MEMORANDUM

TO: Superintendent, Fort Berthold Agency

FROM: Acting Regional Director, Great Plains Region *Marilyn Bercier*

SUBJECT: Supplemental to Environmental Assessment

A Categorical Exclusion has been completed in compliance with the regulations of the National Environmental Policy Act (NEPA) of 1969, as amended. The proposed Supplemental Categorical Exclusion is for information tiering off of an existing Environmental Assessment for EOG Resources, Inc. and authorizes two additional wells on the West Clark 1-2413H well pad on the Fort Berthold Reservation. No new surface disturbances will be associated with the proposed action.

All the necessary requirements of the National Environmental Policy Act have been completed. Attached for your files is a copy of the Categorical Exclusion.

If you have any questions, please call Marilyn Bercier, Regional Environmental Scientist, Division of Environment, Safety and Cultural Resources Management, at (605) 226-7656.

EXCEPTION CHECKLIST FOR BIA CATEGORICAL EXCLUSIONS

Project: Supplement to Environmental Assessment to Authorize Additional Wells and Expanded Rights-of-Ways on the Approved West Clark 1-2413H

Date: November 7, 2011

Nature of Proposed Action: Is to authorize EOG Resources, Inc. (EOG) to add two wells to the previously approved well pad without any additional disturbances. There will be no additional surface disturbance to the well pad or access road as the result of drilling two additional wells from previous approved location. This document is tied to an Environmental Assessment: EOG Resources, Inc. Clarks Creek EA for Eleven Development Oils Wells. (January 2011)

Exclusion category and number: 516 DM 10.5 F (1)

Evaluation of Exceptions to use of Categorical Exclusion:

1. This action would have significant adverse effects on public health or safety. No X Yes _____
2. This action would have an adverse effect on unique geographical features, such as wetlands, wild or scenic rivers, refuges, floodplains, rivers placed on nationwide river inventory, or prime or unique farmlands. No X Yes _____
3. The action will have highly controversial environmental effects. No X Yes _____
4. The action will have highly uncertain environmental effects or involve unique or unknown environmental risks. No X Yes _____
5. This action will establish a precedent for future actions. No X Yes _____
6. This action is related to other actions with individually insignificant, but cumulatively significant environmental effects. No X Yes _____
7. This action will affect properties listed or eligible for listing in the National Register of Historic Places. No X Yes _____
8. This action will affect a species listed, or

proposed to be listed as endangered or threatened.

No X Yes _____

9. This action threatens to violate federal, state, local or tribal law or requirements imposed for protection of the environment.

No X Yes _____

10. This action will have a disproportionately high and adverse effect on low income or minority populations.

No X Yes _____

11. This action will limit access to, and ceremonial use of Indian sacred sites on federal lands by Indian religious practitioners, or significantly adversely affect the physical integrity of such sacred sites.

No X Yes _____

12. This action will contribute to the introduction, continued existence, or spread of noxious weeds or non-native invasive species known to occur in the area, or may promote the introduction, growth, or expansion of the range of such species.

No X Yes _____

A "yes" to any of the above exceptions will require that an EA be prepared.

NEPA Action - - - CE X EA _____

Appendix

A Drawings, and Diagrams for the West Clark 5-2425H & 102-2413H Well Pad Location

1. Purpose and Need for the Proposed Action

EOG Resources, Inc. (EOG) is proposing to drill a Middle Bakken Formation oil and gas well on the Fort Berthold Indian Reservation to evaluate and possibly develop the commercial potential of natural resources. Developments have been proposed on land held in trust by the United States in McKenzie County, North Dakota. The Bureau of Indian Affairs (BIA) is the surface management agency for potentially affected tribal lands and individual allotments. The BIA also holds title to subsurface mineral rights. The economic development of available resources and associated BIA actions are consistent with BIA's general mission. Leasing and development of mineral resources offers substantial economic benefits to the Three Affiliated Tribes of the Mandan, Hidatsa, and Arikara Nation and to individual tribal members.

The purpose of the proposed action is to authorize EOG to drill two additional wells (West Clark 5-2425H & West Clark 102-2413H) to explore the potential of the Middle Bakken Formation, on the approved West Clark 1-2413H well pad.

2. Authorities

Oil and gas exploration and development activities are conducted under authority of the Indian Mineral Leasing Act of 1938 (25 United States Code [USC] 396a, et seq.), the Indian Mineral Development Act of 1982 (25 USC 2101, et seq.), and the Energy Policy Act of 2005 (42 USC 15801, et seq.).

3. Legal Land Description for Proposed Action

The well pad is located 17.0 miles north of Mandaree, North Dakota, in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 24, Township 151 North, Range 95 West, McKenzie County, North Dakota (Figure 1). The proposed West Clark 5-2425H well will have a bottom hole located approximately 8,840 feet south and 300 feet east of the surface location, in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 25, Township 151 North, Range 95 West, McKenzie County. The proposed West Clark 102-2413H well will have a bottom hole located approximately 6,600 feet north and 360 feet west of the surface location, in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 13, Township 151 North, Range 95 West, McKenzie County.

4. Scope of Work for Proposed Action

EOG proposes to drill two additional wells, which will enter the Middle Bakken Formation, on the approved West Clark 1-2413H well pad. There will be no additional surface disturbance to the existing well pad or access road. The existing well pad currently contains six well bores and no additional disturbance is required for the placement of the two proposed well bores.

5. Resource Surveys

SWCA Environmental Consultants (SWCA) conducted a cultural resource inventory of this well pad and associated access road using an intensive pedestrian methodology. Approximately 73.89 acres were inventoried for the well pad and access road on September

10, 2010 (Eisenhauer 2010¹). No historic properties were located that appear to possess the quality of integrity and meet at least one of the criteria (Title 36 Code of Federal Regulations 60.6) for inclusion on the National Register.

SWCA conducted natural resource surveys for threatened and endangered species, migratory birds, bald and golden eagles, and wetlands on September 10, 2010. Representatives from the BIA and Bureau of Land Management were present during these site visits. No protected species were observed during the survey. SWCA also conducted an aerial survey for the presence of raptor nests near this well pad on March 17, 2011. No raptor nests were identified within 0.5 miles of this well pad (SWCA 2011²).

6. Applicable National Environmental Policy Act (NEPA) Document(s)

Environmental Assessment: *EOG Resources, Inc. Clarks Creek EA for Eleven Development Oil Wells (January 2011)*.

7. NEPA Adequacy Criteria

This document has identified the above-mentioned previously prepared NEPA document, which adequately describes the environmental consequences of the newly proposed action described herein, and meets the following NEPA Adequacy Criteria.

1. The proposed action is substantially the same action and at the site specifically analyzed in the existing NEPA document.
2. The range of alternatives is reasonable with respect to the current proposed action in the existing NEPA document, which appropriately considers and analyzes current environmental concerns, interests, and resource values.
3. The existing analysis and conclusions are adequate in the existing NEPA document. The analysis is still valid in light of new studies or resource assessment information.
4. The methodology and analytical approach used in the existing NEPA document continues to be appropriate for the proposed action.
5. The direct and indirect impacts of the proposed action are unchanged from those identified in the existing NEPA document.
6. The cumulative impacts that would result from implementation of the proposed action are unchanged from those analyzed in the existing NEPA document.
7. A 30-day comment period involving public input and interagency review was used in the development of the existing NEPA document.
