reservation Boarding Schools	7	3	4
Post-Secondary Schools	33	31	2
BIE-Owned Schools	2	0	2
Tribal Colleges and Universities Grants	29	29	0
Tribal Technical Colleges	2	2	0

Funding Sources

The FY 2019 request for BIE elementary and secondary school operations is \$625,890,000. In addition, the Department of Education will transfer approximately \$215,000,000 to educate and provide services to students attending BIE-funded elementary and secondary schools. BIE serves in the capacity of a State Education Agency (SEA) and administers and oversees the Department of Education’s programs for

disadvantaged children, individuals with disabilities, and teacher quality improvement, amongst others, in BIE-funded schools.

Some schools also receive competitive grants directly from the Department of Education and other Federal agencies, such as the Federal Communication Commission's (FCC) E-Rate and USDA Free and Reduced Meals programs. Tribal post-secondary schools are also funded by a combination of BIE, Department of Education, USDA Free and reduced lunch and other Federal agency sources.

The FY 2019 request for Post-Secondary Programs is \$92,652,000 which supports the two colleges operated by BIE, administers grants for 29 tribally operated colleges, and funds two tribal technical colleges.

The BIE school system employs thousands of teachers, administrators and support personnel, while many more work in tribal school systems which are funded by BIE. Improving education and literacy in tribal communities is essential to improvement of community life, the promotion of economic development, improved employment opportunities, and improved standards of living for future generations of American Indians and Alaska Natives.

BIE PROGRAMS FUNDED BY THE DEPARTMENT OF EDUCATION IN 2019

(School Year 2018-2019)

Type	Amount \$	Description
Individuals with Disabilities Education Act, Pub.L. 94-142, as amended by Pub.L. 105-17, Part B, Section 611(a) (1)	\$75,904,933	This program is to ensure that all children with disabilities receive a free appropriate education that provides special education services designed to meet their unique needs and prepare them for further education, employment, and independent living. Funds provide students, ages five to 21, with supplemental services in accordance with an Individual Education Plan.
Education of Homeless Children and Youth (McKinney-Vento Homeless Assurance Act), Pub.L. 107-110	\$770,000	This program is intended to ensure that homeless children and youths have access to the education and other services they need to meet the same challenging academic achievement standards to which all students are held.
Title I Part A – Education for the Disadvantaged, Pub.L. 107-110	\$106,449,866	This program is to help ensure that all children have the opportunity to obtain a high-quality education and reach proficiency on challenging performance standards. Funds may be used for supplemental services and activities, most commonly for instruction in reading and mathematics.
Title I – Helping Disadvantaged Children Meet High Standards, Pub.L. 107-110. 1003(G) funding	\$2,925,465	1003(G) School Improvement Grants (SIG) are made to SEA’s for competitive subgrants to local educational agencies (LEAs) to provide adequate resources to substantially raise the achievement of students in the lowest performing schools.
School Improvement Title II – Part A Teacher Quality Improvement, Pub.L. 107-110	\$10,227,754	This program increases student achievement by elevating teacher and principal quality through recruitment, hiring and retention strategies, and professional development and holds districts and schools accountable for improvements in student academic performance.
Title IV, Part B Supporting Effective Educator Development Program	\$2,000,000	Grantees may use the funds to recruit and train prospective teachers, principals, or other school leaders. They may also use the funds to provide professional development activities to address the needs of LEAs. Grantees may also provide professional enhancement activities that lead to an advanced credential.
Title IV – Part B 21 st Century Community Learning Centers, Pub.L. 107-110	\$8,230,740	This program provides services, during non-school hours or periods, to students and their families for academic enrichment, including tutorial and other services to help students, particularly those who attend low-performing schools, to meet state and local student academic achievement standards.
Title VI – Part B Rural Education, Pub.L. 107-110	\$439,600	This program provides additional funds to rural districts that serve concentrations of poor students. An LEA that is eligible to receive funds under the Small, Rural School Achievement program may not participate in the Rural and Low-Income School Program.
Title VII – Indian Education Act, Formula Grants to LEA’s Pub.L. 107-110	\$2,174,138	This program provides funds to meet the unique educational and culturally related academic needs of American Indian and Alaska Native students so that they can meet the same challenging state student academic achievement standards as all other students.
Striving Readers - Title 1 Demonstration Authority, Part E, P.L. 107-110	\$1,900,000	The purpose of the Striving Readers Comprehensive Literacy discretionary grants is to create a comprehensive literacy program to advance literacy skills for students from birth through grade 12, including limited-English-proficient students and students with disabilities.
Title IV, Part A - Student Support and Academic Enrichment Grant	\$2,000,000	This program provides funds to provide students with a well-rounded education including programs such as college and career counseling, STEM, arts, civics and International Baccalaureate/Advance Placement; supports safe and health students; and supports the effective use of technology.
Title VI – Part A – Subpart 1 – Improving Academic Achievement, Accountability, Grants for State Assessments and Enhanced Assessments	\$1,850,510	This program helps develop the assessments required under the NCLBA and supports collaborative efforts with institutions of higher education or research institutions to improve the quality of assessments.
Total	\$214,873,006	
Department of Education amounts represent funds distributed to schools only, and does not include Department of Education Indian set-aside funding, which is distributed directly to tribes, tribal organizations, tribal colleges, and tribal universities.		

Subactivity - Elementary and Secondary (Forward Funded) (FY 2019: \$511,788,000; FTE: 1,645):

Program Overview:

The Elementary and Secondary forward funded programs provide base funding for the operation of the entire BIE elementary and secondary school system. The programmatic goal for the forward funded Elementary and Secondary subactivity is to ensure that BIE-funded schools are capable of providing students with a high quality education in a manner that is culturally relevant to Indian students. In order to ensure that it is meeting this goal, the BIE annually assesses academic performance (mathematics and reading/language arts), graduation rates, and attendance. Funds appropriated for FY 2019 for these programs will become available for obligation on July 1, 2019.

ISEP Formula Funds [\$378,055,000; FTE: 1,477]:

The ISEP formula funds serve as the primary funding source for basic and supplemental educational programs at BIE-funded elementary and secondary schools. In SY 2017-2018, this funding will support an estimated 46,810 individual students with a calculated 40,728 Average Daily Membership (ADM) at BIE schools and dormitories.

The ISEP distribution is based on the number of students attending school during the year and their academic needs. In calculating ISEP funding BIE first determines a school's ADM. The ADM is based on the attendance of students during the entire year. The ADM is adjusted for special academic needs of students, as well as for other purposes, in order to arrive at a WSU. Distribution of ISEP funding is based on the number of WSU at each school. The ISEP formula provides additional funding for schools with residential programs. Please see table on ISEP Formula Funding methodology in this chapter and Appendix 2, ISEP Funding by School.

The proposed level of funding for SY 2019-2020 is projected to provide an estimated \$5,272.27 per WSU. In SY 2017-2018, the most recent year with funds distribution data, the majority of funding, \$292,392,300 or 73.9 percent is being used for basic education programs. Approximately \$27,366,700 or 6.9 percent supports language development programs, and \$13,239,100 or 3.4 percent supports programs for gifted and talented students, and 14.9 percent is expended for residential and dormitory costs.

Average Daily Membership	Actual SY 13-14	Actual SY 14-15	Actual SY 15-16	Actual SY 16-17	Estimate SY 17-18	Estimate SY 18-19	Estimate SY 18-19
Single-year ADM	41,532	41,129	40,460	40,595	TBD	TBD	TBD
3-year rolling average ADM	41,333	41,464	41,408	41,040	40,728	40,728	40,728

Distribution of FY 2017 Funding for SY 2017-2018 ISEP Funding and Weighted Student Units by Program		
Program/Weighting Factor	Weighted Student Unit (WSU)	
	Three Year Average WSU	ISEP Funding @ \$5,582.20 ¹ per WSU (\$000)
Basic Instructional	52,378.83	292,392.30
Language Development	4,902.44	27,366.70
Gifted & Talented	2,371.64	13,239.10
Total Educational Programs	59,652.91	332,998.10
Small School Adjustment & Isolation Factor	628.91	3,510.70
School Board	63.60	355.00
Subtotal Instruction	60,345.42	336,863.80
Dormitory and Boarding	10,024.01	55,956.60
Small School Residential Adjustment	500.43	2,793.53
School Board	1.20	6.70
Subtotal Dormitory & Boarding	10,525.64	58,756.83
Total	70,871.06	395,620.63

¹ Funding per WSU based on annual appropriations minus one percent of the total ISEP funding for contingencies as authorized by law and \$600,000 to resolve student count appeals.

ISEP FORMULATION METHODOLOGY

The formula for ISEP funding distribution is driven by the student count at a school for the entire school year, referred to as the Average Daily Membership (ADM), and a Weighted Student Unit (WSU) for each school. The WSU is calculated by weighting ADM for each school to account for the school's requirement for special services including basic education, language development, gifted and talented programs, and residential requirements. There are also weights for small schools, the grade levels at a school, and any supplemental education programs the school offers due to student need. The WSU is then averaged with the two previous years' WSU data to arrive at a three year rolling average, which is used in all calculations.

Distribution of ISEP funding is based on a dollar amount per WSU, which is calculated by dividing the ISEP formula funds by the total WSU after deductions are made to the ISEP funds as authorized by the Hawkins-Stafford Elementary and Secondary School Improvement Amendments of 1988, Pub.L. 100-297, as amended. The law stipulates that one percent of ISEP funding be set aside for contingencies at BIE schools. The BIE also sets aside \$600,000 to resolve student count appeals, after which any remaining balance is distributed to schools via the formula.

The following table displays the funding history for Indian Education from BIE and the Department of Education:

INDIAN EDUCATION FUNDING HISTORY: BIE AND DEPARTMENT OF EDUCATION						
School Years	FY 2014	FY 2015	FY 2016	FY 2017 (est)	FY 2018 (est)	FY 2019 (est)
	SY 14-15 PLAN	SY 15-16	SY16-17	SY17-18 EST	SY18-19 EST	SY19-20
Program Funding (in \$ millions)						
BIE School Operations	637.3	654.2	689.1	726.2	721.7	642.4
Dept. of Education ¹	196.8	199.3	205.9	214.9	214.9	212.9
TOTAL Program Funding	834.1	853.5	895.0	941.1	936.6	855.3
Number of BIE Students (ADM)¹						
	41,424	41,352	41,027	40,728	40,728	40,728
Per Student (ADM) Funding (In dollars)						
BIE plus Dept. of Education	20,135	0	21,816	23,107	22,996	21,001
BIE Only	15,384	15,820	16,797	17,830	17,720	15,773
ISEP Only ²	9,280	9,348	9,551	9,603	9,760	9,282

¹ ADM is a three-year rolling average. As a result of *Public Law 112-74*, Consolidated Appropriations Act, 2012, the Bureau of Indian Education began funding the academic program at Jones Academy in July 2012.

² Costs for residential students will be higher than the above average while day students will be lower than the above averages.

ISEP Program Adjustments [\$2,617,000; FTE: 17]:

The ISEP Program Adjustments funding enables BIE-funded schools to target specific projects. Many schools utilize these funds to operate safe school initiatives.

Education Program Enhancements [\$6,341,000; FTE: 28]:

The Education Program Enhancement program enables BIE to provide services and technical assistance to schools in order to improve student outcomes. ERCs also utilize the Enhancement Program to fund short and long term professional development, at all levels of the BIE schools system. Each ADD and ERC works in close cooperation with tribes and the schools they serve, both BIE operated and tribally controlled, and provides necessary resources to meet the unique needs and priorities of individual tribes and their schools. Assistance provided by the ADDs and ERC includes, but is not limited to, training to individual schools, instructional programs designed to meet the specific student needs, and culturally relevant instructional strategies. Finally, Enhancement Program funds are used to provide targeted college and career ready programs through the College Bridge program. The BIE’s College Bridge program draws upon the capabilities and resources to provide resource materials, staff, and outreach programs designed to increase student readiness for post-graduation success.

Student Transportation [\$50,802,000; FTE: 123]:

The BIE Transportation funds are used to pay for bus leases, fuel, maintenance, vehicle replacement, driver salaries, and staff training. In addition, BIE Transportation funds also cover the commercial costs of transporting students to boarding schools within the BIE school system at the beginning and end of each school year; some students are provided an additional round trip home at mid-year. Distribution of BIE’s Transportation funding is based on the number of miles driven and actual commercial transportation costs incurred.

The annual accumulated distance traveled by BIE-funded school busses totals nearly 15 million miles. BIE-funded schools are spread across 23 states and are largely located in rural and geographically remote areas. Mileage is verified and certified by each school’s respective ERC. In addition, approximately 15 percent of BIE’s school transportation miles are on dirt or unimproved roads. The following table includes the mileage recorded at BIE schools annually for SY 2010-2011 through SY 2016-2017 and provides projections thereafter. Detailed funding distribution by schools is provided in Appendix 2, Student Transportation by School, including road mileage recorded at each school.

Annual Student Miles Travelled and Funding Per Mile						
Year	School Year	Annual Miles Travelled (000)			Mileage Funding (\$000)	Funding Per Mile (\$)
		Day Student Miles	Residential Student Miles	Total Miles		
2011	2011-2012	14,885	318	15,203	48,041	\$3.16
2012	2012-2013	14,914	304	15,218	48,089	\$3.16
2013	2013-2014	14,685	297	14,982	44,946	\$3.00
2014	2014-2015	14,852	293	15,145	48,614	\$3.21
2015	2015-2016	14,643	279	14,921	49,165	\$3.27
2016	2016-2017	14,769	325	15,094	48,477	\$3.21
2017	2017-2018	14,717	283	15,000	51,857	\$3.46
2018	2018-2019	14,717	283	15,000	51,477	\$3.43
2019	2018-2019	14,717	283	15,000	46,664	\$3.11

1. For calculating student transportation costs, the school year equates to the fiscal year. 2018 and 2019 are estimates as actuals are not yet available.
2. Residential student miles will vary from year to year depending upon where the student population’s domiciles are located.
3. Does not include commercial transportation costs of approximately \$4.14 million for FY 2017.

Tribal Grant Support Costs [\$73,973,000]:

A major goal of BIE is to facilitate tribal sovereignty over education by assisting tribes in assuming the operation and management of BIE schools. In order to further participation by tribes, it is critically important to ensure that the administrative costs which accompany the operation and management of tribally controlled schools are provided for by BIE. The BIE’s Tribal Grant Support Costs is designed to accomplish this goal. Tribes operating BIE-funded schools use these funds to cover the overhead costs of operating a school, meet legal requirements, and carry out support functions that would otherwise be provided by BIE directly. The FY 2019 budget request supports 100% of calculated need.

Funds are distributed by formula according the following methodology:

ADMINISTRATIVE COST GRANT DISTRIBUTION FORMULA
In accordance with the Hawkins-Stafford Elementary and Secondary School Improvement Amendments of 1988, Pub.L. 100-297, as amended by the NCLBA, individual administrative cost grants are determined using an administrative cost percentage rate calculated by the following formula:
$\frac{(\text{Tribe Administered Program Dollars} \times 11\%) + (\$600,000 \text{ (std Direct Cost Base)} \times 50\%)}{(\text{Tribe Administered Program Dollars}) + (600,000)}$
The above formula generates a percentage that is then multiplied by the Tribally administered program dollars (called the Tribal Direct Cost Base which is the total number of Federally appropriated dollars managed by the tribe) to calculate the dollars for the Administrative Cost Grant. The Administrative Cost Grant equals the value generated from the formula above or a minimum amount of \$200,000 regardless of the number of students (as required by the NCLB), prorated based on the availability of funds.

Subactivity - Elementary/Secondary Programs (\$114,128,000; FTE: 369):

Program Overview:

The funds in this subactivity are not forward funded, as such, they are available for the entire two year period of authorization for the annual Operation of Indian Programs appropriation. Funds for facilities operations and maintenance (O&M) are distributed by formula to schools in the BIE school system.

Facilities Operations [\$60,405,000; FTE: 168]:

Schools are operated and maintained in a fashion that ensures their continued safety and usefulness for educational purposes. Facilities Operations funds the operational expenses for BIE-funded educational facilities. Presently, the Education Facilities Operations program addresses the services required to manage an O&M program. Common expenses for operating BIE-funded facilities include: electricity, heating fuels, communication, grounds maintenance, vehicle rental (excluding school buses), refuse collection, custodial services, pest control, water and sewer service, fire/intrusion monitoring, and operations program administration.

Facilities Maintenance [\$53,723,000; FTE: 201]:

The BIE's Facilities Maintenance funds are used to conduct preventive, routine, and unscheduled maintenance for all school buildings, equipment, utility systems, and ground structures. Like the Education Facilities Operations program, the Maintenance program also addresses the services required to manage a BIA, O&M program. These funds provide needed maintenance services for:

1. Equipment, including heating, ventilation and air conditioning systems, boilers and other pressure vessels, furnace, fire alarms and sprinkler, radio repeaters, and security systems;
2. Utility systems such as portable water wells, water treatment plans, and water storage tanks; and,
3. Horizontal infrastructures including sidewalks, driveways, parking lots, and landscaping.

Providing adequate maintenance keeps school facilities from deteriorating and can extend the useful life of a school facility by as much as 50 percent.

Subactivity - Post Secondary Programs (Forward Funded) (\$72,128,000; FTE: 0):

Program Overview:

Under the provisions of Pub.L. 95-471, the Tribally Controlled Colleges or Universities Assistance Act of 1978, as amended by Pub.L. 110-315, the Higher Education Opportunity Act of 2008, BIE administers funds to operate post-secondary institutions: Haskell and SIPI. In addition, the BIE administers grants for 29 tribally operated colleges and funds two tribal technical colleges.

Tribal Colleges and Universities (Forward Funded) [\$65,664,000]:

Tribal Colleges and Universities (TCUs) provide tribal communities with necessary resources and facilities to teach Indian students the skills they need for career success. Post-secondary education of tribal members is also an important component in the economic development plans of tribes. In many

instances TCUs are the primary access tribes and Indian students have to a post-secondary education. In most instances TCUs are two-year institutions that award associate level degrees or career certifications, but some also award baccalaureate degrees. Recognizing the importance of partnerships, many TCUs have leveraged their BIE funding by teaming with local and national businesses to provide training-partnership opportunities for Indian students. BIE funded an additional TCU, Red Lake Nation College, beginning in July 2017.

The Tribally Controlled Colleges and Universities Assistance Act (Pub.L. 95-471, as amended by Pub.L. 110-315), authorizes BIE to award grants to TCUs in order to defray expenditures associated with academic, educational, and administrative operations. Funding under this authorization is distributed through two Title programs which support faculty, facilities, and instructional programs for TCUs. The TCUs receiving grants in FY 2018 will provide services to an estimated 23,000 students.

During SY 2018 - 2019, there will be 29 Title I schools eligible for BIE funding under Title I of Pub.L. 95-471. Funds are distributed to these Title I colleges according to a formula based on the Indian Student Count (ISC). To calculate the ISC per academic school year, all credit hours of full-time and part-time students at each school are added and then divided by 12. The table below displays the ISC by school and other relevant information.

The BIE provides funding to a single Title II school. The Diné College (formerly Navajo Community College) is not included in the formula distribution of funds for Title I schools. Instead Diné College is funded at an amount equal to that which is necessary for operation and maintenance of the college, including, but not limited to, administrative, academic, operation, and maintenance costs.

The Pub.L. 99-428 authorizes BIE to provide endowments grants to TCUs. The BIE's Endowment Grant funding enables TCUs to develop and offer their own supplemental grant programs to students needing additional financial assistance. In order to utilize BIE Endowment Grant funds TCUs must match with a capital contribution equal to half of the amount of the BIE's endowment contribution. Alternatively, TCUs may meet its contribution requirement through the use of personal or real property received as a donation or gift. Colleges are eligible to obtain additional contributions from other private sector entities to help meet their endowment program needs. Funds may be invested under the authority of Section 331(c)(2) of the Higher Education Act of 1965, as amended, and any interest earned can be used to defray expenditures associated with the operation of the TCU.

¹ Indian Student Count (ISC) numbers are rounded. ² The accreditation classifications of the colleges are either: (A) fully accredited by a recognized accrediting association; (B) institution transfer; or (C) candidate status towards accreditation. ³ Certificates awarded include (1) Associate of Arts, (2) Associate of Science, (3) Associate of Applied Science, (4) Bachelor of Science (5) Master of Arts, and/or (6) vocational certificates. ⁴ Cumulative total of Indian students attending one or more of the fall, spring, or summer terms, part-time or full-time. ⁵ Latest graduation numbers available. ⁶ Red Lake count is new for SY 2016 – 2017.							

Tribal Technical Colleges (Forward Funded) [\$6,464,000]:

The Tribal Technical Colleges (forward funded) program provides funding for United Tribes Technical College (UTTC) and for Navajo Technical University (NTU). The program supports core functions (e.g., classroom instruction and school operations) at the two colleges partially funded by BIE. Tribal technical colleges provide resources and facilities to teach community members the skills they need to be successful in the workforce and overcome barriers to Indian higher education while supporting economic development on their reservations.

