Then we'll move through some overview and information on the consultation topics, introduce our panelists today from leadership from Department of Interior Bureau of Indian affairs, and then give you some background information on the Executive Order 14210, Executive Order 14156 and Secretary Order 3429. We will then move into a leader-to-leader consultation on both of those topics simultaneously. And I'll talk more about the comment period, but we really are prioritizing a leader-to-leader consultation. If and when we have time, we have some folks that signed up for non-leader comment, and we will open that space at that time. We will build in a break if we can, find times that makes sense as we go through our day together, and then we will wrap up. I believe the building is requiring us to be out of here by 4:30, so we'll time our day accordingly. So then before we continue, I'd like to invite Chairman Seki and the spiritual advisor for the Red Lake Band of the Chippewa Indian Tribe, Fred Desjarlait, to do

So this is the team that's been leading the more aggressive use of the Buy Indian Act over the last several years. We went from about 25 percent of our funds going to Indian economic enterprises to the last few years, 75 percent. And we also increased overall obligations through acquisitions from about 300 million to over 600 million. So through aggressive use of Buy Indian Act, that's hundreds of millions going more to tribal	1 2 3 4 5 6 7 8 9 10 11	individual Indians across the country for 55 million acres of surface and 57 million acres of subsurface rights. But we also have the 105L leases, which tend to get to the areas where there aren't a lot of facilities. So that's the team that does that. So let's see. Then we have Office of Human Capital, which does the classic HR. They deliver actual HR services to AS-IA, BIA, and then they provide policy oversight and coordination with BIE, who operates its own team and BTFA. And then last, we have our Office of Information Technology, which is kind of your this is more the classic enterprise services for IT. They do a bit more operational work in that they've been building out the learning management system and IT upgrades at BIE schools. So and that's it. And these are Bryan alluded earlier to the Secretary order to consolidate business functions at the department level. They've already done that with all the other bureaus for finance, IT, HR, grant making, that kind of stuff. They haven't done that with Indian Affairs yet.	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	And then finally, the Office of Field Operations, which is the deputy bureau component that oversees the 12 regions. 21 22 23 24 25	So that but most of DAS-M would be folded into that consolidation, if that happens, if they're included in the departmental consolidation. MR. MERCIER: Great. Thank you, Jason. So next I'll touch on the BIA. Since you all are	21 22 23 24 25	within our schools for approximately 40,000 students. And the remaining, the gap that makes up over 400,000 is the other funding that flows through the department BIE. In the Bureau of Indian Education, we have 183 schools across 23 states and 64 reservations. One hundred

Do we keep it tribal so we try to build it ourselves? So we decided to go tribal, and it took a long time and a long process to get open, and we finally opened it just recently, our first year. And we're having a lot more college graduates from our tribe. Michigan State, Michigan, Central Michigan, mid-Michigan, local colleges around the area. So that, that's great that that's happening, that we need to educate our people and provide better services to them in schools. With law enforcement, we have cross deputization with all of our local agencies which is, we have five agencies in Mount Pleasant, State Police, CMU Police, that's college, city police, county police and tribal police. We all work together as a great team, you know, so we watch each other's backs all the time. So I'm just</pre>

13	is in agreement with you. We're all for that. To minimize	13	million acres. We still have a million acres today, but we
14	the potential impact on the quality of services of tribes,	14	gave up 11 million acres. My great, great, great
15	yes, we agree with that as well, but our biggest concern is	15	grandfather, Maidway Ganonan, he signed the treaty for our
16	that anytime new government policies have come about,	16	tribe with the U.S. government. He signed that treaty with
17	historically, it's been tragic results. And you only have	17	Abraham Lincoln. And Abraham Lincoln gave our family and

I'm short. (Native language). Good afternoon. I have the honor to serve as the Chairwoman for Ponca Nation. The Ponca Tribe of Nebraska is a federally recognized tribe that was restored through an Act of Congress in 1990 after being unjustly terminated in the 1960s. We are perhaps best known for the landmark 1879 trial of Chief Standing Bear in which Standing Bear argued for the recognition of Native Americans as persons under U.S. law. Today we serve more than 5,700 enrolled members across a 15-county service area in Nebraska, Iowa and South Dakota. While we do not have a reservation, we operate a wide range of government services, including full-service health clinics, transportation services, food distribution, housing, elder care, cultural programming, and much more. From our offices and clinics in Omaha, Lincoln, Norfolk, Niobrara and Sioux City. We go to great lengths to ensure our citizens can access these services regularly, regardless of geography. This means we interact with a broad array of federal programs across multiple agencies. The current system, fragmented, inconsistent, and administratively burdensome,

