2005

American Indian Population and Labor Force Report

Purpose

Public Law 102-477, the Indian Employment, Training, and Related Services Demonstration Act of 1992, mandates that the Bureau of Indian Affairs (BIA) publish, not less than biennially, a report on the American Indian and Alaska Native population who are eligible for services provided by the Secretary of the Interior to American Indian and Alaska Native people.

This report provides 2005 calendar year data on tribal enrollment, service population, and labor force information for the Nation's 561 federally recognized Indian tribes. All the data provided in this publication was determined by representatives of each tribe and certified as accurate by their tribal leader or designee. In addition to the 561 federally recognized Indian tribes, this report includes several corporate and "at-large" Alaska tribal entities that were formed as a result of the Alaska Native Claims Settlement Act of 1971.

Of the federally recognized Indian tribes, 73 percent provided revised data for this report. Many of the tribes that did not provide updated population and labor force information identified the lack of staffing and other resources as the primary reason for not responding.

Report Organization

The American Indian Population and Labor Force Report is organized into seven sections:

1. Report Summary
2. National Totals by State
3. National Totals by Region
4. Regional and Self-Governance Totals by Tribe
5. Alphabetical List by Tribe
6. Report Participation

For tribes with reservation boundaries and service populations located in more than one state, the tribe's labor market totals were proportionately distributed, by tribal population, for each state. The total for the State of Alaska does not equal the total for the Alaska Region, because about half of the Alaska tribes are in the Self-Governance section of the "Regional and Self-Governance Totals by Tribe."

Alphabetical Table	27
Report Participation Table	40

The initials “NR” in any table cell signify that datum was not provided by the tribe, “UC” indicates that some data needed to make certain calculations were not provided, and “NI” means these data were provided but not included in the table because doing so would have resulted in an under-/overestimate of the unemployment rate. Some tribes were listed under another name in prior reports. For these tribes, the name used in a prior report is provided in parenthesis.

Where a tribe did not report 2005 data, its most current data were used instead. For these tribes, the reporting year of the data used is indicated at the bottom of the table.

Report Summary

Overall

In terms of the Indian reservation population, there was a 9 percent increase in the total service population between 2003 and 2005. In addition, there was a 19 percent increase in the number of individuals age 65 and over. There was also an 11 percent increase in the total number employed. Private sector employment increased 14 percent whereas public sector employment increased by 8 percent. Much of this change occurred in Self-Governance tribes.

Various factors contributed to the Self-Governance increase, such as revised methodologies used by Self-Governance tribes and additional tribes included in the Self-Governance section of the report, as well as eligible Indians who came to reside in a Self-Governance tribe's service area to benefit from increased opportunities.

Tribal Enrollment

The total 2005 Tribal Enrollment of 1,978,099 represents an increase of 54,449 enrolled members or about 3 percent over the 1,923,650 enrollment reported in 2003.

The total 2005 Tribal Enrollment represents an increase of 549,829 or 38 percent over the 1,428,270 total Tribal Enrollment reported in 1995, the first year Tribal Enrollment information was collected and published in a biennial labor force report.

The 2005 increase in enrollment is attributed to updated tribal rolls, improved record keeping procedures, and revisions to tribal enrollment criteria.

Service Population

The total 2005 Service Population of 1,731,178 represents an increase of 143,659 Indian residents or 9 percent over the 1,587,519 reported in the 2003 Labor Force Report.

The total 2005 Service Population represents an increase of 470,972 or 37 percent over the 1,260,206 total Service Population reported in 1995, and an increase of 996,283 or 136 percent over the total Service Population of 734,895 reported in 1982 (the earliest year for which historical data is available).

The 2005 increase in Service Population is attributed to increased record-keeping and improved data collection methods, as well as eligible Indian individuals and families who came to reside in a tribe's service area to benefit from opportunities and services unavailable to them in off-reservation communities. The trend, wherein enrolled Indians returned to reside on or near a reservation, continued in 2005.

Employment

Unemployment, as a percent of the available labor force, did not change between 2003 and 2005, remaining at 49 percent.

The total 2005 workforce (i.e., those available for work) of 872,483 increased by 71,955 individuals, a 9 percent increase over the total workforce of 800,528 reported in 2003. The total 2005 workforce increase is, in part, attributable to the increase of 84,771 reservation residents in the Service Population who were age 16 to 64, as well as the increase in the number of Indians who were available for work.

Between 2003 and 2005, private sector employment increased by 14 percent or 24,439 (from 178,692 in 2003 to 203,131 in 2005). During the same time period, public sector employment increased by 8 percent or 18,195 (from 227,131 in 2003 to 245,326 in 2005). Hence, the total number of employed Indians increased by 11 percent (from 405,823 to 450,511) over the two-year period.

In 2005, Indian individuals employed but earning wages below the poverty level increased by 494 or less than 1 percent between 2003 (131,728) and 2005 (132,222). Even so, the percentage of those employed below the poverty guidelines decreased from 32 percent in 2003 to 29 percent in 2005.