Subactivity - Post Secondary Programs (\$20,524,000; FTE: 167):

Program Overview:

The BIE directly operates two post-secondary schools: (1) Haskell Indian Nations University (Haskell), located in Lawrence, Kansas, and (2) the Southwestern Indian Polytechnic Institute (SIPI), located in Albuquerque, New Mexico. In addition, this subactivity includes supplemental funding for Tribal Colleges and Universities.

Haskell and SIPI [\$19,376,000; FTE: 167]:

The BIE's two directly operated post-secondary institutions serve Indian students from tribes throughout the country. On May 24, 1999, BIE adopted a post-secondary funding formula for Haskell and SIPI. Additional direction regarding application of the formula was enacted in Pub.L. 109-54, which stipulates that any funds made available for these schools in excess of the amount available in FY 2005 will be allocated in proportion to unmet need. Based on the formula budgets submitted by the schools for this request, the school specific distributions incorporate the directives of Pub.L. 109-54. Please see the following two tables for enacted and proposed distribution of funds to these two schools and student enrollment and graduates at Haskell and SIPI from Fall Semester 2013 through Summer Semester 2018.

SIPI and Haskell Funding (FY 2015-FY 2019 Request)					
BIE Post-Secondary School	FY2015	FY2016	FY2017	FY2018 Projected (Fall 2017-Summer 2018)	FY2019 Projected (Fall 2018-Summer 2019)
Southwestern Indian Polytechnic Institute (SIPI)					
# of Students Enrolled	655	547	508	516	529
Graduation Rate	8%	15%	12%	16	15
Transfer Rate	30%	21%	28%	22%	24%
Funding (\$000)	\$7,614	\$7,550	\$8,353	\$8,297	\$7,318
Haskell Indian Nations University (Haskell)					
# of Students Enrolled	930	915	934	944	949
Graduation Rate	23%	25%	31%	35%	40%
Transfer Rate	-	-	29%	-	-
Funding (\$000)	\$12,153	\$12,440	\$13,763	\$13,670	\$12,058
Haskell & SIPI					
TOTAL Funding (\$000)	\$19,767	\$19,990	\$22,116	\$21,967	\$19,376
*Enrollment counts include unduplicated headcounts for the academic year.					
*Graduation and transfer rates reflect the percentage of fall cohorts (first time, full-time, degree-seeking students) who graduate or transfer to another institution within 150 percent of normal time to complete.					

Haskell Indian Nations University [\$12,057,685]:

Haskell Indian Nations University (Haskell) is a post-secondary institution established by Federal legislation. The functional purpose of Haskell is to fulfill the United States' Treaty and trust obligations to provide a high quality education to American Indians and Alaska Natives. Haskell is a fully accredited university offering an advanced, modern education to eligible Indian students via culturally sensitive curricula, innovative services, and a commitment to academic excellence. Haskell is located on a 320-acre campus in Lawrence, Kansas. Haskell's location affords American Indian and Alaska Native students the opportunity to learn in an area rich in American Indian history and culture. Annually, students from over 152 tribal nations and as many as 36 states create a campus environment diverse in Indian heritage.

Haskell maintains a consortium program with the University of Kansas that permits students to apply credits earned at either institution toward graduation requirements. The programs offered are those that have been identified as important to the development of human capital that contributes to the economic success of Native communities. Haskell offers several associate degrees in Arts (AA) and Science (AS), as well as baccalaureate degrees in Arts (BA) and Science (BS). The University's School of Education offers associate and baccalaureate degrees. Students graduating from the elementary education program are certified to teach kindergarten through sixth grade in Kansas, and in other states with similar programs. The Natural and Environmental Science (AS) degree in Natural Resources and the Bachelor of

Science (BS) degree in Environmental Science prepare students to take land stewardship positions in their communities or related government positions. More than 100 students at Haskell attend courses in the Natural Resources program that provides education and summer employment in the natural resources field. Such students are trained as professional natural resource managers with the US Forest Service, the US Geological Survey, the Department of Agriculture, and the Department of the Interior and tribal nations. Haskell also offers a Business Administration degree to prepare students to take leadership and management roles in addition to contributing to the economic health of their communities through entrepreneurial studies. Haskell also offers an Associate and a Bachelor degree in American Indian Studies which is designed to prepare students in many facets of tribal community development and leadership.

Southwestern Indian Polytechnic Institute [\$7,318,315]:

Southwestern Indian Polytechnic Institute (SIPI) is a National Indian Community College that prepares American Indian and Alaska Native students to be productive life-long learners as tribal members in an ever-changing global environment. As a land grant institution, SIPI partners with tribes, employers, and other Indian education stakeholders. An enduring commitment to student success is the hallmark of SIPI's operations.

SIPI's primary purpose is to provide postsecondary education, including career-technical and transfer degrees, that give graduating Indian students increased career potential. Many of the programs offered at SIPI meet a specific need determined in consultation between tribes and its board of regents. SIPI serves American Indian and Alaska Native students from all tribes across the United States. SIPI further serves federally recognized tribes by developing and conducting competitive programs for workforce needs, extension, and outreach programs, including high impact community based programs, workshops, seminars, and distance learning courses.

SIPI maintains a culturally supportive educational, social, and physical environment, which allows its students to develop marketable skills aimed at facilitating gainful employment or to transfer to a baccalaureate degree program. In delivering educational services to its students, SIPI strives to ensure that its Indian students have a sound understanding of the unique place American Indians and Alaska Natives in American society.

Tribal Colleges and Universities Supplements (TPA) [\$1,148,000]:

Tribes may choose to direct Tribal Priority Allocations (TPA) funds to supplement the operation of their TCUs. Currently, six tribes are providing tribal colleges with these funds. Funds are used for policy development, curriculum additions, and general program operations designed to meet the specific needs of a TCUs' community members.

Subactivity - Education Management (\$23,282,000; FTE: 88):

Program Overview:

This subactivity consists of education program management and information technology. The primary goal of Education Management is to optimize learning opportunities for students of all ages.

Education Program Management [\$15,575,000; FTE: 83]:

The BIE central office management provides policy direction and exercises line authority over the ERCs and the two BIE post-secondary schools. Support services carried out by Headquarters and ERC staff also include: data collection, analysis, reporting, certain financial and accounting functions, oversight and coordination of major facility repairs, coordination and preparation of grant applications and reporting. The BIE also operates local on-reservation day and boarding schools, off-reservation residential schools, and peripheral dormitories housing students attending public schools.

In delivering educational services, BIE is required to execute a wide variety of management activities. Some activities are of a large public school system and some are unique to Federal agencies. In addition, because some BIE-funded schools are small, BIE program management staff frequently handle functions typically carried out by school administrative staff. With regard to facilities, BIE's administrative functions include oversight, coordination, and assistance with on-site facilities management activities, including renovations and aspects of facility construction.

Education IT [\$7,707,000; FTE: 5]:

The BIE information technology (IT) requirements encompass the multiple and varied needs of students, administrators, teachers, and Headquarters staff. The BIE's IT infrastructure includes the wide area network (WAN) and general support system used by BIE-funded schools. This infrastructure supports the ability to provide standards-based connectivity, security, content delivery, web services, distance learning, wireless communication, email access, and education application access for all BIE school networks. The BIE's highest priorities are expanding available bandwidth at BIE-funded schools and maintaining a modern IT infrastructure to keep pace with developments in education.

The BIE's Education IT funding also provides for the BIE student information data system. The system provides school management software, training, and system support for management of student academic program data. This centralized database manages records such as enrollments, attendance, behavior, class schedules, grades, assessments, teacher grade books, health and immunization data, special education needs, transcripts, parent contact information, and student demographics for all students in BIE-funded schools. Efficient and consistent management of student records assists faculty in the continual assessment of individual students' academic progress, enabling them to fine-tune instruction to meet student needs and improve academic achievement.

Program Accomplishments

The BIE is working to achieve higher coordination of data related activities to show greater accountability. In FY 2017, The Phoenix Education Resource Center conducted a data driven reading project focused on small group specialized instruction. The Associate Deputy Director for Tribally Controlled Schools also initiated streamlined data submission procedures for ISEP Verification and Certification. In FY 2018, the BIE intends to improve data collection and reporting through increased school-level training, completion of a data inventory and reporting calendar, and establishment of a BIE Data Governance Committee. In FY 2019, the Bureau intends to continue school level data entry training, utilize the data inventory and reporting calendar, and implement the BIE Data Governance Committee.

In FY 2017, BIE completed their draft strategic plan in preparation for consultation. The BIE also engaged in the New Teacher Project to attract and hire quality staff at the school level. The BIE also added the Residential component to the Human Capital Management Assessment. The Albuquerque Education Resource Center entered into an informal partnership with the University of Montana's Native Children's Trauma Center to implement the Trauma Resilient Schools Pilot in three BIE schools. In FY 2018, BIE intends to continue the Human Capital Management Strengths and Needs Assessments and Site Visits. The BIE also intends to build capacity for ERC staff to ensure they can effectively provide technical assistance and training on the Trauma Resilient Schools Pilot for interested schools and dormitories.

Contract Support Costs

For payments to tribes and tribal organizations for contract support costs associated with Indian Self-Determination and Education Assistance Act agreements with the Bureau of Indian Affairs for fiscal year 2019, such sums as may be necessary, which shall be available for obligation through September 30, 2020: Provided, That, notwithstanding any other provision of law, no amounts made available under this heading shall be available for transfer to another budget account.

Note.—A full-year 2018 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Continuing Appropriations Act, 2018 (Division D of Pub. L. 115-56, as amended). The amounts included for 2018 reflect the annualized level provided by the continuing resolution.

Total Requirements <i>FTE</i>	278,000	278,000			-47,000	231,000	-47,000

Contract support costs are a key component of tribal self-determination and support the ability of tribes to assume responsibility for operating Federal programs. The funding is provided to cover the costs that tribes incur for the management and administration of their tribal contracts.

Justification of 2019 Program Changes:

The FY 2019 budget request for the Contract Support Costs activity is \$231,000,000. The proposed amount will fully fund contract support costs. The 2019 budget continues to request funding for Contract Support Costs in a separate indefinite current account.

Subactivity: Contract Support; (FY 2019: \$226,000,000; FTE: 0):

In 1975, the Indian Self-Determination and Education Assistance Act of 1975 (the Act), as amended (Pub.L. 93-638) authorized Indian tribes to take over the administration of programs that had been previously administered on their behalf by the Department of the Interior. In passing the Act, Congress recognized that the Federal government’s administration of Indian programs prevented tribes from establishing their own policies regarding program services. The Act removed that impediment; it allows tribes to contract for a range of Indian programs that are managed by the BIA on their behalf. Once having contracted the program, a tribe assumes responsibility for all aspects of its management, such as hiring program personnel, conducting program activities, delivering program services, and establishing and maintaining administrative and accounting systems. Typical programs that are contracted by tribes include such BIA programs as law enforcement, social services, road maintenance, and forestry.

Congress amended the Act in 1988 and 1994 to provide that, under self-determination contracts, tribes will receive eligible funding for contract support costs in addition to the base program amount. Since 1988, Congress has provided funding for contract support costs in annual appropriations acts. The funding included in a tribe’s contract is the sum of program funds transferred by BIA plus the eligible contract support funds provided for that tribe’s allowable administrative and managerial costs.

In implementing the Act’s provisions for contract support costs, BIA commonly refers to the following three categories of contract support costs: (1) indirect costs, which are the costs incurred for a common or joint purpose benefitting more than one contract objective, or which are not readily assignable to the contract objectives specifically benefitted without effort disproportionate to the results achieved; (2) direct contract support costs, which are the costs of the activities tribes incur but are not provided in program funding or indirect funding, such as the cost of program-specific training; and (3) startup costs, which are the one-time costs incurred during the initial year an agreement is in effect. The request for

startup costs shall be reasonable, allowable, and allocable as it applies to the program, service, function or activity (PSFA).

As the fiscal year progresses, and in the event of an overpayment of contract support funds, BIA will recoup the funds and may redistribute the funding to tribes that have an increased contract support cost need.

Fully funding contract support costs allows BIA to: meet the Act's legal requirement to pay these costs, advance the Administration's policy of strengthening Indian self-determination; enhance BIA contracting programs; comply with the Supreme Court's decision in *Salazar v. Ramah Navajo Chapter*, 567 U.S. ___ (2012), that payment of contract support costs is a legally enforceable contract obligation; and reduce BIA's exposure to breach of contract lawsuits.

Subactivity: Indian Self-Determination Fund (FY 2019: \$5,000,000; FTE: 0)

Each year BIA estimates the amount of funds each tribe with existing contracts should receive for contract support costs. Beginning in FY 1995, BIA established a separate Indian Self-Determination Fund (ISD), a two-year appropriation to provide funding for contract support costs for new and expanded contracts during the first year of operation. The ISD fund enables BIA to assist with startup costs for the new or expanding PSFA's. The funding includes allowable start-up costs, without decreasing the funding for ongoing contracts. In the second year of a contract, the funding amount is added to the contract support cost calculation and the tribe receives a share of contract support funding for ongoing contracts.

The ISD may include the allowable costs to: (1) provide an initial transfer of a program previously operated by BIA to the tribe or tribal organization; (2) expand current tribal operations through the assumption of additional programs previously operated by BIA; or, (3) provide initial contract support funding for all new and expanded awards under the Act, including the assumption of programs previously operated by other tribes or tribal organizations, and for newly recognized tribes.

The Regional staff is encouraged to begin discussions with the proposing tribes or tribal organizations early to identify the amount of need and allowable startup contract support costs. Once the amount of need is identified, and before the end of the proposal's review period, a request for this amount is submitted to the Division of Self-Determination Services for approval and for a determination if funds are available. The BIA Central Office determines approval of ISD proposals and startup funds by request from the Regional office, after the Regional office recommends approval of proposals for new and expanded contracts.

The ISD supports two BIA goals: (1) fostering strong and stable tribal governments and (2) providing tribes with the resources they need to enhance their basic government infrastructure.

The ISD complements other cross-cutting budget programs such as Contract Support Costs and the New Tribes program. These activities are dependent upon each other for meeting the goal of strengthening Indian Self-Determination.

Construction

(INCLUDING TRANSFER OF FUNDS)

For construction, repair, improvement, and maintenance of irrigation and power systems, buildings, utilities, and other facilities, including architectural and engineering services by contract; acquisition of lands, and interests in lands; and preparation of lands for farming, and for construction of the Navajo Indian Irrigation Project pursuant to Public Law 87-483; \$133,288,000, to remain available until expended: Provided, That such amounts as may be available for the construction of the Navajo Indian Irrigation Project may be transferred to the Bureau of Reclamation: Provided further, That not to exceed 6 percent of contract authority available to the Bureau of Indian Affairs from the Federal Highway Trust Fund may be used to cover the road program management costs of the Bureau: Provided further, That any funds provided for the Safety of Dams program pursuant to the Act of November 2, 1921 (25 U.S.C. 13) shall be made available on a nonreimbursable basis: Provided further, That in order to ensure timely completion of construction projects, the Secretary may assume control of a project and all funds related to the project, if, within 18 months of the date of enactment of this Act, any grantee receiving funds appropriated in this Act or in any prior Act, has not completed the planning and design phase of the project and commenced construction: Provided further, That this appropriation may be reimbursed from the Office of the Special Trustee for American Indians appropriation for the appropriate share of construction costs for space expansion needed in agency offices to meet trust reform implementation: Provided further, That of the unobligated balances available under this heading, \$21,367,000 are hereby permanently cancelled: Provided further, That no amounts may be cancelled from amounts that were designated by the Congress as an emergency requirement pursuant to a concurrent resolution on the budget or the Balanced Budget and Emergency Deficit Control Act of 1985.

Note.—A full-year 2018 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Continuing Appropriations Act, 2018 (Division D of P.L. 115-56, as amended). The amounts included for 2018 reflect the annualized level provided by the continuing resolution.

General Authorization

25 U.S.C. 13 (The Snyder Act of November 2, 1921) is the basic authority under which the Secretary provides services, including construction of facilities, to support operating programs to federally recognized tribes. This Act also provides for the enlargement, extension, improvement, and repair of the buildings and grounds of existing plants and projects. In addition, most of the major projects have specific authorizations.

1. For construction, repair, improvement, and maintenance of irrigation and power systems

For construction, repair, improvement, and maintenance of irrigation and power systems involving irrigation canals, wells, hydroelectric dams, and water and electrical distribution systems.

P. L. 106-382

P. L. 87-483

P. L. 114-322

P. L. 106-382 (The Fort Peck Reservation Rural Water System Act of 2000) provides that the Federal share of construction of the Assiniboine and Sioux Rural Water system shall be 100 percent, and shall be funded through annual appropriations to the Bureau of Reclamation; then 100 percent of the Federal share of the cost of operation and maintenance of the Assiniboine and Sioux Rural Water System shall be funded through annual appropriations to the Bureau of Indian Affairs.

P. L. 87-483 (76 Stat.96), as amended, provides for the construction, operation, and maintenance of the Navajo Indian Irrigation Project.

Public Law 114-322 (Water Infrastructure Improvements for the Nation Act of 2016) established in the Treasury of the United States two Funds, the “High-Hazard Indian Dam Safety Deferred Maintenance Fund” and the “Low-Hazard Indian Dam Safety Deferred Maintenance Fund” for “the completion of repairing, replacing, improving, or performing maintenance on Indian dams as expeditiously as practicable, subject to the dam safety policies of the Director of the Bureau of Indian Affairs established to carry out the Indian Dams Safety Act of 1994 (25 U.S.C. 3801 et seq.)” The Funds shall terminate on September 30, 2023. The Act also established in the Treasury of the United States a fund, to be known as the “Indian Irrigation Fund” for the “completion of repairing, replacing, modernizing, or performing maintenance on [certain Indian irrigation] projects”. The Fund shall terminate on September 30, 2021.

2. For construction and maintenance of buildings, utilities, and other facilities.

For construction, repair, and improvement of all Indian Affairs buildings, utilities, and other facilities, including demolition of obsolete structures and consolidation of underutilized facilities, inclusive of

architectural and engineering services by contract;

25 U.S.C. 458
25 U.S.C. 2005&2006
P. L. 107-110

25 U.S.C. 458 (The Indian Self-Determination and Education Assistance Act) authorizes the Secretary to enter into a contract or contracts with any State education agency or school district for the purpose of assisting such agency or district in the acquisition of sites for or the construction, acquisition or renovation of facilities (including all equipment) in school districts on or adjacent to Indian reservations or other lands held in trust, if such facilities are necessary for the education of Indians residing on any such reservation or lands. The Secretary may not expend more than 25 percent of any funds appropriated pursuant to this section, for use of private schools.

25 U.S.C. 2005 provides that the Secretary shall immediately begin to bring all schools, dormitories, and other Indian education-related facilities operated by Indian Affairs or under contract or grant with Indian Affairs in connection with the education of Indian children into compliance with all applicable Federal, tribal, or State health and safety standards, whichever provide greater protection (except that the tribal standards to be applied shall be no greater than otherwise applicable Federal or State standards), with section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), and with the Americans with Disabilities Act of 1990, except that nothing in this section shall require *termination* of the operations of any facility which does not comply with such provisions and which is in use on October 20, 1994.

P. L. 107-110, 25 U.S.C.2005 provides for the development of a rule-making committee pursuant to section 2018(b)(3).

25 U.S.C. 2005(b) (6) provides that the Secretary shall develop a Facilities Information Systems Support Database to maintain and update the conditions of school facilities, replacement and construction need and minor and major improvement need.

25 U.S.C. 2006(e) provides that the Assistant Secretary shall submit as part of the annual budget a plan for school facilities to be constructed, to establish priorities among projects and for the improvement and repair of education facilities, which shall form the basis for the distribution of appropriated funds and for capital improvements to be made over the 5 succeeding years.

3. For the Operations and Maintenance of Indian Affairs facilities.

25 U.S.C. 2006
25 U.S.C. 13

25 U.S.C. 2006(e) provides that the Assistant Secretary shall establish a program, including the distribution of appropriated funds, for the operation and maintenance of education facilities.

25 U.S.C. 13 provides generally for the use of funds for the operation and maintenance of Indian Affairs facilities.

4. Acquisition of lands, and interests in lands.

25 U.S.C. 465

25 U.S.C. 465 provides that the Secretary of the Interior is authorized, in his discretion, to acquire, through purchase, relinquishment, gift, exchange, or assignment, an interest in lands, water rights, or surface rights to lands, within or without existing reservations, including trust or otherwise restricted allotments, whether the allottee be living or deceased, for the purpose of providing land for Indians. Such sum may not exceed \$2,000,000 in any one fiscal year.

5. Indian Roads Program.

25 U.S.C. 318a
23 U.S.C. 201-204

25 U.S.C. 318a authorizes material, equipment, supervision and engineering in the survey, improvement, construction, and maintenance of Indian reservation roads.

23 U.S.C. 201 et seq. (The Surface Transportation and Uniform Relocation Assistance Act of 1987) provides for the expenditure of federal funds on Indian reservation roads. Section 202 of the Act provides for a portion of the funds appropriated for Indian reservation roads to be used by the Secretary of the Interior for program management and project related administrative expenses. Section 203 of the Act identifies a three-year period of availability after the close of the fiscal year for which authorized, for Indian reservation roads projects. Section 204 provides that Highway Trust funds for Indian reservation roads may be used by the Secretary of the Interior for the cost of construction and improvement of such roads.

