BIA Midwest Region Climate Change Adaptation Action Plan (CAP)

- CAP lays out activities that BIA will carry out in the Midwest Region so as to make consideration of climate change adaptation a routine part of our work.
- Plan was originally approved in 2014. Revision is necessary now that we know how we're being evaluated.
- Focus is on BIA, but Tribal input is desired since our work is inextricably linked to Tribes.

BIA Midwest Region Climate Change Public Internet Site

- Website will link to main BIA public internet site and BIA climate change public internet site.
- We need input on what content the site should have and what else it should link to.
