Disclaimer:

The Bureau of Indian Affairs (BIA) attempts to use the most current and complete geospatial data available. Geospatial data are not intended to be legal documents, and their use is at the risk of the user. The BIA does not guarantee the accuracy, reliability, or completeness of the data. Data are protected by copyright and other intellectual property laws. The BIA reserves the right to modify geospatial inputs to these data. The BIA gives no warranty, expressed or implied, as to the accuracy, reliability, or completeness of the data. No warranty expressed or implied is made regarding the utility of the maps and data for general or scientific purposes, nor shall the act of providing access to the maps or data constitute any such warranty.

Land and fire management conditions as of the date of publication. Using these maps or data for other than their intended purposes may yield inaccurate or misleading results. The BIA reserves the right to correct, update or modify geospatial inputs to these data in some way. No warranty expressed or implied is made regarding the utility of the maps and data for general or scientific purposes, nor shall the act of providing access to the maps or data constitute any such warranty. This disclaimer applies both to individual use of the maps and data and their aggregate use with other data. Utilization data in some way. No warranty expressed or implied is made regarding the utility of the maps and data for general or scientific purposes, nor shall the act of providing access to the maps or data constitute any such warranty.

The Wildland Fire Decision Support System (WFDSS) will be used to determine values, probabilities, hazards, and risk for all fires exceeding initial response. In addition, all wildland fire events will be entered into WFDSS. The following DOI Agency Administrator Approval Requirements must be adhered to.