6. Dams.

25 U.S.C. 3801

25 U.S.C. 3801 (The Indian Dams Safety Act of 1994) provides authority to establish and operate a dam safety maintenance and repair program to ensure maintenance and monitoring of the condition of dams and to maintain the dams in a satisfactory condition on a long-term basis.

7. Quarters Program.

5 U.S.C. 5911

5 U.S.C. 5911 et seq. (Federal Employees Quarters and Facilities Act) provides for the use of federal quarters and collection of rent, for the Operations and Maintenance of such structures.

CONSTRUCTION SUMMARY

Overview

The Indian Affairs (IA) Construction program carries out facilities and structures projects, demolition, and environmental compliance for IA owned and funded assets across the Nation. The Construction program consists of four major activities serving different missions of the BIA:

- Education
- Public Safety and Justice
- Resource Management
- Other Program Construction

IA owns or provides funding for a broad variety of buildings, structures, and other facilities including buildings with historical and architectural significance. IA is responsible for facilities and structures of all types and sizes. This includes structures such as schools, detention and correctional facilities, employee housing, small storage sheds, fences, security check-point shelters, water and wastewater systems, and protective structures over pumping systems. Other structures include roads, bridges, forestry lookout towers, telecommunications facilities, irrigation systems, and 138 high-hazard and significant-hazard classified dams.

The Indian Affairs-Construction Investment Review Board (IA-CIRB) meets periodically to review individual project data sheets of proposed and ongoing major capital investment projects and review the status of ongoing major capital investments. Upon approval by the Department, construction projects are prioritized and incorporated into the Five-Year Deferred Maintenance and Construction plan. School construction and repair projects, in addition to advance planning and design work, are accomplished through the Indian Self Determination and Education Assistance Act, (Pub.L. 93-638) contracts, Pub.L. 100-297 grants or through commercial contracting.

Asset Condition Assessments

IA conducts facility condition assessments on a three year cycle to identify facility deficiencies in need of correcting, code deficiencies, and compliance issues. Deficiencies that cannot be corrected in the same year are identified and tracked as deferred maintenance for the building or structure. The Facility Condition Index (FCI), which is the deferred maintenance cost divided by the current replacement value, is the industry standard measure used to compare the condition of buildings and structures. The FCI is used by all IA programs to support asset management and to develop five year plans for improvement and repair of facilities. Based on the FCI, buildings and structures are categorized as being in Good, Fair, or Poor condition. The formula for calculating the FCI and the relation of the FCI to condition categorization are as follows:

$$\text{Facilities Condition Index (FCI)} = \frac{\text{Maintenance, Repair, and Replacement Deficiencies of the Facility(-ies)}}{\text{Current Replacement Value of the Facility(-ies)}}$$

Facility Condition Categorization as Measured by FCI		
FCI (School Assets)	FCI (All Others)	Condition
< .0500	< .0500	Good
<= .1000	<= .1500	Fair
>.1000	>.1500	Poor

Indian Affairs - Facilities Management System

The Indian Affairs - Facilities Management System (IA-FMS) is used to regularly update the multi-phase inventory and deferred maintenance backlogs. The IA-FMS allows maintenance of a current and accurate inventory of IA real property and integration with the Department of the Interior’s Financial and Business Management System (FBMS) with IA-FMS. Information in IA-FMS is used to develop the Indian Affairs Five Year Maintenance and Construction Plan (Plan) in accordance with the Department of Interior’s (Department) guidance, which prioritizes deferred maintenance and capital improvement projects. The Plan provides IA with a clear strategy for addressing facilities with the greatest need with primary focus on critical health and safety requirements. The goal of IA Construction program is to bring all facilities to the “Fair” or “Good” (acceptable) condition level while meeting the IA’s mission.

IA also maintains a current and accurate inventory of real property in the Federal Real Property Profile (FRPP). The FRPP includes Government-wide performance metrics including FCI, utilization, operating costs, etc.

Education Construction

The Education Construction program provides safe, functional, energy-efficient, and universally accessible facilities at Bureau of Indian Education (BIE) funded schools through school and facility replacement, and facility improvements and repairs. Approximately 47,000 Indian students, including 1,500 resident-only boarders, attend the 183 BIE-funded schools and dormitories located in Indian communities in 23 states. The Education Construction program supports education goals by rehabilitating schools and dormitories to provide an environment conducive to quality educational achievement and improved opportunities for Indian students. IA provides 1,979 housing units at 88 sites to accommodate teachers and educational staff.

The major activities associated with the Education Construction Program are:

- Replacement School Construction
- Replacement Facility Construction
- Employee Housing Repair
- Facility Improvement and Repair (FI&R)

These programs are implemented with architectural and engineering standards of design for education facilities. These standards have become the basis of construction for BIE schools across Indian country

and are currently being updated. Efficiencies have been attained by using common building systems, components, and design elements.

Public Safety and Justice Construction

The Public Safety & Justice (PS&J) construction program funds facility improvement and repair (FI&R) and related projects at detention, correctional, and law enforcement facilities. The BIA operates or funds law enforcement and detention facilities throughout Indian country to support BIA and tribal law enforcement programs. The facilities are operated either by BIA or the tribe under contract or compact as authorized by the Indian Self Determination and Education Assistance Act, (Pub.L. 93-638). Facilities include housing units to support public safety and justice employees. Repair and improvement of BIA-funded detention and other Office of Justice Services facilities improves both public safety and the quality of life in Indian country. The program also maintains fire safety systems in these facilities. Completion of FI&R projects facilitates compliance with the requirements of the Americans with Disabilities Act (ADA), Architectural Barriers Act, Environmental Protection Agency (EPA), and other safety code requirements, reducing BIA's exposure to liability.

The PS&J construction program prioritizes projects based on critical life safety deficiencies. Detention centers have the highest funding priority; the second priority is for short term holding cell facilities; and the third priority is for law enforcement administrative offices and court facilities. Detention facilities in the worst conditions and highest demand receive the highest priority for funding. To support this effort, work plans, financial program plans, and preventive maintenance plans are developed by BIA detention centers.

Resource Management Construction

The Resource Management Construction program improves the management of land and natural resource assets through the delivery of water consistent with applicable Federal, tribal, and state laws in an environmentally responsible and cost-efficient manner and protects lives, resources, and property by improving public safety and security.

The Resource Management Construction program is composed of the following major activities:

- Irrigation Project Construction
- Engineering and Supervision
- Survey and Design
- Federal Power Compliance (FERC)
- Dam Projects.

Of the approximately 600 high-hazard and significant-hazard classified dams in the Department, the BIA is responsible for 138 dams. Federal hazard classifications show the most realistic adverse impact on human life and on downstream development if a dam fails. The hazard is "high" if loss of life would be one or more persons. The hazard is "significant" if the economic loss would be excessive or appreciable (for example, would involve areas with notable access roads, agriculture enterprises, or industry.) The average age of a dam in the BIA inventory system is about 75 years.

Other Program Construction

Other Program Construction funds repairs for the administrative buildings at 127 locations and telecommunication assets not included in the Education or PS&J Construction inventories. It also provides strategic, tactical, and liaison support for the facilities management program operated by IA which provides safe and functional facilities for programs throughout Indian Affairs.

The Other Program Construction program major activities include:

- Telecommunications Improvement and Repair
- Facilities/Quarters Improvement and Repair (F/QI&R)
- Construction Program Management

The Division of Facilities Management and Construction (DFMC), in partnership with the regional facilities and BIE programs, is responsible for the management and accomplishment of the facilities construction, repair and improvement program, and O&M programs provided through direct services, Pub.L. 93-638 contracts, or self-governance compacts with tribal governments. The DFMC 1) develops, implements, and administers construction policies and procedures; 2) plans, formulates, executes, and manages facilities' budgets; and 3) provides fiscal and programmatic administration, management, monitoring, and evaluation of the facilities' programs on an IA-wide basis. DFMC also distributes Operation and Maintenance (O&M) funds and provides subject matter expertise and technical guidance for the O&M program.

Education Construction

Education Construction (Dollars in thousands)							
Subactivity Program Element	2017 Enacted	2018 CR	FY 2019				Net Change from 2018 CR
			Internal Transfers	Fixed Costs	Program Changes	Budget Request	
Replacement School Construction <i>FTE</i>	45,504	45,195			-45,195		-45,195
Replacement Facility Construction <i>FTE</i>	11,935	11,854			-11,854		-11,854
Employee Housing Repair <i>FTE</i>	7,567 2	7,516 2		2	-2,458	5,060 2	-2,456
Facilities Improvement and Repair <i>FTE</i>	68,251 3	67,788 3		3		67,791 3	3
Total Requirements <i>FTE</i>	133,257 5	132,353 5		5	-59,507	72,851 5	-59,502

In FY 2019 the Education Construction program will be used to improve the safety and functionality of facilities to provide an environment conducive to quality educational achievement and improved opportunities for Indian students. IA will seek to maximize the utility and prolong the useful life of education buildings by improving or rehabilitating these facilities as part of a comprehensive approach that includes major and minor Facilities Improvement and Repair (FI&R) and Employee Housing Repair projects.

Justification of 2019 Program Changes:

Replacement School Construction (-\$45,195,000):

The FY 2019 budget does not request funding for Replacement School Construction. Using the funds currently available, Indian Affairs (IA) will continue construction of the three remaining 2004 list replacement schools and the design-build of at least one school from the 2016 Replacement School list.

Replacement Facility Construction (-\$11,854,000):

The 2019 budget does not request funding for Replacement Facilities Construction. Using the funds currently available, the program will complete the facility replacement project at Bug-O-Nay-Ge-Shig High School and initiate the next approved facilities replacement project.

Employee Housing Repair (-\$2,458,000):

In FY 2019, the program will continue to prioritize employee housing units containing hazardous materials, such as asbestos and lead-based paint, to allow for abatement. Additionally, the program will continue to implement the master housing plan to eliminate unneeded units and prioritize repairs.

Education Construction Overview:

The IA Education Construction program supports education goals by rehabilitating or reconstructing BIE-funded schools and dormitories to provide an environment conducive to high quality educational achievement and improved opportunities for Indian students. The program provides safe, functional, energy-efficient, and universally accessible facilities to students attending 183 BIE-funded schools and dormitories serving elementary

and secondary students in 23 states. The schools serve approximately 47,000 individual K-12 Indian students and residential boarders, which equates to an average daily membership of approximately 41,000 students due to transfers, absences, and dropout rates. The BIE also owns and operates two post-secondary institutions. The major activities associated with the Education Construction Program are:

- Replacement School Construction
- Replacement Facilities Construction
- Employee Housing Repair
- Facilities Improvement and Repair (FI&R)

The Facility Condition Index (FCI) and the Asset Priority Index (API) are used by IA to support asset management and develop construction plans for improvement and repair and replacement of facilities. The FCI also provides a baseline from which IA measures and tracks improvements in asset conditions and the API indicates the importance of each asset to the organization’s mission. The formula for calculating the FCI and the relation of the FCI to condition categorization are as follows:

$$\text{Facilities Condition Index (FCI)} = \frac{\text{Maintenance, Repair, and Replacement Deficiencies of the Facility(-ies)}}{\text{Current Replacement Value of the Facility(-ies)}}$$

Facility Condition Categorization as Measured by FCI	
FCI	Condition
< .0500	Good
<= .1000	Fair
>.1000	Poor

The FCI for each building is automatically calculated in the IA – Facilities Management System (IA-FMS) for use with other criteria in allocating resources for management of renovations and repairs. Based on the FCI, buildings and structures are categorized as being in good, fair, or poor condition. Overall, IA projects 68% of education facilities will be in good or fair condition by the end of FY 2018.

The IA-Construction Investment Review Board (IA-CIRB) develops and maintains a capital investment portfolio. The IA-CIRB has final approval of IA’s annual construction capital planning investment portfolios before submission to DOI. Upon approval by the DOI, construction projects are prioritized and incorporated into the Five-Year Deferred Maintenance and Construction plan. School construction and repair projects, in addition to advance planning and design work, are accomplished through P.L. 93-638 contracts, P.L. 100-297 grants, or through commercial contracting.

In an effort to contain costs and maximize the impact of available funding, IA is pursuing both time and cost savings through the design-build approach for school replacement projects. Design-build includes offsite construction to save time and money. IA has put in place a national multiple award construction contract (NMAACC) that education construction will utilize for future off-site design build projects. While regional cost factors heavily influence total savings, IA is confident the Department can continue to deliver high quality construction in less time and for less money using this national approach.

In addition to the discretionary request for annual funding, the FY 2019 budget launches Interior’s new Public Lands Infrastructure Fund to help pay for repairs and improvement in national parks, national wildlife refuges, and BIE schools. The proposal would allow Interior to keep 50 percent of revenue from Federal energy leasing and development over 2018 budget projections to address deferred maintenance requirements. Deposits to the Fund would be capped at \$18 billion.

Subactivity - Replacement School Construction (FY2019: \$0; FTE: 0):

Using the funds currently available, IA will continue construction of the three remaining 2004 list replacement schools and the design-build of at least one school from the 2016 Replacement School list. The Replacement School Construction program replaces entire school campuses placed onto an approved school replacement list using a deliberate evaluation and screening process. Schools selected are in poor condition, have exceeded their original design life, and have a high concentration of portable units supplementing their educational programs.

The final schools from the 2004 list under construction are Beatrice Rafferty School (in construction as of Q2 2018), Cove Day School (by the end of Q2 2018), and Little Singer Community School (construction started in Q4 2017). As of January 2018, IA anticipates 3 of the 10 schools from the 2016 School Replacement list to be ready for design or design-build awards in 2018 and the remaining seven will have completed the planning phase by the end of 2018. Laguna Elementary School was the first to complete planning and elected to use a design-build approach, managed by the Tribe via P.L. 100-297 grant funding with award expected Q2 2018. Quileute Tribal School was completed next and elected to partner with IA to use the NMACC to complete the design and construction of their school. IA, in coordination with the Quileute Tribe, will use the new school construction project as the initial project on the NMACC and expects to award the first task order in the third quarter of 2018 to develop the 20% design schematic. Blackwater Community School elected to pursue the design-build approach as well. To manage the risk of redesign due to the time between design completion and construction funding, IA seeks to maintain at least three schools in design and/or construction at any given time.

Planning Review Meeting at the Blackwater Community School, Arizona

The table below provides information on Replacement School Construction projects completed from 2013 to current.

School Replacement Status Update – Completed Projects within the Previous 5 Years (2013-2017)										
School	St.	Grade	Number of Students Planned (Sum of Least Squares)	Original Completion Schedule	Status as of January 2018	Original Construct. Estimate (\$ Millions)	Final Construct. Tonalea Redlake School	AZ	K-8	230	TBD	Estimate Completion of Planning Q3 FY 2018	TBD	TBD	.35

Subactivity - Replacement Facility Construction (FY2019: \$0; FTE: 0):

Using available funds, IA will complete the facilities replacement project at the Bug-O-Nay-Ge-Shig High School in FY 2018.

Placing a Module On-Site for the Construction of the Bug-O-Nay-Ge-Shig High School in MN

Subactivity - Employee Housing Repair (FY2019: \$5,060,000; FTE: 2):

IA maintains employee quarters consisting of Single Family Houses, duplex, triplex, and apartment units for school employees such as principals, teachers, facility managers, security officers, and other staff as determined by the program. These housing units are typically located around or near school locations spread throughout Indian Country. The Employee Housing Repair component funds repairs and remediation of health and safety deficiencies and complies with the Department of Interior's commitment to provide Federal employees with living quarters that are safe, functional, energy efficient, and cost-effective. The total repair need as of the first quarter FY 2018 was \$82.2 million. The program applies a master housing plan and continues to improve staff housing through complete renovations that address all deficiencies to as many houses as possible. As part of the master plan, the program includes space reduction goals to eliminate unneeded units.

Program Management (\$300,000):

Funds requested in FY 2019 will be used for administrative overhead associated with program oversight, project management and inspection.

Quarters Improvement and Repair (\$3,060,000):

Funds requested will be prioritized to correct critical safety and health deficiencies and perform deferred maintenance and renovations of quarters units assessed to be in poor condition. Funds will be allocated to regional offices to address the most critical housing units requiring repairs. Regional Offices are staffed with Quarters Managers who have the responsibility to provide local support to the various site and agency housing managers within their specific geographic area.

Quarters Emergency Repairs (\$200,000):

Funds requested will be used for work necessary to correct immediate threats to life or property at BIE housing sites resulting from catastrophic failure, fires, wind and water damage, or other causes. This funding will also be provided to immediately correct failing utility systems or infrastructure and restore to functional condition as may be required.

Quarters Environmental Projects (\$500,000):

Funds will be used to assess, characterize, remediate and monitor potential or actual releases of environmental contaminants. Work will include upgrade and replacement of fuel oil tanks, removal and disposal of contaminated soils and hazardous materials and abatement of asbestos and lead-based paint, and sampling and analysis of environmental contaminants.

Quarters Demolition/Reduction of Excess Space (\$1,000,000):

Funds will be used for disposal of housing units identified as unneeded. This will continue with the efforts to right-size the inventory, improve the overall FCI and space utilization, and meet the established goals in the IA Asset Management Plan (AMP) for space reduction. It is anticipated that during FY 2019, a total of 20,000 GSF of excess space will be disposed of at multiple locations, based on the Space Management Plan.

Moencopi Quarters under Construction

Quarters Walk Through at White Swan, WA

Subactivity - Facilities Improvement and Repair (FY2019: \$67,791,000; FTE: 3):

Funds requested in FY 2019 Facilities Improvement and Repair (FI&R) will be used to improve the safety and functionality of facilities for the program’s customers. IA will seek to maximize the utility and prolong the useful life of education buildings by improving or rehabilitating these facilities as part of a comprehensive approach that includes facilities improvement and repair combined with new school and new facilities initiatives. At the end of the first quarter of FY 2018 there were \$634 million dollars of deferred maintenance across BIE-funded school facilities and grounds. This includes \$416 million for buildings deferred maintenance projects and \$218 million in deferred maintenance for “grounds and sites.”

Program Management (\$5,291,000):

Funds requested in FY 2019 will be used for program management and administrative overhead associated with the execution of the program. The IA-Facilities Management System (IA-FMS) is funded in part from these funds. Funds also support staff from the Office of Facilities, Property, and Safety Management (OFPSM) who perform asset management and staff from the Division of Facilities Management and Construction (DFMC) who provide program oversight, direction, and technical assistance to support program execution. Technical assistance is provided to tribal, BIA, and BIE customers to assist in planning, design, and construction. In addition, experienced and knowledgeable teams perform program evaluations to ensure facility construction and operation and maintenance programs conform to DOI and IA policy, laws, and regulations. Program evaluation reviews help ensure safety and health standards are met, work conforms to approved drawings and specifications, and Regions and Agencies are knowledgeable of IA policy, processes, and best practices.

Students at Laguna Elementary

Advance Planning and Design (\$1,000,000):

Funds requested in FY 2019 will be used for design of the schools on the replacement school and replacement facilities lists and design for improvement and repair and major system component projects included in the Department’s Five Year Deferred Maintenance and Capital Improvement plan. In FY 2019, additional support will be provided for centralized project planning, supplemental design support for major FI&R projects and site planning to support BIA and BIE on a limited basis. By applying funds in this manner IA will be able to ensure a smoother transition from planning to design and construction with best control of overall project cost and time.

Quileute Tribal School students

Major Improvement and Repair (\$17,366,000):

Major Improvement and Repair funds are for the abatement of those identified critical deficiencies costing greater than \$250,000 but fall below education facility replacement program consideration. Major FI&R projects improve the safety and functionality of facilities, repair or replace major capital equipment, and in doing so move facilities closer to a status of fair or better condition as measured by the Facility Condition Index (FCI). Funds will be used to correct priority deficiencies, beginning with critical safety work items and as assessed using the BIA Supplemental Project Scoring Guidelines for 5-year Capital Improvement Planning. A list of current prioritized projects is presented to the IA-CIRB annually. Correction of these items is critical for IA’s

compliance with accessibility requirements; Environmental Protection Agency (EPA) requirements; National Fire Protection Association (NFPA); and other Life Safety code requirements. As of the first quarter of FY 2018, there are approximately \$180 million in qualified Major FI&R projects.

These projects will advance BIA’s ability to provide a healthy, safe and positive environment for students and staff, allow accessibility to up-to-date technologies and enhance student learning capabilities and will improve the FCI of individual buildings and school sites. Additional expected outcomes include improved costs and efficiencies through the design and installation of high performance energy efficient building systems.

The table below provides a progress summary for FI&R Major projects (>\$1 million) from 2013 to current.

