Indian Service Population and Labor Force Estimates

U. S. Department of the Interior

Bureau of Indian Affairs

Purpose

The purpose of this report is to provide estimates of the service population of the Bureau of Indian Affairs (BIA) and the population's labor force status in calendar year 1995. This report supplies estimated information related to the labor force itself. It does not provide other combinations of data or conclusions other than those represented on these pages.

Definitions and Coverage

The total Indian population of the United States, as reported in the 1990 United States census, was 1,937,391. The population estimate of the U. S. Census Bureau is based on self-reporting and includes American Indians, Eskimos and Aleuts who reside on or adjacent to reservations or off reservations in urban areas.

The data contained in this report provide the labor force status of the 1,260,206 Indians residing on or adjacent to Indian reservations governed by Federally recognized tribes. The data contained in this report are confined to the population and the labor force status of persons who are members of Indian tribes or who are one fourth degree or more of blood quantum descendants of a member of any tribe, band, nation, rancheria, colony, pueblo, or community, including Alaska Native villages or regional village corporations defined in or established pursuant to the Alaska Native Claims Settlement Act. Therefore, this report does not provide the labor force status of Indians who reside in urban areas or rural areas not adjacent to reservations or who are not members of an Indian tribe or at least one-fourth blood quantum descendants.

The "BIA Total" which appears in column (1) basically includes: "... all Indians living on or near reservations." By contrast, tribal enrollment reflects the: "... total membership count as maintained by the individual tribes according to their specific rules of membership." Tribal members may not necessarily be living on or adjacent to the reservation.

Study Methodology

Local BIA agencies collected data from tribes, household surveys, school records, employment records, tribal election statistics, tribal membership rolls, BIA program service records, and other sources. Accuracy of information varies due to the size of the geographic areas covered, isolation of many communities, and differing levels of cooperation among respondents. In the majority of cases, data are estimated and not representative of an actual count. In all instances, data have been exhaustively checked and has been reviewed by the applicable Area Director and certified as to accuracy and appropriateness for publication. Any discrepancies will be covered in an errata list if such should be necessary. In those cases where no new data were obtained, 1993 or 1991 data are used, as reported in the 1993 publication of this report, and are identified by footnote. Although there is no specific data for the three Creek towns, this material is contained in the information for the Muskogee Creek Nation under the Okmulgee Agency. The United Keetoowah and Delaware data is contained in the material for the Cherokee Nation under the Tahlequah Agency.

Labor Force Report Format

The population and labor force data are shown in considerable detail in the accompanying table and are identified by tribe, state, and servicing BIA organizational elements, i.e., area offices, agencies, and other components.

Summary

The "potential labor force" (column 7) is comprised of all individuals 16 years or older, excluding those who are either students or otherwise unable to work. Thus, the total potential work force was comprised of 616,182 individuals in 1995. This is an increase in the total potential labor force of 66,438 or 12 percent since 1993 when this report was last published (please note certain 1993 data have been perfected). Of the total potential labor force, 49 percent of persons were unemployed in 1995 compared to 46 percent in 1993. The total potential labor force unemployment rate increased 3 percentage points in the two year period.

Of the 301,422 persons unemployed (column 9) 169,685 are seeking work (column 13). Those 131,737 persons not seeking work include persons who have been discouraged from seeking work; those who have no available work opportunities in the immediate area; or, have no means of transportation to seek work elsewhere. These individuals are omitted from the standard BLS definitions of labor force and unemployed.

Therefore, in accordance with BLS definitions, the "labor force" (column 11) consists of persons employed or persons seeking work. The total labor force is 483,133, an increase of 19,140 over 1993, or 4 percent. Of the total labor force, 35 percent of persons were unemployed and seeking work in 1995, compared to 37 percent in 1993. The labor force unemployment rate decreased over the two year period despite the growth in the labor force because employment increased by approximately 6 percent.

In 1995, only 29 percent of persons employed between the ages of 16 and 64 earned \$9,048 or more (column 16). In 1993, only 27 percent of persons aged 16 through 64 earned \$7,000 or more.