I have another one written here, but it's too small. And this is something that comes from our interactions with the state government here in Minnesota. Something that the Department should be pushing for is	1 2 3 4 5 6 7	wanted to know which treaty site was that. What took place there? And it's a historical society is what that building is. And the treat that Dakota ceded 24 million acres. And so that was significant. I cruised by there. I was like, wow, that's what took place right there. And
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	<pre>having tribal and federal relations training. A lot of times, we have to educate these legislators. We have to educate these people about who we are. And yet, they're on our land. We need more efforts for them to learn about the tribes that gave up, made those sacrifices. That would be really something, if we had consultations that were going to educate those people in those seats that make policies, that make laws that affect us every day, affect our people. We call on the Department of the Interior and the U.S. government to remember the commitments made to our ancestors and to work in true partnership with us, one that centers on tribal sovereignty, upholds treaty obligations, and protects the land and water for the next seven generations. And we have the Dakota 38+2. And those two were Winnebegos. And so we acknowledge what took place there. And I'm just mentioning this history because this is the kind of devastation that we stand on. This is the sacred ground that we come from. And these are the hardships that we bring here today to visit with you guys. And it's also where we draw our strength. And when we acknowledge that our ancestors recognize that we had a place on this creation, and our place was to remind all the relatives to take care of Mother Earth. And so the things that our tribes are experiencing and this consultation exercise we're going through and what may come of this is what I'm going to call a modern-day massacre. Because the devastation that's going to come from some of these changes are going to be

And when I drove through Mankato and I drove through that treaty site, there was devastation that took place, too. And so I just want to remind you guys that be thinking of the collateral damage that will happen from these decisions that are made in Washington, D.C. on our behalf. And so it's really important that we be visible and we be diligent and that we come to these meetings. And this gentleman drove all the way from Montana I don't know where he went and that's what we got to do. And I hope some of my leaders are going to go to the one in Bismarck. And I encourage everyone just to go more than one. Just listen, learn from one another. I feel encouraged by what I heard this morning. So just wanted to open up by saying that, because when I come to some of these gatherings, there's always a spirit. And the spirit that was brought by those songs and by that prayer is strong today. And the relatives and the land that was ceded and the land that we're standing on, that we acknowledge, is going to bring us power. But with all that acknowledgement, I also want to mention that it was encouraging in the past few years to see the Indian Affairs come out with reports on MMIR, come out with reports on the boarding school era, and to have

You know where the disparities are, and we need to shake the those savings down and make sure some of that come to Indian country. And expanding self-governance is also another way that I think that we could deal with some of these cuts, because I do believe that the funding's there. And I would like to see statutory changes to retain federal functions. And there are certain things that the feds say, oh, only we do that. Like, well, you know what, we're sophisticated. We're armed with the knowledge and experience to carry out these functions. And so I just don't believe that some of these retained federal functions are really being the best use of those resources. And so if there are ways that we could talk about reclassifying those, or if these are statutory changes, the Winnebago Tribe stands ready to take

The tribe is also concerned about the implementation of the Voluntary Early Retirement Authority and the Deferred Resignation Program. We're already operating in we're with skeleton crews, and to see some of these hit our agency. We're also in contact with our superintendent because we want to have an understanding of what was already vacant, who was riffed and how does that impact our current operation. And so wanting to really dial down on what does this mean for the Winnebago people, what does this mean for the Winnebago agency is something that I don't think has been shared, or maybe the superintendents haven't been encouraged to have those type of situations. But that's what we really want to know. We want to know what services are going away, who's getting consolidated. And I was really happy to hear you say, Mr. Mercier, that there would not be the elimination of some of these agencies, because I was already going to ask my colleagues from the Nebraska Tribal Nations to stand	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	about is that when the federal government passes resources onto the state, those do not make it to Indian country, and grants are just a poor undertaking and fulfillment of the trust responsibility. And so even that, if we're going to change I really like the comment made earlier about all these billions of dollars saved. Well, you know where the unmet need is. You know where the disparities are, and we need to shake the those savings down and make sure some of that come to Indian country. And so education is important. But the 37 treaty, as it was taught to me by my dad, was one of the treaties they called the perfect treaties because it put in language that reserved the right to hunt, fish and gather. It also reserved and recognized the boundary lines that are still in place today. But the thing that he spoke the most was is it's one of the few treaties that acknowledged the negotiating strength of the headmen and the people that traveled. And so we traveled a lot of time here, and we're late in the day. But the St. Peter's is where they signed</pre>