Facility Improvement and Repair Major Projects (Projects >\$1 Million)							
School	St.	Building (s)	Project Description	Year Funded	Status as of January 2018	Original Project Estimate (\$ Millions)	Estimated Final Project Cost (\$ Millions)
Cheyenne Eagle Butte	SD	Grounds	Convert Steam to Hot Water Pipe	2016	In Construction	1.9	1.9
Many Farms Community School	AZ	1163, 1165, 1166, 1167	Major Structural Repairs. Completion projected for June 2018	2017	In Construction	10.2	10.2
Chooshgai Community School	NM	Grounds	Replace Domestic Water Mains	2018	Tribal consultation required	3.6	3.6
Many Farms Community School	AZ	1004, 1009	HVAC, Plumbing and Roofing replacement	2018	Tribal consultation required	2.9	2.9
Choctaw Central School	MS	Grounds, 268	Replace domestic water mains and replace a roof on a multi-classroom/library bldg	2018	Tribal consultation required	1.6	1.6
Greyhills Academy HS	AZ	385	Alignment of boilers and Chillers for a dormitory	2018	Tribal consultation required	1.9	1.9
Sherman Indian HS	CA	1, 2, 8 10	Structural repairs to 4 dormitories	2018	Requirements development	1.3	1.3
There were no individual FI&R Major projects >\$1 million FY 2013-2015							

Minor Improvement and Repair (\$24,352,000):

The deficiencies scheduled for correction are in the following categories: 1) critical health and safety deficiencies and 2) mechanical, electrical, and other building systems to include grounds improvements. Funds for the abatement of identified deficiencies will be in accordance with accessibility requirements; EPA requirements; National Fire Protection Association; and other applicable safety code requirements.

Prioritization of deficiencies for FY 2019 is based on project scoring criteria incorporated into the IA-Facilities Management System (IA-FMS). Final project lists will be developed using guidance provided by DFMC to the BIE and BIA regional facilities staff working with each school location to identify deficiencies. The work will be accomplished by each location where feasible via Pub.L. 100-297 grants, Pub.L. 93-638 contracts, or commercial

contracts. These funds are primarily for serious health and safety deficiencies existing in the backlog or identified in an annual health and safety inspection with completed abatement plans that are not included in the annual O&M program. BIA and BIE will have some discretion to repair and replace other critical systems in accordance with guidance provided by DFMC.

Facility Condition Assessments (\$2,002,000):

Funds requested in FY 2019 will be used to perform the cyclic inventory and deferred maintenance assessment and validation project (Condition Assessments). The IA real property portfolio for education facilities, including academic and housing quarters, consists of approximately 23.5 million gross square feet contained in over 3,630 facilities located at 179 locations in 23 states. The purpose of the program is to complete a comprehensive condition assessment and inventory validation of all IA owned or leased real property assets on a three year cycle. The condition assessments identify new and validate existing deficiencies in IA-FMS in order to facilitate the allocation of resources to help maintain IA real property portfolio assets at an operational level, as well as extend the useful life of the asset. Facilities inspections include standard elements identified such as fire and life safety, HVAC systems, electrical systems, structural integrity, etc. Assets include building and housing units, roads, recreation facilities, water and power facilities, storage facilities, garages (employee housing and non-housing structures), and existing structure operation support systems; i.e., infrastructure of the identified location.

Asset Disposal (\$3,985,000):

Funds requested in FY 2019 will be used for space reduction activities in the education program. The asset portfolio and Space Management Plan (SMP), as derived from the DOI Asset Management Plan (AMP), contains a five year space reduction plan, which is the vehicle for implementing the space goals through consolidation, co-location, and disposal of assets. The goal of space management is achieved by eliminating unnecessary space while maintaining facilities to meet mission-related needs. The SMP identifies education owned assets nationwide which have been determined to be in excess of program needs and are not considered viable for continued use by consolidation or renovation. Subsequently, these assets have been designated for disposal via demolition or transfer. It is anticipated that during FY 2019, a total of 225,000 GSF of excess space will be disposed of at multiple education locations, based on the Space Management Plan.

Emergency Repair (\$3,490,000):

Funds requested in FY 2019 will be used as necessary to support the Emergency Reimbursement Program (ERP). IA has the responsibility of providing safe facilities and when an emergency occurs that results in the facility presenting an immediate threat to life or property, IA must correct the situation as soon as possible. To do so, IA established the ERP which DFMC manages. This program does not provide funding for repairs to community or tribally-owned systems or funding for projects more appropriately covered by the Minor Improvement and Repair Program (MI&R).

Environmental Projects (\$4,830,000):

Funds requested in FY 2019 will be used to continue efforts to abate environmental hazards in accordance with environmental laws and regulations. Specifically, funds will be used to assess, characterize, remediate, and monitor potential or actual releases of environmental contaminants at BIE-owned education facilities. Environmental projects will include the upgrade or replacement of storage tanks, wastewater systems, water systems, water towers or wells; removal and disposal of contaminated soils and hazardous or toxic materials; abatement of asbestos and lead paint; and sampling and analysis of environmental contaminants, including testing for and mitigation of radon gas. Compliance will minimize or eliminate public exposure to environmental hazards. Material is properly handled by trained and qualified contractors and disposed of at approved locations proximate to various project locations.

Radon Exhaust Fan Installed at Blackfeet Dormitory Quarters Units

Portable Classroom Buildings (\$1,500,000):

Due to short term variations in enrollment or when development of a new permanent facility is pending, IA constructs, transports, repairs, installs, and relocates portable buildings at various sites. The work may also include constructing infrastructure associated with building utilities and vehicle and pedestrian walkways necessary for completion and operation of the portable buildings. It is anticipated that during FY 2019, a total of five portable classrooms will be completed and installed at multiple locations, based on BIE’s priority listing.

Yakama Tribal School Portable Classrooms

Quileute Tribal School Portable Classrooms

Energy Program (\$3,200,000):

Funds requested in 2019 for the energy program will continue to accomplish the legislative goals mandated by the Energy Policy Act of 2005, Pub.L. 109-58 and the Energy Independence and Security Act of 2007 (EISA), Pub.L. 110-140. The statute requires that energy managers shall complete for each calendar year a comprehensive energy and water evaluation with re-commissioning or retro-commissioning for approximately 25 percent of the covered facilities of each agency. IA has approximately 54 facility locations that are covered facilities. This request provides funding to meet the statute requirements in FY 2019 and implement selected energy or water-saving measures.

Education Telecommunications (\$350,000):

Funds requested in FY 2019 will be used for the continued narrow band radio conversion mandated by 47 CFR Section 300, which requires replacement of all Very High Frequency (VHF) and Ultra High Frequency (UHF) systems. Infrastructure communications systems and radio mobile and portable unit improvements will be provided to schools. Funds will be used for management administration, providing technical assistance, and the immediate repair or replacement of unanticipated life/safety and other facility deficiencies affected by the education telecommunication infrastructure. Examples of repairs include repair or replacement of radio towers and base stations or telephone switching systems and infrastructure.

Boiler Inspections (\$350,000):

Funds requested in FY 2019 will be used for inspections and repair of boilers for the BIE-funded schools.

Seismic Safety Data (\$75,000):

Funds requested in FY 2019 will be used for structural design of buildings requiring seismic retrofitting. This program is in compliance with provisions of Executive Order 12941, Seismic Safety of Existing Federally Owned or Leased Buildings, which requires Federal agencies to assess and enhance the seismic safety of existing buildings that were designed and constructed without adequate seismic design and construction methods.

Region/Area/ District:	Navajo Region	Congressional District:	01 State: AZ

Project Justification

DOI Asset Code	FRPP Unique Id #	API:	FCI-Before:	FCI-Projected:
35290000	N35R2001000	40	0.7095	0.5532

Project Description:

Many Farms Community School serves 204 students in grades K-8 and is located 104 miles northwest of Gallup, New Mexico. This project replaces the electrical system for the multi- purpose building. The requested funds will be used to improve the safety/health and functionality of this building that is currently in poor condition and mission critical.

Category	Description of work to be performed	Estimated Cost
M-1	Replace electrical system in Multi-purpose Building 1000	TBD

Scope of Benefits (SB):

Replacement of the electrical system addresses critical Life/Health/Safety and resource protection issues. The current system is running to failure. This project will enable continued use of the facilities and allow educators to administer their programs and eliminate lost instructional time due to malfunctioning equipment.

Investment Strategy (IS):

This project will enable continued use of mission critical facilities as well as increase energy efficiency. This major renovation will also extend the life of the overall structure and allow increased integration of up to date technology systems that improve the overall learning environment.

Consequences of Failure to Act (CFA):

Without this project, operation and maintenance costs will continue to increase as a result of inefficient building systems and deteriorating components using resources inefficiently. Liability costs will increase as the potential liability risk associated with unsafe and deteriorating conditions increases. This project is required to prevent further deterioration of these educational assets and address health and safety issues.

Project Identification

Project Title:	Shonto Preparatory School HVAC and Domestic Water Line Replacement		
Project Number:	Unit/Facility Name:	Bldgs 648, 671,674	
Region/Area/ District:	Navajo Region	Congressional District:	01 State: AZ

Project Justification

DOI Asset Code	FRPP Unique Id #	API:	FCI-Before:	FCI-Projected:
35230000	N33R1600648	40	0.4588	0.3969
35310000	N33R1600671	40	0.5836	0.3656
35310000	N33R1600674	40	0.4475	0.2644

Project Description:

Shonto Preparatory School serves 360 students in grades K-8 and is located 127 miles northeast of Flagstaff, Arizona. This project replaces the HVAC system and a domestic water system for the main school building and replacement of the HVAC systems for two dormitory buildings. These requested funds will be used to improve the safety/health and functionality of facilities that are in poor condition and critical to the continued operation of this school and its ability to operate its dorms.

Category	Description of work to be performed	Estimated Cost
M-1	Replace dormitory HVAC system in Building 671	TBD
M-1	Replace dormitory HVAC system in Building 674	TBD
M-1	Replace primary academic structure HVAC and domestic water system, Building 648.	TBD

Scope of Benefits (SB):

Replacement of these systems addresses critical Life/Health/Safety and resource protection issues. The current systems are running to failure. This project will enable continued use of the facilities and allow educators to administer their programs and eliminate lost instructional time due to malfunctioning equipment and poor air quality. Replacing HVAC systems in the dorms will greatly increase the quality of life and increase the likelihood of positive educational outcomes.

Investment Strategy (IS):

This project enables continued use of mission critical facilities, increases overall site level energy efficiency, and reduces operations and maintenance costs for the school and two dormitory buildings. Replacement of the domestic water system will enable replacement of deteriorating infrastructure that affects water quality throughout the campus.

Consequences of Failure to Act (CFA):

These buildings were built in 1968 and are fast approaching their useful lifespan. Without this project, operation and maintenance costs will continue to increase as a result of inefficient building systems and deteriorating components using resources inefficiently. Liability costs will increase as the potential liability risk associated with unsafe and deteriorating conditions increases. Student learning will be negatively impacted with inefficient HVAC systems and a domestic water system in need of replacement. This project is required to prevent further deterioration of these educational assets and address health and safety issues.

The Public Safety & Justice (PS&J) Construction program funds projects and repairs facilities used by BIA-funded direct service and tribally operated law enforcement and detention services including employee housing. The program also includes the Structural Fire Protection program that helps ensure safe facilities. Assets maintained under this program include law enforcement, detention buildings (including some tribal court facilities), housing units, and a wide variety of other constructed assets such as roads, recreation facilities, water and power facilities, warehouses, storage facilities, garages (quarters and non-quarters), and existing building operation support systems.

Justification of 2019 Program Changes:

Employee Housing Repair (-\$378,000):

The FY 2019 budget request proposes to fund the Employee Housing Repair program at \$3.1 million. In 2019, funding will permit construction of three employee housing units associated with the Eastern Nevada Owyhee Detention Center in Nevada and six units serving the Northern Cheyenne JV Detention Center in Nevada. Priority is given to locations considered by OJS as areas with high crime rates that require increased law enforcement officials and detention center staff presence and have limited housing stock available because of the remote location of the Indian reservations.

Facilities Improvement and Repair (-\$284,000):

The FY 2019 budget request proposes to fund the PS&J Facilities Improvement and Repair program at \$4.1 million. The program will fund minor improvement and repair projects, advanced planning and design as necessary, condition assessments, environmental and demolition projects, and emergency repairs of Indian Affairs (IA)-owned or operated law enforcement facilities as resources permit. The program prioritizes projects with critical health and safety deficiencies and environmental hazardous material items.

Fire Protection (-\$147,000):

The FY 2019 budget request proposes to fund the Fire Protection program at \$3.1 million. The Fire Protection program prioritizes replacement and repair of non-working fire alarm and fire sprinkler systems, with an emphasis on educational facilities, and assessing existing fire protection systems. The program will continue to provide training to maintenance staff at Bureau of Indian Education (BIE) schools on preventive maintenance requirements to keep existing life safety systems functional as resources permit.

Public Safety and Justice Construction Overview:

Tribes collaborate with IA and coordinate with local and state governments to ensure efficiencies of operation for law enforcement, corrections, and fire programs. The PS&J Construction program supports facilities used by IA-funded direct service and tribally operated law enforcement and detention services. The activity funds projects and repairs to IA-owned detention and law enforcement facilities and PS&J employee housing. The program also includes the Structural Fire Protection program that helps ensure safe facilities.

Red Lake Detention Center, Red Lake Minnesota

Assets maintained under this program include Detention, Law Enforcement buildings (including some Court facilities), housing units, and a wide variety of other constructed assets such as roads, recreation facilities, water and power facilities, warehouses, storage facilities, garages (quarters and non-quarters), and existing building operation support systems. The program also maintains fire safety systems in schools, dormitories, and other facilities. Completion of FI&R projects facilitates compliance with accessibility requirements, Environmental Protection Agency (EPA) requirements, and other safety code requirements.

Subactivity - Employee Housing (FY 2019: \$3,092,000; FTE: 0):

Program Overview:

In recent years, the PS&J Quarters Construction program has focused on building new housing, primarily at locations where new tribal detention centers have been built. Priority is given to locations considered by OJS as areas with high crime rates that require increased law enforcement officials and detention center staff presence and have limited housing stock available because of the remote location of the Indian reservations. The availability of housing is one of the necessary components in recruitment and retention of PS&J staff. The proximity of these houses enables officers to respond quickly and effectively to emergencies.

The FY 2019 budget proposes funding for Phase II of housing construction plans at two detention center locations. The budget requests funding to complete six units at Northern Cheyenne Juvenile Detention Center in Busby, MT and three units at Eastern Nevada Detention Center in Owyhee, NV. Construction plans are funded in phases subject to availability of funds. Employee quarters are

constructed using an approved standard design that meets all IA building codes including the health and safety standards. This approach accelerates the preliminary design review and acceptance process. Variation in final project costs come from local housing market variations as well as site development and site utility expansions. .

The following table reflects the status of ongoing and proposed detention/corrections employee housing projects and includes projected completion dates, estimated costs, and type of procurement method for the construction.

PS&J Quarters Construction Projects in Progress				Project Cost Estimate (\$000)			Procurement Method
Employee Housing Project	State	Projected Completion	Status January 2018	Planning & Design	Construction	Total	
Wind River	WY	Q2 FY2018	Ongoing Construction	100	2,000	2,100	P.L. 93-638
Mescalero	NM	Q3 FY2018	Ongoing Construction	100	1,200	1,300	Commercial
Standing Rock	ND/SD	Q4 FY2018	Ongoing Construction	100	2,400	2,500	P.L. 93-638

Eastern Nevada - Owyhee	NV	Q4 FY2020	Proposed for funding in FY2019	100	TBD	TBD	Commercial
Northern Cheyenne - Busby	MT	Q4 FY2020	Proposed for funding in FY2019	100	TBD	TBD	Commercial

TBD - To be determined upon awarding of construction contract.

Subactivity - Facilities Improvement and Repair (FY 2019: \$4,058,000; FTE: 0):

Oglala Sioux Tribal Offenders Detention Center Control Room, Pine Ridge, SD

The FI&R program prioritizes on critical health and safety deficiencies when ranking improvements and repairs or renovation projects at IA-owned detention and law enforcement facilities. There are 84 detention and other OJS facilities located in 17 States across Indian Country.

Minor Improvement and Repair (MI&R) (\$1,743,000):

Projects help maintain IA real property portfolio assets at an operational level as well as extend the useful life of the asset. Projects support IA compliance with the American Correctional Association Core Jail Standards; accessibility requirements; EPA requirements; and other life safety and health code requirements. This program also funds the disposal of assets no longer needed for the program and the abatement of any environmental hazards required to support demolition.

Facilities Condition Assessments (\$437,000):

Condition assessments document new and validate identified deficiencies at IA-funded detention and law enforcement facilities. Condition assessments identify deferred maintenance (DM) needs and include a computation of the current replacement value (CRV) of each asset, which is critical in calculating the asset FCI. Condition assessments also identify museum

property and assess facility conditions to assure adequate protective measures are in place. Facilities inspections include standard elements identified such as fire and life safety, HVAC systems, electrical systems, structural integrity, etc.

Emergency Repair (\$370,000):

The Emergency Repair Program covers facilities-related expenses necessary to mitigate or correct immediate threats to life or property at PS&J facilities.

Environmental Projects (\$547,000):

This program funds correction of environmental deficiencies at public safety facilities. IA facilities often have several complex environmental compliance needs. The key areas for compliance include storage tank management, toxic substances management, hazardous materials/waste management, water quality management, and air quality management.

Portable Office Buildings (\$961,000):

This program supports construction, transport, repair, installation, and relocation of portable office buildings at various IA/OJS locations throughout Indian Country. Work may also include constructing infrastructure associated with building including utilities, vehicle accommodation, and pedestrian walkways. The portable program was introduced to provide temporary space for OJS when critical to operations and new construction funding is not available. It is anticipated that during FY 2019, a total of two portable buildings will be completed and installed at multiple locations, based on OJS's priority listing.

Pine Ridge Agency Facilities Personnel accompanying Facilities Condition Assessment Pine Ridge Justice Complex, Pine Ridge, SD

Subactivity - Fire Safety Coordination (FY 2019: \$166,000; FTE: 1):

Firefighters train to a live fire scenario

The Structural Fire Protection Program (SFPP), ensures fire safe IA facilities at IA's schools, dormitories, detention facilities, offices, and other IA funded facilities. The program works with non-IA fire agencies such as other Federal, tribal, state, county, and municipal fire departments as a resource for fire training or information pertaining to the fire service that may affect IA.

Subactivity - Fire Protection (FY 2019: \$3,105,000; FTE: 0):

The SFPP ensures fire suppression responses by IA, tribal, other Federal, and county fire departments. The program promotes and monitors compliance with the National Fire Protection Association (NFPA) codes, Occupational Safety and Health Act

(OSHA), and Federal law. The SFPP provides structural fire protection systems for IA funded facilities. This includes upgrading or replacing non-working or outdated fire alarm and automatic sprinkler systems. The SFPP also provides ongoing replacement and major repairs support to locations previously provided with fire trucks, stations, and equipment.

In FY 2019 the SFPP will continue to focus on the replacement and repair of non-working fire alarm and fire sprinkler systems with an emphasis on educational facilities. The SFPP will focus on assessing existing fire protection systems and providing training to maintenance staff at BIE schools on preventive maintenance requirements in order to keep existing life safety systems functional.

Automatic Sprinkler System (\$760,000):

Project funding will be used to correct automatic fire sprinkler systems at BIE schools and dormitories. Eight projects under \$100,000 and three projects over \$100,000 are scheduled to be completed by the end of FY 2019. This will ensure that, in the event of fire, the sprinkler system will activate, sound an alarm, control, or extinguish the fire, and give building occupants time for evacuation or provide secondary means of egress if their primary exit is blocked.

Automatic Sprinkler System Panel

Fire Equipment (\$295,000):

Project funding will be used to replace firefighting equipment damaged, contaminated, or beyond repair, such as fire hoses, nozzles, and hand tools.

Fire Alarm Systems (\$1,850,000):

Project funding will provide fire alarm systems to meet NFPA codes. Fourteen projects under \$100,000 and 9 projects over \$100,000 are scheduled to be completed by the end of FY 2019. The funds will be used to repair or replace older systems experiencing chronic problems at BIE schools and dormitories. The SFPP will also provide preventative maintenance training at locations throughout Indian Country.

Structural Firefighter Training (\$200,000):

Funds will be used to maintain the skills of current firefighters and train new structural firefighters. Annual firefighter training will be offered to all IA locations and identified tribal fire departments that provide structural fire protection to IA facilities. Training will include Introduction to Firefighting, which provides the foundation for firefighting. Advanced firefighter training will focus on search and rescue operations with fire control and extinguishing. Other courses have been

Firefighters prepare to enter the Mobil Live Fire Training Simulator

added, including Liquid Petroleum Gas (LPG) emergencies and vehicle extrication at certain training locations. IA plans to hold eight trainings annually spread throughout Indian Country.

Project Data Sheet

Total Project Score/Ranking:	80/1
Planned Funding FY:	2019
Funding Source: Public Safety and Justice Construction Improvement & Repair Employee Housing	

Project Identification

Project Title:	Detention Employee Housing		
Project Number:	TBD	Unit/Facility Name:	Northern Cheyenne JV Detention Center – Busby
Region/Area/District:	District V	Congressional District:	00 State: Montana

Project Justification

DOI Asset Code	FRPP Unique Id #	API:	FCI-Before:	FCI-Projected:
35300200	Multiple Employee	100	N/A	0.00
	Quarters			

Project Description:

The Division of Facilities Management and Construction (DFMC) will use the requested funding to complete Phase II of the new employee quarters construction for the Northern Cheyenne Juvenile Detention Center. This project fulfills the program requirement for this location. A total of six (6) units will be built in Busby, MT in a two-bedroom configuration.