Since the total number of employed Indians increased by 11 percent, from 2003 to 2005, and the number of Indians who were employed under the poverty guidelines increased by less than 1 percent in the same two-year period, this yielded a slight net decrease (3 percent) in the proportion of the Indian reservation population who were employed below the poverty guideline.

Report Coverage

Each tribe that responded designated a tribal labor force coordinator who used a standardized survey reporting form to collect data and provide estimates on their enrolled members and members from other tribes who lived “on-or-near” the reservation and who were eligible to use the tribe’s BIA-funded services. The aggregated total of those eligible to use the services constituted the tribe’s Indian “Service Population.” Excluded from each tribe’s 2005 Service Population total and other report totals were members who, for example, were serving in the Armed Forces or attending post-secondary institutions and not residing on tribal lands. Members were also excluded from the tribe’s Service Population if they had relocated for purposes of direct employment or were incarcerated or confined to a long-term treatment facility.

The data within the Regional section of this Report are provided by Tribe, by BIA Agency, and by BIA Region. The Navajo Nation is listed by BIA Agency under the BIA Navajo Region. Alaska Native entities are listed individually or grouped by consortium.

Definitions Used for the Report (from 25 CFR § 20.1)

Indian means any person who is a member of a federally recognized Indian tribe. Some tribes have enrollment criteria that allows their members to have a blood quantum less than the one-fourth specified in 25 CFR § 20.1.

Indian Tribes are tribes, bands, nations, rancherias, pueblos, colonies, communities, and Alaska Native groups recognized as eligible for funding and services from the BIA and included in the current list of tribal entities, pursuant to Section 104 of the Act of November 2, 1994 (Pub. L. 103-454; 108 Stat. 4791). The list was last published in the Federal Register on November 25, 2005.

Near Reservation means those areas or communities adjacent or contiguous to a reservation, which are designated by the Assistant Secretary upon recommendation of the local BIA Superintendent. The recommendation is based upon consultation with the tribal governing body of those reservations on the basis of such general criteria as:

- ▶ Number of Indian people native to the reservation residing in the area;
- ▶ A written designation by the tribal governing body that members of their tribe and family members who are Indians and residing in the area are socially, culturally, and economically affiliated with the tribe and the reservation;
- ▶ Geographic proximity of the area to the reservation; and
- ▶ Administrative feasibility of providing an adequate level of service.

For Alaska, the term includes the entire State, since Alaska Native tribes are typically isolated from each other and are not formed as reservations, except for the Metlakatla Indian Community on the Annette Island Reserve in southeast Alaska.

On Reservation means American Indians who live within present reservation boundaries and who are eligible for BIA-funded services.

Resident Indian means American Indians living on or near Federal reservations who are considered part of the tribe's service population.

Report Headings/Terms

Tribal Enrollment is the total number of tribal enrollees who are certified as being tribal members by their tribe's leader or designate. Pursuant to tribal governing documents, tribal enrollees may live on-reservation or anywhere outside the reservation – for example, in distant towns, cities, or foreign countries.

Total Service Population is the tribe's estimate of all American Indians and Alaska Natives, members and non-members, who are living on or near the tribe's reservation during the 2005 calendar year and who are eligible to use BIA-funded services. The aggregated sum of those reported as "Age Under 16", "Age 16-64", and "Age 65 and Over" sub-totals of a given tribe equals the tribe's "Total Service Population". Typically, Indians included in a tribe's Service Population live within a reasonable distance of the reservation from where they can access the tribe's services. Such Indians typically do not live in distant cities, towns, or foreign countries.

Not Available for Work is the total estimated number of individuals who were age 16 and over and who were included in a tribe's Service Population, but because of personal circumstances were unable to assume or sustain gainful employment.

Available for Work represents the tribe's 2005 "Total Work Force" and is the sum of the "Age 16-64" and "Age 65 and Over" sub-totals minus the number of individuals who were "Not Available for Work".

Number Employed is determined by aggregating the tribe's estimated subtotals of the number of individuals in its Service Population who were employed by either public, private, or tribal entities.

Number Not Employed is determined by subtracting the "Number Employed" from the tribe's number of individuals in the tribe who were "Available for Work".

Unemployed as a percent of the Labor Force is determined by dividing the "Number Not Employed" by the "Total Workforce" (also called the "Available for Work" total).

Employed, but Below Poverty Guidelines is determined by using the U.S. Department of Health and Human Services (DHHS) 2005 Poverty Guidelines. The tribe estimated the number of its employed workforce whose annual earned income was below the poverty guidelines. For example, for a family of two the poverty threshold of combined earned income was \$12,830 and for a family of four the poverty threshold of combined earned income was \$19,350 (for Alaska, \$16,030 and \$24,190, respectively). Additionally, the report tables show the percent of those employed below the "Poverty Guideline." This percent is derived by dividing the tribe's estimated total number of "Employed, but Below Poverty Guidelines" by the "Number Employed".

Description of Report Tables

State

This table provides information, by state, on the number of Indians who reside on or near a reservation in that state.

Regional

This series of tables provides information on those tribes which were under each BIA Region. In addition, a Self-Governance Table provides information on self-governing tribes.

