Streater BIA Osage Negotiated Rulemaking Comments 3-12-2013.PDF

**STATE OF OKLAHOMA
WATER RESOURCES BOARD**

www.owrb.ok.gov

March 12, 2013
VIA FIRST CLASS MAIL AND EMAIL

Mr. Eddie Streater
Acting Deputy Regional Director - Trust Services
Eastern Oklahoma Region, Bureau of Indian Affairs
3100 W. Peak Blvd.
Muskogee, Oklahoma 74401

RE: Osage Negotiated Rulemaking

Dear Mr. Streater:

It has recently come to my attention that the Bureau of Indian Affairs ("BIA") is engaged in negotiated rulemaking involving the Osage Nation mineral estate. Some of the 25 C.F.R. § 226.24 language regarding use of water by mineral lessees in Osage County is quite alarming as outlined herewith.

1. Background

The Oklahoma Water Resources Board ("OWRB") is the agency of the State of Oklahoma (the "State") that administers and regulates rights to the use of stream water and groundwater in Oklahoma pursuant to the laws of the State, including generally Title 60 Oklahoma Statutes (O.S.) Section 60 and particularly Title 82 O.S. §§105.1 *et seq.* (regarding stream water) and §§1020.1 *et seq.* (regarding groundwater). Among other things, these laws provide that use of stream water or groundwater for non-domestic purposes (including use in oil and gas exploration, production and other operations) must be done pursuant to a water right or permit issued by the OWRB.

Title 25 C.F.R. § 226.24 does not acknowledge these requirements of Oklahoma law, and promotes the incorrect interpretation that a mineral lessee need only obtain the approval of the BIA Superintendent of the Osage Agency in order to take and use water from a stream or reservoir in Osage County. This could result in shortages of stream water for those who are properly permitted under Oklahoma law (see discussion below). Moreover, we are concerned that now or in the future there could be substantial usage of

groundwater in Osage County by mineral lessees without permits from the OWRB. The negotiated rulemaking is an opportunity to correct these problems by amending the language of 25 C.F.R. § 226.24 to make it clear that the requirements of Oklahoma law for stream water and groundwater permits apply in Osage County.

2. Stream Water

Currently, the OWRB administers forty-three (43) rights to use stream water from diversion points in Osage County. These current rights and permits of record are summarized in Exhibit 1.

Applications for permits to use stream water in Osage County are processed and treated by OWRB staff the same as applications for stream water elsewhere in Oklahoma. Generally, whenever a stream water permit application is received, OWRB staff evaluates whether it satisfies the elements prescribed in the law, including whether there is water available for appropriation in the amount applied for, and whether the proposed use will interfere with existing permitted uses. There is no consideration for any diversions by mineral lessees who do not have a permit from the OWRB. If diversions by mineral lessees on the stream in question are occurring, this could result in shortages for those that use water for domestic purposes, as well as those who have permits properly issued by the OWRB. Similarly, mineral lessees utilizing stream water without an OWRB permit would not be protected against interference by upstream diversions, thus subjecting oil and gas operators to significant risk.

3. Groundwater

Currently, the OWRB administers fifty-eight (58) rights to use groundwater from wells located in Osage County (see Exhibit 2). The use of groundwater in Osage County by mineral lessees without proper permits from the OWRB would be unlawful and could result in the depletion of groundwater resources that should be available for permitted users.

4. Conclusion

The serious legal and practical problems discussed above could be addressed simply by amending the language of 25 C.F.R. § 226.24 as follows:

§ 226.24 Lessee's use of water.

Lessees or his contractor's use of water shall be in accordance with the laws of the State of Oklahoma. may, with the approval of the Superintendent, use water from streams and natural water courses to the extent that same does not diminish the supply below the requirements of the surface owner from

Mr. Eddie Streater
Eastern Oklahoma Region – Bureau of Indian Affairs

~~whose land the water is taken. Similarly, Lessee or his contractor may use water from reservoirs formed by the impoundment of water from such streams and natural water courses, provided such use does not exceed the quantity to which they originally would have been entitled had the reservoirs not been constructed. Lessee or his contractor may install necessary lines and other equipment within the Osage Mineral Estate to obtain such water. Any damage resulting from such installation shall be settled as provided in § 226.21.~~

I appreciate your prompt and serious attention to the aforementioned concerns and welcome the opportunity to work with you as the rulemaking proceeds. If I can provide additional information or assistance, please do not hesitate to contact me.

Sincerely,

J. D. Strong
Executive Director