The Northern Cheyenne Juvenile Detention Center is in Busby, Montana. Busby is approximately 100 miles to the east of Billings, MT. Heavy snows and extreme weather often make roads impassable and rental housing is scarce or non-existent, due to the low population in Busby area; just over 2,000.

Units have been designed to have lower life cycle costs, use energy efficiently, and meet accessibility standards. The quarters will be constructed with longer-lasting materials to withstand severe use and require minimal maintenance. The structures will feature a fixed foundation with Radon elimination system, fire sprinklers, high efficiency HVAC equipment, Energy Star appliances, and additional insulation. They will have a low carbon input and a photovoltaic system that will be net metered to the grid. Fiberglass reinforced sheet rock will be used in areas where moisture could be expected and fiber cement lap siding will be used on the exteriors. The roofs will be standing metal seam for durability.

The construction of the new employee quarters will improve the safety and functionality of facilities for the program's stakeholders and will support the Department's plan to improve Public Safety and Justice programs by ensuring that facilities are in fair or better condition as measured by the Facility Condition Index (FCI).

Scope of Benefits (SB):

Housing units are essential to staffing these facilities, as no other housing is available in these areas. Providing quarters for key personnel helps in recruitment and retention of quality corrections and law enforcement staff. One advantage of housing personnel nearby is their ability to respond quickly to unexpected or emergency situations, including inclement weather. This project is a Presidential High Performance Priority Goal (HPPG).

This project supports Indian Affairs (IA) core mission by administering its trust responsibilities and implementing self-determination policies on behalf of Tribal Governments, American Indians and Alaskan Natives and by strengthening Tribal communities through the development of self-sustaining economies and improved human and physical infrastructure. The project, also, supports the IA Public Safety and Justice Centers and facilities serving communities, the general public and staff. They support the Departmental Strategic Plan by responding to the outcome goals of supporting Indian Self Governance and Self-Determination and Improving Education and Welfare systems for Indian Tribes.

These quarters will improve the safety and functionality of facilities for the program's stakeholders and support the Department's

plan to improve Public Safety and Justice programs by ensuring that facilities are in fair or better condition as measured by the Facility Condition Index (FCI).

Investment Strategy (IS):

This project supports the Department of the Interior (DOI) Asset Management Plan that ensures managers at all levels are provided with the tools to make wise investments, including making informed choices for funding in owned and leased buildings, structures, linear, fleet, and non-stewardship lands that contribute to the IA mission.

The investment will improve the FCI as well as decreased operational costs and greater overall efficiency through the design and installation of more effective, energy efficient building systems. Completion of this project will contribute to a healthy and safe environment and reduce long-term costs for potential liability risk associated with unsafe conditions.

Consequences of Failure to Act (CFA):

Failure to act will result in difficulty recruiting and retaining quality corrections and law enforcement staff. Personnel will be unable to respond quickly to unexpected or emergency situations, including inclement weather. Potential liability risk associated with decreased security and unsafe conditions will remain.

35300200	Multiple Employee	100	N/A	0.00
	Quarters			

Project Description:

The Division of Facilities Management and Construction (DFMC) will use the requested funding to complete Phase II of the new employee quarters construction for the Office of Justice Services (OJS) Program. Budget limitations in FY18 required adjustment to the delivery schedule and resulted in a two phased project. Phase II completes the program requested need for this location. A total of three (3) units will be built in a 2-bedroom configuration and will house OJS employees supporting Eastern Nevada Detention Center.

The Eastern Nevada Detention Center is located in Owyhee, Elko County, Nevada. The facility is located in the northern part of Nevada near Idaho. The nearest town, Elko, Nevada, is about 95 miles away and there is no nearby commercial housing to own or rent.

Units have been designed to have lower life cycle costs, use energy efficiently, and meet accessibility standards. The quarters will be constructed with longer-lasting materials to withstand severe use and require minimal maintenance. The structures will feature a fixed foundation with Radon elimination system, fire sprinklers, high efficiency HVAC equipment, Energy Star appliances, and additional insulation. They will have a low carbon input and a photovoltaic system that will be net metered to the grid. The Resources Management Construction program funds deferred maintenance projects for dams, irrigation projects and systems, and power projects in Indian Country. BIA provides management and program oversight, technical assistance, training, and other support as needed.

Justification of 2019 Program Changes:

Navajo Indian Irrigation Project (-\$149,000):

The budget request funds construction and deferred maintenance of the Navajo Indian Irrigation Project at \$3.3 million. Proposed funding will be used for projects to correct the remaining construction deficiencies identified during inspections of BOR constructed NIIP pumping plants which need to be completed prior to transfer from Reclamation to Indian Affairs. Funding will also support a plan to automate and integrate operation of NIIP pumping plants and canal check structures.

Irrigation Projects – Rehabilitation (+\$724,000):

The budget request funds the Irrigation Projects – Rehabilitation program at \$3.3 million. This program is part of the Administration’s focus on infrastructure. In 2019, Indian Affairs (IA) will address critical outstanding maintenance issues at the 17 Indian Irrigation Projects, which are vital economic contributors to the tribes, local communities, and regions where they are located. The IA estimates that irrigated lands served by the major Indian Irrigation Projects produce in excess of \$960 million in gross crop revenues annually.

Engineering and Supervision (-\$102,000):

The budget request funds the Engineering and Supervision program at \$2.0 million. In 2019, the program will continue to provide technical assistance and oversight to the 17 irrigation projects and three power utilities located in Indian Country in the western United States.

Survey and Design (+\$300,000):

The budget request funds the Survey and Design at \$590,000. This program is part of the Administration's focus on infrastructure. In 2019, the program will fast track technical modernization studies for rehabilitation of the 17 Congressionally authorized Indian Irrigation Projects and three IA Power Utilities in the IA inventory. Modernization studies will be used to improve resource utilization and water delivery service.

Safety of Dams (+\$949,000):

The budget request funds the Safety of Dams at \$26.4 million. This program is part of the Administration's focus on infrastructure. In 2019, the program will prioritize construction projects for dam safety rehabilitation projects already designed or with expected design completion in FY 2019. The budget proposes to fund seven dam projects based on funding levels requested and projects proposed in the 2018 budget request to Congress. The program will also support design projects for planned construction beyond FY 2019 and conduct risk assessments to help prioritize future projects.

Resources Management Construction Overview:

The Resources Management Construction program serves Indian communities by assisting tribes in the management of water delivery assets consistent with applicable Federal, tribal, and State laws. Indian Affairs provides management and program oversight, technical assistance, training and other support to dams programs, irrigation projects and systems, and power projects in Indian Country.

The program is continually applying new technology to improve the management of irrigation, power and dam safety programs. Examples include: mapping and inventory of all projects with Geographical Information System (GIS) technology; implementation of computerized asset maintenance management system; continued improvements to the billing and collection system for the irrigation projects; implementation of an on-line rate setting tool for the irrigation projects; and most recently establishing a Cooperative Agreement with California Polytechnic University's Irrigation Training and Research Center (ITRC) to assist with training of field staff and development of Modernization Studies for specific irrigation projects.

The Resources Management Construction activity is composed of the following subactivities: Irrigation Project Construction, Engineering and Supervision, Survey and Design, Federal Power Compliance (Federal Energy Regulatory Commission or FERC), Dam Projects, and Oversight of Power Projects.

Subactivity - Irrigation Project Construction (FY 2019: \$6,543,000; FTE: 2):

This program provides management, oversight, and engineering technical assistance to the irrigation projects under BIA's jurisdiction. The program addresses deferred maintenance needs at 17 congressionally authorized irrigation projects. These 17 irrigation projects are located on Indian reservations across the Rocky Mountain, Northwest, Southwest, Navajo and Western Regions. The BIA also has irrigation systems in its inventory which are non-revenue-generating that are mainly used for subsistence gardening.

Indian irrigation projects provide water vital to agricultural production in the western United States. Serving over 25,000 customers in 10 western states, irrigation projects provide irrigation water to over 780,000 acres through over 56,000 structures and 6,000 miles of canals and drains. The IA owns, operates, and maintains the projects, providing the manpower, materials, and equipment to operate and maintain these projects. There are no other Federal agencies which operate and maintain irrigation projects.

The current water users on IA projects include the tribes, individual Indian landowners, non-Indian landowners, and non-Indian lessees of Indian lands. The mix of fee and trust lands, along with the delivery of Indian and non-Indian water rights to both Indian and non-Indian customers, makes IA irrigation different from most other irrigation projects.

Navajo Indian Irrigation Project [\$3,224,000; FTE: 2]:

This program funds construction and deferred maintenance of the Navajo Indian Irrigation Project (NIIP). All work is accomplished through a reimbursable agreement with the Bureau of Reclamation. The construction of the NIIP is authorized under Pub. L. 87-483, as amended, for the purposes of delivering water for the irrigation of irrigable and arable lands. The legislation authorized the Secretary of the Interior to construct, operate, and maintain the Navajo Indian Irrigation Project for the principal purpose of furnishing irrigation water to approximately 110,630 acres of land. The NIIP design is comprised of 11 blocks; with each block delivering water to approximately 10,000 acres. Construction of the project began in 1962. Currently, the irrigation delivery system can deliver water to approximately 77,685 acres, through eight completed blocks and a portion of block 9. The cost to date is approximately \$670 million.

Irrigation Projects-Rehabilitation [\$3,319,000; FTE: 1]:

The irrigation rehabilitation program addresses critical deferred maintenance and construction work on BIA owned and operated irrigation facilities, with an emphasis placed on infrastructure rehabilitation that addresses health and safety concerns for IA employees and the public. Projects are prioritized in accordance with the Department and Indian Affairs Asset Management Plan, the rehabilitation priority index (RPI), Facility Condition Index (FCI), Asset Priority Index (API), and also considers the risk associated with the loss of water delivery to all or a portion of the irrigation facility. Modernization Study results are incorporated into all rehabilitation projects to improve resource utilization and water delivery service as most facilities are reaching 100 years old.

Subactivity - Engineering and Supervision (FY 2019: \$1,971,000; FTE: 9):

This subactivity provides oversight and technical support to the 17 irrigation and three power projects at both Region and Project levels to ensure that Federal assets are protected and in compliance with laws and regulations. The program also ensures that the projects are operated and maintained in an efficient manner and providing good customer service. Support and assistance includes asset management, budgeting, technical assistance, operations and maintenance billing and collection activities, program oversight and reviews, computerized maintenance management implementation and a variety of other technical support functions. The program also provides water measurement training to IA and tribal staff.

Subactivity - Survey and Design (FY 2019: \$590,000; FTE: 0):

This program provides the planning and technical support activities for the Irrigation Resources Management Construction and develops information required for rehabilitation and maintenance efforts for the irrigation projects owned, operated and maintained by IA. The program 1) conducts rapid appraisal process, or mini-modernization, studies on irrigation projects to assist in prioritization of deferred maintenance project activities; 2) performs comprehensive condition assessments on power utilities and modernization studies of irrigation projects to meet the Department and BIA Asset Management responsibilities; 3) implements project sustainability studies to assist tribal efforts to improve and promote local and regional agricultural economies; 4) maintains project inventories and data, including the development of Map Data Books specific to the Irrigation and Power Projects; 5) undertakes irrigated land classification studies, mapping, and other technical activities, in direct support of developing critical information used to manage irrigation projects and systems; and 6) updates construction cost estimates for the asset management database that provides deferred maintenance estimates.

Subactivity - Federal Power Compliance [FERC] (FY 2019: \$641,000; FTE: 2):

Currently, there are approximately 200 hydroelectric and other facilities on, or affecting, Indian lands and resources. This program partners with affected Indian tribes to implement Secretarial authorities under Part I of the Federal Power Act (FPA) (16 U.S.C. 739a-825r) to improve tribal capacity to conduct research and participate in governmental efforts affecting or potentially affecting important Indian resources. Actions under this program generally include: 1) identification of non-Federal hydroelectric projects affecting Indian reservations, Indian trust resources (e.g., land, fish, wildlife, and cultural resources) and/or other resources important to Indian tribes; 2) development and implementation of studies to address potential effects of existing or proposed hydroelectric projects on fish and wildlife, water supply, cultural resources, and tribal economies; 3) development of settlement agreements, license recommendations, terms and conditions, and amendments to address project effects on Indian resources; and 4) long-term implementation of settlement agreements and other measures necessary to protect tribal interests. Program activities also cover Trial-Type Hearings and Alternatives Analyses pursuant to the Energy Policy Act of 2005 (EPA Act of 2005).

Subactivity - Dam Projects (FY 2019: \$28,281,000; FTE: 25):

Safety of Dams [\$26,365,000; FTE: 21]:

The Indian Dams Safety Act of 1994 (P. L. 103-302), established that IA is responsible for all dams on Indian lands. The Safety of Dams inventory currently includes 138 high- or significant-hazard potential dams on 42 Indian reservations and over 700 dams on Indian reservations that are classified as low-hazard potential or are unclassified. A dam's hazard potential classification is based on the potential for loss of life or significant damage to property downstream of the dam in the event of uncontrolled releases from the dam and is not a measure of the current dam condition.

The Safety of Dams program ensures the safety of all high and significant-hazard potential dams on tribal lands. These dams form a significant part of water resources and trust assets for Indian reservations. Failure of any of these 138 dams would be expected to result in the loss of one or more lives or would result in significant economic, environmental, cultural, or lifeline losses. The Safety of Dams program conducts yearly workshops to educate tribal community leaders and members about potential dam safety risks and demonstrate how floodplain management measures can and will be helpful for them in mitigating these risks.

The primary emphasis of the Safety of Dams program is to protect downstream residents from undue risks associated with the dams. This requires identifying dams that pose unacceptable risks, and utilizing a risk-informed decision process to prioritize risk reduction actions. These actions include correcting identified safety deficiencies to mitigate hazards in accordance with the Indian Dams Safety Act of 1994 and the Department's Safety of Dams Program, Secretarial Order No. 3048. The program is developing emergency action plans and early warning systems on all of its high and significant hazard dams, performing maintenance, enhancing security, and rehabilitating dams in poor condition. Dams under the jurisdiction of BIA potentially have more than 100,000 tribal persons living below these dams with hundreds of millions in assets.

Safety of Dams Construction and Design: The FY 2019 request will fund rehabilitation projects for the dams listed below. Projects will correct identified high-risk safety deficiencies in accordance with Federal guidelines and Department/Bureau directives. The corrective actions include repair and rehabilitation to address possible flood hydrology, seepage, static stability, dynamic stability, and landslide problems. The following seven dams are among the highest ranked dams based on the IA Risk Management process for funding this fiscal year. If the planned projects are delayed, funding will go toward the next highest priority projects. Funding may also be used to assist in ongoing design or construction, where additional funding is required on current construction, due to unforeseen circumstances, deficiencies or changed conditions. Design and planning are included in the project cost for each dam. If additional funds are available, new rehabilitation designs or construction will be started on the next highest ranked dam(s). Modification construction activities will be conducted at the following dams:

Proposed FY 2019 Safety of Dams Projects

Dam	Reservation	State	Project Description
Crow Dam	Flathead Indian Reservation	MT	Construction
Owhi Dam	Colville Indian Reservation	WA	Construction
Ghost Hawk Dam	Rosebud Indian Reservation	SD	Construction
Parmelee Dam	Rosebud Indian Reservation	SD	Design
Kicking Horse Dam	Flathead Indian Reservation	MT	Design
Bottle Hollow Dam	Uintah and Ouray Indian Reservation	UT	Design
Neopit Dam	Menominee Indian Reservation	WI	Design

Expedited Issues – Mitigation of High-Risk Failure Modes: Expedited issues are safety of dams deficiencies identified on high or significant hazard dams, which need to be corrected in the short term. These may be identified during Comprehensive Reviews or during inspections of the dams. The funds may be used in the mitigation of the risk through various means, such as additional monitoring, construction repairs, temporary breaching of the dam, or other methods to reduce risk.

Issue Evaluations: Issue evaluations are feasibility level studies of the higher risk failure modes on dams. The studies review all failure modes on a particular identified dam in determining which failure modes should be addressed in the rehabilitation. The high-risk failure modes will be included in any rehabilitation, but some or all of the moderate to lower risk failure modes may not be included.

Security: This program funds the installation of security equipment at key dam facilities and structures. Security includes access control, enhanced communications and proper lighting, remote surveillance systems, exterior alarm doors and locks, and alarm systems. In light of credible threats, the security assessments and findings will be maintained in the IA Central and the Regional Offices.

Emergency Management Systems

(EMS): Funds are used to ensure that Early Warning Systems (EWS) and Emergency Action Plans (EAPs) are developed, implemented, and maintained effectively. The EWS and EAPs are critical components of EMS. Inoperable systems and ineffective plans could adversely impact a given population, property, or the environment.

Currently, 136 programs dams have EAPs and EAPs are under development for the two new dams recently added to the list of high hazard dams. The EAPs are updated on a five-year cycle.

Emergency Management

❖ **Early Warning Systems (EWS)**

EWS are connected to a 24/7 National Monitoring Center, which monitors the streamflow, water elevation, spillway flow, weather conditions and developing storms, other dam parameters, and notifies the appropriate personnel.

❖ **Emergency Action Plans (EAPs)**

EAPs have been completed on all BIA dams in operation. Tabletop and functional exercises are held on a 5-year cycle with annual contact updates.

The EWS are electronic monitors and transmitters at each dam. The EWS Program provides monitoring and support at 120 IA dams via over 330 monitoring locations utilizing more than 3,300 sensors. The SOD Program performs emergency and annual maintenance services for monitoring locations and upgrades satellite telemetry at sites as necessary. The SOD Program maintains a data services contract to host and store EWS data and cover data feed billing from monitoring sites.

Safety of Dams Inspections and Evaluations: The SOD program inspects and evaluates high and significant hazard dams, and prepares Safety and Evaluation of Existing Dams (SEED) inspections on selected dams. Inspections and evaluations provide the information necessary to determine and identify the physical condition of the dams and which dams present a high or significant hazard to public safety. For dams that have been determined to be in less than satisfactory condition, annual special examinations are performed to detect deficiencies as quickly as possible, before a catastrophic failure occurs.

Program Coordination: These funds are used to operate and administer the SOD program primarily at Central and Regional Offices.

Dam Maintenance [\$1,916,000; FTE: 4]:

The Dam Maintenance program performs recurring maintenance and repairs of high and significant hazard potential dams on Indian lands. The program also performs annual maintenance on early warning systems.

Bureau of Indian Affairs Project Data Sheet	Total Project Score/Ranking:	70/1
	Planned Funding FY:	2019
	Funding Source: Construction-Resource Management Construction-Project Construction-Irrigation	

Project Identification

Project Title: Navajo Indian Irrigation Project, Inspector General Audit Deficiencies and Transfer Stipulations Corrections		
Project Number: NIIP - 1	Unit/Facility Name: Navajo Indian Irrigation Project	
Region/Area/District: Navajo Region	Congressional District: 3	State: NM

Project Justification

Project Description:

The Navajo Indian Irrigation Project (NIIP) is an on-going irrigation construction project on the Navajo Indian Reservation in northwest New Mexico. The NIIP started construction in 1964. The NIIP was authorized by Public Law 87-483 (76 Stat.96), signed into law on June 13, 1962 as a settlement of a specific issue and is the initial stage of the San Juan Chama Project in New Mexico and Colorado. This legislation authorized the delivery of irrigation water to 110,630 acres to be developed under irrigation. Currently, the irrigation system can deliver up to approximately 78,000 acres of irrigated land. The NIIP has been under construction for approximately 51 years. The backlog of routine maintenance on constructed facilities and infrastructure has been deferred and is now a major component of total cost to complete the project. The Indian Affairs (IA) funds the operation and maintenance of the NIIP.

The Bureau of Reclamation (Reclamation) performs the design and construction of the NIIP. The NIIP is divided into 11 blocks, each block delivering water to approximately 10,000 acres. The Reclamation completes a block and transfers the block from Construction-in-Progress (CIP) status to IA operations and maintenance (O&M) status. The construction of each block takes a few years to complete depending on construction funding levels. Portions of the block may be used by the Navajo Nation and when transferred to the BIA, some maintenance on deferred items may be required. Portions of this work are deferred items noted during the transfer and other punch list items to complete the construction project.

This proposed funding is to be used to correct deficiencies of the NIIP as mandated in the 1988 Office of Inspector General's (OIG) Report, and items noted above in the transfer from Reclamation to IA. A major portion of this work can only take place when there is no water in the canals. This work will involve the correction of the remaining OIG Deficiency items and correction of items noted during the newly constructed facility transfer inspections. It will also provide for O&M for items considered to be in the CIP status and pay for the power to run those structures to deliver water to the Navajo Nation.

FY 2019 funding will be used to continue development of Standing Operating Procedures (SOP) and related drawings. Minor construction will be performed with available funding, O&M, and power will be provided for those structures still considered to be in Assets-Under-Construction status. Work will also involve the correction of some items noted during the newly constructed facility transfer inspections.

Scope of Benefits (SB):

The NIIP support the Interior/IA's core mission by:

- Supporting IA's mission to enhance the quality of life, to promote economic opportunity, and to carry out the responsibility to protect and improve the trust assets of American Indians, Indian Tribes, and Alaska Natives. This is to be accomplished through the delivery of quality services, and by maintaining government-to-government relationships within the spirit of Indian self-determination.