Alphabetical

This table provides a quick reference tool to locate a specific tribe.

Report Participation

This table provides information on how current and complete the data are for this report. The data included in the 2005 biennial report are reasonably current in that 73 percent of the reporting entities submitted data for the 2005 reporting period and an additional 18 percent submitted data in 2003. Therefore, 91 percent of the data in the report are no older than the previous reporting period (2003). This report participation analysis was not preformed in prior reporting periods.

Additional Information

Any questions regarding a specific tribe's labor market information can be directed to the tribe's BIA Agency, Field Office, or Regional Office. The current BIA Tribal Leaders Directory, with contact information for BIA Regional and Agency offices and the federally recognized tribes, can be accessed at www.doi.gov/leaders.pdf. This report can be accessed at www.doi.gov/triballaborforce2005.pdf.

Note to Readers

The process for collecting data included in the *American Indian Population and Labor Force Report* has remained unchanged since 1999. Tribes are provided written instructions and technical assistance, if requested, to report the data. Data is certified by the tribe. In most cases, BIA reports data as reported by the tribes. An analysis of the data provided in this report, however, reveals problems in the population data reported by the tribes. Users of this report should also be aware that the unemployment data detailed in the report is calculated pursuant to the law that requires the report and that this definition of employment is not the same as that used by the Federal Bureau of Labor Statistics.

Population Data includes "Tribal Enrollment" and the "Total Eligible for Services" data reported by Tribes. Tribes are instructed to report "Tribal Enrollment" as well as the "Total [number of individuals] Eligible for Services" within the tribal domain. The distinction is made because services provided through BIA funding are only available to tribal members living on or near the reservation. The numbers differ because not all enrolled members live on or near the tribal reservation (because they are serving in the armed forces or attending colleges or live in another part of the country, for example.) Conversely, in many cases members of one tribe may live on or near another tribe's reservation (because of marriage, for example). These individuals are eligible for services provided through BIA funding from the tribe on whose reservation they live on or near.

A review of the reported population data indicates that many tribes do not report these numbers as instructed. For example, there are many cases where "Tribal Enrollment" and the "Total Eligible for Services" are identical, which while possible, is not probable, especially to the extent reported in this document. BIA believes that many of the reporting issues may be the result of misunderstandings of how to fill out the data submission form. To address this problem, as part of the 2007 data collection, the BIA will re-examine its data collection process and train the tribes on how to fill out the submission forms so that future Labor Force Reports reflect a truer depiction of Tribal enrollment and BIA service population in Indian Country.

Unemployment Data is calculated consistent with the methodology included in the Indian Employment, Training and Related Services Demonstration Act of 1992 (P. L. 102-477), which differs from the methodology used by the Federal Bureau of Labor Statistics. The BLS unemployment rates includes adults who do not have a job, are currently available for work, and who have actively looked for work in the last 4 weeks. The BIA definition includes the BLS definition plus those who would like a job but who are no longer actively looking for work. The difference in calculations generally leads to the Tribes reporting significantly higher unemployment rates than those reported by BLS for counties and states in proximity to the reservations.

2005 State Table										SERVICE POPULATION: ON-OR-NEAR RESERVATION & ALASKA

The number of reporting entities for this table differs from the number of reporting entities for the overall report. For the overall report, the Navajo Nation is subdivided into 9 reporting entities. For this table, the Navajo Nation is divided into three entities since the Navajo Reservation is contained within portions of three states (AZ, NM, and UT). There are other reservations that cross state borders. In each instance, a tribe is counted once for each state that contains a portion of its reservation.

NR = Not reported

* Total is greater than the number of Federally recognized tribes, primarily due to the inclusion of several corporate and "at-large" Alaska tribal entities that were formed as a result of the Alaska Native Claims and Settlement Act of 1971. The service population is reported by tribe and state of residence.
 ** One tribe in the Southwest Region reported aggregate number employed without reporting number employed in the public and private sector columns do not sum to the total employed column for this region and nationally.
 *** The Delaware Tribe of Oklahoma was dropped from the list of Federally recognized tribes in 2005. The group's data are included in the totals for the Cherokee Nation of Oklahoma.

See Self-Governance Section for Ak-Chin Indian Community, Duck Valley Shoshone-Paiute Tribe, Duckwater Shoshone Tribe, Ely Shoshone Tribe, Gila River Indian Community, and Salt River-Pima-Mariacopa Indian Community.

2003 data were used for the Cocopah Tribe, Havasupai Tribe, Quechan Tribe of Fort Yuma, Summit Lake Paiute Tribe, and White Mountain Apache Tribe.

2001 data were used for the To-Modak Tribe (Baute Mountain, Eiko Colony, South Fork and Wells Colony) and Washoe Tribe.

1999 data were used for the Paiute-Shoshone Tribe of the Fallon Reservation.

1997 data were used for the Skull Valley Band of Goshute Indians, Ute Indian Tribe of the Uintah and Ouray Reservation, and Winnemucca Indian Colony.

NI - Not included (due to other needed information that was not reported that is used to calculate the unemployment rate, including this information in the table would result in an inaccurate unemployment rate for the region and nationally).
