

WHITE HOUSE COUNCIL ON NATIVE AMERICAN AFFAIRS TRIBAL AND INDIGENOUS CLIMATE SERIES

Topic :

Working Together to Implement Tribal Climate Adaptation Plans.

SPEAKER

Dr. Seth Moore

Director of Biology and Environment at
the Grand Portage Band of Chippewa

SPEAKER

Joe Hostler

Environmental Protection Specialist
with the Yurok Tribe

The White House Council on Native American Affairs Climate Adaptation Subcommittee and the Environmental Protection Agency invite you to join tribal environmental professionals for a discussion on priorities in tribal climate adaptation plans and how the federal government can effectively partner with Tribes to implement these plans. This event will be led by a panel of tribal representatives sharing their experience on climate change adaptation efforts, planning, and collaboration.

This is the fifth webinar in the 2023 Tribal and Indigenous Climate Speaker Series hosted by the White House Council of Native American Affairs Climate Adaptation Subcommittee. This monthly series is designed to educate federal agency personnel about consulting and coordinating with Indian Tribes, Native Hawaiians, and other Indigenous Peoples in our combined effort to combat the climate crises. Each webinar will feature Indigenous speakers and/or federal agencies to share knowledge and experience beneficial to federal employees working on climate adaptation priorities.

-  June 6, 2023
-  02:00 PM - 03:00 PM EDT
-  Zoom
-  Session contact: Berrios.Lisa @epa.gov