- Carrying out the mission of the Office of Trust Services in protecting and preserving Trusts lands and Trust resources. This project protects and preserves trust resources through the on-going construction of the NIIP.

- Carrying out the authorization under the Navajo Indian Irrigation Project: San Juan Chama Project (*Public Law 87-483, as amended*) and the initial stage of the San Juan Chama Project in New Mexico and Colorado. This legislation authorized the Secretary of the Interior to construct, operate, and maintain the Navajo Indian Irrigation Project.

The Project clearly demonstrates a major and measurable contribution to established goals and objectives of the Department and IA, aligning with specific outputs and outcomes detailed in the strategic plans. The NIIP beneficially impacts the economy of the geographic area and the Navajo Nation (NN), including employment and multiple benefits to local, regional and national economies. The NIIP has four Public Law 93-638 contracts with the Navajo Agricultural Products Industry (NAPI), Navajo Nation's Tribal farming and agri-business enterprise. The NAPI provides operation, maintenance, corrects transfer deficiencies, and performs minor construction to irrigation systems on the completed segments. NAPI impacts not just the local economy but other areas through national and international marketing of consumer goods produced by the NAPI. The NIIP fulfills the location and partnership initiatives of the Department and IA.

Investment Strategy (IS):

NIIP investment strategy demonstrates a steady state position on operation and maintenance costs and a moderate leveraging of non-DOI resources.

Consequences of Failure to Act (CFA):

Failure to complete the NIIP would have a major and measurable direct impact on public or employee health and safety.

	Funding Source: Construction-Resource Management Construction-Project Construction-Irrigation	

Project Identification

Project Title: Navajo Indian Irrigation Project, Automation and Power Factor Correction		
Project Number: NIIP-2	Unit/Facility Name: Navajo Indian Irrigation Project	
Region/Area/District: Navajo Region	Congressional District: 3	State: NM

Project Justification

Project Description:

The Navajo Indian Irrigation Project (NIIP) is an on-going irrigation construction project on the Navajo Indian Reservation in northwest New Mexico. The NIIP started construction in 1964. The NIIP was authorized by Public Law 87-483 (76 Stat.96), signed into law on June 13, 1962 as a settlement of a specific issue and is the initial stage of the San Juan Chama Project in New Mexico and Colorado. This legislation authorized the delivery of irrigation water to 110,630 acres.

Currently, the irrigation system can deliver up to 77,685 acres of irrigated land. The NIIP has been under construction for approximately 51 years. The Indian Affairs (IA) funds the operation and maintenance of the NIIP.

Automation of the project will tie 32 small and large self-controlled pumping plants, 50 manually operated pumping plants and 19 canal check structures into the NAPI Master Station. The status of each pumping plant and the canal water levels at each side of the canal check structures can be monitored in real time. Adjustments to the system can be made remotely by a computer rather than manually by project personnel. Automation will make the NAPI irrigation operation more economical, more efficient, and will solve many of the water delivery problems NAPI is currently having. The design of the work started in FY 2011. The work on each block is scheduled to be completed in one to two years as funding is made available. The work is scheduled to be complete in FY 2022.

The current project power agreement was established on June 27, 1990 between Western Area Power Administration (Western), Navajo Agricultural Products Industry (NAPI), the Bureau of Reclamation (Reclamation) and IA. The Power factor Correction requirements were established on June 27, 1990. The agreement is to adhere to a power factor requirement i.e. "95 percent lagging and 95 percent leading" which was not considered until Block 8 pumping plants were constructed. If the average power factor at which power is delivered to the project is less than 95 percent lagging or more than 95 percent leading, the billing demand will be increased for each percent or major fraction thereof and will be billed at the power rate, i.e., by adding power factor capacitors to pump motors, the project will have a lower electric bill.

In Blocks 8 and 9 pumping plants, power factor capacitors were added to the pump motors. In 1997, prior to the moratorium on new construction, Block 5 power factor capacitors were added to the plant motors under the 1425-98-CC-40-22510 contract. Blocks 1 through 3 pumps are powered by natural gas; therefore, have small electrical load requirements which probably will not require power factor capacitor corrective action. Recently IA installed electrical motors in the Block 1 single unit pumping plants through a contract with Keller-Bleisner Engineering. As this is a working irrigation project, the work needs to be scheduled around the delivery of the water, and at times during the off-season, and is scheduled to be completed in FY 2022.

FY 2019 funding will allow for the continuation of the power factor correction work and automation work.

Scope of Benefits (SB):

The NIIP support the Interior/IA's core mission by:

- Supporting IA's mission to enhance the quality of life, to promote economic opportunity, and to carry out the responsibility to protect and improve the trust assets of American Indians, Indian Tribes, and Alaska Natives. This is to be accomplished through the delivery of quality services, and by maintaining government-to-government relationships within the spirit of Indian self-

determination.

-Carrying out the mission of the Office of Trust Services in protecting and preserving Trusts lands and Trust resources. This project protects and preserves trust resources through the on-going construction of the NIIP.

- Carrying out the authorization under the Navajo Indian Irrigation Project: San Juan Chama Project (*Public Law 87-483, as amended*) and the initial stage of the San Juan Chama Project in New Mexico and Colorado. This legislation authorized the Secretary of the Interior to construct, operate, and maintain the Navajo Indian Irrigation Project.

The Project clearly demonstrates a major and measurable contribution to established goals and objectives of the Department and IA, aligning with specific outputs and outcomes detailed in the strategic plans. The NIIP beneficially impacts the economy of the geographic area and the Navajo Nation (NN), including employment and multiple benefits to local, regional and national economies. The NIIP has four Public Law 93-638 contracts with the Navajo Agricultural Products Industry (NAPI), Navajo Nation's Tribal farming and agri-business enterprise. The NAPI provides operation, maintenance, corrects transfer deficiencies, and performs minor construction to irrigation systems on the completed segments. NAPI impacts not just the local economy but other areas through national and international marketing of consumer goods produced by the NAPI. The NIIP fulfills the location and partnership initiatives of the Department and IA.

Investment Strategy (IS):

NIIP investment strategy demonstrates a steady state position on operation and maintenance costs and a moderate leveraging of non-DOI resources.

Consequences of Failure to Act (CFA):

Failure to complete the NIIP would have a major and measurable direct impact on public or employee health and safety.

Project Identification

Project Title: Parmelee Dam Rehabilitation – Final Design		
Project Number:	Unit/Facility Name: Parmelee Dam	
Region/Area/District: Great Plains Region	Congressional District: 1	State: SD

Project Justification

<p>Project Description: Parmelee Dam is located on Cut Meat Creek on the Rosebud Indian Reservation west of the town of Parmelee in southwestern South Dakota. The reservoir contains 530 acre-feet of storage at spillway crest elevation 2615 and 1,400 acre-feet of storage at dam crest elevation 2625.9. The original dam was constructed in 1968 as a joint venture between the State of South Dakota and the Rosebud Sioux Tribe (RST). Parmelee Dam and Reservoir provide recreational benefits to the area. The dam is a rolled earthfill embankment with a crest length of 1,200 feet and a crest width of 30 feet at elevation 2625.9. The height of the dam above streambed is 36 feet. State Highway No. 63 crosses the crest of the dam. The upstream face of the dam has riprap protection between elevations 2613 and about elevation 2620. Currently BIA is completing an Issue Evaluation to determine which deficiencies are high risk and should be included in this project and preparing the conceptual design. In FY 2019, Parmelee Dam will be funded for final design.</p>																									
<p>Scope of Benefits (SB): The Safety of Dams (SOD) Program is primarily a public safety program, with the primary intent to reduce the potential loss of life and other risks, which are posed by dams located on Indian Reservations, to people, property, and the environment. The SOD program protects the public by identifying and implementing necessary corrective actions to make dams are as safe as practically possible and to reduce the potential threat to human life and property due to a catastrophic dam failure. When structural modifications are required to correct safety of dams deficiencies, the program ensures that modifications are completed in an economically, technically, environmentally, and culturally sound manner. The program monitors performance of dams through regular examinations and instrumentation monitoring. The program provides a consistent and logical approach to manage and reduce the risk posed by dams that are under the jurisdiction of the Bureau.</p>

Project Identification

Project Title: Kicking Horse Dam Rehabilitation – Final Design		
Project Number:	Unit/Facility Name: Kicking Horse Dam	
Region/Area/District: Northwest Region	Congressional District: 1	State: MT

Project Justification

<p>Project Description: Kicking Horse Dam is located on the Flathead Indian Reservation. Kicking Horse Dam, Dikes, and Reservoir are located on the Flathead Indian Reservation, in Lake County, Montana, approximately 5 miles southeast of the town of Ronan, Montana. The reservoir is an off-stream storage facility that is fed by the Kicking Horse Feeder Canal, which diverts from Post Creek southeast of the reservoir and discharges into the reservoir at the left abutment, and the South Crow Feeder Canal, which diverts from South Crow Creek at the reservoir inlet. The dam was constructed in 1930 by the Bureau of Indian Affairs (BIA) as part of the Flathead Irrigation and Power Project, now the Flathead Indian Irrigation Project (FIIP), to impound water for irrigation and recreation. The storage capacity of the reservoir is 9,200 acre-feet at elevation (El.) 3063. The dam is a homogeneous earthfill structure, with a crest length of 5,243 feet, a crest width of 14 feet and a maximum height of 30.4 feet. In addition to the dam, there is also a dike on the west side of the reservoir and a dike at the north end of the reservoir. The west dike is 450 feet long and the north dike is 1,700 feet long. Both dikes have an approximate crest elevation of 3066, a crest width of 10 feet, a 3H:1V upstream slope, and a 2H:1V downstream slope. There is riprap protection on the upstream face of both dikes. Currently BIA is completing an Issue Evaluation to determine which deficiencies are high risk and should be included in this project and preparing the conceptual design. In FY 2019 final design will start and in FY 2021 construction planned to be funded.</p>																												
<p>Scope of Benefits (SB): The Safety of Dams (SOD) Program is primarily a public safety program, with the primary intent to reduce the potential loss of life and other risks, which are posed by dams located on Indian Reservations, to people, property, and the environment. The SOD program protects the public by identifying and implementing necessary corrective actions to make dams are as safe as practically possible and to reduce the potential threat to human life and property due to a catastrophic dam failure. Project Identification

Project Title: Bottle Hollow Dam Rehabilitation-Final Design		
Project Number:	Unit/Facility Name: Bottle Hollow Dam	
Region/Area/District: Western Region	Congressional District: 1	State: UT

Project Justification

<p>Project Description: Bottle Hollow Dam is located on the Uintah and Ouray Indian Reservation in northeast Utah. Bottle Hollow Dam was completed in 1970, and comprised of the North Dam, the South Dam, and the Dike. All three structures are zoned earthfill embankments. The north dam has a crest length of 500 feet and a maximum height of approximately 59 feet. The south dam has a crest length of 680 feet and a maximum height of approximately 74 feet. The dike is 780 feet long with a maximum height of 11 feet. The crest elevation and width for all three embankments is 5114 and 30 feet, respectively. The SEED Analysis Report also concluded that the Probable Maximum Flood (PMF) did not overtop the dam embankment, leaving 4.9 feet of freeboard. Bottle Hollow Dams and Dike are classified as a HIGH-hazard facility. The current condition of the dams, dike, and combined spillway and outlet works generally meet accepted safety standards, and no major dam safety concerns have been identified in this Comprehensive Review (CR) regarding the current conditions of the dams, dike, and the appurtenant facilities. However, monitoring of the dams for critical information including seepage flows and visual inspections has been erratic. Three new Safety of Dams (SOD) recommendations have been made as a result of this CR, relating to the susceptibility of foundation liquefaction during a seismic event and updating the seismic loadings at the dam site. There are no outstanding SOD recommendations. Eleven new Operations and Maintenance (O&M) recommendations were made (2014-1-A through 2014-3-B) and several outstanding O&M recommendations remain incomplete.</p>																												
<p>Scope of Benefits (SB): The Safety of Dams (SOD) Program is primarily a public safety program, with the intent to reduce the risks, which are posed by dams located on Indian Reservations, to people, property, and the environment. The SOD program protects the public by identifying and implementing necessary corrective actions to make dams as safe as practically possible and to reduce the potential threat to human life and property due to a catastrophic dam failure. When structural modifications are required to correct safety of dams deficiencies, the program ensures that modifications are completed in an economically, technically, environmentally, and culturally sound manner. Project Title: Crow Dam Rehabilitation – Expedited Action		
Project Number:	Unit/Facility Name: Crow Dam	
Region/Area/District: Northwest Region	Congressional District: 1	State: MT

Project Justification

<p>Project Description: The dam is located on Crow Creek in Lake County, Montana, on the Flathead Indian Reservation. Crow Dam is a homogeneous embankment with a structural height of 99 feet and a crest length of 900 feet. The dam was constructed in the 1933 and modified in 1940. Crow Dam has unacceptably high probabilities of failure identified by the Bureau of Reclamation (BOR). Overall Safety of Dams condition is currently judged to be unsatisfactory. Two Expedited Actions have been identified. If this dam fails, the population at risk is estimated 370. The main deficiencies, considered Expedited Action, are high likelihood of failure due to overtopping during a flood event and spillway erosion during spillway flows. An Issue Evaluation and conceptual design was initiated in FY2011, and is complete. The final design is currently being developed.</p>																	
<p>Scope of Benefits (SB): The Safety of Dams (SOD) Program is primarily a public safety program, with the intent to reduce the risks, which are posed by dams located on Indian Reservations, to people, property, and the environment. The SOD program protects the public by identifying and implementing necessary corrective actions to make dams are as safe as practically possible and to reduce the potential threat to human life and property due to a catastrophic dam failure. This project supports the long-term goal by correcting identified safety deficiencies on the dam in accordance with the Indian Dam Safety Act of 1994 (Public Law 100-302) and the Department's Safety of Dams Program as per Secretarial Order No. 3048. When structural modifications are required to correct safety of dams deficiencies, the program ensures that modifications are completed in an economically, technically, environmentally, and culturally sound manner. The program monitors performance of dams through regular examinations and instrumentation monitoring. The program provides a consistent and logical approach to manage and reduce the risk posed by dams that are under the jurisdiction of the Bureau. The Crow Dam Rehabilitation fulfills the location and partnership initiatives of the Department and Bureau.</p>																	
<p>Investment Strategy (IS): The Crow Dam investment strategy demonstrates a steady state position on operation and maintenance costs and a moderate leveraging of non-DOI resources.</p>																	
<p>Consequences of Failure to Act (CFA): Failure to complete the Crow Dam would have a major and measurable direct impact on public or employee health and safety.</p>

Project Title: Owhi Dam Rehabilitation – Construction		
Project Number:	Unit/Facility Name: Owhi Dam	
Region/Area/District: Northwest Region	Congressional District: 5	State: WA

Project Justification

<p>Project Description: Owhi Dam is located on located on the Little Nespelem River, within the Colville Indian Reservation in northeast Washington . Owhi Dam is a combination embankment and concrete dam. The dam is approximately 20 miles northeast of Grand Coulee Dam and 5 miles northeast of Nespelem, Washington. Owhi Dam was constructed for the Little Nespelem Irrigation Project in 1915, and was rehabilitated in 1952 and 2001. The dam was built at the outfall of the glacially formed lake, and has a capacity of approximately 21,500 acre-feet at the spillway crest elevation (Photo 1). The spillway structure raises the Normal High Water Level of the lake by about 8 feet. The dam is operated and maintained by the Confederated Tribes of the Colville Reservation. The design documentation of the various elements of the dam has not been located and likely does not exist. The dam has a maximum height of approximately 12 feet and a hydraulic height of approximately 8 feet. The length of the dam is approximately 150 feet long across the natural lake’s outlet channel. The main dam consists primarily of an ungated concrete spillway/outlet works structure with embankments extending from either end to fill the natural drainage channel. Currently BIA is completing an Issue Evaluation to determine which deficiencies are high risk and should be included in this project and preparing the conceptual design. In FY 2016, BIA initiated final design and in FY 2019 construction will be funded.</p>																								
<p>Scope of Benefits (SB): The Safety of Dams (SOD) Program is primarily a public safety program, with the primary intent to reduce the potential loss of life and other risks, which are posed by dams located on Indian Reservations, to people, property, and the environment. The SOD program protects the public by identifying and implementing necessary corrective actions to make dams are as safe as practically possible and to reduce the potential threat to human life and property due to a catastrophic dam failure. When structural modifications are required to correct safety of dams deficiencies, the program ensures that modifications are completed in an economically, technically, environmentally, and culturally sound manner. The program monitors performance of dams through regular examinations and instrumentation monitoring. The program provides a consistent and logical approach to manage and reduce the risk posed by dams that are under the jurisdiction of the Bureau.</p>

Project Identification

Project Title: Ghost Hawk Dam Rehabilitation – Construction		
Project Number:	Unit/Facility Name: Ghost Hawk Dam	
Region/Area/District: Great Plains Region	Congressional District: 1	State: SD

Project Justification

<p>Project Description: Ghost Hawk Dam is a homogeneous earthfill structure located on the Rosebud Reservation approximately 3 miles northwest of Rosebud, SD on a tributary of the Little White River. The dam was constructed in 1975 as part of Hwy No. 7. The dam impounds 160 ac-ft. at elevation 2443. The dam is 42 ft. high with a crest length of 500 ft. and a crest with of 44 ft. the dam has an overall Safety of Dams condition classification of poor, with a downstream hazard classification of high. If this dam fails, the population at risk is 46 according to the Dam Consequence Rating and threatens significant cultural and historic sites. The dam has a high probability for overtopping and the Comprehensive Dam Review listed overtopping as an Expedited Safety Action item. The project will look at reducing the potential for overtopping, spillway replacement and also to reduce the potential for seepage through the dam embankment. The BIA completed the Issue Evaluation study in FY 2012 on the facilities to determine which deficiencies are high risk and should be included in this project. The Conceptual Design was completed in FY2013. The Final Design was completed in FY 2014. The construction phase is scheduled in FY 2018.</p>																	
<p>Scope of Benefits (SB): The Safety of Dams (SOD) Program is primarily a public safety program, with the primary intent to reduce the potential loss of life and other risks, which are posed by dams located on Indian Reservations, to people, property, and the environment. The SOD program protects the public by identifying and implementing necessary corrective actions to make dams are as safe as practically possible and to reduce the potential threat to human life and property due to a catastrophic dam failure. Project Identification

Project Title: Neopit Dam Safety of Dams Modifications-Final Design		
Project Number:	Unit/Facility Name: Neopit Dam	
Region/Area/District: Midwest Region	Congressional District: 1	State: WI

Project Justification

Project Description:

Neopit Dam is located on the Menominee Indian Reservation, about 12 miles northwest of Keshena, Wisconsin. The dam is an embankment dam with a concrete spillway located near the left abutment. The dam has a structural height of about 18 feet and a reported crest length of approximately 237 feet. The features associated with this dam include the left and right embankment sections, the concrete spillway, concrete powerplant, and the water treatment facility. The water treatment facility and the concrete powerplant are abandoned, although the tribe is discussing the potential of re-building the powerplant.

A dam failure flood at Neopit Dam would potentially endanger a Population-At-Risk (PAR) of up to roughly 30 persons on bridges and in homes downstream from the dam. Twelve potential failure modes were evaluated during the course of this Comprehensive Dam Review (CDR) and seven of the potential failure modes identified are currently considered to present unacceptably high risks of dam failure, such that they are viewed to represent potential dam safety deficiencies. Five of the potential failure modes are associated with normal operating conditions and two potential failure modes are associated with the spillway and overtopping of the dam during a flood event.

The potential failure modes under normal conditions involve potential erosion at the spillway-embankment contact, internal erosion through the embankment, internal erosion along buried conduits, erosion through the foundation, and failure of the concrete. The risks for these potential failure modes are high due to the uncertainty associated with the estimates for current conditions. The uncertainty is largely a result of the lack of documentation and construction information. There are two potential failure modes associated with flood loadings that warrant expedited action (outstanding EDSA); one is overtopping of the dam and failure due to headward erosion that leads to uncontrolled reservoir releases and the second potential failure mode is similar but is due to debris plugging the spillway and causing overtopping.

The remaining five potential failure modes relate to potential seepage-related failures. Repairing and rehabilitating the dam of these failure modes will bring this dam into an acceptable safety category.

Scope of Benefits (SB):

The Safety of Dams (SOD) Program is primarily a public safety program, with the intent to reduce the risks, which are posed by dams located on Indian Reservations, to people, property, and the environment. The SOD program protects the public by identifying and implementing necessary corrective actions to make dams as safe as practically possible and to reduce the potential threat to human life and property due to a catastrophic dam failure. When structural modifications are required to correct safety of dams deficiencies, the program ensures that modifications are completed in an economically, technically, environmentally, and culturally sound manner. The program monitors performance of dams through regular examinations and instrumentation monitoring. The program provides a consistent and logical approach to manage and reduce the risk posed by dams that are under the jurisdiction of the Bureau.

Investment Strategy (IS):

The Neopit Dam investment strategy demonstrates a steady state position on operation and maintenance costs and a moderate leveraging of non-DOI resources.

Consequences of Failure to Act (CFA):

Failure to complete the A-1 Dam would have a major and measurable direct impact on public or employee health and safety.