And so if you want to extract what's from the ground, you're going to deal with those manoomin that are down there, because they are not going to vote on party lines. They're not going to wait for a budget year. And
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	So if you talk about budget cuts and deficits, you know, we already paid our share. We sacrificed trillions of dollars, and we were given hundreds of dollars in order to waive any more claim against the federal government because Elaine Cobell asked for a reckoning, which is what a trustee, the trust, trust corpus, the trustor, all of that, that responsibility for accounting for that money that was supposed to be collected on our behalves, that was supposed to be providing for our services. So we don't live free. This is not on the government dole. We're not just, you know, poor, broke Indians looking for a handout. These were obligations that were shattered and taken away. And so when you come in here, and I say this because I saw you guys kind of react a little bit more and and Mr. Davis, we met once, but it was a long time ago. I get your response. And if you're going to get that worked up over one person, you got a long couple years ahead of you. But I'm just going to say that the sacrifice of our elders needs to be remembered, because when we speak for this, when we do our protocol, we do this because we want to acknowledge our spirits that are here. Right?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	emergency, whether it's real or imagined, depends on what news station you're listening to at the time, we're the ones that are kind of misplaced or misunderstood, disregarded. But next time when someone goes spearing, there's going to be some people that are going to be there to help, you know, protect our treaty harvesters. Next time someone goes hunting, they're going to be paying attention to their surroundings. They're going to be aware. Next time we go ricing and there's a you want to talk about rumors? There's a rumor that we're going to lose the wild rice in our lifetime. And that happens, there's going to be some serious consequences. I know this Administration's dedicated itself to this idea of mineral extraction. Well, I'm going to tell you, the one thing that's going to be sad and you guys will understand this, but your counterparts are not going to understand, that there's teachings that go with what's going on. And so if you want to extract what's from the ground, you're going to deal with those manoomin that are down there, because they are not going to vote on party lines. They're not going to wait for a budget year. And if you take something and it breaks something that they

Chairman Boyd talked about Red Cliff being one of the more challenged in terms of the financials. So my nieces and my nephews LCO and Red Cliff. And so when we had to tell them, well, you got Redcliffe and you got LCO, be good-looking or you got a good tan. And so they picked the good-looking side. and, knowing Red Cliff, just they know where they come from. But we're the only group that has to make that kind of decision. And so to have that forced on us and have that idea of federal recognition held over our heads as a way of compliance, that's something that also needs to be discussed but won't be fixed today. With that, I apologize for talking as long as I have. And I know there's other elected leaders that should be speaking before me. Just want to prove to my Council that I made it down here and that I did my best with the talking points I had. And Miigwech and I hope everyone has a safe travel. (Native language). MR. In that capacity as the original caretakers of this land, Minnesota, for thousands of years, where our origin stories are, I welcome you here. Again, I'm Robert Larson, President here at Lower Sioux, and I'll share our vision statement. The vision statement of Cansa'yapi is a healthy, safe and happy community, grounded and guided by Dakota culture, traditions and language, where every person contributes to a diversified social and economic life. The people grow, adapt and innovate together through opportunities that span the generations and seek continuous success. Again, I appreciate this opportunity and the accommodation. And I got to say, I appreciate the words that I've heard today. Passionate and heartfelt. Appreciate my relatives. Cansa'yapi does intend to follow up with written comments as well. 14	you know, just like you. And I make no bones about this	14	MR. DEARMAN: I want to start off by thanking all
15	when I've said this to many, every tribe I meet. I want	15	the tribal leaders and stakeholders. You're going to hear
16	what you want. I do. How do we get there together? You	16	me say this over and over. You've heard me say it a lot.
17	know, help me navigate through all this stuff as our team	17	And our team, our strength comes from our tribal leaders
18	here, here helps me navigate through all the D.C.	18	and our stakeholders. And I want to thank our team from
19	regulations, the CFRs, and to get to this place of where	19	BIE online and here personally, because we're very proud of
20	it's good for our people.	20	our team, because we really take to heart what our tribal

22	help me as well. All these notes that we compile, you	22	The one thing that I got from today, that really
23	know, they're just not notes for notes. I read them and	23	makes me proud of doing what we do every day is we're not
24	check off to-do lists all the time. So that's always this	24	going anywhere. We're still here. And the strength that
25	ongoing consultation that I have in my for me	25	we heard and the words from today is incredible. And that