The Other Program Construction program addresses rehabilitation and repair needs for structures in the BIA inventory that serve Regional and Agency offices across the nation. The inventory includes administrative buildings and ancillary structures and telecommunication towers. Real property assets include buildings, housing units, and a wide variety of other constructed assets such as warehouses, storage facilities, garages, and existing building operation support systems. Construction Program Management provides national strategic, operational, tactical, and liaison support for the facilities programs operated by the Bureau of Indian Education and Bureau of Indian Affairs, and provides technology support for water infrastructure under the purview of the Resources Management Construction program.

Justification of 2019 Program Changes:

Telecommunications Improvement & Repair (+\$267,000):

The FY 2019 budget request for the Telecommunications Improvement and Repair program is \$1.1 million and supports the Administration’s emphasis on infrastructure. The program supports repair and modernization of Indian Affairs (IA) telecommunication systems across the regions and agencies. Funding in 2019 will support maintenance, spectrum management, five-year cyclical review, and administration of all Radio Frequency Assignments.

Facilities/Quarters Improvement & Repair (+\$761,000):

The FY 2019 budget request for the BIA Administration Facilities/Quarters Improvement and Repair program is \$2.9 million and supports the Administration’s emphasis on infrastructure. In 2019, the program will prioritize correction of health and safety deficiencies in the general administration locations identified in “Poor” condition based on the FCI. Funding will target replacement of large building systems such as roofs, HVAC, and lighting, electrical, and mechanical systems.

Construction Program Management (+\$69,000):

Funds will be used for program reviews to assess the efficacy of BIA Construction management policy, and confirm compliance with laws, regulations and program guidance. The outcome will serve as the basis for improved policy and procedural development.

Subactivity - Telecommunications Improvement & Repair (FY 2019: \$1,117,000; FTE: 0):

Indian Affairs operates a number of communication sites which are critical to the bureau mission. Identifying and remediating telecommunication problems are critical to continuity of operations. Projects target the repair or replacement of radio towers, base stations, and infrastructure; correction of hazardous safety conditions; damage caused by fire; acts of nature; and vandalism. Projects remediate telecommunication sites to meet compliance regulations, correct identified life safety deficiencies, replace systems that fall outside the narrowband requirements, and provide emergency repairs.

Subactivity - Facilities/Quarters Improvement & Repair (FY 2019: \$2,917,000; FTE: 0):

IA performs FI&R work on existing administrative facilities. The program prioritizes projects that improve safety and protect the health of employees and the public in administrative buildings.

Minor Improvement and Repair [\$2,305,000]:

Funds are used to correct priority deficiencies and support code compliance repairs necessary to provide safe, functional facilities and minimize program personnel's exposure to potential life, safety and health hazards. As of the 4th quarter of FY 2017, BIA Agency Facilities had \$68.3 million in building Deferred Maintenance and \$85.1 million in Site/Ground Deferred Maintenance. In FY2019, the program will focus on the significant backlog of unoccupied and slated for demo or transfer sites within the General Administration portfolio.

Facility Condition Assessments [\$62,000]:

This program supports the cyclic assessment of the condition of facilities. The purpose of the program is to complete a comprehensive condition assessment and inventory validation of all IA-owned or leased real property assets on a three year cycle. Assessments identify new deficiencies and validate existing ones in the facilities management system for assets that provide Trust Services to tribes and tribal members. Condition assessments identify deferred maintenance (DM) needs and include a computation of the current replacement value (CRV) of each asset, which is necessary to calculate the asset Facility Condition Index (FCI). Condition assessments include major building systems such as fire and life safety, HVAC and electrical systems, as well as structural integrity evaluations

Emergency Repairs [\$200,000]:

Funds requested in FY 2019 will be used to support emergency reimbursement for repairs as needs arise. When an emergency occurs that results in an IA facility presenting an immediate threat to life or property, the program provides funds to mitigate immediate threats to life or property.

Environmental Projects [\$350,000]:

This program addresses environmental clean-up in accordance with environmental laws and regulations. Specifically, funds are used to assess, characterize, remediate, and monitor potential or actual releases of environmental contaminants at IA-owned general administration facilities. Environmental projects include the upgrade or replacement of storage tanks, wastewater systems, water systems, water towers, or wells; removal and disposal of contaminated soils and hazardous or toxic

materials; abatement of asbestos and lead paint; and sampling and analysis of environmental contaminants, including testing for and mitigation of radon gas.

Subactivity - Construction Program Management (FY 2019: \$7,956,000; FTE: 24):

The Construction Program Management provides for national strategic, operational, tactical, and liaison support for the facilities programs operated by IA. The program ensures that all major construction or renovation projects materially contribute to effective resource protection for employees, a high quality education experience for students, and improved overall operation of IA programs in the most cost effective and environmentally responsible manner possible. The program also manages and oversees all maintenance programs which are accomplished through commercial contract, Pub. L. 93-638 contracts, Pub. L. 100-297 grants, or compacts with Tribes or tribal organizations for BIE, BIA, and Office of Justice Services (OJS).

Program Management Construction [\$4,209,000; FTE: 24]:

Construction program management supports an inventory of 5,953 buildings, more than 28.8 million square feet, nation-wide and includes all associated site utilities. The buildings are located in 26 states and are distributed over approximately 392 sites that are often remote and isolated. Of these buildings, 1) 3,642 are education facilities utilized by the BIE, consisting of 179 school sites including two post-secondary colleges, 2) 2,029 buildings are used by BIA for administration and other program operations including fire stations, roads shops, employee housing units, forestry buildings, lookout towers, communications sites, water intake systems, pumping stations, pipelines, and water treatment plants. 3) 84 detention facilities and tribal courts provide services for OJS, and 4) 50 buildings (815,980 square feet) are managed by tribes who receive O&M funds for such purposes, via Pub. L. 93-638 contracts or Pub. L. 100-297 grants.

Facility Data Management System [\$1,500,000]:

The Indian Affairs Facility Management System (IA-FMS) is a suite of applications integrated with the work management and asset management software package, the facility maintenance management system for all the DOI bureaus. DOI has an enterprise license agreement with IBM on behalf of the bureaus to address licensing requirements. Each bureau is required to pay a DOI License Cost Allocation each year to DOI. The IA-FMS interfaces with the system of record, the Financial and Business Management System (FBMS), on facility maintenance activities associated with IA funded assets that include schools, detention centers, telecommunication towers, and general administration facilities. The IA-FMS serves as the primary tool for gathering, tracking, and monitoring data on IA funded assets.

Fort Peck Water System [\$2,247,000]:

In accordance with the requirements of the Fort Peck Reservation Rural Water System Act of 2000, BIA funds OM&R for the completed sections of the Fort Peck Water System located within the Fort Peck reservation boundaries. This system ensures a safe and adequate municipal, rural, and industrial water supply for the residents of the Fort Peck Indian Reservation in the State of Montana, as well as the citizens of Roosevelt, Sheridan, Daniels, and Valley counties in the state, outside the Fort Peck Indian Reservation.

Settlements & Miscellaneous Payments

Appropriation Language

DEPARTMENT OF THE INTERIOR

INDIAN AFFAIRS

Indian Land and Water Claim Settlements and Miscellaneous Payments to Indians

For payments and necessary administrative expenses for implementation of Indian land and water claim settlements pursuant to Public Laws 99-264, 100-580, 101-618, 111-11, 111-291, and 114-322, and for implementation of other land and water rights settlements, \$45,644,000, to remain available until expended.

Note.—A full-year 2018 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Continuing Appropriations Act, 2018 (Division D of Pub. L. 115-56, as amended). The amounts included for 2018 reflect the annualized level provided by the continuing resolution.

The DOI is committed to honoring enacted Indian land and water rights settlements. Settlements often end decades of controversy and contention among tribes and neighboring communities. Securing tribal and individual Indian rights to historic land and ensuring permanent access to a clean and reliable water supply is important to tribal nationhood, quality of life, economic security, and sustained fundamental cultural values.

Justification of 2019 Program Changes:

UNALLOCATED (+905,000):

The distribution of settlement funding in 2019 will depend on the outcome of Congressional action on the 2018 appropriations. A proposed allocation of the 2019 request by settlement will be forwarded separately at that time. The Navajo Trust Fund and the Navajo-Gallup Water Supply Project both have enforceability dates in 2019. Authorized appropriations for these settlements need to be met in 2019 to meet the terms of the settlements or they become null and void and will need to be renegotiated.

Subactivity - Settlements (FY 2019 \$45,644,000; FTE: 4):

The budget continues to meet Federal responsibilities outlined in enacted land and water rights claim settlements with Indian Tribes to ensure they have access to land and water to meet domestic, economic, and cultural needs. For example, water infrastructure projects supported in these agreements bring clean and potable water to tribal communities, repair crumbling irrigation and water delivery infrastructure upon which tribal economies depend, support environmental restoration and protection goals, and support water sharing agreements between tribes and other water users. These investments improve the health

and well-being of tribal members and preserve existing economies and, over the long-term, bring the potential for jobs and economic development. Enacted settlements authorized for appropriation in 2019 include the following:

White Earth Land Settlement Act (Adm.)

The White Earth Land Settlement Funds are used to investigate and verify questionable transfers of land by which individual Indian allottees or their heirs were divested of ownership and to achieve the payment of compensation to allottees or heirs in accordance with Pub. L. 99-264. A major portion of work is contracted under the authority of Pub. L. 93-638, as amended, to the White Earth Reservation Business Committee.

Pyramid Lake Water Rights Settlement

The Pyramid Lake Water Rights Settlement (Pub. L. 101-618) authorizes funds to meet the federal responsibility to the Pyramid Lake Water Rights Settlement for water rights service and documentation of the Truckee River Operating Agreement (TROA) and Federal Water Master Costs in preparing for its implementation. Most of these funds are used to cover Federal costs in preparing the TROA. The TROA is being negotiated with the States of California and Nevada, the Truckee Meadows Water Authority, municipal and county governments in the Reno, NV, metropolitan area, the Pyramid Lake Tribe, and others. In preparing for the implementation of the TROA; funds are used for costs incurred by the Federal Water Master for the benefit of the Pyramid Lake Paiute Tribe and to implement and administer TROA under the Federal Orr Ditch Decree. Appropriations also fund BIA's share of the costs to maintain and use the Administrative Record to secure a final judgment in several court proceedings required to confirm the legal effectiveness of TROA, as identified in Pub. L. 101-618.

Navajo Water Resources Development Trust Fund

The Navajo Nation Water Resources Development Trust Fund was established in Pub. L. 111-11, the Omnibus Public Land Management Act. The Act authorizes funds to be appropriated for deposit into the Trust Fund: \$6,000,000 for FY 2010 through FY 2014 and \$4,000,000 for FY 2015 through FY 2019 for a total funding of \$50 million. Upon receipt of the funds when all conditions precedent of the settlement are met, the Nation may use the amounts in the Trust Fund to investigate, construct, operate, maintain, or replace water project facilities, including facilities conveyed to the Nation, and facilities owned by the United States for which the Nation is responsible for operation, maintenance, and replacement costs. The Trust may also be used to investigate, implement, or improve water conservation measures (including a metering or monitoring activity) necessary for the Nation to make use of a water right of the Nation under the agreement. Funding for the Navajo Water Resources is to be completed by FY-2019.

Navajo-Gallup Water Supply Project

The Omnibus Public Land Management Act of 2009 (Pub. L. 111-11) authorizes Federal appropriations for the Navajo-Gallup Water Supply Project. The Act allows appropriation of \$30 million for operations and maintenance of conjunctive use wells. The Act also authorizes \$7.7 million for rehabilitation of the Fruitland-Cambridge Irrigation Project and \$15.4 million for the Hogback-Cudei Irrigation Project. These three funding authorizations are subject to indexing. In addition, another \$11 million is authorized and not subject to indexing, to be appropriated for survey, recovery, protection, preservation, and display of archeological resources in the area of the project, facilities or conjunctive use wells.

The Navajo Nation Water Rights in the San Juan Basin were settled with the State of New Mexico in April 2005. The enacted legislation which ratifies the settlement focuses on two projects: groundwater conjunctive use wells, and the rehabilitation of historic irrigation ditches. These projects are important to sustain communities within the Nation with the enhancement and expansion of regional water supply distribution systems, including municipal and irrigation water systems. The ground water wells to be developed will provide conjunctive uses to help meet water needs of the Navajo Nation's communities in the San Juan Little Colorado, and Rio Grande basins and minimize the demand for water from the San Juan River.

The BIA Navajo Region funds four FTEs on term appointments to implement the settlement and to ensure proper monitoring and review. Funding for the settlement must be appropriated by FY 2019 to meet the appropriations requirements authorized in the enacted settlement, one of several actions required to meet the terms of the settlement, or the settlement is null and void and would need to be renegotiated.

The Pechanga Band of Luiseno Mission Indians Water Rights Settlement Act

The Pechanga settlement was ratified and confirmed in the omnibus Water Infrastructure Improvements for the Nation Act (WIIN Act, Pub. L. 114-322, Sec. 3401-3413) enacted December 16, 2016. The Act settles claims to water rights in the Santa Margarita River Watershed for the Pechanga Band of Luiseno Mission Indians, located in Temecula Valley of southern California. Appropriations authorized in the Act will support Pechanga Recycled Water Infrastructure, Extension of Service Area Agreement (ESAA) Delivery Capacity, the Pechanga Water Fund, and Pechanga Water Quality work.

The Act establishes the Pechanga Settlement Fund in the U.S. Treasury and authorizes funding of \$28.5 million, subject to discretionary appropriations. Certain amounts authorized in the settlement act require indexing to retain purchasing power of the amounts authorized in the bill, also subject to discretionary appropriations. Indexed amounts could range from \$7-9 million. The settlement enforceability date is April 30, 2021 by which time all appropriations and other criteria will need to be met or the settlement is void, funding is returned to the Treasury, and the Settlement must be renegotiated. The timing of the enforceability date requires that all appropriations be made by FY 2020.

The Blackfeet Water Rights Settlement

The Blackfeet Water Rights Settlement was ratified and confirmed in the omnibus Water Infrastructure Improvements for the Nation Act (WIIN Act, Pub. L. 114-322, Sec. 3701-3724) enacted December 16, 2016. The Act settles claims to water rights in the State of Montana for the Blackfeet Tribe of the Blackfeet Indian Reservation. Appropriations authorized in the Act will support the Administration and Energy Account, OM&R Account, St. Mary Account, and Blackfeet Water, Storage, and Development Projects.

The Act establishes the interest bearing Blackfeet Settlement Trust Fund in the U.S. Treasury and authorizes funding of \$175.46 million, plus indexing to retain purchasing power of the amounts authorized in the bill. Current estimates indicate indexed amounts could reach \$58 million. Payments on the settlement are subject to discretionary appropriations. The settlement enforceability date is January 21, 2026 by which time all appropriations and other criteria need to be met or the settlement is void,

funding is returned to the Treasury, and the Settlement must be renegotiated. The timing of the enforceability date requires that all appropriations be made by FY 2025.

The Act also establishes the non-trust, interest bearing Blackfeet Settlement Implementation Fund in the U.S. Treasury and authorizes funding of \$246.5 million, plus indexing, to retain purchasing power of the amounts authorized in the bill, subject to discretionary appropriations. The Bureau of Reclamation will request appropriations for this Fund.

Indian Guaranteed Loan Program Account

For the cost of guaranteed loans and insured loans, \$6,699,000, of which \$904,000 is for administrative expenses, as authorized by the Indian Financing Act of 1974: Provided, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974: Provided further, That these funds are available to subsidize total loan principal, any part of which is to be guaranteed or insured, not to exceed \$108,553,160.

Note.—A full-year 2018 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Continuing Appropriations Act, 2018 (Division D of Pub. L. 115-56, as amended). The amounts included for 2018 reflect the annualized level provided by the continuing resolution.

This program guarantees or insures loans covering up to 90 percent of outstanding loan principal to Indian tribes, tribal members, or for profit and not-for-profit businesses at least 51 percent Indian owned. Private lenders have historically been hesitant to make business financing available to Indian borrowers. By helping Indian-owned businesses obtain the capital they need to operate, the program advances economic development on federally recognized tribal reservations and within tribal service areas recognized by the BIA.

Justification of 2019 Program Changes:

Loan Subsidies (-\$1,729,000)

The FY 2019 budget proposes \$5.8 million for Indian Guaranteed Loan Program Subsidies. Using subsidies rates approved by the Office of Management and Budget for the FY 2019 budget, the proposed 2019 funding level would guarantee and insure \$108.6 million in loan principal.

Program Management (-\$277,000)

The FY 2019 budget proposes \$904,000 for the Loan program management. The program will continue administrative duties associated with managing the IGLP credit portfolio, marketing the program, and regularly interacting with lenders, tribal economic development specialists, and entrepreneurs. Division of Capital Investment (DCI) will prioritize implementing new software so that it can properly store, manage and retrieve loan accounting data in accordance with modern lending practice and Federal Law. The DCI will also focus on implementing a policies and procedures manual with revised regulations for the program.

Indian Guaranteed Loan Program Overview:

Funding supports subsidies of new loans in Indian country issued under the Indian Loan Guarantee and Insurance program, part of the Indian Financing Act of 1974 (Pub.L. 93-262), as amended. This program addresses the historic hesitancy of private lenders to make business financing available to Indian borrowers. By offering loan guarantees and insurance covering up to 90 percent of outstanding loan principal and accrued interest, the program reduces lender risk and makes Indian business financing much more readily available.

Borrowers must be Indian tribes, tribal members, or for profit and not-for-profit businesses at least 51 percent Indian owned. Loans must be for business purposes that benefit the economy of an Indian reservation or a tribal service area designated by the Bureau of Indian Affairs (BIA). The program offers flexibility in that it can be used with loans for permanent working capital, real estate, construction, equipment, lines of credit, refinancing, and nearly any other lawful business activity, excluding those that are primarily involved in gaming or tobacco. The Office of Indian Energy and Economic Development administers the program through its Division of Capital Investment (DCI).

Approved lenders can be banks or non-banks, as long as they are regularly engaged in the practice of making and servicing loans, and otherwise meet program requirements. The Native American Technical Corrections Act of 2006, specifically authorized community development financial institutions (CDFIs) as program lenders. CDFIs already exist throughout much of Indian country, and typically offer loans of modest size. They are a particularly good match for the program's loan insurance feature, aimed at loans of \$250,000 or less. DCI is actively seeking broader program participation by CDFIs, and their use of loan insurance.

Most program activity concerns loan guarantees. DCI reviews all loan guarantee applications, independently checking the lender's underwriting. Most loan guarantee requests are reviewed by a loan committee. All approvals involve specific written conditions tailored to the transaction in question in order to ensure, to the greatest possible extent, the success of the Indian business and its contribution to a tribal economy.

Once authorized to use the program, lenders may seek either loan guarantees or loan insurance. Guaranteed lenders execute a Loan Guarantee Agreement with DCI, at which point they may submit individual loan proposals for consideration. Program staff checks the lender's underwriting and makes sure the loan and business proposal comply with program requirements. All requests are currently reviewed by a credit committee before approval. Approved applications are documented by a loan guarantee certificate and a list of loan guarantee conditions, tailored to the transaction in question. This procedure assures, to the greatest extent possible, the success of the business and repayment of the loan.

The second option is for lenders to execute a Loan Insurance Agreement. Loan insurance is aimed at smaller loans and start-up businesses requiring \$250,000 or less. Approved lenders are allocated a portion of annual program ceiling, and authorized to make program-compliant loans without prior DCI staff review. Like loan guarantees, loan insurance can cover up to 90 percent of outstanding principal and accrued interest on qualified loans. Unlike loan guarantees, loan insurance claims have a statutory cap of 15 percent of that lender's outstanding portfolio of insured loans, so as a practical matter an insured lender must have several insured loans before any of them are covered 90 percent. Also unlike guaranteed loans, insured lenders who suffer a loss must liquidate all loan collateral before submitting an insurance claim; guaranteed lenders have the option of liquidating collateral or not prior to submitting a claim.

Subactivity - Subsidies (FY 2019: \$5,795,000; FTE: 0):

Loan Guarantees: This program directly supports start-up businesses and Indian business efforts to become and remain competitive in an economy that is linked regionally, nationally, and internationally. Since 1992, the Indian Financing Act has facilitated nearly \$1.6 billion in loans to Indian businesses. The current outstanding balance of loans still in repayment status is roughly \$600 million. Apart from a statutory limit of \$500,000 to individual Indians, there is no cap on guaranteed loan amounts under the program, other than the prudent use of ceiling calculated from appropriations. Average loan size in FY 2017 was \$4.77 million, but the diversity of Indian business needs varies widely and guarantees have been issued for less than \$100,000 and more than \$23,000,000.

Needs reflect everything from business start-ups, to business expansion, to renovation required to remain competitive, to restructuring. Many of the loans the program makes possible have a profound impact on a local Indian community's quality of life facilitating cultural museums, services otherwise unavailable to a geographically remote community, well-designed and properly functioning administrative buildings, and similar projects.

40' sightseeing boat for Three Wolves Charters, LLC in Hoonah, Alaska

The program has been in existence for over 40 years, and despite its simple structure and small scale, it has consistently maintained a loss rate lower than other, similar Federal programs. As of November 1 2017, that loss rate (losses net of recoveries since 1992, divided by actual loans guaranteed during the same period) was 2.35 percent.

Loan Insurance: The DCI issues loan insurance primarily for smaller projects, many of them start-ups. Lenders and borrowers benefit from both the cost and speed of this credit enhancement program. Loan insurance premiums are just one percent of the insured loan amount, as opposed to two percent for loan guarantees. Because DCI normally does not have to review the lender's underwriting before insurance becomes effective, borrowers and lenders can proceed rapidly to loan closing, without waiting for government approval. Exceptions occur only when a lender wishes to have loan insurance for one or more loans totaling more than \$250,000, or when a borrower requests interest subsidy, both of which require prior DCI approval.

Loan insurance was offered only nominally during the first 26 years of the program's history. In 2001, the Department re-wrote and published comprehensive regulations, forms and procedures to re-introduce loan insurance, and after a considerable warming trend, it now appears to be gaining widespread acceptance. Over \$5,200,000 in loan insurance has been issued as of September 31, 2017.

Subactivity - Program Management (FY 2019: \$904,000; FTE: 0):

In accordance with the Federal Credit Reform Act of 1990 (2 U.S.C. 661) the program receives appropriations for the administrative costs of the credit portfolio, including those loan guarantees issued prior to FY 1992 for which funds were appropriated under the Indian Loan Guarantee and Insurance Fund. Program administration develops program policies, oversees regulatory compliance, approves program lenders, reviews and takes action on requests for loan guarantees and loan insurance from lenders, addresses loan modification requests, considers claims for loss, and pursues enforced collection action on assigned guaranteed and insured loans after making payment on a claim for loss and being subrogated to the rights of the lender. Program management also includes outreach to and monitoring of new lenders, including CDFIs, occasional site inspections, and speaking at seminars and conferences.

Indian Affairs

Appropriation: Indian Guaranteed Loan Financing Account

Program Description

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from loan guarantees and insured loans committed in 1992 and beyond (including modifications of loan guarantees and insured loans that resulted from commitments in any year). The amounts in this account are a means of financing and are not included in the budget totals.

The budget schedules for this account are located in the Budget Summary Tables section at the front of this report.

DEPARTMENT OF THE INTERIOR

Indian Affairs

Appropriation: Indian Loan Guarantee and Insurance Fund Liquidating Account

Program Description

As required by the Federal Reform Act of 1990, this account records all cash flows to and from the Government resulting from direct loans obligated prior to 1992. This account is shown on a cash basis. All new activity in this program in 1992 and beyond (including modifications of direct loans that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

The budget schedules for this account are located in the Budget Summary Tables section at the front of this report.

DEPARTMENT OF THE INTERIOR

Indian Affairs

Appropriation: Indian Direct Loan Program Account

Program Description

The Indian Direct Loan Program Account ceased making new direct loans at the end of FY 1995. Any subsequent activity in this account is the result of upward subsidy re-estimates required by the Federal Credit Reform Act of 1990 (Pub L. 101-508, Section 504(F)).

The budget schedules for this account are located in the Budget Summary Tables section at the front of this report.

Appropriation: Revolving Fund for Loans Liquidating Account

Program Description

As required by the Federal Reform Act of 1990, this account records all cash flows to and from the Government resulting from direct loans obligated prior to 1992. This account is shown on a cash basis. All new activity in this program in 1992 and beyond (including modifications of direct loans that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

The Federal Credit Reform Act of 1990 (*2 U.S.C. 661*) changed the Revolving Fund for loans to a Liquidating Account for loans made prior to FY 1992. The program collects repayments, interest, and fees from borrowers of pre-1992 direct loans. Receipts from loans made from 1935 to 1991 are deposited into the Revolving Fund and returned to the General Fund of the U.S. Treasury. The liquidating account does not make new loan disbursements.

The budget schedules for this account are located in the Budget Summary Tables section at the front of this report.

Total Requirements <i>Total FTE</i>	530	3,000		3,000	

Subactivity - White Earth Settlement Fund (FY 2019: \$3,000,000; FTE: 0):

The White Earth Reservation Land Settlement Act of 1985 (Pub. L. 99-264) authorizes the payment of funds to eligible allottees or heirs as defined in the Act. The payment of funds shall be treated as the final judgment, award, or compromise settlement under the provisions of Title 31, United States Code, section 1304. From 1990 through 2017, payments were made to 45,836 claimants in the amount of \$79,978,277.45. Compensation is paid for the fair market value as of the date of questionable taking of allotted land, less any compensation actually received, plus compound interest to the date of payments.

The budget schedules for this account are located in the Budget Summary Tables section at the front of this report.

Subactivity - Indian Water Rights and Habitat Acquisition (FY 2019: \$0; FTE: 0):

Funds were requested and appropriated in FY 2003 for the settlement of the water claims of the Shivwits Band of the Paiute Indian Tribe of Utah. Pub.L.106-263 specifies the use of the Land and Water Conservation Fund for the implementation of the water rights and habitat acquisition program. There is a balance of \$3 million remaining from the FY 2003 funding that is contingent on the terms of Section 10 of the Act. It is anticipated that the terms will be met and the \$3 million in carryover will be obligated. No additional funds are being requested in FY 2019.

The budget schedules for this account are located in the Budget Summary Tables section at the front of this report.

<i>FTE</i>					
Total Requirements	110,900	113,810		113,776	-34
<i>Total FTE</i>	294	280		280	

Subactivity – Power Revenues, Indian Irrigation Projects (FY 2019: \$74,736,000; FTE: 94):

The BIA owns three power projects, two in Arizona and one in Montana. The BIA operates and maintains the San Carlos Irrigation and Power Project and the Colorado River Power Project in Arizona. The Confederated Salish and Kootenai Tribes of the Flathead Reservation operate Mission Valley Power in Northwest Montana under a Pub. L. 93-638 contract. The BIA-owned power projects distribute power to approximately 38,000 customers, both on and off the reservations.

These power projects generate revenue through the issuance of bills and associated collections from power consumers and users of the three power projects based on statutory requirements pursuant to section 4 of the Permanent Appropriation Repeal Act (48 Stat. 1227), signed June 26, 1934. Power rates are reviewed annually and published as necessary in the Federal Register when changes are proposed. As authorized by the FY 1984 Appropriations Act (Pub. L. 98-146), collections are invested in interest-bearing securities until needed by a project.

The collected revenues are deposited in the U.S. Treasury for use by the respective projects. BIA administers the revenues to operate, maintain, and rehabilitate power system infrastructure on each project. Infrastructure includes power generating facilities, power substations, electrical switching stations, transmission lines, distribution lines, and other related equipment including deteriorated infrastructures.

Subactivity – Operations and Maintenance, Irrigation Systems (FY 2019: \$37,000,000; FTE: 185):

These receipts are obtained through the annual collection from water users of irrigated lands where assessments are levied pursuant to section 4 of the Permanent Appropriation Repeal Act (48 Stat. 1227), signed June 26, 1934 which allows assessments to be levied on irrigation projects constructed and owned by the United States for delivering service to Indian and non-Indian landowners and water users.

Fifteen of the irrigation projects owned by the BIA charge their water users an annual operations and maintenance fee to fund the cost of operating and maintaining the project and are considered self-supporting. The per acre assessment rate is calculated by estimating the cost of O&M for the project, divided by the acreage. Assessment rates are published annually in the Federal Register notice.

The collected funds are deposited in the U.S. Treasury which BIA administers for operations and maintenance of the respective projects. As authorized by the FY 1984 Appropriations Act (Pub. L. 98-146), collections are invested in interest-bearing securities until required for project operations.

Indian Affairs operates and maintains the irrigation infrastructure to deliver available water during the irrigation season for the authorized users at each project. Infrastructure includes 1) water storage reservoirs, diversion structures, and pumping plants and 2) canals and water control structures.

Subactivity - Alaska Resupply Program (FY 2019: \$2,000,000; FTE: 1):

The Alaska Resupply Program (Pub. L. 77-457, as amended by Pub. L. 102-154) provides a supply of essential life-sustaining commodities, such as heating fuel and gasoline, to remote Alaskan Native villages and IA facilities. The commodities are purchased by the recipients and collected revenues are deposited into a special fund in the Treasury, to be available to carry out the provisions of the Alaska Resupply Program. The program is managed by Indian Affairs' Seattle Support Center in Seattle, Washington.

Subactivity - Claims and Treaty Obligations (FY 2019: \$40,500; FTE: 0):

This appropriation allows annual payments to fulfill continuing treaty requirements as follows:

Treaties with the Seneca Tribe of Indians of New York (\$6,000) - Funds are paid in equal shares to members of the Seneca Nation as provided by the Act of February 19, 1831 (4 Stat. 442).

Treaties with the Six Nations of New York (\$4,500) - The Six Nations are comprised of the Seneca, Tonawanda Band of Seneca, Tuscarora, Onondaga, Oneida, and Cayuga Tribes. The funds are allocated as follows: \$2,700 to the New York Indians for the purchase of dress goods, implements of husbandry, and other utensils suited to their circumstances. The remaining of \$1,800 is distributed per capita to the Oneida Indians under the jurisdiction of the Great Lakes Agency, Wisconsin, as provided by the Treaty of November 11, 1794, and the Act of February 25, 1799 (1 Stat. 618, 619).

Treaties with the Pawnees of Oklahoma (\$30,000) – This money is distributed per capita to the Pawnees as provided by the Treaty of September 24, 1857, Article 2 (11 Stat. 729).

The budget schedules for this account are located in the Budget Summary Tables section at the front of this report.

Operation and Maintenance of Quarters					
<i>(Dollars in thousands)</i>					
Activity	2017 Enacted	2018 CR	2019		Net Change from 2018 CR
			Program Changes (+/-)	Budget Request	
Operation and Maintenance of Quarters	5,775	5,720		5,642	-78
<i>FTE</i>	40	43		43	
Total Requirements	5,775	5,720		5,642	-78
<i>Total FTE</i>	40	43		43	

Subactivity - Operation and Maintenance of Quarters (FY 2019: \$5,642,000; FTE: 43):

The Federal Employees Quarters Facilities Act (Pub. L. 98-473, as amended (5 U.S.C. 5911)), authorizes Federal agencies to provide housing and related conveniences to their employees when conditions of employment or availability of housing warrant such action. The law requires collection of rent and charges for related conveniences made available in connection with the occupancy of the housing unit. Funds collected are deposited into an account in the Treasury and made available to the Indian Affairs' Operation and Maintenance (O&M) of Quarters program through annual appropriations. These funds are distributed to the servicing quarter's management program and expended for daily O&M activities at the location where the monies were collected.

The O&M Quarters program oversees management of over 3,000 housing units leased to IA employees, including single family houses, duplexes, triplexes, apartments, mobile homes, and trailer spaces. Rental rates for government-owned housing are determined through the Internet Quarters Management Information System (iQMIS), a centralized, web-based database and management tool. Rental rates take into consideration such factors as remoteness, age, and physical conditions of the quarters. The iQMIS interface with the Financial Business Management System (FBMS) created transparency coupled with improved audits, reconciliation, tracking, and distribution of funds. This provides real time data for management and reporting.

Quarters operation activities and costs include administrative services, utility system services/expenses, refuse disposal, fire protection, maintenance vehicle costs, communications costs and pest control. Maintenance and repair activities and costs include routine preventive, routine cyclical and unscheduled (emergency) work for quarters units and related structures (i.e., detached quarters garages), equipment and utility system repairs.

The Office of Facilities Management and Construction (OFMC) provide management oversight for the O&M of quarters and maintain the national iQMIS database. Regions and agencies provide oversight at the local levels.

In FY 2019, the Operations and Maintenance of Quarters program will continue to address and provide oversight management; coordinate/process complaints, evictions and appeals; on-site compliance reviews; housing requirements analysis; routine preventive maintenance and unscheduled maintenance including

emergency repairs and improvement projects through established work ticket processes; and complete iQMIS and FMMS inventory updates. In accordance with OMB Circular A-45, as amended, the program will implement new survey rents and Consumer Price Index (CPI) adjustments to rental rates for all IA quarters nation-wide. IA will continue to implement the master housing plan to eliminate unneeded units and prioritize repair/renovation and replacement of existing housing units, targeting those in poor condition. The program will prorate costs associated with the iQMIS program services provided by the iQMIS Program Office, Interior Business Center, Department of the Interior.

The budget schedules for this account are located in the Budget Summary Tables section at the front of this report.

Gifts and Donations					
<i>Dollars in thousands)</i>					
Activity	2017 Enacted	2018 CR	2019		Net Change from 2018 CR
			Program Changes (+/-)	Budget Request	
Gifts and Donations <i>FTE</i>	74	100		100	
Total Requirements <i>Total FTE</i>	74	100		100	

Subactivity - Gifts and Donations (FY 2019: \$1,000,000; FTE: 0):

The Secretary of the Interior may accept donations of funds or other property and may use the donated property in accordance with the terms of the donation in furtherance of any programs authorized by other provision of law for the benefit of Indians (25 U.S.C. 451).

The budget schedules for this account are located in the Budget Summary Tables section at the front of this report.

Distribution of ISEP Funds for School Year 2017-2018

The distribution of Indian School Equalization Program (ISEP) Funds for School Year 2017-2018 reflects distribution of the ISEP funding to each school for the most recent school year. Allocation to individual schools is determined by formula and funds are available to the schools in July for the forthcoming school year. As allowed by law, a portion of the total funding is withheld from the initial distribution as a reserve to cover any ISEP appeals or school emergencies. All funds remaining after resolution of appeals and emergency distributions are subsequently distributed to the schools using the distribution formula. A detailed report of the distribution of the reserved (contingency) funds is contained in Appendix 2.8.

Distribution of ISEP Funds for School Year 2017-2018

Note:

* The BIE is required to pay tuition to Sevier Public Schools for out of State students residing at Richfield Dormitory. It is not considered part of the BIE school system.

** Due to funds held in reserve pending resolution of ISEP appeals, and for emergencies, the total funding reflected above will not balance to the total funds available. Any funds remaining after resolution of appeals will be issued to schools per the ISEP Distribution formula.

Distribution of FY 2016-2017 ISEP Contingency Funds

The distribution of FY 2016-2017 Indian School Equalization Program (ISEP) Contingency Funds, reflects final distribution of the prior school years' ISEP funds held in reserve to cover any ISEP count appeals or school emergencies. Additionally, the appendix identifies the amount, recipient, and reason for every emergency distribution. The remaining balance of the reserved funds were distributed to the schools as determined by the ISEP formula.

187	St. Stephens Indian School	WY	192.34	302.19	16,950	Distribution per ISEP formula.
	TOTAL		41,026.78	71,489.88	4,518,500	

* The amount of distributions is not the same as the school count, because some schools received multiple distributions (see purpose on each line) and BIE funds the eight Choctaw Schools with one line of accounting instead of eight lines.

** The BIE is required to pay tuition to Sevier Public Schools for out of State students who reside at Richfield Dormitory.

Distribution of FY 2017-2018 Transportation Funds

The distribution of Student Transportation Funds for School Year 2017-2018 reflects distribution of transportation funding to each school for the most recent school year. Allocations to individual schools is based on the number of miles traveled by school vehicles transporting students to/from school and the estimated commercial costs of transporting boarding students. Commercial cost estimates are based on the most recent actual costs.

Distribution of FACE funds for School Year 2017-2018

Distribution of Early Childhood Development funds to the 47 schools that participate in the Family and Child Education (FACE) program for preschool American Indian children and their families. The program addresses the achievement gap for Indian children primarily located on rural reservations by teaching the skills needed to begin school successfully.

1. The child count is from School Year 2016-2017. The final count for School Year 2017-2018 will not be available until June, 2018.
2. Current School Year 2017-2018 dollar amounts include base of \$297,300 plus \$8,300 for language enrichment activities.
3. Four schools received additional funds for hosting training sessions.
4. Kha'p'o Community School and Nazlini Community School were new FACE sites in SY 2016-2017.
5. Hanaa'dli Community School and Sky City Community School were new FACE sites in SY 2017-2018 and received funds for the base, language enrichment activities, and \$17,000 in startup funds.
6. Kin Dah Lichi'l' Olta' Inc dropped the FACE program in SY 2016-2017, returned as a FACE site in SY 2017-2018 and operated with their unobligated prior year funds.

Distribution of Safe and Secure Funds for School Year 2017-2018

ISEP Program Adjustments funding was provided in FY 2017 to school programs that were identified as having high safety and security issues. Through training, technical assistance and identification of the safety and security needs, schools began to implement changes that were identified on their campuses. These schools utilize the funds provided to advance a safe learning environment for both students and staff. Funds were provided to support police and security services at off-reservation boarding schools with unique at risk student populations and proximity to urban centers.

Self Governance Compact Participation

Self-Governance Compacts Participation

Participation	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019
Number of annual and multi-year self governance funding agreements	96	98	101	103	106	111	114	115	116	121	125 (Est.)
Number of Tribes covered under annual and multi-year self-governance funding agreements 1/	236	246	249	251	254	259	262	263	264	269	273 (Est.)
Obligations (\$000) awarded under annual and multi-year self governance funding agreements 2/	416,122	419,372	436,083	410,734	402,159	442,196	453,220	472,414	472,794 (YTD)	519,076 (Est.)	550,184 (Est.)

1/ The number of annual and multi-year funding agreements differ from the number of participating tribes since consortia of tribes, specifically in the State of Alaska, have one agreement that serves numerous tribes. The number of tribes may vary during a given year and from one year to the next depending upon tribal decisions to be included in or removed from consortia agreements.

2/ Included in self-governance funding agreements are funds from other Federal programs allocated or awarded to self-governance tribes such as funds from the Department of Transportation/Federal Highway Administration/Tribal Transportation Program, Bureau of Land Management, the Department of Labor, and the Department of Health and Human Services under the Employment, Training, and Related Services Demonstration Act (Pub. L. 102-477).

Section 403 Compliance

Compliance with Section 403

Section 403 of Public Law 115-34, Consolidated Appropriations Act 2017, includes a requirement for disclosure of program assessments used to support Government-wide, departmental, or agency initiatives or general operations. The general provision states:

SEC. 403. The amount and basis of estimated overhead charges, deductions, reserves or holdbacks, including working capital fund and cost pool charges, from programs, projects, activities, and subactivities to support government-wide, departmental, agency, or bureau administrative functions or headquarters, regional, or central operations shall be presented in annual budget justifications and subject to approval by the Committees on Appropriations of the House of Representatives and the Senate. Changes to such estimates shall be presented to the Committee on Appropriations for approval.

Burden Rate on Reimbursable Contract and Agreements

The Office of Management and Budget (OMB) Circular A-25 and the Statement of Federal Financial Accounting Standards (SFFAS) No. 4 require Federal agencies to assess a burden rate (user charge) on reimbursable contracts and agreements, where agencies act in the capacity of a service provider. Beginning in FY 2007, Indian Affairs initiated the inclusion of a burden rate to be applied to all new reimbursable agreements initiated in FY 2007 and thereafter. The rate for each new fiscal year is re-calculated and re-issued prior to the start of the new fiscal year.

Agreements requiring application of a burden assessment rate include all reimbursable agreements, with certain exceptions, between Indian Affairs and other Federal agencies, state, and local governments, the public, and other Department of the Interior agencies. Exceptions to the policy include reimbursable agreements that result in compacts, contracts, and grants awarded pursuant to 25 USC 5301 et seq. (Public Law 93-638 the Indian Self Determination and Education Assistance Act), and reimbursable agreements received under the authority of 25 U.S.C. 318a (P.L 70-520 The Federal Highway Act), as amended by 23 U.S.C. 202 (P.L. 112-141 Moving Ahead for Progress in the 21st Century Act and P.L.114-94 Fixing America's Surface Transportation Act of 2015). In addition, the burden rate does not apply to authority received from the Department of Education for programs operated through the Bureau of Indian Education (BIE) and to grants awarded to BIE by other Federal agencies or state institutions to support BIE programs, and funds received by BIE from state agencies for the administration of the Food Services Program. All funds received from a tribal government are also exempt from the burden assessment.

Furthermore, the burden rate does not apply to Intra-agency/Inter-agency Personnel Agreements established to detail an Indian Affairs (IA) employee to another Federal, state, local or tribal government, nor does it apply to emergency supplemental agreements and Wildfire Management-Fire Suppression reimbursements. Finally, construction agreements for the benefit of a tribe/school, cost shared administrative support agreements, travel expenses or award payments to an IA employee are exempt from the burden rate assessment as well as TAAMS related efforts, i.e., trainings, program enhancements, program support.

Program Assessments

In FY 2019, Indian Affairs may assess no more than 1.5 percent to programs within the Operation of Indian Programs account for certain administrative costs that support emergent, unfunded government-wide, departmental, and Indian Affairs efforts performed at regional or central offices such as direct lease shortfalls, union representation/labor relations, ethics program support, and common use charges.

Department of the Interior Working Capital Fund charges and deductions

The following table summarizes data for collections paid to the Department under the Working Capital Fund (WCF) centralized and direct billings.

**WORKING CAPITAL FUND BILLING
FY 2019 President's Budget
BUREAU OF INDIAN AFFAIRS
(\$ in thousands)**

Activity	2018			2019 Estimate		
	Central	Direct	TOTAL	Central	Direct	TOTAL
OS Shared Services	2,746.2	45.3	2,791.5	2,742.8	45.5	2,788.3
